1	Do healthcare needs-based population segments predict outcomes among the elderly? Findings from a prospective cohort study in an urbanized low-income community. BMC Geriatrics, 2020, 20, 78.	2.7	5
2	Health-seeking behaviour of the elderly living alone in an urbanised low-income community in Singapore. Singapore Medical Journal, 2020, 61, 260-265.	0.6	13
3	Factors associated with emergency room visits and hospitalisation amongst low-income public rental flat dwellers in Singapore. BMC Public Health, 2019, 19, 713.	2.9	5
4	Effectiveness and feasibility of deprescribing of symptomatic medications in a Singapore rehabilitation hospital. Proceedings of Singapore Healthcare, 2019, 28, 31-38.	0.6	5
5	Frequent hospital admissions in Singapore: clinical risk factors and impact of socioeconomic status. Singapore Medical Journal, 2018, 59, 39-43.	0.6	30
6	Anti-hypertensive medications and injurious falls in an older population of low socioeconomic status: a nested case-control study. BMC Geriatrics, 2018, 18, 195.	2.7	8
7	A systematic review of health status, health seeking behaviour and healthcare utilisation of low socioeconomic status populations in urban Singapore. International Journal for Equity in Health, 2018, 17, 39.	3.5	78
8	FAM-FACE-SG: a score for risk stratification of frequent hospital admitters. BMC Medical Informatics and Decision Making, 2017, 17, 35.	3.0	13
9	Evaluating a novel Integrated Community of Care (ICoC) for patients from an urbanised low-income community in Singapore using the participatory action research (PAR) methodology: a study protocol. BMJ Open, 2017, 7, e017839.	1.9	3
10	Applying the Integrated Practice Unit Concept to a Modified Virtual Ward Model of Care for Patients at Highest Risk of Readmission: A Randomized Controlled Trial. PLoS ONE, 2017, 12, e0168757.	2.5	46
11	Transitional Home Care Program Utilizing the Integrated Practice Unit Concept (THC-IPU): Effectiveness in Improving Acute Hospital Utilization. International Journal of Integrated Care, 2017, 17, 5.	0.2	10
12	Predicting 30-Day Readmissions in an Asian Population: Building a Predictive Model by Incorporating Markers of Hospitalization Severity. PLoS ONE, 2016, 11, e0167413.	2.5	39
13	Housing as a Social Determinant of Health in Singapore and Its Association with Readmission Risk and Increased Utilization of Hospital Services. Frontiers in Public Health, 2016, 4, 109.	2.7	43
14	Oral Vitamin B12 Replacement for the Treatment of Pernicious Anemia. Frontiers in Medicine, 2016, 3, 38.	2.6	36
15	Predicting frequent hospital admission risk in Singapore: a retrospective cohort study to investigate the impact of comorbidities, acute illness burden and social determinants of health. BMJ Open, 2016, 6, e012705.	1.9	28
16	Predicting 30-Day Readmissions: Performance of the LACE Index Compared with a Regression Model among General Medicine Patients in Singapore. BioMed Research International, 2015, 2015, 1-6.	1.9	60
17	Effectiveness of a transitional home care program in reducing acute hospital utilization: a quasi-experimental study. BMC Health Services Research, 2015, 15, 100.	2.2	49
18	Transitional care for the highest risk patients: findings of a randomised control study. International Journal of Integrated Care, 2015, 15, e039.	0.2	32

19	Applicability of a previously validated readmission predictive index in medical patients in Singapore: a retrospective study. BMC Health Services Research, 2013, 13, 366.	2.2	34
20	Analyzing Trends of Hospital Length of Stay Using Phase-Type Distributions. , 2011, , .		0
21	Bringing generalists into the hospital: Outcomes of a family medicine hospitalist model in Singapore. Journal of Hospital Medicine, 2011, 6, 115-121.	1.4	27
22	Trend Analysis of Length of Stay Data via Phase-Type Models. International Journal of Knowledge Discovery in Bioinformatics, 2011, 2, 37-51.	0.8	2
23	The hospitalist movement--a complex adaptive response to fragmentation of care in hospitals. Annals of the Academy of Medicine, Singapore, 2008, 37, 145-50.	0.4	8
