citing authors

#	ARTICLE	IF	CITATIONS
1	Clinical and Microbiological Outcomes Associated With Use of Platelet-Rich Plasma in Chronic Venous Leg Ulcers. <i>Journal of Wound, Ostomy and Continence Nursing</i> , 2021, 48, 292-299.	1.0	5
2	Avaliação da eficácia de biocidas na remoção de biofilmes produzidos por <i>Pseudomonas aeruginosa</i> multidroga resistentes. <i>Research, Society and Development</i> , 2020, 9, e83996975.	0.1	0
3	Ciprofloxacin-Resistant <i>Kerstersia gyiorum</i> Isolated From a Chronic Wound in Brazil: A Case Report. <i>Wound Management and Prevention</i> , 2020, 66, 42-45.	0.5	0
4	Monitoring and Molecular Characterization of <i>Staphylococcus aureus</i> Isolated from Chronic Wounds. <i>Advances in Skin and Wound Care</i> , 2018, 31, 399-405.	1.0	7
5	Molecular characterization of multidrug-resistant (MDR) <i>Pseudomonas aeruginosa</i> isolated in a burn center. <i>Burns</i> , 2017, 43, 137-143.	1.9	42
6	Production of metallo- $\beta$ -lactamase among <i>Pseudomonas aeruginosa</i> strains isolated in the State of Sergipe, Brazil. <i>Revista Da Sociedade Brasileira De Medicina Tropical</i> , 2015, 48, 212-215.	0.9	3
7	Influence of papain in biofilm formed by methicillin-resistant <i>Staphylococcus epidermidis</i> and methicillin-resistant <i>Staphylococcus haemolyticus</i> isolates. <i>Brazilian Journal of Pharmaceutical Sciences</i> , 2014, 50, 261-267.	1.2	10
8	The antimicrobial susceptibility, biofilm formation and genotypic profiles of <i>Staphylococcus haemolyticus</i> from bloodstream infections. <i>Memorias Do Instituto Oswaldo Cruz</i> , 2013, 108, 812-813.	1.6	36
9	Prevalence, aetiology and antibiotic resistance profiles of coagulase negative staphylococci isolated in a teaching hospital. <i>Brazilian Journal of Microbiology</i> , 2011, 42, 248-255.	2.0	13
10	Comparison of different methods for detecting methicillin resistance in MRSA isolates belonging to international lineages commonly isolated in the American continent. <i>Microbiology and Immunology</i> , 2009, 53, 117-122.	1.4	5
11	Emergence of multiresistant variants of the community-acquired methicillin-resistant <i>Staphylococcus aureus</i> lineage ST1-SCCmecIV in 2 hospitals in Rio de Janeiro, Brazil. <i>Diagnostic Microbiology and Infectious Disease</i> , 2009, 65, 300-305.	1.8	38
12	Detection and characterization of international community-acquired infections by methicillin-resistant <i>Staphylococcus aureus</i> clones in Rio de Janeiro and Porto Alegre cities causing both community- and hospital-associated diseases. <i>Diagnostic Microbiology and Infectious Disease</i> , 2007, 59, 339-345.	1.8	47
13	Commensal isolates of methicillin-resistant <i>Staphylococcus epidermidis</i> are also well equipped to produce biofilm on polystyrene surfaces. <i>Journal of Antimicrobial Chemotherapy</i> , 2006, 57, 855-864.	3.0	63
14	The Predominant Variant of the Brazilian Epidemic Clonal Complex of Methicillin-Resistant <i>Staphylococcus aureus</i> Has an Enhanced Ability to Produce Biofilm and to Adhere to and Invade Airway Epithelial Cells. <i>Journal of Infectious Diseases</i> , 2005, 192, 801-810.	4.0	118
15	Isolation of methicillin-resistant coagulase-negative staphylococci from patients undergoing continuous ambulatory peritoneal dialysis (CAPD) and comparison of different molecular techniques for discriminating isolates of <i>Staphylococcus epidermidis</i> . <i>Diagnostic Microbiology and Infectious Disease</i> , 2003, 45, 13-22.	1.8	34
16	Analysis of different molecular methods for typing methicillin-resistant <i>Staphylococcus aureus</i> isolates belonging to the Brazilian epidemic clone. <i>Journal of Medical Microbiology</i> , 2001, 50, 732-742.	1.8	28
17	Spread of the Brazilian epidemic clone of a multiresistant MRSA in two cities in Argentina. <i>Journal of Medical Microbiology</i> , 2000, 49, 187-192.	1.8	31
