#	ARTICLE	IF	CITATIONS
1	The Fifth-Century AD Riverine Barge of Santa Maria in Padovetere (Ferrara, Italy): A Multidisciplinary Approach to its Environment and Shipbuilding Techniques. <i>Environmental Archaeology</i> , 2021, 26, 29-50.	1.2	3
2	Middle Pleistocene to Holocene palaeoenvironmental evolution of the south-eastern Alpine foreland basin from multi-proxy analysis. <i>Quaternary Science Reviews</i> , 2021, 259, 106908.	3.0	5
3	Seesaw longitudinalâ€”transverse drainage patterns driven by Middle and Late Pleistocene climate cycles in the foreland basin of the south-eastern European Alps. <i>Sedimentary Geology</i> , 2021, 421, 105960.	2.1	2
4	Integrating palaeo- and archaeobotanical data for a synthesis of the Italian fossil record of <i>Lycopus</i> (Lamiaceae, Mentheae). <i>Phytotaxa</i> , 2021, 513, .	0.3	1
5	Pollen and macroremains from Holocene archaeological sites: A dataset for the understanding of the bio-cultural diversity of the Italian landscape. <i>Review of Palaeobotany and Palynology</i> , 2015, 218, 250-266.	1.5	76
6	Late Quaternary glaciations and connections to the piedmont plain in the prealpine environment: The middle and lower Astico Valley (NE Italy). <i>Quaternary International</i> , 2013, 288, 8-24.	1.5	23
7	Tools for Non-Pollen Palynomorphs (NPPs) analysis: A list of Quaternary NPP types and reference literature in English language (1972â€”2011). <i>Review of Palaeobotany and Palynology</i> , 2012, 186, 142-161.	1.5	138
8	Holocene salt marsh plant communities in the North Adriatic coastal plain (Italy) as reflected by pollen, non-pollen palynomorphs and plant macrofossil analyses. <i>Vegetation History and Archaeobotany</i> , 2010, 19, 513-529.	2.1	14
9	Wetlands in the Venetian Po Plain (northeastern Italy) during the Last Glacial Maximum: Interplay between vegetation, hydrology and sedimentary environment. <i>Review of Palaeobotany and Palynology</i> , 2006, 141, 53-81.	1.5	72
