#	Article	IF	CITATIONS
1	In a transitive group of conformai transformations, any normal subgroup with orbit of dimension k > 1 is inessential. Mathematical Notes, 2007, 82, 279-282.	0.4	О
2	A lorentz manifold with a group of conformal transformations possessing a normal one-parameter subgroup of homotheties. Siberian Mathematical Journal, 1997, 38, 1178-1181.	0.6	0
3	Gaussian and mean curvatures of two-dimensional subgroups of three-dimensional unimodular Lorentzian Lie groups. Siberian Mathematical Journal, 1995, 36, 338-342.	0.6	O
4	An equivalent definition of the strong causality of space-time. Siberian Mathematical Journal, 1992, 33, 354-355.	0.6	1
5	Conformally homogeneous Lorentz manifolds. II. Siberian Mathematical Journal, 1992, 33, 1087-1093.	0.6	5
6	On the paper ?A class of transformations of Lie groups?. Siberian Mathematical Journal, 1991, 31, 868-868.	0.6	0
7	A lorentzian manifold with a one-parameter group of homotheties which has a closed isotropic orbit. Siberian Mathematical Journal, 1990, 30, 771-773.	0.6	1
8	A class of transformations of Lie groups. Siberian Mathematical Journal, 1990, 30, 423-428.	0.6	1
