#	ARTICLE	IF	CITATIONS
1	A fast shapelet selection algorithm for time series classification. Computer Networks, 2019, 148, 231-240.	5.1	54
2	Device Data Ingestion for Industrial Big Data Platforms with a Case Study. Sensors, 2016, 16, 279.	3.8	36
3	XG-SF: An XGBoost Classifier Based on Shapelet Features for Time Series Classification. Procedia Computer Science, 2019, 147, 24-28.	2.0	24
4	A Fast Shapelet Discovery Algorithm Based on Important Data Points. International Journal of Web Services Research, 2017, 14, 67-80.	0.8	22
5	A Shapelet Selection Algorithm for Time Series Classification: New Directions. Procedia Computer Science, 2018, 129, 461-467.	2.0	19
6	A just-in-time shapelet selection service for online time series classification. Computer Networks, 2019, 157, 89-98.	5.1	17
7	A piecewise linear representation method based on importance data points for time series data. , 2016, , .		14
8	IBDP: An Industrial Big Data Ingestion and Analysis Platform and Case Studies. , 2015, , .		12
9	ADARC: An anomaly detection algorithm based on relative outlier distance and biseries correlation. Software - Practice and Experience, 2020, 50, 2065-2081.	3.6	12
10	A novel multi-resolution representation for time series sensor data analysis. Soft Computing, 2020, 24, 10535-10560.	3.6	12
11	A novel consciousness emotion recognition method using ERP components and MMSE. Journal of Neural Engineering, 2021, 18, 046001.	3.5	12
12	Multi-layer Representation Learning and Its Application to Electronic Health Records. Neural Processing Letters, 2021, 53, 1417-1433.	3.2	9
13	Efficient Snapshot KNN Join Processing for Large Data Using MapReduce. , 2016, , .		7
14	Disease Prediction Model Based on BiLSTM and Attention Mechanism. , 2019, , .		7
15	Edge user allocation by FOA in edge computing environment. Journal of Computational Science, 2021, 53, 101390.	2.9	6
16	A Self-Evolving Method of Data Model for Cloud-Based Machine Data Ingestion. , 2016, , .		5
17	Continuous Route Planning over a Dynamic Graph in Real-Time. Procedia Computer Science, 2020, 174, 111-114.	2.0	4
18	Emotion Classification Based on Brain Functional Connectivity Network. , 2020, , .		4

#	ARTICLE	IF	CITATIONS
19	A new parallel simulation method for massive crowd. <i>Procedia Computer Science</i> , 2019, 147, 283-287.	2.0	3
20	An improved fast shapelet selection algorithm and its application to pervasive EEG. <i>Personal and Ubiquitous Computing</i> , 2022, 26, 941-953.	2.8	3
21	Identifiable Temporal Feature Selection via Horizontal Visibility Graph Towards Smart Medical Applications. <i>Interdisciplinary Sciences, Computational Life Sciences</i> , 2021, 13, 717-730.	3.6	3
22	Selecting Superior Candidates from a Suitable Set: A Selective Extraction Algorithm for Accelerating Shapelet Discovery in Time Series Data. , 2019, , .		1
23	A 2D Transform Based Distance Function for Time Series Classification. <i>Lecture Notes of the Institute for Computer Sciences, Social-Informatics and Telecommunications Engineering</i> , 2019, , 543-559.	0.3	1
24	Cooperative Anomaly Detection Model and Real-Time Update Strategy for Industrial Stream Data. <i>Communications in Computer and Information Science</i> , 2021, , 307-319.	0.5	1
25	A fast shapelet discovery algorithm with symbolic fourier approximation. , 2016, , .		1
26	Diversified Representation Approach for Time Series Using Storm. , 2018, , .		0
27	Fast Shapelet Discovery with Trend Feature Symbolization. <i>Communications in Computer and Information Science</i> , 2021, , 352-363.	0.5	0
28	A Pervasive Multi-physiological Signal-Based Emotion Classification with Shapelet Transformation and Decision Fusion. <i>Lecture Notes of the Institute for Computer Sciences, Social-Informatics and Telecommunications Engineering</i> , 2021, , 628-641.	0.3	0
29	ECG Prediction based on Bidirectional Time Series Chain Discovery Algorithm. , 2021, , .		0
