#	ARTICLE	IF	CITATIONS
1	Dysregulation of HSG triggers vascular proliferative disorders. <i>Nature Cell Biology</i> , 2004, 6, 872-883.	4.6	323
2	Recent development of risk-prediction models for incident hypertension: An updated systematic review. <i>PLoS ONE</i> , 2017, 12, e0187240.	1.1	56
3	Expression Profile of microRNAs in Hypertrophic Cardiomyopathy and Effects of microRNA-20 in Inducing Cardiomyocyte Hypertrophy Through Regulating Gene <i>MFN2</i> . <i>DNA and Cell Biology</i> , 2019, 38, 796-807.	0.9	33
4	HSG/Mfn2 Gene Polymorphism and Essential Hypertension: a Case-Control Association Study in Chinese. <i>Journal of Atherosclerosis and Thrombosis</i> , 2011, 18, 24-31.	0.9	18
5	E-selectin gene polymorphisms are associated with essential hypertension: a case-control pilot study in a Chinese population. <i>BMC Medical Genetics</i> , 2010, 11, 127.	2.1	17
6	Mitofusin 2 ameliorates aortic remodeling by suppressing ras/raf/ERK pathway and regulating mitochondrial function in vascular smooth muscle cells. <i>International Journal of Cardiology</i> , 2015, 178, 165-167.	0.8	13
7	The Association of Mitofusion-2 Gene Polymorphisms with Susceptibility of Essential Hypertension in Northern Han Chinese Population. <i>International Journal of Medical Sciences</i> , 2016, 13, 39-47.	1.1	7
8	Association of mitofusin 2 methylation and essential hypertension: a case-control study in a Chinese population. <i>Hypertension Research</i> , 2018, 41, 605-613.	1.5	7
9	Is Prehypertension Really Different from Normotension and Hypertension? A Case-Control Pilot Proteomic Study in Chinese. <i>Clinical and Experimental Hypertension</i> , 2009, 31, 316-329.	0.5	5
10	A Novel 5'-Uncooding Region -1248 A>G Variation of Mitofusin-2 Gene Is Associated with Hypertension in Chinese. <i>Yonsei Medical Journal</i> , 2013, 54, 603.	0.9	5
11	Single Nucleotide Polymorphisms (SNPs) Genotyping Reveals that Mfn2 Polymorphisms are Associated with Thoracic Aortic Dissection in Han Chinese Population. <i>Medical Science Monitor</i> , 2019, 25, 2419-2428.	0.5	4
12	Association of the bradykinin receptors genes variants with hypertension: a case-control study and meta-analysis. <i>Clinical and Experimental Hypertension</i> , 2016, 38, 100-106.	0.5	3
13	Association of ECE1 gene polymorphisms and essential hypertension risk in the Northern Han Chinese: A case-control study. <i>Molecular Genetics &amp; Genomic Medicine</i> , 2020, 8, e1188.	0.6	3
14	A Pilot Study on Level of Blood Vasoactive Factors in Prehypertensive and Hypertensive Patients. <i>Clinical and Experimental Hypertension</i> , 2008, 30, 598-605.	0.5	2
15	Neglect of Several Important Indexes During the Study of Human Essential Hypertension. <i>Journal of Clinical Hypertension</i> , 2013, 15, 769-771.	1.0	0
16	C1q/TNF-related protein 9 is elevated in hypertension and associated with the occurrence of hypertension-related atherogenesis. <i>Cell Biology International</i> , 2021, 45, 989-1000.	1.4	0
