#	ARTICLE	IF	CITATIONS
1	The performance of the National Early Warning Score and National Early Warning Score 2 in hospitalised patients infected by the severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). Resuscitation, 2021, 159, 150-157.	3.0	85
2	Observational study of the relationship between nurse staffing levels and compliance with mandatory nutritional assessments in hospital. Journal of Human Nutrition and Dietetics, 2021, 34, 679-686.	2.5	5
3	Impact of using data from electronic protocols in nursing performance management: A qualitative interview study. Journal of Nursing Management, 2019, 27, 1682-1690.	3.4	9
4	Reply to: NEWS2 needs to be tested in prospective trials involving patients with confirmed hypercapnia. Resuscitation, 2019, 139, 371-372.	3.0	0
5	The National Early Warning Score 2 (NEWS2). Clinical Medicine, 2019, 19, 260-260.	1.9	77
6	Nurse staffing, nursing assistants and hospital mortality: retrospective longitudinal cohort study. BMJ Quality and Safety, 2019, 28, 609-617.	3.7	211
7	A comparison of the ability of the National Early Warning Score and the National Early Warning Score 2 to identify patients at risk of in-hospital mortality: A multi-centre database study. Resuscitation, 2019, 134, 147-156.	3.0	104
8	A fundamental conflict of care: Nurses' accounts of balancing patients' sleep with taking vital sign observations at night. Journal of Clinical Nursing, 2018, 27, 1860-1871.	3.0	27
9	National Early Warning Score Accurately Discriminates the Risk of Serious Adverse Events in Patients With Liver Disease. Clinical Gastroenterology and Hepatology, 2018, 16, 1657-1666.e10.	4.4	14
10	Relationships between healthcare staff characteristics and the conduct of vital signs observations at night: Results of a survey and factor analysis. Nursing Open, 2018, 5, 621-633.	2.4	8
11	A Comparison of the Quick Sequential (Sepsis-Related) Organ Failure Assessment Score and the National Early Warning Score in Non-ICU Patients With/Without Infection. Critical Care Medicine, 2018, 46, 1923-1933.	0.9	58
12	Nurse staffing levels, missed vital signs and mortality in hospitals: retrospective longitudinal observational study. Health Services and Delivery Research, 2018, 6, 1-120.	1.4	69
13	Universal screening for alcohol misuse in acute medical admissions is feasible and identifies patients at high risk of liver disease. Journal of Hepatology, 2017, 67, 559-567.	3.7	31
14	A Comparison of the Ability of the Physiologic Components of Medical Emergency Team Criteria and the U.K. National Early Warning Score to Discriminate Patients at Risk of a Range of Adverse Clinical Outcomes*. Critical Care Medicine, 2016, 44, 2171-2181.	0.9	62
15	Early warning scores: unravelling detection and escalation. International Journal of Health Care Quality Assurance, 2015, 28, 872-875.	0.9	18
16	Can binary early warning scores perform as well as standard early warning scores for discriminating a patient's risk of cardiac arrest, death or unanticipated intensive care unit admission?. Resuscitation, 2015, 93, 46-52.	3.0	26
17	Impact of introducing an electronic physiological surveillance system on hospital mortality. BMJ Quality and Safety, 2015, 24, 176-177.	3.7	19
18	Are observation selection methods important when comparing early warning score performance?. Resuscitation, 2015, 90, 1-6.	3.0	25

#	ARTICLE	IF	CITATIONS
19	Impact of introducing an electronic physiological surveillance system on hospital mortality. <i>BMJ Quality and Safety</i> , 2015, 24, 10-20.	3.7	93
20	The ability of the National Early Warning Score (NEWS) to discriminate patients at risk of early cardiac arrest, unanticipated intensive care unit admission, and death. <i>Resuscitation</i> , 2013, 84, 465-470.	3.0	732
21	Patterns in the recording of vital signs and early warning scores: compliance with a clinical escalation protocol. <i>BMJ Quality and Safety</i> , 2013, 22, 719-726.	3.7	121
22	ViEWSâ€™ Towards a national early warning score for detecting adult inpatient deterioration. <i>Resuscitation</i> , 2010, 81, 932-937.	3.0	907
23	Review and performance evaluation of aggregate weighted â€œtrack and triggerâ€™™ systems. <i>Resuscitation</i> , 2008, 77, 170-179.	3.0	266
24	Calculating early warning scoresâ€™ A classroom comparison of pen and paper and hand-held computer methods. <i>Resuscitation</i> , 2006, 70, 173-178.	3.0	119
25	Hospital-wide physiological surveillanceâ€™ A new approach to the early identification and management of the sick patient. <i>Resuscitation</i> , 2006, 71, 19-28.	3.0	180
