citing authors

#	ARTICLE	IF	CITATIONS
1	Blood-Retinal Barrier. <i>European Journal of Ophthalmology</i> , 2011, 21, 3-9.	1.3	363
2	Digital Ocular Fundus Imaging: A Review. <i>Ophthalmologica</i> , 2011, 226, 161-181.	1.9	161
3	Macular alterations after small-incision cataract surgery. <i>Journal of Cataract and Refractive Surgery</i> , 2004, 30, 752-760.	1.5	123
4	Phenotypes and biomarkers of diabetic retinopathy. <i>Progress in Retinal and Eye Research</i> , 2014, 41, 90-111.	15.5	122
5	Ranibizumab Plus Panretinal Photocoagulation versus Panretinal Photocoagulation Alone for High-Risk Proliferative Diabetic Retinopathy (PROTEUS Study). <i>Ophthalmology</i> , 2018, 125, 691-700.	5.2	84
6	Randomized controlled European multicenter trial on the prevention of cystoid macular edema after cataract surgery in diabetics: ESCRS PREMED Study Report 2. <i>Journal of Cataract and Refractive Surgery</i> , 2018, 44, 836-847.	1.5	74
7	Pseudophakic Cystoid Macular Edema. <i>Ophthalmologica</i> , 2012, 227, 61-67.	1.9	72
8	Alterations of the Blood-Retinal Barrier and Retinal Thickness in Preclinical Retinopathy in Subjects With Type 2 Diabetes. <i>JAMA Ophthalmology</i> , 2000, 118, 1364.	2.4	69
9	Effects of Topically Administered Neuroprotective Drugs in Early Stages of Diabetic Retinopathy: Results of the EUROCONDOR Clinical Trial. <i>Diabetes</i> , 2019, 68, 457-463.	0.6	69
10	Late postoperative opacification of a hydrophilic/hydrophobic acrylic intraocular lens. <i>Journal of Cataract and Refractive Surgery</i> , 2016, 42, 1324-1331.	1.5	54
11	Mapping Retinal Fluorescein Leakage With Confocal Scanning Laser Fluorometry of the Human Vitreous. <i>JAMA Ophthalmology</i> , 1999, 117, 631.	2.4	51
12	Three Different Phenotypes of Mild Nonproliferative Diabetic Retinopathy With Different Risks for Development of Clinically Significant Macular Edema. , 2013, 54, 4595.		50
13	Retinal Thickness in Eyes With Mild Nonproliferative Retinopathy in Patients With Type 2 Diabetes Mellitus. <i>JAMA Ophthalmology</i> , 2002, 120, 1301.	2.4	49
14	Three-Year Follow-up Study of Blood-Retinal Barrier and Retinal Thickness Alterations in Patients With Type 2 Diabetes Mellitus and Mild Nonproliferative Diabetic Retinopathy. <i>JAMA Ophthalmology</i> , 2004, 122, 211.	2.4	48
15	Evaluation of the efficacy and safety of a standardised intracameral combination of mydriatics and anaesthetics for cataract surgery. <i>British Journal of Ophthalmology</i> , 2016, 100, 976-985.	3.9	47
16	Femtosecond laser versus mechanical microkeratomes for flap creation in laser in situ keratomileusis and effect of postoperative measurement interval on estimated femtosecond flap thickness. <i>Journal of Cataract and Refractive Surgery</i> , 2009, 35, 833-838.	1.5	43
17	Irregular Astigmatism After Corneal Transplantation – Efficacy and Safety of Topography-Guided Treatment. <i>Cornea</i> , 2016, 35, 30-36.	1.7	40
18	One-Year Follow-up of Blood-Retinal Barrier and Retinal Thickness Alterations in Patients With Type 2 Diabetes Mellitus and Mild Nonproliferative Retinopathy. <i>JAMA Ophthalmology</i> , 2001, 119, 1469.	2.4	39

#	ARTICLE	IF	CITATIONS
19	Microaneurysm turnover is a predictor of diabetic retinopathy progression. British Journal of Ophthalmology, 2019, 103, 222-226.	3.9	37
20	Multimodal Imaging of the Initial Stages of Diabetic Retinopathy: Different Disease Pathways in Different Patients. Diabetes, 2019, 68, 648-653.	0.6	34
21	Multimodal Macula Mapping. Survey of Ophthalmology, 2002, 47, 580-589.	4.0	32
22	Prevalence of Age-Related Macular Degeneration in Portugal: The Coimbra Eye Study - Report 1. Ophthalmologica, 2015, 233, 119-127.	1.9	32
23	Alterations of retinal capillary blood flow in preclinical retinopathy in subjects with type 2 diabetes. , 2003, 241, 181-186.		31
24	Comparison of visual function after bilateral implantation of inferior sector-shaped near-addition and diffractive refractive multifocal IOLs. Journal of Cataract and Refractive Surgery, 2013, 39, 1653-1659.	1.5	26
25	Characterization of Disease Progression in the Initial Stages of Retinopathy in Type 2 Diabetes: A 2-Year Longitudinal Study. , 2020, 61, 20.		26
26	Subclinical Macular Edema as a Predictor of Progression to Clinically Significant Macular Edema in Type 2 Diabetes. Ophthalmologica, 2013, 230, 201-206.	1.9	23
27	Quantitative Evaluation of Visual Function 12 Months after Bilateral Implantation of a Diffractive Trifocal IOL. European Journal of Ophthalmology, 2015, 25, 516-524.	1.3	21
28	Diabetic Macular Edema. Biological and Medical Physics Series, 2012, , 1-21.	0.4	20
29	Genetic Variants in ICAM1, PPARGC1A and MTHFR Are Potentially Associated with Different Phenotypes of Diabetic Retinopathy. Ophthalmologica, 2014, 232, 156-162.	1.9	20
30	Noninvasive Evaluation of Retinal Leakage Using Optical Coherence Tomography. Ophthalmologica, 2011, 226, 29-36.	1.9	18
31	Age-related macular degeneration in Portugal: prevalence and risk factors in a coastal and an inland town. The Coimbra Eye Study - Report 2. Acta Ophthalmologica, 2016, 94, e442-53.	1.1	18
32	Agreement between OCT Leakage and Fluorescein Angiography to Identify Sites of Alteration of the Blood-Retinal Barrier in Diabetes. Ophthalmology Retina, 2017, 1, 395-403.	2.4	18
33	Progression of retinopathy and alteration of the blood-retinal barrier in patients with type 2 diabetes: a 7-year prospective follow-up study. Graefe's Archive for Clinical and Experimental Ophthalmology, 1998, 236, 264-268.	1.9	17
34	Ocular fundus reference images from optical coherence tomography. Computerized Medical Imaging and Graphics, 2014, 38, 381-389.	5.8	17
35	Degree of Decrease in Central Retinal Thickness Predicts Visual Acuity Response to Intravitreal Ranibizumab in Diabetic Macular Edema. Ophthalmologica, 2014, 231, 16-22.	1.9	16
36	Large-scale opacification of a hydrophilic/hydrophobic intraocular lens. European Journal of Ophthalmology, 2020, 30, 307-314.	1.3	16

#	ARTICLE	IF	CITATIONS
37	Microaneurysm Turnover in Mild Non-Proliferative Diabetic Retinopathy is Associated with Progression and Development of Vision-Threatening Complications: A 5-Year Longitudinal Study. <i>Journal of Clinical Medicine</i> , 2021, 10, 2142.	2.4	14
38	Optical Coherence Tomography Angiography Metrics Monitor Severity Progression of Diabetic Retinopathy—3-Year Longitudinal Study. <i>Journal of Clinical Medicine</i> , 2021, 10, 2296.	2.4	12
39	Computer-Aided Detection of Diabetic Retinopathy Progression. , 2012, , 59-66.		10
40	New technique for iridodialysis correction: Single-knot sewing-machine suture. <i>Journal of Cataract and Refractive Surgery</i> , 2016, 42, 520-523.	1.5	10
41	Macular Thickness Measured by Stratus Optical Coherence Tomography in Patients with Diabetes Type 2 and Mild Nonproliferative Retinopathy without Clinical Evidence of Macular Edema. <i>Ophthalmologica</i> , 2013, 229, 181-186.	1.9	9
42	Ocular and Systemic Risk Markers for Development of Macular Edema and Proliferative Retinopathy in Type 2 Diabetes: A 5-Year Longitudinal Study. <i>Diabetes Care</i> , 2021, 44, e12-e14.	8.6	8
43	Retinal Neurodegeneration in Different Risk Phenotypes of Diabetic Retinal Disease. <i>Frontiers in Neuroscience</i> , 2021, 15, .	2.8	8
44	Phakic Intraocular Lens Implantation: Refractive Outcome and Safety in Patients with Anterior Chamber Depth between 2.8 and 3.0 versus $\geq 3.0$ mm. <i>Ophthalmic Research</i> , 2017, 57, 239-246.	1.9	7
45	Subclinical Macular Edema as a Predictor of Progression to Central-Involved Macular Edema in Type 2 Diabetes. <i>Ophthalmic Research</i> , 2018, 60, 18-22.	1.9	7
46	Photorefractive keratectomy for myopia and myopic astigmatism correction using the WaveLight Allegretto Wave Eye-Q excimer laser system. <i>International Ophthalmology</i> , 2014, 34, 477-484.	1.4	6
47	Characterization of Initial Stages of Diabetic Macular Edema. <i>Ophthalmic Research</i> , 2019, 62, 203-210.	1.9	6
48	Different Phenotypes of Mild Nonproliferative Diabetic Retinopathy with Different Risks for Development of Macular Edema (C-TRACER Study). <i>Ophthalmic Research</i> , 2018, 59, 59-67.	1.9	5
49	Association between Neurodegeneration and Macular Perfusion in the Progression of Diabetic Retinopathy: A 3-Year Longitudinal Study. <i>Ophthalmologica</i> , 2022, 245, 335-341.	1.9	4
50	Validation of the automatic identification of eyes with diabetic retinopathy by OCT. , 2012, , .		3
51	Characterisation of progression of macular oedema in the initial stages of diabetic retinopathy: a 3-year longitudinal study. <i>Eye</i> , 2023, 37, 313-319.	2.1	3
52	Characterization of One-Year Progression of Risk Phenotypes of Diabetic Retinopathy. <i>Ophthalmology and Therapy</i> , 2022, 11, 333-345.	2.3	3
53	Biomarkers of diabetic retinopathy. <i>Diabetes Management</i> , 2014, 4, 177-188.	0.5	2
54	Clinical Phenotypes of Diabetic Retinopathy. , 2012, , 53-68.		0
