#	ARTICLE	IF	CITATIONS
1	A Meta-analysis of Mental Time Travel in Individuals with Autism Spectrum Disorders. <i>Journal of Autism and Developmental Disorders</i> , 2023, 53, 1509-1528.	1.7	5
2	Are Brain Responses to Emotion a Reliable Endophenotype of Schizophrenia? An Image-Based Functional Magnetic Resonance Imaging Meta-analysis. <i>Biological Psychiatry</i> , 2023, 93, 167-177.	0.7	5
3	Altered brain structural and functional connectivity in schizotypy. <i>Psychological Medicine</i> , 2022, 52, 834-843.	2.7	16
4	The impact of childhood trauma on thalamic functional connectivity in patients with obsessive-compulsive disorder. <i>Psychological Medicine</i> , 2022, 52, 2471-2480.	2.7	5
5	Validation of the Chinese Version of the Body Image Concern Inventory. <i>Evaluation and the Health Professions</i> , 2022, 45, 204-214.	0.9	9
6	Co-occurrence of schizo-obsessive traits and its correlation with altered executive control network functional connectivity. <i>European Archives of Psychiatry and Clinical Neuroscience</i> , 2022, 272, 301-312.	1.8	2
7	Altered activation and functional connectivity in individuals with social anhedonia when envisioning positive future episodes. <i>Psychological Medicine</i> , 2022, 52, 4058-4066.	2.7	4
8	Distinct clinical manifestations of obsessive-compulsive disorder are associated with cortical thickness alteration. <i>Australian and New Zealand Journal of Psychiatry</i> , 2022, 56, 186-196.	1.3	5
9	A network analysis of interoception, self-awareness, empathy, alexithymia, and autistic traits. <i>European Archives of Psychiatry and Clinical Neuroscience</i> , 2022, 272, 199-209.	1.8	11
10	Altered empathy-related resting-state functional connectivity in patients with bipolar disorder. <i>European Archives of Psychiatry and Clinical Neuroscience</i> , 2022, 272, 839-848.	1.8	4
11	Multidimensional Interoception and Autistic Traits Across life Stages: Evidence From a Novel Eye-tracking Task. <i>Journal of Autism and Developmental Disorders</i> , 2022, 52, 2644-2655.	1.7	3
12	Audiovisual Temporal Processing in Children and Adolescents With Schizophrenia and Children and Adolescents With Autism: Evidence From Simultaneity-Judgment Tasks and Eye-Tracking Data. <i>Clinical Psychological Science</i> , 2022, 10, 482-498.	2.4	6
13	Individuals with Autistic Traits Exhibit Heightened Alexithymia But Intact Interoceptive-Exteroceptive Sensory Integration. <i>Journal of Autism and Developmental Disorders</i> , 2022, 52, 3142-3152.	1.7	3
14	The past and future of mapping the biomarkers of psychosis. <i>Current Opinion in Behavioral Sciences</i> , 2022, 43, 1-5.	2.0	4
15	Hub-connected functional connectivity within social brain network weakens the association with real-life social network in schizophrenia patients. <i>European Archives of Psychiatry and Clinical Neuroscience</i> , 2022, 272, 1033-1043.	1.8	5
16	Longitudinal bifactor modeling of anxiety, depression and schizotypy - The role of rumination as a shared mechanism. <i>Schizophrenia Research</i> , 2022, 240, 153-161.	1.1	4
17	Food pleasure across nations: A comparison of the drivers between Chinese and Danish populations. <i>Food Quality and Preference</i> , 2022, 97, 104493.	2.3	4
18	Subclinical psychopathology and affective forecasting: Role of in-the-moment feelings. <i>PsyCh Journal</i> , 2022, 11, 317-326.	0.5	2

#	ARTICLE	IF	CITATIONS
19	The Important Role of Motivation and Pleasure Deficits on Social Functioning in Patients With Schizophrenia: A Network Analysis. <i>Schizophrenia Bulletin</i> , 2022, 48, 860-870.	2.3	16
20	Decreased interoceptive accuracy in children with autism spectrum disorder and with comorbid attention deficit/hyperactivity disorder. <i>Autism Research</i> , 2022, 15, 729-739.	2.1	5
21	Shared and distinct reward neural mechanisms among patients with schizophrenia, major depressive disorder, and bipolar disorder: an effort-based functional imaging study. <i>European Archives of Psychiatry and Clinical Neuroscience</i> , 2022, 272, 859-871.	1.8	8
22	Prospective Memory Influences Social Functioning in People With First-Episode Schizophrenia. <i>Journal of Clinical Psychiatry</i> , 2022, 83, .	1.1	5
23	â€œSoundâ€•Decisions: The Combined Role of Ambient Noise and Cognitive Regulation on the Neurophysiology of Food Cravings. <i>Frontiers in Neuroscience</i> , 2022, 16, 827021.	1.4	5
24	The relationship between schizotypal traits and satisfaction with life among Chinese young adults: The mediating effect of trait anxiety and mind wandering. <i>PsyCh Journal</i> , 2022, 11, 310-316.	0.5	5
25	Promoting computational psychiatry in China. <i>Nature Human Behaviour</i> , 2022, 6, 615-617.	6.2	5
26	The importance of studying psychopathology in subclinical populations. <i>PsyCh Journal</i> , 2022, 11, 147-148.	0.5	4
27	Audiovisual synchrony detection for fluent speech in early childhood: An eye-tracking study. <i>PsyCh Journal</i> , 2022, 11, 409-418.	0.5	1
28	Mapping genomic loci implicates genes and synaptic biology in schizophrenia. <i>Nature</i> , 2022, 604, 502-508.	13.7	929
29	Validity and normative data of the Chinese Prospective and Retrospective Memory Questionnaire (PRMQ) across adolescence, adults and elderly people. <i>Memory</i> , 2022, 30, 344-353.	0.9	6
30	The role of the SLC6A3 3' UTR VNTR in nicotine effects on cognitive, affective, and motor function. <i>Psychopharmacology</i> , 2022, 239, 489-507.	1.5	4
31	Structural network alterations and their association with neurological soft signs in schizophrenia: Evidence from clinical patients and unaffected siblings. <i>Schizophrenia Research</i> , 2022, 248, 345-352.	1.1	3
32	Mediating role of emotion regulation in the relationship between schizotypy and empathy. <i>PsyCh Journal</i> , 2022, , .	0.5	1
33	A network analysis on the relationship between loneliness and schizotypy. <i>Journal of Affective Disorders</i> , 2022, , .	2.0	5
34	Theories and models of negative symptoms in schizophrenia and clinical implications. , 2022, 1, 454-467.		9
35	Neurological Signs at the First Psychotic Episode as Correlates of Long-Term Outcome: Results From the AESOP-10 Study. <i>Schizophrenia Bulletin</i> , 2021, 47, 118-127.	2.3	20
36	Correlations Between Audiovisual Temporal Processing and Sensory Responsiveness in Adolescents with Autistic Traits. <i>Journal of Autism and Developmental Disorders</i> , 2021, 51, 2450-2460.	1.7	4

#	ARTICLE	IF	CITATIONS
37	Comparing motor imagery and verbal rehearsal strategies in children's ability to follow spoken instructions. <i>Journal of Experimental Child Psychology</i> , 2021, 203, 105033.	0.7	6
38	Neural Correlates of Audiovisual Temporal Binding Window in Individuals With Schizotypal and Autistic Traits: Evidence From Resting-State Functional Connectivity. <i>Autism Research</i> , 2021, 14, 668-680.	2.1	6
39	Neurological Soft Signs Are Associated With Altered Cerebellar-Cerebral Functional Connectivity in Schizophrenia. <i>Schizophrenia Bulletin</i> , 2021, 47, 1452-1462.	2.3	18
40	Cerebellar hypoactivation is associated with impaired sensory integration in schizophrenia.. <i>Journal of Abnormal Psychology</i> , 2021, 130, 102-111.	2.0	11
41	Schizophrenia patients with poor clinical insight report less subjective memory problems. <i>PsyCh Journal</i> , 2021, 10, 437-443.	0.5	2
42	Visual short-term memory and attention: An investigation of familiarity and stroke count in Chinese characters.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2021, 47, 282-294.	0.7	6
43	The benefits of emotionally salient cues on event-based prospective memory in bipolar patients and schizophrenia patients. <i>European Archives of Psychiatry and Clinical Neuroscience</i> , 2021, 271, 1503-1511.	1.8	3
44	The effect of effort-reward imbalance on brain structure and resting-state functional connectivity in individuals with high levels of schizotypal traits. <i>Cognitive Neuropsychiatry</i> , 2021, 26, 166-182.	0.7	3
45	Network analysis of executive function, emotion, and social anhedonia. <i>PsyCh Journal</i> , 2021, , .	0.5	4
46	Altered cortico-striatal functional connectivity in people with high levels of schizotypy: A longitudinal resting-state study. <i>Asian Journal of Psychiatry</i> , 2021, 58, 102621.	0.9	3
47	An ERP study on proactive and reactive response inhibition in individuals with schizotypy. <i>Scientific Reports</i> , 2021, 11, 8394.	1.6	6
48	Different trajectories of neurological soft signs progression between treatment-responsive and treatment-resistant schizophrenia patients. <i>Journal of Psychiatric Research</i> , 2021, 138, 607-614.	1.5	4
49	Social brain network correlates with real-life social network in individuals with schizophrenia and social anhedonia. <i>Schizophrenia Research</i> , 2021, 232, 77-84.	1.1	8
50	Cognitive insight is correlated with cognitive impairments and contributes to medication adherence in schizophrenia patients. <i>Asian Journal of Psychiatry</i> , 2021, 60, 102644.	0.9	7
51	Latent structure of self-report negative symptoms in patients with schizophrenia: A preliminary study. <i>Asian Journal of Psychiatry</i> , 2021, 61, 102680.	0.9	10
52	Convergent validity of the Chinese version of the Multidimensional Schizotypy Scale. <i>Asian Journal of Psychiatry</i> , 2021, 61, 102671.	0.9	2
53	Investigation of structural brain correlates of neurological soft signs in individuals at ultra-high risk for psychosis. <i>European Archives of Psychiatry and Clinical Neuroscience</i> , 2021, 271, 1475-1485.	1.8	0
54	Range-Adaptive Value Representation in Different Stages of Schizophrenia: A Proof of Concept Study. <i>Schizophrenia Bulletin</i> , 2021, 47, 1524-1533.	2.3	6

#	ARTICLE	IF	CITATIONS
55	A Conceptual Framework for Multi-Dimensional Measurements of Food Related Pleasure—The Food Pleasure Scale. <i>Foods</i> , 2021, 10, 2044.	1.9	8
56	Striatal GABA level is associated with sensory integration ability in individuals with low levels of negative schizotypy. <i>PsyCh Journal</i> , 2021, , .	0.5	0
57	Volition in prospective Memory: Evidence against differences between free and fixed target events. <i>Consciousness and Cognition</i> , 2021, 94, 103175.	0.8	0
58	Sounds Healthy: Modelling sound-evoked consumer food choice through visual attention. <i>Appetite</i> , 2021, 164, 105264.	1.8	18
59	Social brain network predicts real-world social network in individuals with social anhedonia. <i>Psychiatry Research - Neuroimaging</i> , 2021, 317, 111390.	0.9	6
60	Deficits in maintenance and interference control of working memory in major depression: evidence from the visuospatial change detection task. <i>Cognitive Neuropsychiatry</i> , 2021, 26, 122-135.	0.7	4
61	Dissociation of Proactive and Reactive Cognitive Control in Individuals with Schizotypy: An Event-Related Potential Study. <i>Journal of the International Neuropsychological Society</i> , 2021, 27, 981-991.	1.2	5
62	Glutamate correlates negatively with cognitive theory of mind in schizotypy. <i>PsyCh Journal</i> , 2021, , .	0.5	0
63	Neural mechanisms of prospection in individuals with schizotypal traits, autistic traits, or depressive symptoms.. <i>Journal of Abnormal Psychology</i> , 2021, 130, 807-814.	2.0	3
64	Negative belief-updating bias for positive daily life events in individuals with schizophrenia and social anhedonia. <i>Cognitive Neuropsychiatry</i> , 2021, , 1-18.	0.7	4
65	Identifying Schizo-Obsessive Comorbidity by Tract-Based Spatial Statistics and Probabilistic Tractography. <i>Schizophrenia Bulletin</i> , 2020, 46, 442-453.	2.3	9
66	Generalizability of machine learning for classification of schizophrenia based on resting-state functional MRI data. <i>Human Brain Mapping</i> , 2020, 41, 172-184.	1.9	44
67	Affective forecasting in individuals with social anhedonia: The role of social components in anticipated emotion, prospection and neural activation. <i>Schizophrenia Research</i> , 2020, 215, 322-329.	1.1	25
68	Impact of long-term institutionalization on experiential pleasure and motivation in patients with schizophrenia. <i>PsyCh Journal</i> , 2020, 9, 77-86.	0.5	2
69	High incentive salience promotes motivation and pleasure experience. <i>PsyCh Journal</i> , 2020, 9, 150-152.	0.5	2
70	Effort—cost computation in a transdiagnostic psychiatric sample: Differences among patients with schizophrenia, bipolar disorder, and major depressive disorder. <i>PsyCh Journal</i> , 2020, 9, 210-222.	0.5	29
71	Differential profiles of response inhibition deficit between male children with autism spectrum disorders and schizophrenia. <i>Autism Research</i> , 2020, 13, 591-602.	2.1	7
72	Network structure of anticipatory pleasure and risk features: Evidence from a large college sample. <i>PsyCh Journal</i> , 2020, 9, 223-233.	0.5	7

#	ARTICLE	IF	CITATIONS
73	Revisiting anticipatory hedonic processing in patients with schizophrenia: An examination between representation activation and maintenance. <i>Schizophrenia Research</i> , 2020, 216, 138-146.	1.1	3
74	Audiovisual temporal integration and rapid temporal recalibration in adolescents and adults: Age-related changes and its correlation with autistic traits. <i>Autism Research</i> , 2020, 13, 615-626.	2.1	7
75	Semantic processing event-related potential features in patients with schizophrenia and bipolar disorder. <i>PsyCh Journal</i> , 2020, 9, 247-257.	0.5	5
76	Neurological Soft Signs and Brain Network Abnormalities in Schizophrenia. <i>Schizophrenia Bulletin</i> , 2020, 46, 562-571.	2.3	26
77	The effect of implementation intentions on prospective memory performance in patients with schizophrenia: A multinomial modeling approach. <i>Schizophrenia Research</i> , 2020, 215, 120-125.	1.1	5
78	Impaired olfactory identification and hedonic judgment in schizophrenia patients with prominent negative symptoms. <i>Cognitive Neuropsychiatry</i> , 2020, 25, 126-138.	0.7	9
79	M158. ASSOCIATIONS OF NEUROLOGICAL SOFT SIGNS AND CEREBELLAR-CEREBRAL FUNCTIONAL CONNECTIVITY IN PATIENTS WITH FIRST-EPISEDE SCHIZOPHRENIA AND THEIR UNAFFECTED SIBLINGS. <i>Schizophrenia Bulletin</i> , 2020, 46, S196-S196.	2.3	0
80	M165. CEREBELLAR VOLUMES REDUCED IN PATIENTS WITH SCHIZOPHRENIA BASED ON ANATOMICAL, TASK-FREE AND TASK-BASED FUNCTIONAL PARCELLATIONS. <i>Schizophrenia Bulletin</i> , 2020, 46, S199-S199.	2.3	0
81	Altered default mode network functional connectivity in individuals with co-occurrence of schizotypy and obsessive-compulsive traits. <i>Psychiatry Research - Neuroimaging</i> , 2020, 305, 111170.	0.9	6
82	Applying network analysis to investigate the links between dimensional schizotypy and cognitive and affective empathy. <i>Journal of Affective Disorders</i> , 2020, 277, 313-321.	2.0	10
83	Grey matter volume and structural covariance associated with schizotypy. <i>Schizophrenia Research</i> , 2020, 224, 88-94.	1.1	6
84	Self-reported sensory responsiveness patterns in typically-developing and early-onset schizophrenia adolescents: Its relationship with schizotypal and autistic traits. <i>Journal of Psychiatric Research</i> , 2020, 131, 255-262.	1.5	10
85	Schizotypal and obsessive-compulsive traits: Co-occurrence rate and relationship with executive function, emotion experience, and emotion expressivity in college students. <i>PsyCh Journal</i> , 2020, 9, 749-759.	0.5	5
86	Validation of the Questionnaire of Cognitive and Affective Empathy in patients with schizophrenia, major depressive disorder and bipolar disorder. <i>Cognitive Neuropsychiatry</i> , 2020, 25, 466-479.	0.7	2
87	Resting frontal EEG asymmetry and schizotypal traits: a test-retest study. <i>Cognitive Neuropsychiatry</i> , 2020, 25, 333-347.	0.7	4
88	The Effects of Ethnically Congruent Music on Eye Movements and Food Choice—A Cross-Cultural Comparison between Danish and Chinese Consumers. <i>Foods</i> , 2020, 9, 1109.	1.9	13
89	Evidence in cortical folding patterns for prenatal predispositions to hallucinations in schizophrenia. <i>Translational Psychiatry</i> , 2020, 10, 387.	2.4	17
90	Clinical Implication of Brain Asymmetries in Psychiatric Disorders. <i>Biological Psychiatry</i> , 2020, 87, 1014-1016.	0.7	2

#	ARTICLE	IF	CITATIONS
91	Post-Ingestive Sensations Driving Post-Ingestive Food Pleasure: A Cross-Cultural Consumer Study Comparing Denmark and China. <i>Foods</i> , 2020, 9, 617.	1.9	8
92	Structural and functional brain abnormalities in children with schizotypal disorder: a pilot study. <i>NPJ Schizophrenia</i> , 2020, 6, 6.	2.0	2
93	Validation and extension of the Motivation and Pleasure Scale-Self Report (MAP-SR) across the schizophrenia spectrum in the Chinese context. <i>Asian Journal of Psychiatry</i> , 2020, 49, 101971.	0.9	12
94	Altered cerebellocerebral structural covariance in individuals with attenuated psychosis syndrome. <i>Asian Journal of Psychiatry</i> , 2020, 53, 102238.	0.9	1
95	Audiovisual temporal integration: Cognitive processing, neural mechanisms, developmental trajectory and potential interventions. <i>Neuropsychologia</i> , 2020, 140, 107396.	0.7	37
96	The thinner the better: Evidence on the internalization of the slimness ideal in Chinese college students. <i>PsyCh Journal</i> , 2020, 9, 544-552.	0.5	12
97	Social anhedonia across mental disorders: A validation study of the Anticipatory and Consummatory Interpersonal Pleasure Scale. <i>PsyCh Journal</i> , 2020, 9, 160-162.	0.5	6
98	Altered brain white matter microstructural asymmetry in children with ADHD. <i>Psychiatry Research</i> , 2020, 285, 112817.	1.7	11
99	Exploring the links between alexithymia, empathy and schizotypy in college students using network analysis. <i>Cognitive Neuropsychiatry</i> , 2020, 25, 245-253.	0.7	14
100	Validation of the Chinese version of the Multidimensional Schizotypy Scale (MSS): Convergent evidence from exploratory and confirmatory factor analyses. <i>Asian Journal of Psychiatry</i> , 2020, 51, 102057.	0.9	7
101	Transdiagnostic study of mental disorders. <i>PsyCh Journal</i> , 2020, 9, 157-159.	0.5	0
102	Altered grey matter volume and white matter integrity in individuals with high schizo-obsessive traits, high schizotypal traits and obsessive-compulsive symptoms. <i>Asian Journal of Psychiatry</i> , 2020, 52, 102096.	0.9	9
103	The influence of taste-congruent soundtracks on visual attention and food choice: A cross-cultural eye-tracking study in Chinese and Danish consumers. <i>Food Quality and Preference</i> , 2020, 85, 103962.	2.3	34
104	Emotionâ€“behavior decoupling in individuals with schizophrenia, bipolar disorder, and major depressive disorder.. <i>Journal of Abnormal Psychology</i> , 2020, 129, 331-342.	2.0	8
105	Emotional Expressivity Scale. , 2020, , 1303-1305.		0
106	The Most Commonly Used Instruments in Research on Functioning in Schizophrenia. <i>European Psychologist</i> , 2020, 25, 283-292.	1.8	6
107	Hayling Sentence Completion Test. , 2020, , 1910-1913.		0
108	Tractography-based classification in distinguishing patients with first-episode schizophrenia from healthy individuals. <i>Progress in Neuro-Psychopharmacology and Biological Psychiatry</i> , 2019, 88, 66-73.	2.5	23

#	ARTICLE	IF	CITATIONS
109	Revisiting the overlap between autistic and schizotypal traits in the non-clinical population using meta-analysis and network analysis. <i>Schizophrenia Research</i> , 2019, 212, 6-14.	1.1	34
110	Classification of social anhedonia using temporal and spatial network features from a social cognition fMRI task. <i>Human Brain Mapping</i> , 2019, 40, 4965-4981.	1.9	12
111	Network analysis of schizotypal personality traits and their association with other subclinical psychiatric features. <i>Asian Journal of Psychiatry</i> , 2019, 44, 209-216.	0.9	19
112	Inheritance of Neural Substrates for Motivation and Pleasure. <i>Psychological Science</i> , 2019, 30, 1205-1217.	1.8	9
113	Mind wandering in schizophrenia: A thought-sampling study. <i>Consciousness and Cognition</i> , 2019, 74, 102774.	0.8	6
114	Modification and validation of a performance-based functional capacity instrument for individuals with schizophrenia. <i>Psychiatry Research</i> , 2019, 281, 112572.	1.7	0
115	Associations of cortical thickness, surface area and subcortical volumes with insight in drug-naïve adults with obsessive-compulsive disorder. <i>NeuroImage: Clinical</i> , 2019, 24, 102037.	1.4	12
116	Worry and metacognitions as predictors of the development of anxiety and paranoia. <i>Scientific Reports</i> , 2019, 9, 14723.	1.6	13
117	Neural correlates of prospection impairments in schizophrenia: Evidence from voxel-based morphometry analysis. <i>Psychiatry Research - Neuroimaging</i> , 2019, 293, 110987.	0.9	4
118	Working memory training can improve anhedonia in college students with subsyndromal depressive symptoms. <i>PsyCh Journal</i> , 2019, 8, 401-410.	0.5	8
119	F15. NEGATIVE BELIEF UPDATING BIAS FOR POSITIVE LIFE EVENTS IN PATIENTS WITH SCHIZOPHRENIA. <i>Schizophrenia Bulletin</i> , 2019, 45, S259-S260.	2.3	0
120	S85. INDIVIDUALS WITH POSITIVE AND NEGATIVE SCHIZOTYPY EXHIBIT A REVERSED PATTERN OF THALAMIC-CEREBELLAR BRAIN CONNECTIVITY. <i>Schizophrenia Bulletin</i> , 2019, 45, S339-S340.	2.3	0
121	Searchlight classification based on Amplitude of Low Frequency Fluctuation and functional connectivity in individuals with obsessive-compulsive symptoms. <i>Cognitive Neuropsychiatry</i> , 2019, 24, 322-334.	0.7	6
122	A Cross-Cultural Examination of the Experiences in Close Relationships â€” Revised â€” General Short Form (ECR-R-GSF) in an Australian and a Chinese Sample. <i>Journal of Relationships Research</i> , 2019, 10, .	0.6	3
123	Association between Maltreatment, Positive Parentâ€”Child Interaction, and Psychosocial Well-Being in Young Children. <i>Journal of Pediatrics</i> , 2019, 213, 180-186.e1.	0.9	19
124	The remediation effects of working memory training in schizophrenia patients with prominent negative symptoms. <i>Cognitive Neuropsychiatry</i> , 2019, 24, 434-453.	0.7	6
125	Affective forecasting and accuracy in social anhedonia: Predicted and experienced emotion for a social interaction. <i>Journal of Clinical Psychology</i> , 2019, 75, 1684-1700.	1.0	14
126	The role of hedonics in the Human Affectome. <i>Neuroscience and Biobehavioral Reviews</i> , 2019, 102, 221-241.	2.9	38

#	ARTICLE	IF	CITATIONS
127	Validation and extension of the Questionnaire of Cognitive and Affective Empathy in the Chinese setting. <i>PsyCh Journal</i> , 2019, 8, 439-448.	0.5	28
128	The interaction between positive schizotypy and high sensitivity C-reactive protein on response inhibition in female individuals. <i>Psychiatry Research</i> , 2019, 274, 365-371.	1.7	5
129	Cultureâ€“Sex Interaction and the Self-Report Empathy in Australians and Mainland Chinese. <i>Frontiers in Psychology</i> , 2019, 10, 396.	1.1	22
130	Humour processing deficits in individuals with social anhedonia. <i>Psychiatry Research</i> , 2019, 275, 345-350.	1.7	4
131	S38. SCHIZOPHRENIA PATIENTS WITH PROMINENT NEGATIVE SYMPTOMS HAVE MORE SEVERE OLFACTORY IDENTIFICATION IMPAIRMENTS THAN SCHIZOPHRENIA PATIENTS WITHOUT PROMINENT NEGATIVE SYMPTOMS. <i>Schizophrenia Bulletin</i> , 2019, 45, S320-S321.	2.3	0
132	Populationâ€“based identityâ€“byâ€“descent mapping combined with exome sequencing to detect rare risk variants for schizophrenia. <i>American Journal of Medical Genetics Part B: Neuropsychiatric Genetics</i> , 2019, 180, 223-231.	1.1	2
133	Functional connectivity of the default mode network is associated with prospection in schizophrenia patients and individuals with social anhedonia. <i>Progress in Neuro-Psychopharmacology and Biological Psychiatry</i> , 2019, 92, 412-420.	2.5	24
