#	ARTICLE	IF	CITATIONS
1	Bayesian adaptive model selection design for optimal biological dose finding in phase I/II clinical trials. <i>Biostatistics</i> , 2023, 24, 277-294.	0.9	7
2	Two-Dimensional Functional Principal Component Analysis for Image Feature Extraction. <i>Journal of Computational and Graphical Statistics</i> , 2022, 31, 1127-1140.	0.9	4
3	Robust Functional Principal Component Analysis Based on a New Regression Framework. <i>Journal of Agricultural, Biological, and Environmental Statistics</i> , 2022, 27, 523-543.	0.7	3
4	Dynamic prediction with time-dependent marker in survival analysis using supervised functional principal component analysis. <i>Statistics in Medicine</i> , 2022, , .	0.8	0
5	Reconnecting p -Value and Posterior Probability Under One- and Two-Sided Tests. <i>American Statistician</i> , 2021, 75, 265-275.	0.9	19
6	Functional principal component analysis for longitudinal data with informative dropout. <i>Statistics in Medicine</i> , 2021, 40, 712-724.	0.8	10
7	uTPI: A utility-based toxicity probability interval design for phase I/II dose-finding trials. <i>Statistics in Medicine</i> , 2021, 40, 2626-2649.	0.8	8
8	Early diagnosis of Alzheimer's disease on ADNI data using novel longitudinal score based on functional principal component analysis. <i>Journal of Medical Imaging</i> , 2021, 8, 024502.	0.8	4
9	A unified Bayesian framework for exact inference of area under the receiver operating characteristic curve. <i>Statistical Methods in Medical Research</i> , 2021, 30, 2269-2287.	0.7	2
10	Demystify Lindley's paradox by connecting p -value and posterior probability. <i>Statistics and Its Interface</i> , 2021, 14, 489-502.	0.2	1
11	START: single-to-double arm transition design for phase II clinical trials. <i>Pharmaceutical Statistics</i> , 2020, 19, 454-467.	0.7	3
