#	ARTICLE	IF	CITATIONS
1	Perceived listening effort in children with hearing loss: listening to a dysphonic voice in quiet and in noise. <i>Logopedics Phoniatrics Vocology</i> , 2022, 47, 1-9.	0.5	8
2	Children's experiences of their learning environment: Psychometric properties of a questionnaire evaluating classroom environment, activities and interactions. <i>Child Language Teaching and Therapy</i> , 2022, 38, 59-77.	0.4	2
3	The impact of tinnitus on working memory capacity. <i>International Journal of Audiology</i> , 2021, 60, 274-281.	0.9	16
4	Psychometric properties of the Norwegian translation of the Tinnitus Handicap Inventory (THI-NOR). <i>International Journal of Audiology</i> , 2021, , 1-6.	0.9	3
5	Importance of personality and coping expectancy on patient-reported hearing disability, quality of life and distress level: a study of patients referred to an audiology service. <i>Health and Quality of Life Outcomes</i> , 2021, 19, 168.	1.0	6
6	Best ear hearing level, time factors and language outcome in Swedish children with mild and moderate hearing loss with hearing aids. <i>Logopedics Phoniatrics Vocology</i> , 2021, , 1-10.	0.5	0
7	Development of an Auditory Passage Comprehension Task for Swedish Primary School Children of Cultural and Linguistic Diversity. <i>Journal of Speech, Language, and Hearing Research</i> , 2021, 64, 3883-3893.	0.7	2
8	Listening effort and fatigue in native and non-native primary school children. <i>Journal of Experimental Child Psychology</i> , 2021, 210, 105203.	0.7	12
9	Implementation and evaluation of a teacher intervention program on classroom communication. <i>Logopedics Phoniatrics Vocology</i> , 2020, 45, 110-122.	0.5	10
10	Passage comprehension performance in children with cochlear implants and/or hearing aids: the effects of voice quality and multi-talker babble noise in relation to executive function. <i>Logopedics Phoniatrics Vocology</i> , 2020, 45, 15-23.	0.5	2
11	Audio-visual speech comprehension in noise with real and virtual speakers. <i>Speech Communication</i> , 2020, 116, 44-55.	1.6	3
12	Can the Lateralized Readiness Potential Detect Suppressed Manual Responses to Pure Tones?. <i>Journal of the American Academy of Audiology</i> , 2020, 31, 061-068.	0.4	0
13	Hearing thresholds and cognitive flexibility in young healthy individuals with normal hearing. <i>International Journal of Audiology</i> , 2020, 59, 583-589.	0.9	4
14	A Pilot Study on the Relationship between Primary-School Teachers' Well-Being and the Acoustics of their Classrooms. <i>International Journal of Environmental Research and Public Health</i> , 2020, 17, 2083.	1.2	9
15	Editorial: Children Listen: Psychological and Linguistic Aspects of Listening Difficulties During Development. <i>Frontiers in Psychology</i> , 2020, 11, 584034.	1.1	4
16	Reduced grey- and white matter volumes due to unilateral hearing loss following treatment for vestibular schwannoma. <i>Heliyon</i> , 2020, 6, e05658.	1.4	5
17	Clinical Application and Psychometric Properties of a Swedish Translation of the Abbreviated Profile of Hearing Aid Benefit. <i>Journal of the American Academy of Audiology</i> , 2020, 31, 656-665.	0.4	3
18	An fMRI-study on single-sided deafness: Spectral-temporal properties and side of stimulation modulates hemispheric dominance. <i>NeuroImage: Clinical</i> , 2019, 24, 101969.	1.4	8

#	ARTICLE	IF	CITATIONS
19	Quality of life in persons with hearing loss: a study of patients referred to an audiological service. <i>International Journal of Audiology</i> , 2019, 58, 696-703.	0.9	4
20	The influence of voice quality and multi-talker babble noise on sentence processing and recall performance in school children using cochlear implant and/or hearing aids. <i>Logopedics Phoniatics Vocology</i> , 2019, 44, 87-94.	0.5	3
21	A virtual speaker in noisy classroom conditions: supporting or disrupting children's listening comprehension?. <i>Logopedics Phoniatics Vocology</i> , 2019, 44, 79-86.	0.5	12
22	The effect of voice quality and competing speakers in a passage comprehension task: performance in relation to cognitive functioning in children with normal hearing. <i>Logopedics Phoniatics Vocology</i> , 2018, 43, 11-19.	0.5	19
23	The effect of voice quality and competing speakers in a passage comprehension task: perceived effort in relation to cognitive functioning and performance in children with normal hearing. <i>Logopedics Phoniatics Vocology</i> , 2018, 43, 32-41.	0.5	20
24	Is children's listening effort in background noise influenced by the speaker's voice quality?. <i>Logopedics Phoniatics Vocology</i> , 2018, 43, 47-55.	0.5	21
25	Neural processing of morphosyntactic tonal cues in second-language learners. <i>Journal of Neurolinguistics</i> , 2018, 45, 60-78.	0.5	21
26	The influence of voice quality on sentence processing and recall performance in school-age children with normal hearing. <i>Speech, Language and Hearing</i> , 2018, 21, 1-9.	0.6	19
27	The Impact of Tinnitus on N-Back Performance in Normal Hearing Individuals. <i>Journal of the American Academy of Audiology</i> , 2018, 30, 169-177.	0.4	6
28	Listening Comprehension and Listening Effort in the Primary School Classroom. <i>Frontiers in Psychology</i> , 2018, 9, 1193.	1.1	40
29	Listening Effort: Order Effects and Core Executive Functions. <i>Journal of the American Academy of Audiology</i> , 2018, 29, 734-747.	0.4	15
30	Extended high-frequency pure tone hearing thresholds and core executive functions. <i>International Journal of Audiology</i> , 2018, 57, 639-645.	0.9	8
31	Increasing Cognitive Interference Modulates the Amplitude of the Auditory Brainstem Response. <i>Journal of the American Academy of Audiology</i> , 2018, 29, 512-519.	0.4	3
32	Immediate Passage Comprehension and Encoding of Information Into Long-Term Memory in Children With Normal Hearing: The Effect of Voice Quality and Multitalker Babble Noise. <i>American Journal of Audiology</i> , 2018, 27, 231-237.	0.5	16
33	Generic quality of life in persons with hearing loss: a systematic literature review. <i>BMC Ear, Nose and Throat Disorders</i> , 2018, 18, 1.	2.6	92
34	Reading Comprehension in Quiet and in Noise: Effects on Immediate and Delayed Recall in Relation to Tinnitus and High-Frequency Hearing Thresholds. <i>Journal of the American Academy of Audiology</i> , 2018, 29, 503-511.	0.4	2
35	Clinical Application and Psychometric Properties of a Norwegian Questionnaire for the Self-Assessment of Communication in Quiet and Adverse Conditions Using Two Revised APHAB Subscales. <i>Journal of the American Academy of Audiology</i> , 2018, 29, 025-034.	0.4	8
36	Doppler Audio Signal Analysis as an Additional Tool in Evaluation of Umbilical Artery Circulation. <i>Ultraschall in Der Medizin</i> , 2017, 38, 549-555.	0.8	4

#	ARTICLE	IF	CITATIONS
37	The Acceptable Noise Level and the Pure-Tone Audiogram. <i>American Journal of Audiology</i> , 2017, 26, 80-87.	0.5	9
38	Long-term measurements using home audiometry with BÄ©kÄ©syÄ©™s technique. <i>International Journal of Audiology</i> , 2017, 56, 202-211.	0.9	1
39	How Children Perceive the Acoustic Environment of Their School. <i>Noise and Health</i> , 2017, 19, 84-94.	0.4	15
40	Measuring motivation using the transtheoretical (stages of change) model: A follow-up study of people who failed an online hearing screening. <i>International Journal of Audiology</i> , 2016, 55, S52-S58.	0.9	16
41	The initial evaluation of an Internet-based support system for audiologists and first-time hearing aid clients. <i>Internet Interventions</i> , 2016, 4, 82-91.	1.4	13
42	The impact of sound presentations on executive control: Evidence from eye movements. <i>Psychology of Music</i> , 2016, 44, 996-1011.	0.9	0
43	Occupational stress among Swedish audiologists in clinical practice: Reasons for being stressed. <i>International Journal of Audiology</i> , 2016, 55, 447-453.	0.9	8
44	Functional-structural reorganisation of the neuronal network for auditory perception in subjects with unilateral hearing loss: Review of neuroimaging studies. <i>Hearing Research</i> , 2016, 332, 73-79.	0.9	19
45	Parental comparison of the prosodic and paralinguistic ability of children with cochlear implants and their normal hearing siblings. <i>Clinical Linguistics and Phonetics</i> , 2015, 29, 840-851.	0.5	1
46	Emotional arousal and lexical specificity modulate response times differently depending on ear of presentation in a dichotic listening task. <i>Mental Lexicon</i> , 2015, 10, 221-246.	0.2	1
47	The Process of Developing an Internet-Based Support System for Audiologists and First-Time Hearing Aid Clients. <i>American Journal of Audiology</i> , 2015, 24, 320-324.	0.5	4
48	Does the speaker's voice quality influence children's performance on a language comprehension test?. <i>International Journal of Speech-Language Pathology</i> , 2015, 17, 63-73.	0.6	52
49	Stages of Change in Adults Who Have Failed an Online Hearing Screening. <i>Ear and Hearing</i> , 2015, 36, 92-101.	1.0	34
50	Children's Subjective Ratings and Opinions of Typical and Dysphonic Voice After Performing a Language Comprehension Task in Background Noise. <i>Journal of Voice</i> , 2015, 29, 624-630.	0.6	23
51	The impact of tinnitus on cognitive performance in normal-hearing individuals. <i>International Journal of Audiology</i> , 2015, 54, 845-851.	0.9	21
52	Are children with stronger cognitive capacity more or less disturbed by classroom noise and dysphonic teachers?. <i>International Journal of Speech-Language Pathology</i> , 2015, 17, 577-588.	0.6	20
53	The acceptable noise level: The effect of repeated measurements. <i>International Journal of Audiology</i> , 2014, 53, 21-29.	0.9	16
54	Prediction of IOI-HA Scores Using Speech Reception Thresholds and Speech Discrimination Scores in Quiet. <i>Journal of the American Academy of Audiology</i> , 2014, 25, 154-163.	0.4	5

#	ARTICLE	IF	CITATIONS
55	Does the acceptable noise level (ANL) predict hearing-aid use?. <i>International Journal of Audiology</i> , 2014, 53, 2-20.	0.9	28
56	Audio spectrum analysis of umbilical artery Doppler ultrasound signals applied to a clinical material. <i>Acta Obstetrica Et Gynecologica Scandinavica</i> , 2014, 93, 1320-1324.	1.3	3
57	The effect of repeated measurements and working memory on the most comfortable level in the ANL test. <i>International Journal of Audiology</i> , 2014, 53, 787-795.	0.9	9
58	Clinical note: Validation of the Swedish version of the Parents'™ Evaluation of Aural/Oral Performance of Children (PEACH) Rating Scale for normal hearing infants and children. <i>Hearing, Balance and Communication</i> , 2014, 12, 88-93.	0.1	13
59	Acceptable noise level in Danish adult subjects diagnosed with unilateral Ménière's disease. <i>Hearing, Balance and Communication</i> , 2013, 11, 17-23.	0.1	1
60	Psychosocial work environment among Swedish audiologists. <i>International Journal of Audiology</i> , 2013, 52, 151-161.	0.9	17
61	Intertester Reliability of the Acceptable Noise Level. <i>Journal of the American Academy of Audiology</i> , 2013, 24, 241-243.	0.4	5
62	Operator Auditory Perception and Spectral Quantification of Umbilical Artery Doppler Ultrasound Signals. <i>PLoS ONE</i> , 2013, 8, e64033.	1.1	4
63	Factors affecting severity of tinnitus - a follow-up study of tinnitus subjects at an Ear Nose Throat clinic in Sweden. <i>International Tinnitus Journal</i> , 2013, 18, 115-21.	0.1	1
64	Acceptable noise level (ANL) with Danish and non-semantic speech materials in adult hearing-aid users. <i>International Journal of Audiology</i> , 2012, 51, 678-688.	0.9	30
65	Acceptance of Background Noise, Working Memory Capacity, and Auditory Evoked Potentials in Subjects with Normal Hearing. <i>Journal of the American Academy of Audiology</i> , 2012, 23, 542-552.	0.4	16
66	Acceptable noise level with Danish, Swedish, and non-semantic speech materials. <i>International Journal of Audiology</i> , 2012, 51, 146-156.	0.9	29
67	Acceptable noise level: Repeatability with Danish and non-semantic speech materials for adults with normal hearing. <i>International Journal of Audiology</i> , 2012, 51, 557-563.	0.9	19
68	Octave illusion elicited by overlapping narrowband noises. <i>Journal of the Acoustical Society of America</i> , 2011, 129, 3213-3220.	0.5	7
69	Hearing Aid Fitting Outcome: Clinical Application and Psychometric Properties of a Swedish Translation of the International Outcome Inventory for Hearing Aids (IOI-HA). <i>Journal of the American Academy of Audiology</i> , 2010, 21, 512-521.	0.4	36
70	Interaural attenuation for Sennheiser HDA 200 circumaural earphones. <i>International Journal of Audiology</i> , 2010, 49, 467-471.	0.9	17
71	Hypobaric pressure exposure effects on cochlear frequency selectivity in fluctuating, low-frequency hearing loss. <i>Journal of Laryngology and Otology</i> , 2009, 123, 710-717.	0.4	2
72	Long-term measurement of binaural intensity matches and pitch matches. I. Normal hearing. <i>International Journal of Audiology</i> , 2008, 47, 59-66.	0.9	6

#	ARTICLE	IF	CITATIONS
73	Clinical application of long-term intensity and pitch matches in fluctuating low-frequency hearing loss. <i>International Journal of Audiology</i> , 2008, 47, 412-419.	0.9	6
74	Long-term measurement of binaural intensity and pitch matches. II. Fluctuating low-frequency hearing loss. <i>International Journal of Audiology</i> , 2008, 47, 675-687.	0.9	7
75	Extended High Frequency Hearing, but Not Tinnitus, Is Associated With Every-Day Cognitive Performance. <i>Frontiers in Psychology</i> , 0, 13, .	1.1	4
