citing authors

#	ARTICLE	IF	CITATIONS
1	Initiation of feeding by four sympatric Neotropical primates ( <i>Ateles belzebuth</i> , <i>Lagothrix lagotricha</i> ) Tj ETQq1 1 0.784314 rgBT /Overl Relationships to photic and ecological factors. PLoS ONE, 2019, 14, e0210494.	1.1	11
2	Eye movements between saccades: Measuring ocular drift and tremor. Vision Research, 2016, 122, 93-104.	0.7	66
3	A physiological perspective on fixational eye movements. Vision Research, 2016, 118, 31-47.	0.7	24
4	Joint Associations of Diet, Lifestyle, and Genes with Age-Related Macular Degeneration. Ophthalmology, 2015, 122, 2286-2294.	2.5	44
5	Characterizing ocular drift and tremor: contributions to the retinal input. Journal of Vision, 2015, 15, 214.	0.1	0
6	Primate area V1. NeuroReport, 2014, 25, 1109-1115.	0.6	13
7	Macular lutein and zeaxanthin are related to brain lutein and zeaxanthin in primates. Nutritional Neuroscience, 2013, 16, 21-29.	1.5	125
8	Enhancing Performance While Avoiding Damage: A Contribution of Macular Pigment. , 2013, 54, 6298.		14
9	Physiological differences between neurons in layer 2 and layer 3 of primary visual cortex (V1) of alert macaque monkeys. Journal of Physiology, 2008, 586, 2293-2306.	1.3	32
10	Macular Pigment Density and Age-Related Maculopathy in the Carotenoids in Age-Related Eye Disease Study. Ophthalmology, 2008, 115, 876-883.e1.	2.5	74
11	Spatial Profile of Macular Pigment and Its Relationship to Foveal Architecture. , 2008, 49, 2134.		84
12	Saccades and drifts differentially modulate neuronal activity in V1: Effects of retinal image motion, position, and extraretinal influences. Journal of Vision, 2008, 8, 19-19.	0.1	110
13	Eye Position Compensation Improves Estimates of Response Magnitude and Receptive Field Geometry in Alert Monkeys. Journal of Neurophysiology, 2007, 97, 3439-3448.	0.9	15
14	Direction selectivity in V1 of alert monkeys: evidence for parallel pathways for motion processing. Journal of Physiology, 2007, 585, 383-400.	1.3	34
15	Compensation for Light Loss Resulting From Filtering by Macular Pigment: Relation to the S-Cone Pathway. Optometry and Vision Science, 2006, 83, 887-894.	0.6	29
16	High Response Reliability of Neurons in Primary Visual Cortex (V1) of Alert, Trained Monkeys. Cerebral Cortex, 2006, 16, 888-895.	1.6	74
17	Orientation and Direction Selectivity of Neurons in V1 of Alert Monkeys: Functional Relationships and Laminal Distributions. Cerebral Cortex, 2005, 15, 1207-1221.	1.6	141
18	Nutritional manipulation of primate retinas. IV. Effects of $\omega$ -3 fatty acids, lutein, and zeaxanthin on S-cones and rods in the foveal region. Experimental Eye Research, 2005, 81, 513-529.	1.2	30

#	ARTICLE	IF	CITATIONS
19	Nutritional Manipulation of Primate Retinas, II: Effects of Age, $\omega$ -3 Fatty Acids, Lutein, and Zeaxanthin on Retinal Pigment Epithelium. , 2004, 45, 3244.		76
20	Macular Pigment Measurement by Heterochromatic Flicker Photometry in Older Subjects: The Carotenoids and Age-Related Eye Disease Study. , 2004, 45, 531.		129
21	Nutritional Manipulation of Primate Retinas, I: Effects of Lutein or Zeaxanthin Supplements on Serum and Macular Pigment in Xanthophyll-Free Rhesus Monkeys. , 2004, 45, 3234.		107
22	Spatial Organization of Receptive Fields of V1 Neurons of Alert Monkeys: Comparison With Responses to Gratings. Journal of Neurophysiology, 2002, 88, 2557-2574.	0.9	75
23	Macular pigment density measured by autofluorescence spectrometry: comparison with reflectometry and heterochromatic flicker photometry. Journal of the Optical Society of America A: Optics and Image Science, and Vision, 2001, 18, 1212.	0.8	258
24	Selective activation of visual cortex neurons by fixational eye movements: Implications for neural coding. Visual Neuroscience, 2001, 18, 259-277.	0.5	121
25	Iris color and age-related changes in lens optical density. Ophthalmic and Physiological Optics, 2000, 20, 381-386.	1.0	11
26	Physiological Properties of Macaque V1 Neurons are Correlated With Extracellular Spike Amplitude, Duration, and Polarity. Journal of Neurophysiology, 1999, 82, 1451-1464.	0.9	38
27	Density of the Human Crystalline Lens is Related to the Macular Pigment Carotenoids, Lutein and Zeaxanthin. Optometry and Vision Science, 1997, 74, 499-504.	0.6	85
28	Dietary Manipulation of Plasma Carotenoid Concentrations of Squirrel Monkeys ( <i>Saimiri sciureus</i> ) ,. Journal of Nutrition, 1997, 127, 122-129.	1.3	7
29	Response Variability of Neurons in Primary Visual Cortex (V1) of Alert Monkeys. Journal of Neuroscience, 1997, 17, 2914-2920.	1.7	234
30	Comparison of fluorescein angiography with microvascular anatomy of macaque retinas. Experimental Eye Research, 1995, 61, 1-16.	1.2	154
31	[19] Measurement of carotenoids in human and monkey retinas. Methods in Enzymology, 1992, 213, 220-230.	0.4	62
32	Retinal vasculature of the fovea of the squirrel monkey, <i>Saimiri sciureus</i> : Three-dimensional architecture, visual screening, and relationships to the neuronal layers. Journal of Comparative Neurology, 1990, 297, 145-163.	0.9	90
33	Plasma Carotenoids of Monkeys ( <i>Macaca fascicularis</i> and <i>Saimiri sciureus</i> ) Fed a Nonpurified Diet. Journal of Nutrition, 1990, 120, 1663-1671.	1.3	31
34	Structural and Geometrical Isomers of Carotenoids in Human Plasma. Journal of Nutrition, 1990, 120, 1654-1662.	1.3	115
35	Effects of light and dark environments on macaque and human fixational eye movements. Vision Research, 1987, 27, 401-415.	0.7	46
36	Studying striate cortex neurons in behaving monkeys: Benefits of image stabilization. Vision Research, 1987, 27, 2081-2087.	0.7	52

#	ARTICLE	IF	CITATIONS
37	Primate head and body restraint without chronic skin openings or attachments to the animal. Behavior Research Methods, 1985, 17, 391-396.	1.3	2
38	Mapping Retinal Features in a Freely Moving Eye with Precise Control of Retinal Stimulus Position. Springer Series in Optical Sciences, 1978, , 79-92.	0.5	5
39	Outline of a Primate Visual System. Advances in Behavioral Biology, 1974, , 93-149.	0.2	2
40	Projection of the Lateral Eye of Limulus to the Brain. Nature, 1970, 227, 284-286.	13.7	9
