#	Article	IF	CITATIONS
1	Congenital Adrenal Hyperplasia—Current Insights in Pathophysiology, Diagnostics, and Management. Endocrine Reviews, 2022, 43, 91-159.	20.1	182
2	Treatment of congenital adrenal hyperplasia in children aged 0–3 years: a retrospective multicenter analysis of salt supplementation, glucocorticoid and mineralocorticoid medication, growth and blood pressure. European Journal of Endocrinology, 2022, 186, 587-596.	3.7	7
3	Management of Acute Adrenal Insufficiency-Related Adverse Events in Children with Congenital Adrenal Hyperplasia: Results of an International Survey of Specialist Centres. Hormone Research in Paediatrics, 2022, 95, 363-373.	1.8	2
4	Analysis of therapy monitoring in the International Congenital Adrenal Hyperplasia Registry. Clinical Endocrinology, 2022, 97, 551-561.	2.4	4
5	Real-World Estimates of Adrenal Insufficiency–Related Adverse Events in Children With Congenital Adrenal Hyperplasia. Journal of Clinical Endocrinology and Metabolism, 2021, 106, e192-e203.	3.6	20
6	Surgical Practice in Girls with Congenital Adrenal Hyperplasia: An International Registry Study. Sexual Development, 2021, 15, 229-235.	2.0	4
7	Adrenal insufficiency. Lancet, The, 2021, 397, 613-629.	13.7	157
8	International practice of corticosteroid replacement therapy in congenital adrenal hyperplasia: data from the I-CAH registry. European Journal of Endocrinology, 2021, 184, 553-563.	3.7	21
9	Genetic Analysis of Pediatric Primary Adrenal Insufficiency of Unknown Etiology: 25 Years' Experience in the UK. Journal of the Endocrine Society, 2021, 5, bvab086.	0.2	34
10	Gonadectomy in conditions affecting sex development: a registry-based cohort study. European Journal of Endocrinology, 2021, 184, 791-801.	3.7	9
11	Society for Endocrinology UK Guidance on the initial evaluation of a suspected difference or disorder of sex development (Revised 2021). Clinical Endocrinology, 2021, 95, 818-840.	2.4	29
12	Interrenal development and function in zebrafish. Molecular and Cellular Endocrinology, 2021, 535, 111372.	3.2	9
13	The broad phenotypic spectrum of 17α-hydroxylase/17,20-lyase (CYP17A1) deficiency: a case series. European Journal of Endocrinology, 2021, 185, 729-741.	3.7	12
14	Plasma Renin Measurements are Unrelated to Mineralocorticoid Replacement Dose in Patients With Primary Adrenal Insufficiency. Journal of Clinical Endocrinology and Metabolism, 2020, 105, 314-326.	3.6	30
15	Bidirectional crosstalk between Hypoxia-Inducible Factor and glucocorticoid signalling in zebrafish larvae. PLoS Genetics, 2020, 16, e1008757.	3.5	26
16	The P450 side-chain cleavage enzyme Cyp11a2 facilitates steroidogenesis in zebrafish. Journal of Endocrinology, 2020, 244, 309-321.	2.6	22
17	11β-Hydroxylase loss disrupts steroidogenesis and reproductive function in zebrafish. Journal of Endocrinology, 2020, 247, 197-212.	2.6	14
18	MondoA regulates gene expression in cholesterol biosynthesis-associated pathways required for zebrafish epiboly. ELife, 2020, 9, .	6.0	7

24	Title is missing!. , 2020, 16, e1008757.		0
25	Measurement of Salivary Adrenal-Specific Androgens as Biomarkers of Therapy Control in 21-Hydroxylase Deficiency. Journal of Clinical Endocrinology and Metabolism, 2019, 104, 6417-6429.	3.6	31
26	Exquisite sensitivity of adrenocortical carcinomas to induction of ferroptosis. Proceedings of the National Academy of Sciences of the United States of America, 2019, 116, 22269-22274.	7.1	81
27	Alternative pathway androgen biosynthesis and human fetal female virilization. Proceedings of the National Academy of Sciences of the United States of America, 2019, 116, 22294-22299.	7.1	50
28	Ferredoxin 1b Deficiency Leads to Testis Disorganization, Impaired Spermatogenesis, and Feminization in Zebrafish. Endocrinology, 2019, 160, 2401-2416.	2.8	14
29	Update on adrenal steroid hormone biosynthesis and clinical implications. Archives of Disease in Childhood, 2019, 104, 1223-1228.	1.9	17
30	Causes, patterns and severity of androgen excess in 487 consecutively recruited pre- and post-pubertal children. European Journal of Endocrinology, 2019, 180, 213-221.	3.7	22
31	Quantitative Brain MRI in Congenital Adrenal Hyperplasia: In Vivo Assessment of the Cognitive and Structural Impact of Steroid Hormones. Journal of Clinical Endocrinology and Metabolism, 2018, 103, 1330-1341.	3.6	32
32	International survey on high―and lowâ€dose synacthen test and assessment of accuracy in preparing lowâ€dose synacthen. Clinical Endocrinology, 2018, 88, 744-751.	2.4	25
33	Glucocorticoid deficiency causes transcriptional and post-transcriptional reprogramming of glutamine metabolism. EBioMedicine, 2018, 36, 376-389.	6.1	12
34	Management of Gonads in Adults with Androgen Insensitivity: An International Survey. Hormone Research in Paediatrics, 2018, 90, 236-246.	1.8	34
35	Modified release and conventional glucocorticoids and diurnal androgen excretion in congenital adrenal hyperplasia. Journal of Clinical Endocrinology and Metabolism, 2017, 102, jc.2016-2855.	3.6	38
36	Cardiovascular health, growth and gonadal function in children and adolescents with congenital adrenal hyperplasia. Archives of Disease in Childhood, 2017, 102, 578-584.	1.9	18

#	Article	IF	CITATIONS
37	Birth Weight in Different Etiologies of Disorders of Sex Development. Journal of Clinical Endocrinology and Metabolism, 2017, 102, 1044-1050.	3.6	16
38	Genetic Disruption of 21-Hydroxylase in Zebrafish Causes Interrenal Hyperplasia. Endocrinology, 2017, 158, 4165-4173.	2.8	24
39	Extensive Regulation of Diurnal Transcription and Metabolism by Glucocorticoids. PLoS Genetics, 2016, 12, e1006512.	3.5	44
40	Society for Endocrinology <scp>UK</scp> guidance on the initial evaluation of an infant or an adolescent with a suspected disorder of sex development (Revised 2015). Clinical Endocrinology, 2016, 84, 771-788.	2.4	196
41	Ferredoxin 1b (Fdx1b) Is the Essential Mitochondrial Redox Partner for Cortisol Biosynthesis in Zebrafish. Endocrinology, 2016, 157, 1122-1134.	2.8	29
42	Characterization of the molecular genetic pathology in patients with 11βâ€hydroxylase deficiency. Clinical Endocrinology, 2015, 83, 629-635.	2.4	26
43	Current and novel approaches to children and young people with congenital adrenal hyperplasia and adrenal insufficiency. Best Practice and Research in Clinical Endocrinology and Metabolism, 2015, 29, 449-468.	4.7	47
44	Influence of 17-Hydroxyprogesterone, Progesterone and Sex Steroids on Mineralocorticoid Receptor Transactivation in Congenital Adrenal Hyperplasia. Hormone Research in Paediatrics, 2015, 83, 414-421.	1.8	19
45	ldentification of a Novel Large <i>CYP17A1 </i> Deletion by MLPA Analysis in a Family with Classic 17a-Hydroxylase Deficiency. Sexual Development, 2015, 9, 91-97.	2.0	12
46	5α-Reductase Type 2 Regulates Glucocorticoid Action and Metabolic Phenotype in Human Hepatocytes. Endocrinology, 2015, 156, 2863-2871.	2.8	38
47	Keeping the pressure on mineralocorticoid replacement in congenital adrenal hyperplasia. Clinical Endocrinology, 2015, 82, 478-480.	2.4	4
48	Steroid Biochemistry. Endocrine Development, 2014, 27, 41-52.	1.3	16
49	46,XY Disorder of Sex Development in a Sudanese Patient Caused by a Novel Mutation in theHSD17B3Gene. Sexual Development, 2014, 8, 151-155.	2.0	8
50	Novel Associations in Disorders of Sex Development: Findings From the I-DSD Registry. Journal of Clinical Endocrinology and Metabolism, 2014, 99, E348-E355.	3.6	85
51	Diminished 11β-Hydroxysteroid Dehydrogenase Type 2 Activity Is Associated With Decreased Weight and Weight Gain Across the First Year of Life. Journal of Clinical Endocrinology and Metabolism, 2014, 99, E821-E831.	3.6	22
52	Care provision in congenital adrenal hyperplasia – all doom and gloom or light at the end of the tunnel?. Clinical Endocrinology, 2014, 80, 469-470.	2.4	1
53	Changes Over Time in Sex Assignment for Disorders of Sex Development. Pediatrics, 2014, 134, e710-e715.	2.1	98
54	Low estriol levels in the maternal marker screen as a predictor of X-linked adrenal hypoplasia congenita: Case report. Srpski Arhiv Za Celokupno Lekarstvo, 2014, 142, 728-731.	0.2	7

#	Article	IF	CITATIONS
55	Redefining the Initiation and Maintenance of Zebrafish Interrenal Steroidogenesis by Characterizing the Key Enzyme Cyp11a2. Endocrinology, 2013, 154, 2702-2711.	2.8	38
56	Prenatal Diagnosis of Congenital Adrenal Hyperplasia Caused by P450 Oxidoreductase Deficiency. Journal of Clinical Endocrinology and Metabolism, 2013, 98, E528-E536.	3.6	37
57	Genotype-Phenotype Correlation in 153 Adult Patients With Congenital Adrenal Hyperplasia due to 21-Hydroxylase Deficiency: Analysis of the United Kingdom Congenital Adrenal Hyperplasia Adult Study Executive (CaHASE) Cohort. Journal of Clinical Endocrinology and Metabolism, 2013, 98, E346-E354.	3.6	90
58	A Diagnosis Not to Be Missed: Nonclassic Steroid 11β-Hydroxylase Deficiency Presenting With Premature Adrenarche and Hirsutism. Journal of Clinical Endocrinology and Metabolism, 2013, 98, E1620-E1625.	3.6	63
59	Testicular Adrenal Rest Tumors Develop Independently of Long-Term Disease Control: A Longitudinal Analysis of 50 Adult Men With Congenital Adrenal Hyperplasia due to Classic 21-Hydroxylase Deficiency. Journal of Clinical Endocrinology and Metabolism, 2013, 98, E1820-E1826.	3.6	69
60	Quality of life in adults with congenital adrenal hyperplasia relates to glucocorticoid treatment, adiposity and insulin resistance: United Kingdom Congenital adrenal Hyperplasia Adult Study Executive (CaHASE). European Journal of Endocrinology, 2013, 168, 887-893.	3.7	67
61	Delayed diagnosis of adrenal insufficiency in a patient with severe penoscrotal hypospadias due to two novel P450 side-change cleavage enzyme (CYP11A1) mutations (p.R360W; p.R405X). European Journal of Endocrinology, 2012, 167, 881-885.	3.7	24
62	Genotype-Phenotype Analysis in Congenital Adrenal Hyperplasia due to P450 Oxidoreductase Deficiency. Journal of Clinical Endocrinology and Metabolism, 2012, 97, E257-E267.	3.6	118
63	A Missense Mutation in the Human Cytochrome b5 Gene causes 46,XY Disorder of Sex Development due to True Isolated 17,20 Lyase Deficiency. Journal of Clinical Endocrinology and Metabolism, 2012, 97, E465-E475.	3.6	91
64	Health Problems in Congenital Adrenal Hyperplasia due to 21-Hydroxylase Deficiency. Hormone Research in Paediatrics, 2011, 76, 73-85.	1.8	93
65	Premature adrenarche: novel lessons from early onset androgen excess. European Journal of Endocrinology, 2011, 165, 189-207.	3.7	115
66	UK guidance on the initial evaluation of an infant or an adolescent with a suspected disorder of sex development. Clinical Endocrinology, 2011, 75, 12-26.	2.4	124
67	Urine Steroid Metabolomics as a Biomarker Tool for Detecting Malignancy in Adrenal Tumors. Journal of Clinical Endocrinology and Metabolism, 2011, 96, 3775-3784.	3.6	369
68	Pubertal Presentation in Seven Patients with Congenital Adrenal Hyperplasia due to P450 Oxidoreductase Deficiency. Journal of Clinical Endocrinology and Metabolism, 2011, 96, E453-E462.	3.6	47
69	A Novel Entity of Clinically Isolated Adrenal Insufficiency Caused by a Partially Inactivating Mutation of the Gene Encoding for P450 Side Chain Cleavage Enzyme (CYP11A1). Journal of Clinical Endocrinology and Metabolism, 2011, 96, E1798-E1806.	3.6	52
70	The Adrenal Cortex. , 2011, , 479-544.		40
71	Health Status of Adults with Congenital Adrenal Hyperplasia: A Cohort Study of 203 Patients. Journal of Clinical Endocrinology and Metabolism, 2010, 95, 5110-5121.	3.6	408
72	Functional Consequences of Seven Novel Mutations in the <i>CYP11B1</i> Gene: Four Mutations Associated with Nonclassic and Three Mutations Causing Classic 11β-Hydroxylase Deficiency. Journal of Clinical Endocrinology and Metabolism, 2010, 95, 779-788.	3.6	100

#	Article	IF	CITATIONS
73	Concomitant Mutations in the P450 Oxidoreductase and Androgen Receptor Genes Presenting with 46,XY Disordered Sex Development and Androgenization at Adrenarche. Journal of Clinical Endocrinology and Metabolism, 2010, 95, 3418-3427.	3.6	22
74	Gas chromatography/mass spectrometry (GC/MS) remains a pre-eminent discovery tool in clinical steroid investigations even in the era of fast liquid chromatography tandem mass spectrometry (LC/MS/MS). Journal of Steroid Biochemistry and Molecular Biology, 2010, 121, 496-504.	2.5	353
75	Congenital Adrenal Hyperplasia due to 11-Hydroxylase Deficiency – Insights from Two Novel <i>CYP11B1</i> Mutations (p.M92X, p.R453Q). Hormone Research, 2009, 72, 281-286.	1.8	25
76	Inactivating <i>PAPSS2</i> Mutations in a Patient with Premature Pubarche. New England Journal of Medicine, 2009, 360, 2310-2318.	27.0	139
77	An overlooked cause of glucocorticoid deficiency?. Nature Reviews Endocrinology, 2009, 5, 362-363.	9.6	1
78	Steroid 17α-Hydroxylase Deficiency: Functional Characterization of Four Mutations (A174E, V178D,) Tj ETQq0 0 3058-3064.	0 rgBT /Ov 3.6	verlock 10 T 42
79	Nonclassic Lipoid Congenital Adrenal Hyperplasia Masquerading as Familial Glucocorticoid Deficiency. Journal of Clinical Endocrinology and Metabolism, 2009, 94, 3865-3871.	3.6	138
80	Thoughts on paediatric diabetes care in the UK. British Journal of Diabetes and Vascular Disease, 2009, 9, 259-267.	0.6	4
81	Functional characterization of three <i>CYP21A2</i> sequence variants (p.A265V, p.W302S, p.D322G) employing a yeast co-expression system. Human Mutation, 2009, 30, E443-E450.	2.5	14
82	Revealing a subclinical saltâ€losing phenotype in heterozygous carriers of the novel S562P mutation in the α subunit of the epithelial sodium channel. Clinical Endocrinology, 2009, 70, 252-258.	2.4	27
83	Genetics of congenital adrenal hyperplasia. Best Practice and Research in Clinical Endocrinology and Metabolism, 2009, 23, 181-192.	4.7	235
84	How to improve blood-glucose control in type-1 diabetes. Paediatrics and Child Health (United) Tj ETQq0 0 0 rgB	/Overlock	2 10 Tf 50 30
85	Functional and Structural Consequences of a Novel Point Mutation in theCYP21A2Gene Causing Congenital Adrenal Hyperplasia: Potential Relevance of Helix C for P450 Oxidoreductase-21-Hydroxylase Interaction. Journal of Clinical Endocrinology and Metabolism, 2008, 93, 2891-2895.	3.6	14
86	Cushing's syndrome in women with polycystic ovaries and hyperandrogenism. Nature Clinical Practice Endocrinology and Metabolism, 2007, 3, 778-783.	2.8	14
87	Adult Consequences of Congenital Adrenal Hyperplasia. Hormone Research in Paediatrics, 2007, 68, 158-164.	1.8	40
88	Differential Inhibition of CYP17A1 and CYP21A2 Activities by the P450 Oxidoreductase Mutant A287P. Molecular Endocrinology, 2007, 21, 1958-1968.	3.7	64
89	Age-specific changes in sex steroid biosynthesis and sex development. Best Practice and Research in Clinical Endocrinology and Metabolism, 2007, 21, 393-401.	4.7	29
90	Congenital adrenal hyperplasia and P450 oxidoreductase deficiency. Clinical Endocrinology, 2007, 66, 162-172.	2.4	99

#	Article	IF	CITATIONS
91	Four Novel Missense Mutations in the CYP21A2 Gene Detected in Russian Patients Suffering from the Classical Form of Congenital Adrenal Hyperplasia: Identification, Functional Characterization, and Structural Analysis. Journal of Clinical Endocrinology and Metabolism, 2006, 91, 4976-4980.	3.6	29
92	Analyzing the Functional and Structural Consequences of Two Point Mutations (P94L and A368D) in the CYP11B1 Gene Causing Congenital Adrenal Hyperplasia Resulting from 11-Hydroxylase Deficiency. Journal of Clinical Endocrinology and Metabolism, 2006, 91, 2682-2688.	3.6	39
93	Elucidating the Underlying Molecular Pathogenesis of <i>NR3C2</i> Mutants Causing Autosomal Dominant Pseudohypoaldosteronism Type 1. Journal of Clinical Endocrinology and Metabolism, 2006, 91, 4552-4561.	3.6	58
94	Population spectrum ofACADMgenotypes correlated to biochemical phenotypes in newborn screening for medium-chain acyl-CoA dehydrogenase deficiency. Human Mutation, 2005, 25, 443-452.	2.5	99
95	Thirteen novel mutations in theNROB1(DAX1) gene as cause of adrenal hypoplasia congenita. Human Mutation, 2005, 25, 502-502.	2.5	21
96	The residue E351 is essential for the activity of human 21-hydroxylase: evidence from a naturally occurring novel point mutation compared with artificial mutants generated by single amino acid substitutions. Journal of Molecular Medicine, 2005, 83, 561-568.	3.9	14
97	Disproportionate stature but normal height in hypochondroplasia. European Journal of Pediatrics, 2005, 164, 397-399.	2.7	3
98	Functional Characterization of Two Novel Point Mutations in theCYP21Gene Causing Simple Virilizing Forms of Congenital Adrenal Hyperplasia Due to 21-Hydroxylase Deficiency. Journal of Clinical Endocrinology and Metabolism, 2005, 90, 445-454.	3.6	41
99	Congenital Adrenal Hyperplasia: The Molecular Basis of 21-Hydroxylase Deficiency in H-2aw18 Mice. Endocrinology, 2005, 146, 2563-2574.	2.8	23
100	Congenital Adrenal Hyperplasia Due to 11-Hydroxylase Deficiency: Functional Characterization of Two Novel Point Mutations and a Three-Base Pair Deletion in theCYP11B1Gene. Journal of Clinical Endocrinology and Metabolism, 2005, 90, 3724-3730.	3.6	53
101	Early manifestation of calcinosis cutis in pseudohypoparathyroidism type Ia associated with a novel mutation in the GNAS gene. European Journal of Endocrinology, 2005, 152, 515-519.	3.7	44
102	Autosomal-Dominant Pseudohypoaldosteronism Type 1 in a Turkish Family Is Associated with a Novel Nonsense Mutation in the Human Mineralocorticoid Receptor Gene. Journal of Clinical Endocrinology and Metabolism, 2004, 89, 2150-2152.	3.6	27
103	Treatment of Pubertal Gynecomastia with the Specific Aromatase Inhibitor Anastrozole. Hormone Research in Paediatrics, 2004, 62, 113-118.	1.8	33
104	Long-Term Follow-Up of Spontaneous Development in a Boy with Familial Male Precocious Puberty. Hormone Research in Paediatrics, 2004, 62, 177-181.	1.8	16
105	Identification of a Novel Mutation in the Human Mineralocorticoid Receptor Gene in a German Family with Autosomal-Dominant Pseudohypoaldosteronism Type 1: Further Evidence for Marked Interindividual Clinical Heterogeneity. Journal of Clinical Endocrinology and Metabolism, 2003, 88, 1683-1686.	3.6	38
106	Management of Congenital Adrenal Hyperplasia: Results of the ESPE Questionnaire. Hormone Research in Paediatrics, 2002, 58, 196-205.	1.8	55
107	Multiplex Minisequencing of the 21-Hydroxylase Gene as a Rapid Strategy to Confirm Congenital Adrenal Hyperplasia. Clinical Chemistry, 2002, 48, 818-825.	3.2	59
108	Multiplex minisequencing of the 21-hydroxylase gene as a rapid strategy to confirm congenital adrenal hyperplasia. Clinical Chemistry, 2002, 48, 818-25.	3.2	27
