#	ARTICLE	IF	CITATIONS
1	Urban native vegetation remnants support more diverse native bee communities than residential gardens in Australia's southwest biodiversity hotspot. <i>Biological Conservation</i> , 2022, 265, 109408.	1.9	17
2	Optimising conservation translocations of threatened. <i>Australian Journal of Botany</i> , 2022, 70, 231-247.	0.3	4
3	Emerging technologies revolutionise insect ecology and monitoring. <i>Trends in Ecology and Evolution</i> , 2022, 37, 872-885.	4.2	72
4	A Guide for Using Flight Simulators to Study the Sensory Basis of Long-Distance Migration in Insects. <i>Frontiers in Behavioral Neuroscience</i> , 2021, 15, 678936.	1.0	7
5	Autumn southward migration of dragonflies along the Baltic coast and the influence of weather on flight behaviour. <i>Animal Behaviour</i> , 2021, 176, 99-109.	0.8	9
6	Hoverflies use a time-compensated sun compass to orientate during autumn migration. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2021, 288, 20211805.	1.2	12
7	A global database for metacommunity ecology, integrating species, traits, environment and space. <i>Scientific Data</i> , 2020, 7, 6.	2.4	28
8	Adaptive strategies of high-flying migratory hoverflies in response to wind currents. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2020, 287, 20200406.	1.2	29
9	Interpreting insect declines: seven challenges and a way forward. <i>Insect Conservation and Diversity</i> , 2020, 13, 103-114.	1.4	271
10	The relative performance of sampling methods for native bees: an empirical test and review of the literature. <i>Ecosphere</i> , 2020, 11, e03076.	1.0	105
11	Pollination by hoverflies in the Anthropocene. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2020, 287, 20200508.	1.2	110
12	Mass Seasonal Migrations of Hoverflies Provide Extensive Pollination and Crop Protection Services. <i>Current Biology</i> , 2019, 29, 2167-2173.e5.	1.8	109
13	Characterizing animal anatomy and internal composition for electromagnetic modelling in radar entomology. <i>Remote Sensing in Ecology and Conservation</i> , 2019, 5, 169-179.	2.2	17
14	Mechanisms and Consequences of Partial Migration in Insects. <i>Frontiers in Ecology and Evolution</i> , 2019, 7, .	1.1	41
15	Quantification of migrant hoverfly movements (Diptera: Syrphidae) on the West Coast of North America. <i>Royal Society Open Science</i> , 2019, 6, 190153.	1.1	18
16	Larval and phenological traits predict insect community response to mowing regime manipulations. <i>Ecological Applications</i> , 2019, 29, e01900.	1.8	19
17	Environmental effects on flying migrants revealed by radar. <i>Ecography</i> , 2019, 42, 942-955.	2.1	37
18	Revealing patterns of nocturnal migration using the European weather radar network. <i>Ecography</i> , 2019, 42, 876-886.	2.1	72

#	ARTICLE	IF	CITATIONS
19	Perspectives and challenges for the use of radar in biological conservation. <i>Ecography</i> , 2019, 42, 912-930.	2.1	29
20	Contrasting responses in community structure and phenology of migratory and non-migratory pollinators to urbanization. <i>Diversity and Distributions</i> , 2018, 24, 919-927.	1.9	28
21	Rush hours in flower visitors over a day-night cycle. <i>Insect Conservation and Diversity</i> , 2018, 11, 267-275.	1.4	26
22	Higher flight activity in the offspring of migrants compared to residents in a migratory insect. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2018, 285, 20172829.	1.2	24
23	Promoting diverse communities of wild bees and hoverflies requires a landscape approach to managing meadows. <i>Agriculture, Ecosystems and Environment</i> , 2017, 239, 376-384.	2.5	31
24	Consistent behavioural differences between migratory and resident hoverflies. <i>Animal Behaviour</i> , 2017, 127, 187-195.	0.8	20
25	A framework for the practical science necessary to restore sustainable, resilient, and biodiverse ecosystems. <i>Restoration Ecology</i> , 2017, 25, 605-617.	1.4	114
26	From Agricultural Benefits to Aviation Safety: Realizing the Potential of Continent-Wide Radar Networks. <i>BioScience</i> , 2017, 67, 912-918.	2.2	64
27	Behaviour of sexually deceived ichneumonid wasps and its implications for pollination in <i>Cryptostylis</i> (Orchidaceae). <i>Biological Journal of the Linnean Society</i> , 2016, 119, 283-298.	0.7	14
28	Cooperative Extension: A Model of Science-Practice Integration for Ecosystem Restoration. <i>Trends in Plant Science</i> , 2016, 21, 410-417.	4.3	5
29	Pollinator rarity as a threat to a plant with a specialized pollination system. <i>Botanical Journal of the Linnean Society</i> , 2015, 179, 511-525.	0.8	30
30	Absence of nectar resource partitioning in a community of parasitoid wasps. <i>Journal of Insect Conservation</i> , 2015, 19, 703-711.	0.8	9
31	Does metabolic rate and evaporative water loss reflect differences in migratory strategy in sexually dimorphic hoverflies?. <i>Comparative Biochemistry and Physiology Part A, Molecular & Integrative Physiology</i> , 2015, 190, 61-67.	0.8	12
32	Ecological and genetic evidence for cryptic ecotypes in a rare sexually deceptive orchid, <i>Drakaea elastica</i> . <i>Botanical Journal of the Linnean Society</i> , 2015, 177, 124-140.	0.8	27
33	Changes in the composition and behaviour of a pollinator guild with plant population size and the consequences for plant fecundity. <i>Functional Ecology</i> , 2014, 28, 846-856.	1.7	18
34	Discovery of pyrazines as pollinator sex pheromones and orchid semiochemicals: implications for the evolution of sexual deception. <i>New Phytologist</i> , 2014, 203, 939-952.	3.5	93
35	Hurdles and Opportunities for Landscape-Scale Restoration. <i>Science</i> , 2013, 339, 526-527.	6.0	319
36	Mate-Searching Behaviour of Common and Rare Wasps and the Implications for Pollen Movement of the Sexually Deceptive Orchids They Pollinate. <i>PLoS ONE</i> , 2013, 8, e59111.	1.1	18

#	ARTICLE	IF	CITATIONS
37	The precipitous decline of the ortolan bunting <i>Emberiza hortulana</i> : time to build on scientific evidence to inform conservation management. <i>Oryx</i> , 2012, 46, 122-129.	0.5	24
38	Reconnecting plants and pollinators: challenges in the restoration of pollination mutualisms. <i>Trends in Plant Science</i> , 2011, 16, 4-12.	4.3	278
39	Migration patterns of Hoopoe <i>Upupa epops</i> and Wryneck <i>Jynx torquilla</i> : an analysis of European ring recoveries. <i>Journal of Ornithology</i> , 2009, 150, 393-400.	0.5	28
40	Habitat selection by Ortolan Buntings <i>Emberiza hortulana</i> in post-fire succession in Catalonia: implications for the conservation of farmland populations. <i>Ibis</i> , 2009, 151, 752-761.	1.0	21
41	Foraging Habitat Selection in the Last Ortolan Bunting <i>Emberiza hortulana</i> Population in Switzerland: Final Lessons before Extinction. <i>Ardea</i> , 2009, 97, 323-333.	0.3	21
