#	ARTICLE	IF	CITATIONS
1	Psychometric examination of short forms from the University of Washington pain-related self-efficacy and concerns about pain item banks in patients with low back pain. <i>Quality of Life Research</i> , 2022, 31, 621-631.	1.5	2
2	Changes in Pain Catastrophizing and Fear-Avoidance Beliefs as Mediators of Early Physical Therapy on Disability and Pain in Acute Low-Back Pain: A Secondary Analysis of a Clinical Trial. <i>Pain Medicine</i> , 2022, 23, 1127-1137.	0.9	4
3	Associations Between Early Chiropractic Care and Physical Therapy on Subsequent Opioid Use Among Persons With Low Back Pain in Arkansas. <i>Journal of Chiropractic Medicine</i> , 2022, 21, 67-76.	0.3	5
4	Outcomes of Telehealth Physical Therapy Provided Using Real-Time, Videoconferencing for Patients With Chronic Low Back Pain: A Longitudinal Observational Study. <i>Archives of Physical Medicine and Rehabilitation</i> , 2022, 103, 1924-1934.	0.5	7
5	Self-Management of Chronic Pain: Psychologically Guided Core Competencies for Providers. <i>Pain Medicine</i> , 2022, 23, 1815-1819.	0.9	2
6	Physical Therapy Referral From Primary Care for Acute Back Pain With Sciatica. <i>Annals of Internal Medicine</i> , 2021, 174, 8-17.	2.0	22
7	Optimization of Spinal Manipulative Therapy Protocols: A Factorial Randomized Trial Within a Multiphase Optimization Framework. <i>Journal of Pain</i> , 2021, 22, 655-668.	0.7	6
8	Does motivation mediate the relationship between competence perceptions and patient outcomes among individuals with chronic low back pain? A multiple mediation analysis. <i>Disability and Rehabilitation</i> , 2021, 43, 953-959.	0.9	3
9	Physical therapists' attitudes are associated with their confidence in and the frequency with which they engage in prescription opioid medication misuse management practices with their patients. A cross-sectional study. <i>Substance Abuse</i> , 2021, , 1-9.	1.1	4
10	Physical therapists should play a greater role in managing patients with opioid use and opioid misuse. <i>Substance Abuse</i> , 2021, 42, 1-6.	1.1	2
11	Pivoting to virtual delivery for managing chronic pain with nonpharmacological treatments: implications for pragmatic research. <i>Pain</i> , 2021, 162, 1591-1596.	2.0	26
12	Perceptions of Telehealth Physical Therapy Among Patients with Chronic Low Back Pain. <i>Telemedicine Reports</i> , 2021, 2, 258-263.	0.5	3
13	The association between advanced orthopedic certification and confidence and engagement in prescription opioid medication misuse management practices: a cross-sectional study. <i>Journal of Manual and Manipulative Therapy</i> , 2021, , 1-11.	0.7	0
14	The OPTIMIZE study: protocol of a pragmatic sequential multiple assessment randomized trial of nonpharmacologic treatment for chronic, nonspecific low back pain. <i>BMC Musculoskeletal Disorders</i> , 2020, 21, 293.	0.8	11
15	Time Between an Emergency Department Visit and Initiation of Physical Therapist Intervention: Health Care Utilization and Costs. <i>Physical Therapy</i> , 2020, 100, 1782-1792.	1.1	11
16	Predicting who responds to spinal manipulative therapy using a short-time frame methodology: Results from a 238-participant study. <i>PLoS ONE</i> , 2020, 15, e0242831.	1.1	2
17	Observational retrospective study of the association of initial healthcare provider for new-onset low back pain with early and long-term opioid use. <i>BMJ Open</i> , 2019, 9, e028633.	0.8	84
18	What low back pain is and why we need to pay attention. <i>Lancet</i> , The, 2018, 391, 2356-2367.	6.3	2,444

#	ARTICLE	IF	CITATIONS
19	Prevention and treatment of low back pain: evidence, challenges, and promising directions. <i>Lancet, The</i> , 2018, 391, 2368-2383.	6.3	1,363
20	Associations Between Physical Therapy Continuity of Care and Health Care Utilization and Costs in Patients With Low Back Pain: A Retrospective Cohort Study. <i>Physical Therapy</i> , 2018, 98, 990-999.	1.1	15
21	Optimizing treatment protocols for spinal manipulative therapy: study protocol for a randomized trial. <i>Trials</i> , 2018, 19, 306.	0.7	9
22	Cost-Effectiveness of Primary Care Management With or Without Early Physical Therapy for Acute Low Back Pain. <i>Spine</i> , 2017, 42, 285-290.	1.0	36
23	Outcomes of Patients With Acute Low Back Pain Stratified by the STarT Back Screening Tool: Secondary Analysis of a Randomized Trial. <i>Physical Therapy</i> , 2017, 97, 330-337.	1.1	9
24	Importance of the type of provider seen to begin health care for a new episode low back pain: associations with future utilization and costs. <i>Journal of Evaluation in Clinical Practice</i> , 2016, 22, 247-252.	0.9	71
25	Implications of early and guideline adherent physical therapy for low back pain on utilization and costs. <i>BMC Health Services Research</i> , 2015, 15, 150.	0.9	194
26	Early Physical Therapy vs Usual Care in Patients With Recent-Onset Low Back Pain. <i>JAMA - Journal of the American Medical Association</i> , 2015, 314, 1459.	3.8	123
27	Use of Physical Therapy for Low Back Pain by Medicaid Enrollees. <i>Physical Therapy</i> , 2015, 95, 1668-1679.	1.1	28
28	The evaluation of lumbar multifidus muscle function via palpation: reliability and validity of a new clinical test. <i>Spine Journal</i> , 2015, 15, 1196-1202.	0.6	28
29	Exercise Only, Exercise With Mechanical Traction, or Exercise With Over-Door Traction for Patients With Cervical Radiculopathy, With or Without Consideration of Status on a Previously Described Subgrouping Rule: A Randomized Clinical Trial. <i>Journal of Orthopaedic and Sports Physical Therapy</i> , 2014, 44, 45-57.	1.7	73
30	Initial Management Decisions After a New Consultation for Low Back Pain: Implications of the Usage of Physical Therapy for Subsequent Health Care Costs and Utilization. <i>Archives of Physical Medicine and Rehabilitation</i> , 2013, 94, 808-816.	0.5	64
31	The STarT Back Screening Tool and Individual Psychological Measures: Evaluation of Prognostic Capabilities for Low Back Pain Clinical Outcomes in Outpatient Physical Therapy Settings. <i>Physical Therapy</i> , 2013, 93, 321-333.	1.1	151
32	Primary Care Referral of Patients With Low Back Pain to Physical Therapy. <i>Spine</i> , 2012, 37, 2114-2121.	1.0	179
33	A Randomized Controlled Trial on the Effectiveness of a Classification-Based System for Subacute and Chronic Low Back Pain. <i>Spine</i> , 2012, 37, 1347-1356.	1.0	69
34	Association between history and physical examination factors and change in lumbar multifidus muscle thickness after spinal manipulation in patients with low back pain. <i>Journal of Electromyography and Kinesiology</i> , 2012, 22, 724-731.	0.7	40
35	Preliminary Investigation of the Mechanisms Underlying the Effects of Manipulation. <i>Spine</i> , 2011, 36, 1772-1781.	1.0	92
36	Utilization and Clinical Outcomes of Outpatient Physical Therapy for Medicare Beneficiaries With Musculoskeletal Conditions. <i>Physical Therapy</i> , 2011, 91, 330-345.	1.1	56

#	ARTICLE	IF	CITATIONS
37	Association Between Changes in Abdominal and Lumbar Multifidus Muscle Thickness and Clinical Improvement After Spinal Manipulation. <i>Journal of Orthopaedic and Sports Physical Therapy</i> , 2011, 41, 389-399.	1.7	63
38	The Relationship of Transversus Abdominis and Lumbar Multifidus Activation and Prognostic Factors for Clinical Success With a Stabilization Exercise Program: A Cross-Sectional Study. <i>Archives of Physical Medicine and Rehabilitation</i> , 2010, 91, 78-85.	0.5	69
39	Beyond Minimally Important Change. <i>Spine</i> , 2009, 34, 2803-2809.	1.0	85
40	Comparison of the Effectiveness of Three Manual Physical Therapy Techniques in a Subgroup of Patients With Low Back Pain Who Satisfy a Clinical Prediction Rule. <i>Spine</i> , 2009, 34, 2720-2729.	1.0	121
41	Effectiveness of an Extension-Oriented Treatment Approach in a Subgroup of Subjects With Low Back Pain: A Randomized Clinical Trial. <i>Physical Therapy</i> , 2007, 87, 1608-1618.	1.1	119
42	Responsiveness of the Numeric Pain Rating Scale in Patients with Low Back Pain. <i>Spine</i> , 2005, 30, 1331-1334.	1.0	1,098
43	Pragmatic application of a clinical prediction rule in primary care to identify patients with low back pain with a good prognosis following a brief spinal manipulation intervention. <i>BMC Family Practice</i> , 2005, 6, 29.	2.9	102
44	A Clinical Prediction Rule To Identify Patients with Low Back Pain Most Likely To Benefit from Spinal Manipulation: A Validation Study. <i>Annals of Internal Medicine</i> , 2004, 141, 920.	2.0	698
45	Physical Impairment Index: Reliability, Validity, and Responsiveness in Patients with Acute Low Back Pain. <i>Spine</i> , 2003, 28, 1189-1194.	1.0	47
46	The Effect of a Fear-Avoidance-Based Physical Therapy Intervention for Patients With Acute Low Back Pain: Results of a Randomized Clinical Trial. <i>Spine</i> , 2003, 28, 2551-2560.	1.0	252
47	A Clinical Prediction Rule for Classifying Patients with Low Back Pain Who Demonstrate Short-Term Improvement With Spinal Manipulation. <i>Spine</i> , 2002, 27, 2835-2843.	1.0	564
48	The role of fear-avoidance beliefs in acute low back pain: relationships with current and future disability and work status. <i>Pain</i> , 2001, 94, 7-15.	2.0	405
49	A Comparison of a Modified Oswestry Low Back Pain Disability Questionnaire and the Quebec Back Pain Disability Scale. <i>Physical Therapy</i> , 2001, 81, 776-788.	1.1	841
50	Segmental Instability of the Lumbar Spine. <i>Physical Therapy</i> , 1998, 78, 889-896.	1.1	89
