## Marielle V Fortier

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/3972878/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Prenatal Maternal Depression Associates with Microstructure of Right Amygdala in Neonates at Birth. Biological Psychiatry, 2013, 74, 837-844.	1.3	221
2	Antenatal Maternal Anxiety Predicts Variations in Neural Structures Implicated in Anxiety Disorders in Newborns. Journal of the American Academy of Child and Adolescent Psychiatry, 2015, 54, 313-321.e2.	0.5	113
3	Structural connectivity asymmetry in the neonatal brain. NeuroImage, 2013, 75, 187-194.	4.2	102
4	Effects of Antenatal Maternal Depressive Symptoms and Socio-Economic Status on Neonatal Brain Development are Modulated by Genetic Risk. Cerebral Cortex, 2017, 27, 3080-3092.	2.9	90
5	Faster eating rates are associated with higher energy intakes during an <i>ad libitum</i> meal, higher BMI and greater adiposity among 4·5-year-old children: results from the Growing Up in Singapore Towards Healthy Outcomes (GUSTO) cohort. British Journal of Nutrition, 2017, 117, 1042-1051.	2.3	85
6	Perinatal maternal depressive symptoms alter amygdala functional connectivity in girls. Human Brain Mapping, 2018, 39, 680-690.	3.6	71
7	Brain-derived neurotrophic factor ( <i>BDNF</i> ) Val66Met polymorphism influences the association of the methylome with maternal anxiety and neonatal brain volumes. Development and Psychopathology, 2015, 27, 137-150.	2.3	68
8	FKBP5 Moderates the Association between Antenatal Maternal Depressive Symptoms and Neonatal Brain Morphology. Neuropsychopharmacology, 2018, 43, 564-570.	5.4	37
9	Adherence to a healthy eating index for pregnant women is associated with lower neonatal adiposity in a multiethnic Asian cohort: the Growing Up in Singapore Towards healthy Outcomes (GUSTO) Study. American Journal of Clinical Nutrition, 2018, 107, 71-79.	4.7	35
10	Neonatal neural networks predict children behavioral profiles later in life. Human Brain Mapping, 2017, 38, 1362-1373.	3.6	32
11	Gestational Age and Neonatal Brain Microstructure in Term Born Infants: A Birth Cohort Study. PLoS ONE, 2014, 9, e115229.	2.5	25
12	Maternal sensitivity predicts anterior hippocampal functional networks in early childhood. Brain Structure and Function, 2019, 224, 1885-1895.	2.3	24
13	Maternal care in infancy and the course of limbic development. Developmental Cognitive Neuroscience, 2019, 40, 100714.	4.0	23
14	Asynchronous Development of Cerebellar, Cerebello-Cortical, and Cortico-Cortical Functional Networks in Infancy, Childhood, and Adulthood. Cerebral Cortex, 2017, 27, 5170-5184.	2.9	22
15	Maternal plasma phosphatidylcholine polyunsaturated fatty acids during pregnancy and offspring growth and adiposity. Prostaglandins Leukotrienes and Essential Fatty Acids, 2017, 121, 21-29.	2.2	22
16	Eye size and shape in newborn children and their relation to axial length and refraction at 3Âyears. Ophthalmic and Physiological Optics, 2015, 35, 414-423.	2.0	20
17	Maternal glycemia during pregnancy and offspring abdominal adiposity measured by MRI in the neonatal period and preschool years: The Growing Up in Singapore Towards healthy Outcomes (GUSTO) prospective mother–offspring birth cohort study. American Journal of Clinical Nutrition, 2020. 112. 39-47.	4.7	18
18	Developmental synchrony of thalamocortical circuits in the neonatal brain. NeuroImage, 2015, 116, 168-176	4.2	16

MARIELLE V FORTIER

#	Article	IF	CITATIONS
19	Functional and structural networks of lateral and medial orbitofrontal cortex as potential neural pathways for depression in childhood. Depression and Anxiety, 2019, 36, 365-374.	4.1	16
20	An initial investigation of neonatal neuroanatomy, caregiving, and levels of disorganized behavior. Proceedings of the National Academy of Sciences of the United States of America, 2019, 116, 16787-16792.	7.1	15
21	Long-term Influences of Prenatal Maternal Depressive Symptoms on the Amygdala–Prefrontal Circuitry of the Offspring From Birth to Early Childhood. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2019, 4, 940-947.	1.5	14
22	Neonatal amygdalae and hippocampi are influenced by genotype and prenatal environment, and reflected in the neonatal DNA methylome. Genes, Brain and Behavior, 2019, 18, e12576.	2.2	14
23	Sex-Dependent Associations among Maternal Depressive Symptoms, Child Reward Network, and Behaviors in Early Childhood. Cerebral Cortex, 2020, 30, 901-912.	2.9	13
24	High placental inositol content associated with suppressed pro-adipogenic effects of maternal glycaemia in offspring: the GUSTO cohort. International Journal of Obesity, 2021, 45, 247-257.	3.4	13
25	Inflammatory modulation of the associations between prenatal maternal depression and neonatal brain. Neuropsychopharmacology, 2021, 46, 470-477.	5.4	13
26	Canonical TGF-Î <sup>2</sup> signaling regulates the relationship between prenatal maternal depression and amygdala development in early life. Translational Psychiatry, 2021, 11, 170.	4.8	13
27	Structure-function coupling within the reward network in preschool children predicts executive functioning in later childhood. Developmental Cognitive Neuroscience, 2022, 55, 101107.	4.0	10
28	Behavioral Heterogeneity in Relation with Brain Functional Networks in Young Children. Cerebral Cortex, 2018, 28, 3322-3331.	2.9	9
29	Cortical Development Mediates Association of Prenatal Maternal Depressive Symptoms and Child Reward Sensitivity: A Longitudinal Study. Journal of the American Academy of Child and Adolescent Psychiatry, 2022, 61, 392-401.	0.5	9
30	Automated Segmentation of Visceral, Deep Subcutaneous, and Superficial Subcutaneous Adipose Tissue Volumes in MRI of Neonates and Young Children. Radiology: Artificial Intelligence, 2021, 3, e200304.	5.8	9
31	Do intrinsic brain functional networks predict working memory from childhood to adulthood?. Human Brain Mapping, 2020, 41, 4574-4586.	3.6	8
32	Maternal Adverse Childhood Experience and Depression in Relation with Brain Network Development and Behaviors in Children: A Longitudinal Study. Cerebral Cortex, 2021, 31, 4233-4244.	2.9	8
33	Integrated structural and functional atlases of Asian children from infancy to childhood. NeuroImage, 2021, 245, 118716.	4.2	8
34	Body Composition and Acquired Functional Impairment in Survivors of Pediatric Critical Illness. Critical Care Medicine, 2019, 47, e445-e453.	0.9	7
35	Fronto-parietal numerical networks in relation with early numeracy in young children. Brain Structure and Function, 2019, 224, 263-275.	2.3	7
36	The Kynurenine Pathway Metabolites in Cord Blood Positively Correlate With Early Childhood Adiposity. Journal of Clinical Endocrinology and Metabolism, 2022, 107, e2464-e2473.	3.6	6

MARIELLE V FORTIER

#	Article	IF	CITATIONS
37	Determinants of cord blood adipokines and association with neonatal abdominal adipose tissue distribution. International Journal of Obesity, 2022, 46, 637-645.	3.4	6
38	Neural Transcription Correlates of Multimodal Cortical Phenotypes during Development. Cerebral Cortex, 2020, 30, 2740-2754.	2.9	4
39	The longitudinal association between early-life screen viewing and abdominal adiposity—findings from a multiethnic birth cohort study. International Journal of Obesity, 2021, 45, 1995-2005.	3.4	3
40	Left lateralization of neonatal caudate microstructure affects emerging language development at 24 months. European Journal of Neuroscience, 2021, 54, 4621-4637.	2.6	3
