

Hugo Soudeyns

List of Publications by Citations

Source: <https://exaly.com/author-pdf/410298/hugo-soudeyns-publications-by-citations.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
29	Early initiation of combination antiretroviral therapy in HIV-1-infected newborns can achieve sustained virologic suppression with low frequency of CD4+ T cells carrying HIV in peripheral blood. <i>Clinical Infectious Diseases</i> , 2014 , 59, 1012-9	11.6	66
28	Pathogenesis of hepatitis C during pregnancy and childhood. <i>Viruses</i> , 2012 , 4, 3531-50	6.2	55
27	Study of a novel hypervariable region in hepatitis C virus (HCV) E2 envelope glycoprotein. <i>Virology</i> , 2006 , 352, 357-67	3.6	47
26	LKM1 autoantibodies in chronic hepatitis C infection: a case of molecular mimicry?. <i>Hepatology</i> , 2005 , 42, 675-82	11.2	46
25	Complementary and contrasting roles of NK cells and T cells in pediatric umbilical cord blood transplantation. <i>Journal of Leukocyte Biology</i> , 2011 , 90, 49-60	6.5	23
24	Characterization of humoral and cell-mediated immune responses directed against hepatitis C virus F protein in subjects co-infected with hepatitis C virus and HIV-1. <i>Aids</i> , 2005 , 19, 775-84	3.5	23
23	Differing patterns of liver disease progression and hepatitis C virus (HCV) quasispecies evolution in children vertically coinfecting with HCV and human immunodeficiency virus type 1. <i>Journal of Clinical Microbiology</i> , 2004 , 42, 4365-9	9.7	21
22	CD8(+) T-cell reconstitution in recipients of umbilical cord blood transplantation and characteristics associated with leukemic relapse. <i>Blood</i> , 2011 , 118, 4480-8	2.2	19
21	Selective expansion of high functional avidity memory CD8 T cell clonotypes during hepatitis C virus reinfection and clearance. <i>PLoS Pathogens</i> , 2017 , 13, e1006191	7.6	19
20	Risk factors for pre-term birth in a Canadian cohort of HIV-positive women: role of ritonavir boosting?. <i>Journal of the International AIDS Society</i> , 2015 , 18, 19933	5.4	16
19	Vertical Transmission of Hepatitis C Virus: Variable Transmission Bottleneck and Evidence of Midgestation Infection. <i>Journal of Virology</i> , 2017 , 91,	6.6	15
18	HCV quasispecies evolution during treatment with interferon alfa-2b and ribavirin in two children coinfecting with HCV and HIV-1. <i>Journal of Clinical Virology</i> , 2008 , 43, 236-40	14.5	14
17	The Young and the Resistant: HIV-Infected Adolescents at the Time of Transfer to Adult Care. <i>Journal of the Pediatric Infectious Diseases Society</i> , 2013 , 2, 382-5	4.8	12
16	Umbilical cord blood T cells respond against the Melan-A/MART-1 tumor antigen and exhibit reduced alloreactivity as compared with adult blood-derived T cells. <i>Journal of Immunology</i> , 2010 , 185, 856-66	5.3	12
15	Reconstitution of protective immune responses against cytomegalovirus and varicella zoster virus does not require disease development in pediatric recipients of umbilical cord blood transplantation. <i>Journal of Immunology</i> , 2012 , 189, 5016-28	5.3	12
14	Seronegative hepatitis C virus infection in a child infected via mother-to-child transmission. <i>Journal of Clinical Microbiology</i> , 2012 , 50, 2515-9	9.7	11
13	Structural basis for broad neutralization of hepatitis C virus quasispecies. <i>PLoS ONE</i> , 2011 , 6, e26981	3.7	10

12	Rejection of leukemic cells requires antigen-specific T cells with high functional avidity. <i>Biology of Blood and Marrow Transplantation</i> , 2014 , 20, 37-45	4.7	8
11	Evaluation of the Immunomodulatory Properties of Streptococcus suis and Group B Streptococcus Capsular Polysaccharides on the Humoral Response. <i>Pathogens</i> , 2017 , 6,	4.5	7
10	Vertical transmission of hepatitis C virus: a tale of multiple outcomes. <i>Infection, Genetics and Evolution</i> , 2013 , 20, 465-70	4.5	7
9	Brief Report: Higher Levels of Angiotensin-1 Are Associated With Early and Sustained Viral Suppression in Children Living With Vertically Acquired HIV. <i>Journal of Acquired Immune Deficiency Syndromes (1999)</i> , 2019 , 80, 590-595	3.1	7
8	The mutational landscape of SARS-CoV-2 variants diversifies T cell targets in an HLA-supertype-dependent manner. <i>Cell Systems</i> , 2021 ,	10.6	6
7	Challenges to achieving and maintaining viral suppression among children living with HIV. <i>Aids</i> , 2020 , 34, 687-697	3.5	4
6	No association between early antiretroviral therapy during pregnancy and plasma levels of angiogenic factors: a cohort study. <i>BMC Pregnancy and Childbirth</i> , 2019 , 19, 482	3.2	3
5	Evolution of HIV-1 coreceptor usage and coreceptor switching during pregnancy. <i>AIDS Research and Human Retroviruses</i> , 2014 , 30, 312-24	1.6	2
4	Development of an IFN- γ ELISpot assay to assess varicella-zoster virus-specific cell-mediated immunity following umbilical cord blood transplantation. <i>Journal of Visualized Experiments</i> , 2014 ,	1.6	1
3	Quasispecies Diversity Is a Major Risk Factor for Vertical Hepatitis C Virus Transmission. <i>Journal of Infectious Diseases</i> , 2019 , 219, 760-771	7	1
2	Subtle differences in selective pressures applied on the envelope gene of HIV-1 in pregnant versus non-pregnant women. <i>Infection, Genetics and Evolution</i> , 2018 , 62, 141-150	4.5	
1	Melan-A-specific T cells derived from A2+ or A2-umbilical cord blood (UCB) units proliferate and exhibit specific cytolytic function following in vitro stimulation. <i>FASEB Journal</i> , 2008 , 22, 862.23	0.9
