#	ARTICLE	IF	CITATIONS
1	Feasibility and effectiveness of a multidimensional post-discharge disease management programme for heart failure patients in clinical practice: the HerzMobil Tirol programme. <i>Clinical Research in Cardiology</i> , 2022, 111, 294-307.	1.5	3
2	Challenges using electronic nursing routine data for outcome analyses: A mixed methods study. <i>International Journal of Nursing Sciences</i> , 2022, 9, 92-99.	0.5	3
3	Agile, Easily Applicable, and Useful eHealth Usability Evaluations: Systematic Review and Expert-Validation. <i>Applied Clinical Informatics</i> , 2022, 13, 67-79.	0.8	6
4	Suitability of the Unified Theory of Acceptance and Use of Technology 2 Model for Predicting mHealth Acceptance Using Diabetes as an Example: Qualitative Methods Triangulation Study. <i>JMIR Human Factors</i> , 2022, 9, e34918.	1.0	7
5	Adult patient access to electronic health records. <i>The Cochrane Library</i> , 2021, 2021, CD012707.	1.5	26
6	Improvement and Evaluation of the TOPCOP Taxonomy of Patient Portals: Taxonomy-Evaluation-Delphi (TED) Approach. <i>Journal of Medical Internet Research</i> , 2021, 23, e30701.	2.1	4
7	Development and Validation of a Useful Taxonomy of Patient Portals Based on Characteristics of Patient Engagement. <i>Methods of Information in Medicine</i> , 2021, 60, e44-e55.	0.7	3
8	International Comparison of Six Basic eHealth Indicators Across 14 Countries: An eHealth Benchmarking Study. <i>Methods of Information in Medicine</i> , 2020, 59, e46-e63.	0.7	19
9	Teaching Approaches and Educational Technologies in Teaching Mathematics in Higher Education. <i>Education Sciences</i> , 2020, 10, 354.	1.4	5
10	Applying and Extending the FITT Framework to Identify the Challenges and Opportunities of Successful eHealth Services for Patient Self-Management: Qualitative Interview Study. <i>Journal of Medical Internet Research</i> , 2020, 22, e17696.	2.1	29
11	Use of Natural Language Processing for Precise Retrieval of Key Elements of Health IT Evaluation Studies. <i>Studies in Health Technology and Informatics</i> , 2020, 272, 95-98.	0.2	3
12	IT-Assisted Process Management in Healthcare. <i>Studies in Health Technology and Informatics</i> , 2020, 274, 206-216.	0.2	2
13	Implementing National Electronic Health Records in Nursing Homes in Tyrol: A Nursing Management Perspective. <i>Studies in Health Technology and Informatics</i> , 2020, 271, 240-247.	0.2	2
14	Automated Mapping of LEP Nursing Data to Nursing Minimum Data Sets. <i>Studies in Health Technology and Informatics</i> , 2020, 270, 38-42.	0.2	1
15	Towards Precise Descriptions of Medical Free/Libre and Open Source Software. <i>Studies in Health Technology and Informatics</i> , 2020, 270, 463-468.	0.2	2
16	Availability of Standardized Electronic Patient Data in Nursing: A Nationwide Survey of Austrian Acute Care Hospitals. <i>Studies in Health Technology and Informatics</i> , 2020, 272, 233-236.	0.2	2
17	Multidisciplinary Approach for Education in Healthcare Management: Case Study from Montenegro. <i>Studies in Health Technology and Informatics</i> , 2020, 272, 330-333.	0.2	0
18	Competencies for nursing in a digital world. Methodology, results, and use of the DACH-recommendations for nursing informatics core competency areas in Austria, Germany, and Switzerland. <i>Informatics for Health and Social Care</i> , 2019, 44, 351-375.	1.4	25

#	ARTICLE	IF	CITATIONS
19	Artificial Intelligence in Clinical Decision Support: Challenges for Evaluating AI and Practical Implications. Yearbook of Medical Informatics, 2019, 28, 128-134.	0.8	132
20	Early thrombosis prophylaxis with enoxaparin is not associated with hematoma expansion in patients with spontaneous intracerebral hemorrhage. European Journal of Neurology, 2019, 26, 333-341.	1.7	16
21	Technology Acceptance Models in Health Informatics: TAM and UTAUT. Studies in Health Technology and Informatics, 2019, 263, 64-71.	0.2	93
22	Same Goals, Yet Different Outcomes: Analysing the Current State of eHealth Adoption and Policies in Austria, Germany, and Switzerland Using a Mixed Methods Approach. Studies in Health Technology and Informatics, 2019, 264, 1012-1016.	0.2	7
23	Effects of Adult Patient Portals on Patient Empowerment and Health-Related Outcomes: A Systematic Review. Studies in Health Technology and Informatics, 2019, 264, 1106-1110.	0.2	16
24	Impact of Students' Presence and Course Participation on Learning Outcome in Co-Operative Online-based Courses. Studies in Health Technology and Informatics, 2019, 262, 87-90.	0.2	1
25	Towards a Systematic Construction of a Minimum Data Set for Delirium to Support Secondary Use of Clinical Routine Data. Studies in Health Technology and Informatics, 2019, 264, 1026-1030.	0.2	0
26	Developing a Model for Using Clinical Routine Data to Analyze Nursing Sensitive Patient Outcome Indicators. Studies in Health Technology and Informatics, 2019, 264, 1863-1864.	0.2	0
27	A Framework for Enhancing and Updating Study Programs in Public Health and Medical Informatics Fields in Montenegro. Studies in Health Technology and Informatics, 2019, 264, 1964-1965.	0.2	0
28	The Safe and Effective Use of Shared Data Underpinned by Stakeholder Engagement and Evaluation Practice. Yearbook of Medical Informatics, 2018, 27, 025-028.	0.8	6
29	A Brief Survey on Six Basic and Reduced eHealth Indicators in Seven Countries in 2017. Applied Clinical Informatics, 2018, 09, 704-713.	0.8	16
30	Does health informatics have a replication crisis?. Journal of the American Medical Informatics Association: JAMIA, 2018, 25, 963-968.	2.2	80
31	Evidence-based usability design principles for medication alerting systems. BMC Medical Informatics and Decision Making, 2018, 18, 69.	1.5	35
32	HerzMobil, an Integrated and Collaborative Telemonitoring-Based Disease Management Program for Patients With Heart Failure: A Feasibility Study Paving the Way to Routine Care. JMIR Cardio, 2018, 2, e11.	0.7	21
33	Innovative Power of Health Care Organisations Affects IT Adoption: A bi-National Health IT Benchmark Comparing Austria and Germany. Journal of Medical Systems, 2017, 41, 33.	2.2	14
34	On Teaching International Courses on Health Information Systems. Methods of Information in Medicine, 2017, 56, e39-e48.	0.7	4
35	Monitoring of Students' Interaction in Online Learning Settings by Structural Network Analysis and Indicators. Studies in Health Technology and Informatics, 2017, 235, 293-297.	0.2	4
36	SPIRIT: Systematic Planning of Intelligent Reuse of Integrated Clinical Routine Data. Methods of Information in Medicine, 2016, 55, 114-124.	0.7	16

#	ARTICLE	IF	CITATIONS
37	Steps in Moving Evidence-Based Health Informatics from Theory to Practice. Healthcare Informatics Research, 2016, 22, 255.	1.0	10
38	The national e-medication approaches in Germany, Switzerland and Austria: A structured comparison. International Journal of Medical Informatics, 2016, 93, 14-25.	1.6	19
39	Towards semantically enabled development of service-oriented architectures for integration of socio-medical data. , 2016, , .		2
40	The Need for Evidence in Health Informatics. Studies in Health Technology and Informatics, 2016, 222, 3-13.	0.2	7
41	Forward Outlook: The Need for Evidence and for Action in Health Informatics. Studies in Health Technology and Informatics, 2016, 222, 355-63.	0.2	2
42	Implementation of the Austrian Nursing Minimum Data Set (NMDS-AT): A Feasibility Study. BMC Medical Informatics and Decision Making, 2015, 15, 75.	1.5	10
43	Evidence-based Health Informatics: How Do We Know What We Know?. Methods of Information in Medicine, 2015, 54, 298-307.	0.7	38
44	Evaluation of an Integrated Telemonitoring Surveillance System in Patients with Coronary Heart Disease. Methods of Information in Medicine, 2015, 54, 388-397.	0.7	32
45	Patient Portals as a Means of Information and Communication Technology Support to Patient-Centric Care Coordination â€” the Missing Evidence and the Challenges of Evaluation. Yearbook of Medical Informatics, 2015, 24, 148-159.	0.8	54
46	Memorandum â€œOpen Metadataâ€. Methods of Information in Medicine, 2015, 54, 376-378.	0.7	18
47	A Nursing Intelligence System to Support Secondary Use of Nursing Routine Data. Applied Clinical Informatics, 2015, 06, 418-428.	0.8	11
48	Job Profiles of Biomedical Informatics Graduates. Methods of Information in Medicine, 2015, 54, 372-375.	0.7	5
49	Usability flaws of medication-related alerting functions: A systematic qualitative review. Journal of Biomedical Informatics, 2015, 55, 260-271.	2.5	41
50	Modeling and Automated Examination of Communication Processes in Integrated Health Information Systems. , 2015, , 466-483.		0
51	Development of the Austrian Nursing Minimum Data Set (NMDS-AT): the third Delphi Round, a quantitative online survey. Studies in Health Technology and Informatics, 2015, 212, 73-80.	0.2	5
52	Memorandum on the Use of Information Technology to Improve Medication Safety. Methods of Information in Medicine, 2014, 53, 336-343.	0.7	18
53	A Proposal for an Austrian Nursing Minimum Data Set (NMDS). Applied Clinical Informatics, 2014, 05, 538-547.	0.8	10
54	Crucial Factors for the Acceptance of a Computerized National Medication List. Applied Clinical Informatics, 2014, 05, 527-537.	0.8	20

#	ARTICLE	IF	CITATIONS
55	HerzMobil Tirol network: rationale for and design of a collaborative heart failure disease management program in Austria. Wiener Klinische Wochenschrift, 2014, 126, 734-741.	1.0	19
56	A nationwide computerized patient medication history: Evaluation of the Austrian pilot project "e-Medikation". International Journal of Medical Informatics, 2014, 83, 655-669.	1.6	28
57	Reflections on "Health Care in the Information Society - a Prognosis for the Year 2013". Journal of Medical Systems, 2014, 38, 72.	2.2	1
58	Assessing the Prognoses on Health Care in the Information Society 2013 - Thirteen Years After. Journal of Medical Systems, 2014, 38, 73.	2.2	9
59	Past and Next 10 Years of Medical Informatics. Journal of Medical Systems, 2014, 38, 74.	2.2	13
60	From Adverse Drug Event Detection to Prevention. Methods of Information in Medicine, 2014, 53, 482-492.	0.7	12
61	Successful health-IT--just the use of information and communication technology (ICT) in healthcare?. Studies in Health Technology and Informatics, 2014, 198, v-vi.	0.2	0
62	The EHR-ARCHE project: Satisfying clinical information needs in a Shared Electronic Health Record System based on IHE XDS and Archetypes. International Journal of Medical Informatics, 2013, 82, 1195-1207.	1.6	35
63	On the alert: future priorities for alerts in clinical decision support for computerized physician order entry identified from a European workshop. BMC Medical Informatics and Decision Making, 2013, 13, 111.	1.5	81
64	Clinical decision support systems: Need for evidence, need for evaluation. Artificial Intelligence in Medicine, 2013, 59, 1-3.	3.8	16
65	Medication safety through e-health technology: can we close the gaps?. British Journal of Clinical Pharmacology, 2013, 76, i-iv.	1.1	2
66	Clinical evaluation of the <sc>ADE</sc> scorecards as a decision support tool for adverse drug event analysis and medication safety management. British Journal of Clinical Pharmacology, 2013, 76, 78-90.	1.1	6
67	STARE-HI "Statement on Reporting of Evaluation Studies in Health Informatics. Applied Clinical Informatics, 2013, 04, 331-358.	0.8	52
68	Attitude of Physicians Towards Automatic Alerting in Computerized Physician Order Entry Systems. Methods of Information in Medicine, 2013, 52, 99-108.	0.7	40
69	Modeling and Automated Examination of Communication Processes in Integrated Health Information Systems. International Journal of Knowledge-Based Organizations, 2013, 3, 19-36.	0.3	4
70	The Austrian e-Medikation pilot evaluation: lessons learned from a national medication list. Studies in Health Technology and Informatics, 2013, 192, 347-51.	0.2	5
71	Seeking evidence to support usability principles for medication-related clinical decision support (CDS) functions. Studies in Health Technology and Informatics, 2013, 192, 427-31.	0.2	5
72	Simulation Studies for the Evaluation of Health Information Technologies: Experiences and Results. Health Information Management Journal, 2012, 41, 14-21.	0.9	24

#	ARTICLE	IF	CITATIONS
73	Physicians' Perceptions on the usefulness of contextual information for prioritizing and presenting alerts in computerized physician order entry systems. BMC Medical Informatics and Decision Making, 2012, 12, 111.	1.5	22
74	Systematic Prioritization of the STARE-HI Reporting Items. Methods of Information in Medicine, 2012, 51, 104-111.	0.7	12
75	The Impact of Electronic Patient Portals on Patient Care: A Systematic Review of Controlled Trials. Journal of Medical Internet Research, 2012, 14, e162.	2.1	315
76	eHealth in Europe - Status and Challenges. European Journal for Biomedical Informatics, 2012, 08, .	0.5	9
77	An EHR prototype using structured ISO/EN 13606 documents to respond to identified clinical information needs of diabetes specialists: a controlled study on feasibility and impact. AMIA ... Annual Symposium proceedings, 2012, 2012, 380-9.	0.2	2
78	eHealth indicators: results of an expert workshop. Studies in Health Technology and Informatics, 2012, 180, 328-32.	0.2	2
79	Exploring a methodology for eHealth indicator development. Studies in Health Technology and Informatics, 2012, 180, 338-42.	0.2	2
80	Quality of Electronic Health Records - Coverage of Potential Information Weaknesses by Major EHR Quality Seals. Journal of Healthcare Engineering, 2011, 2, 365-388.	1.1	2
81	Biomedical Informatics – A Confluence of Disciplines?. Methods of Information in Medicine, 2011, 50, 508-524.	0.7	16
82	“Why the Hell Do We Need Electronic Health Records?” Methods of Information in Medicine, 2011, 50, 53-61.	0.7	46
83	Effect of a nursing information system on the quality of information processing in nursing: An evaluation study using the HIS-monitor instrument. International Journal of Medical Informatics, 2011, 80, 25-38.	1.6	70
84	Guideline for good evaluation practice in health informatics (GEP-HI). International Journal of Medical Informatics, 2011, 80, 815-827.	1.6	82
85	Development of a context model to prioritize drug safety alerts in CPOE systems. BMC Medical Informatics and Decision Making, 2011, 11, 35.	1.5	60
86	The status of IT service management in health care - ITIL® in selected European countries. BMC Medical Informatics and Decision Making, 2011, 11, 76.	1.5	19
87	Measurement and quantification of generalized tonic-clonic seizures in epilepsy patients by means of accelerometry – An explorative study. Epilepsy Research, 2011, 95, 173-183.	0.8	42
88	Health Information Systems. Computers in Health Care, 2011, , .	0.2	45
89	How to improve the delivery of medication alerts within computerized physician order entry systems: an international Delphi study. Journal of the American Medical Informatics Association: JAMIA, 2011, 18, 760-766.	2.2	34
90	Creating ISO/EN 13606 archetypes based on clinical information needs. Studies in Health Technology and Informatics, 2011, 165, 43-8.	0.2	2

#	ARTICLE	IF	CITATIONS
91	Patient empowerment by electronic health records: first results of a systematic review on the benefit of patient portals. <i>Studies in Health Technology and Informatics</i> , 2011, 165, 63-7.	0.2	27
92	Impact evaluation of innovative technology: estimating the impact of the PSIP solutions. <i>Studies in Health Technology and Informatics</i> , 2011, 166, 227-33.	0.2	1
93	Validation of completeness, correctness, relevance and understandability of the PSIP CDSS for medication safety. <i>Studies in Health Technology and Informatics</i> , 2011, 166, 254-9.	0.2	2
94	Clinical situations and information needs of physicians during treatment of diabetes mellitus patients: a triangulation study. <i>Studies in Health Technology and Informatics</i> , 2011, 169, 369-73.	0.2	4
95	The Archetype-enabled EHR system ZK-ARCHE - integrating the ISO/EN 13606 standard and IHE XDS profile. <i>Studies in Health Technology and Informatics</i> , 2011, 169, 799-803.	0.2	4
96	Contextualization of automatic alerts during electronic prescription: researchers' and users' opinions on useful context factors. <i>Studies in Health Technology and Informatics</i> , 2011, 169, 920-4.	0.2	8
97	Electronic Health Records. <i>Methods of Information in Medicine</i> , 2010, 49, 320-336.	0.7	150
98	IT adoption of clinical information systems in Austrian and German hospitals: results of a comparative survey with a focus on nursing. <i>BMC Medical Informatics and Decision Making</i> , 2010, 10, 8.	1.5	34
99	Vision and challenges of Evidence-Based Health Informatics: A case study of a CPOE meta-analysis. <i>International Journal of Medical Informatics</i> , 2010, 79, e83-e88.	1.6	26
100	Attitudes and behaviors related to the introduction of electronic health records among Austrian and German citizens. <i>International Journal of Medical Informatics</i> , 2010, 79, 81-89.	1.6	84
101	Recommendations of the International Medical Informatics Association (IMIA) on Education in Biomedical and Health Informatics. <i>Methods of Information in Medicine</i> , 2010, 49, 105-120.	0.7	204
102	Health Informatics Meets eHealth. <i>Methods of Information in Medicine</i> , 2010, 49, 269-270.	0.7	8
103	Quality and Certification of Electronic Health Records. <i>Applied Clinical Informatics</i> , 2010, 01, 149-164.	0.8	10
104	Measuring the impact of the computer on the consultation: An open source application to combine multiple observational outputs. <i>Informatics for Health and Social Care</i> , 2010, 35, 10-24.	1.4	6
105	Evidence based health informatics. <i>Studies in Health Technology and Informatics</i> , 2010, 151, 427-34.	0.2	2
106	The Time Needed for Clinical Documentation versus Direct Patient Care. <i>Methods of Information in Medicine</i> , 2009, 48, 84-91.	0.7	101
107	Categorizing Communication Errors in Integrated Hospital Information Systems. <i>Methods of Information in Medicine</i> , 2009, 48, 203-210.	0.7	16
108	Key Performance Indicators to Benchmark Hospital Information Systems – A Delphi Study. <i>Methods of Information in Medicine</i> , 2009, 48, 508-518.	0.7	31
