

Hossein Gholizadeh

List of Publications by Citations

Source: <https://exaly.com/author-pdf/405689/hossein-gholizadeh-publications-by-citations.pdf>

Version: 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
51	Evaluation of new suspension system for limb prosthetics. <i>BioMedical Engineering OnLine</i> , 2014 , 13, 1	4.1	73
50	Pistoning assessment in lower limb prosthetic sockets. <i>Prosthetics and Orthotics International</i> , 2012 , 36, 15-24	1.5	50
49	Transtibial prosthesis suspension systems: systematic review of literature. <i>Clinical Biomechanics</i> , 2014 , 29, 87-97	2.2	42
48	Qualitative study of prosthetic suspension systems on transtibial amputees: satisfaction and perceived problems with their prosthetic devices. <i>Archives of Physical Medicine and Rehabilitation</i> , 2012 , 93, 1919-23	2.8	41
47	Transtibial prosthetic socket pistoning: static evaluation of Seal-In(□) X5 and Dermo(□) Liner using motion analysis system. <i>Clinical Biomechanics</i> , 2012 , 27, 34-9	2.2	38
46	Clinical investigation of the interface pressure in the trans-tibial socket with Dermo and Seal-In X5 liner during walking and their effect on patient satisfaction. <i>Clinical Biomechanics</i> , 2012 , 27, 943-8	2.2	36
45	Review of the socket design and interface pressure measurement for transtibial prosthesis. <i>Scientific World Journal, The</i> , 2014 , 2014, 849073	2.2	30
44	Interface pressure in transtibial socket during ascent and descent on stairs and its effect on patient satisfaction. <i>Clinical Biomechanics</i> , 2013 , 28, 994-9	2.2	28
43	100 top-cited scientific papers in limb prosthetics. <i>BioMedical Engineering OnLine</i> , 2013 , 12, 119	4.1	28
42	Transtibial prosthetic suspension: less pistoning versus easy donning and doffing. <i>Journal of Rehabilitation Research and Development</i> , 2012 , 49, 1321-30		28
41	Transfemoral prosthesis suspension systems: a systematic review of the literature. <i>American Journal of Physical Medicine and Rehabilitation</i> , 2014 , 93, 809-23	2.6	27
40	Effective Strategies for Increasing Citation Frequency. <i>International Education Studies</i> , 2013 , 6,	1.3	26
39	The evidence-base for elevated vacuum in lower limb prosthetics: Literature review and professional feedback. <i>Clinical Biomechanics</i> , 2016 , 37, 108-116	2.2	25
38	An experimental study of the interface pressure profile during level walking of a new suspension system for lower limb amputees. <i>Clinical Biomechanics</i> , 2013 , 28, 55-60	2.2	24
37	Satisfaction and problems experienced with transfemoral suspension systems: a comparison between common suction socket and seal-in liner. <i>Archives of Physical Medicine and Rehabilitation</i> , 2013 , 94, 1584-9	2.8	22
36	Development of an air pneumatic suspension system for transtibial prostheses. <i>Sensors</i> , 2014 , 14, 16754-65	3.65	22
35	Gait biomechanics of individuals with transtibial amputation: effect of suspension system. <i>PLoS ONE</i> , 2014 , 9, e96988	3.7	21

34	A new approach for the pistoning measurement in transtibial prosthesis. <i>Prosthetics and Orthotics International</i> , 2011 , 35, 360-4	1.5	19
33	Clinical evaluation of two prosthetic suspension systems in a bilateral transtibial amputee. <i>American Journal of Physical Medicine and Rehabilitation</i> , 2012 , 91, 894-8	2.6	17
32	Postural stability characteristics of transtibial amputees wearing different prosthetic foot types when standing on various support surfaces. <i>Scientific World Journal, The</i> , 2014 , 2014, 856279	2.2	11
31	The effects of suction and pin/lock suspension systems on transtibial amputeesTgait performance. <i>PLoS ONE</i> , 2014 , 9, e94520	3.7	11
30	Prosthetics socket that incorporates an air splint system focusing on dynamic interface pressure. <i>BioMedical Engineering OnLine</i> , 2014 , 13, 108	4.1	10
29	Effect of arm motion on postural stability when recovering from a slip perturbation. <i>Journal of Biomechanics</i> , 2019 , 95, 109269	2.9	9
28	A comparison of pressure distributions between two types of sockets in a bulbous stump. <i>Prosthetics and Orthotics International</i> , 2016 , 40, 509-16	1.5	8
27	Development and evaluation of new coupling system for lower limb prostheses with acoustic alarm system. <i>Scientific Reports</i> , 2013 , 3, 2270	4.9	8
26	Improvement on upper limb body-powered prostheses (1921-2016): A systematic review. <i>Proceedings of the Institution of Mechanical Engineers, Part H: Journal of Engineering in Medicine</i> , 2018 , 232, 3-11	1.7	7
25	The influence of foot orthoses on foot mobility magnitude and arch height index in adults with flexible flat feet. <i>Prosthetics and Orthotics International</i> , 2015 , 39, 190-6	1.5	6
24	Comparison study of the prosthetics interface pressure profile of air splint socket and ICRC polypropylene socket for upper limb prosthetics. <i>Biocybernetics and Biomedical Engineering</i> , 2015 , 35, 100-105	5.7	6
23	Comparative study between Dermo, Pelite, and Seal-In X5 liners: effect on patient's satisfaction and perceived problems. <i>Scientific World Journal, The</i> , 2014 , 2014, 769810	2.2	6
22	Development and performance of a new prosthesis system using ultrasonic sensor for wrist movements: a preliminary study. <i>BioMedical Engineering OnLine</i> , 2014 , 13, 49	4.1	5
21	Biomechanics principle of elbow joint for transhumeral prostheses: comparison of normal hand, body-powered, myoelectric & air splint prostheses. <i>BioMedical Engineering OnLine</i> , 2014 , 13, 134	4.1	5
20	Evaluation of postural steadiness in below-knee amputees when wearing different prosthetic feet during various sensory conditions using the Biodex Stability System. <i>Proceedings of the Institution of Mechanical Engineers, Part H: Journal of Engineering in Medicine</i> , 2015 , 229, 491-8	1.7	4
19	Clinical evaluation of a prosthetic suspension system: Looped silicone liner. <i>Prosthetics and Orthotics International</i> , 2017 , 41, 476-483	1.5	4
18	Satisfaction and problems experienced with wrist movements: comparison between a common body-powered prosthesis and a new biomechatronics prosthesis. <i>American Journal of Physical Medicine and Rehabilitation</i> , 2014 , 93, 437-44	2.6	4
17	Effect of Milwaukee brace on static and dynamic balance of female hyperkyphotic adolescents. <i>Prosthetics and Orthotics International</i> , 2013 , 37, 76-84	1.5	4

16	Prosthesis donning and doffing questionnaire: Development and validation. <i>Prosthetics and Orthotics International</i> , 2017 , 41, 571-578	1.5	3
15	Transtibial amputee gait during slope walking with the unity suspension system. <i>Gait and Posture</i> , 2018 , 65, 205-212	2.6	3
14	Effects of the unity vacuum suspension system on transtibial gait for simulated non-level surfaces. <i>PLoS ONE</i> , 2018 , 13, e0199181	3.7	3
13	Clinical implication of interface pressure for a new prosthetic suspension system. <i>BioMedical Engineering OnLine</i> , 2014 , 13, 89	4.1	3
12	Effect of vacuum-assisted socket and pin suspensions on socket fit. <i>Archives of Physical Medicine and Rehabilitation</i> , 2012 , 93, 921	2.8	2
11	Comments on "Assessment of amputee socket-stump-residual bone kinematics during strenuous activities using Dynamic Roentgen Stereogrammetric Analysis" (Volume 43, Issue 5, 2010). <i>Journal of Biomechanics</i> , 2011 , 44, 2851-2	2.9	2
10	The effect of various arm and walking conditions on postural dynamic stability when recovering from a trip perturbation. <i>Gait and Posture</i> , 2020 , 76, 284-289	2.6	2
9	Video Game-Based Rehabilitation Approach for Individuals Who Have Undergone Upper Limb Amputation: Case-Control Study. <i>JMIR Serious Games</i> , 2021 , 9, e17017	3.4	2
8	An anthropomorphic transhumeral prosthesis socket developed based on an oscillometric pump and controlled by force-sensitive resistor pressure signals. <i>Biomedizinische Technik</i> , 2017 , 62, 49-55	1.3	1
7	Analysis of voluntary opening Ottobock Hook and Hosmer Hook for upper limb prosthetics: a preliminary study. <i>Biomedizinische Technik</i> , 2017 , 62, 447-454	1.3	1
6	Effect of stump flexion contracture with and without prosthetic alignment intervention towards postural stability among transtibial prosthesis users. <i>IOP Conference Series: Materials Science and Engineering</i> , 2017 , 210, 012002	0.4	1
5	Compression and tension behavior of the prosthetic foam materials polyurethane, EVA, Pelite [®] and a combination of polyurethane and EVA: a preliminary study. <i>Biomedizinische Technik</i> , 2021 , 66, 317-322	1.3	1
4	Transtibial amputee gait with the unity suspension system. <i>Disability and Rehabilitation: Assistive Technology</i> , 2020 , 15, 350-356	1.8	1
3	Hip disarticulation and hemipelvectomy prostheses: A review of the literature. <i>Prosthetics and Orthotics International</i> , 2021 , 45, 434-439	1.5	1
2	A review of history of CAD/CAM system application in the production of transtibial prosthetic socket in developing countries (from 1980 to 2019). <i>Proceedings of the Institution of Mechanical Engineers, Part H: Journal of Engineering in Medicine</i> , 2021 , 235, 1359-1374	1.7	0
1	Re: Re: "Quantitative and Qualitative Comparison of a New Prosthetic Suspension System with Two Existing Suspension Systems for Lower Limb Amputees". <i>American Journal of Physical Medicine and Rehabilitation</i> , 2015 , 94, e60	2.6
