#	ARTICLE	IF	CITATIONS
1	A global best artificial bee colony algorithm for global optimization. Journal of Computational and Applied Mathematics, 2012, 236, 2741-2753.	1.1	368
2	FOCNet: A Fractional Optimal Control Network for Image Denoising. , 2019, , .		79
3	The KKT optimality conditions in a class of generalized convex optimization problems with an interval-valued objective function. Optimization Letters, 2014, 8, 607-631.	0.9	59
4	Improved biogeography-based optimization with random ring topology and Powell's method. Applied Mathematical Modelling, 2017, 41, 630-649.	2.2	30
5	Reputation-based co-evolutionary model promotes cooperation in prisoner's dilemma game. Physics Letters, Section A: General, Atomic and Solid State Physics, 2020, 384, 126233.	0.9	29
6	Convergent prediction–correction-based ADMM for multi-block separable convex programming. Journal of Computational and Applied Mathematics, 2018, 335, 270-288.	1.1	28
7	Bifurcation of a heroin model with nonlinear incidence rate. Nonlinear Dynamics, 2017, 88, 555-565.	2.7	27
8	Designing a multiple dependent state sampling plan based on the coefficient of variation. SpringerPlus, 2016, 5, 1447.	1.2	26
9	Combination event-triggered adaptive networked synchronization communication for nonlinear uncertain fractional-order chaotic systems. Applied Mathematics and Computation, 2018, 333, 521-535.	1.4	26
10	An Eﬀicient Algorithm for Quadratic Sum-of-Ratios Fractional Programs Problem. Numerical Functional Analysis and Optimization, 2017, 38, 1426-1445.	0.6	25
11	A Discrete Improved Artificial Bee Colony Algorithm for 0–1 Knapsack Problem. IEEE Access, 2019, 7, 104982-104991.	2.6	24
12	Biogeography-based optimization with improved migration operator and self-adaptive clear duplicate operator. Applied Intelligence, 2014, 41, 563-581.	3.3	23
13	A generalization of linearized alternating direction method of multipliers for solving two-block separable convex programming. Journal of Computational and Applied Mathematics, 2019, 357, 251-272.	1.1	23
14	A novel discrete particle swarm optimization algorithm for solving bayesian network structures learning problem. International Journal of Computer Mathematics, 2019, 96, 2423-2440.	1.0	22
15	Modified Tseng's extragradient methods for variational inequality on Hadamard manifolds. Applicable Analysis, 2021, 100, 2627-2640.	0.6	22
16	Outcome space range reduction method for global optimization of sum of affine ratios problem. Open Mathematics, 2016, 14, 736-746.	0.5	20
17	A hybrid method for learning multi-dimensional Bayesian network classifiers based on an optimization model. Applied Intelligence, 2016, 44, 123-148.	3.3	20
18	Range division and compression algorithm for quadratically constrained sum of quadratic ratios. Computational and Applied Mathematics, 2017, 36, 225-247.	1.3	20

#	ARTICLE	IF	CITATIONS
19	Effect of cross-diffusion on the stationary problem of a Leslie prey-predator model with a protection zone. Calculus of Variations and Partial Differential Equations, 2017, 56, 1.	0.9	20
20	An explicit method for systems of equilibrium problems and fixed points of infinite family of nonexpansive mappings. Journal of Computational and Applied Mathematics, 2011, 235, 4128-4139.	1.1	18
21	A link-adding strategy for improving robustness and traffic capacity in large-scale wireless sensor networks. Cluster Computing, 2019, 22, 7687-7694.	3.5	17
22	Prediction of Protein Structural Classes for Low-Similarity Sequences Based on Consensus Sequence and Segmented PSSM. Computational and Mathematical Methods in Medicine, 2015, 2015, 1-9.	0.7	16
23	Efficient parallel computing on the game theory-aware robust influence maximization problem. Knowledge-Based Systems, 2021, 220, 106942.	4.0	16
24	Scalarization and pointwise well-posedness in vector optimization problems. Journal of Global Optimization, 2011, 49, 561-574.	1.1	15
25	A new linearization technique for minimax linear fractional programming. International Journal of Computer Mathematics, 2014, 91, 1730-1743.	1.0	15
26	Variables two stage sampling plans based on the coefficient of variation. Journal of Advanced Mechanical Design, Systems and Manufacturing, 2016, 10, JAMDSM0002-JAMDSM0002.	0.3	15
27	Effective hybrid link-adding strategy to enhance network transport efficiency for scale-free networks. International Journal of Modern Physics C, 2017, 28, 1750107.	0.8	14
28	A distributed semi-supervised learning algorithm based on manifold regularization using wavelet neural network. Neural Networks, 2019, 118, 300-309.	3.3	14
29	Dual non-autonomous deep convolutional neural network for image denoising. Information Sciences, 2021, 572, 263-276.	4.0	14
30	An explicit method for finding common solutions of variational inequalities and systems of equilibrium problems and fixed points of an infinite family of nonexpansive mappings. Nonlinear Analysis: Theory, Methods & Applications, 2010, 72, 3124-3135.	0.6	13
31	Neutral fractional integro-differential equation with nonlinear term depending on lower order derivative. Journal of Computational and Applied Mathematics, 2014, 260, 167-172.	1.1	13
32	Designing a Repetitive Group Sampling Plan for Weibull Distributed Processes. Mathematical Problems in Engineering, 2016, 2016, 1-10.	0.6	13
33	An improved generalized Newton method for absolute value equations. SpringerPlus, 2016, 5, 1042.	1.2	13
34	A new Sumudu transform iterative method for time-fractional Cauchy reaction–diffusion equation. SpringerPlus, 2016, 5, 865.	1.2	13
35	Modified Biogeography-Based Optimization with Local Search Mechanism. Journal of Applied Mathematics, 2013, 2013, 1-24.	0.4	12
36	A Novel Artificial Bee Colony Algorithm for Function Optimization. Mathematical Problems in Engineering, 2015, 2015, 1-10.	0.6	12

#	ARTICLE	IF	CITATIONS
37	An efficient method for generalized linear multiplicative programming problem with multiplicative constraints. SpringerPlus, 2016, 5, 1302.	1.2	12
38	Global optimization algorithm for mixed integer quadratically constrained quadratic program. Journal of Computational and Applied Mathematics, 2017, 319, 159-169.	1.1	12
39	Manifold regularization based distributed semi-supervised learning algorithm using extreme learning machine over time-varying network. Neurocomputing, 2019, 355, 24-34.	3.5	12
40	Eigenvalue Problem for Nonlinear Fractional Differential Equations with Integral Boundary Conditions. Abstract and Applied Analysis, 2014, 2014, 1-6.	0.3	11
41	Observer-based distributed adaptive iterative learning control for linear multi-agent systems. International Journal of Systems Science, 2017, 48, 2948-2955.	3.7	11
42	An Improved Binary Chicken Swarm Optimization Algorithm for Solving 0-1 Knapsack Problem. , 2017, , .		11
43	Constrained Optimization by Artificial Bee Colony Framework. IEEE Access, 2018, 6, 73829-73845.	2.6	11
44	An enhanced multi-objective evolutionary optimization algorithm with inverse model. Information Sciences, 2020, 530, 128-147.	4.0	11
45	Soundness and completeness of the Cirquent calculus system CL6 for computability logic. Logic Journal of the IGPL, 2012, 20, 317-330.	1.3	10
46	Biogeography-Based Optimization with Orthogonal Crossover. Mathematical Problems in Engineering, 2013, 2013, 1-20.	0.6	10
47	Designing a multiple state repetitive group sampling plan based on the coefficient of variation. Communications in Statistics Part B: Simulation and Computation, 2017, 46, 7154-7165.	0.6	10
48	Variational community partition with novel network structure centrality prior. Applied Mathematical Modelling, 2019, 75, 333-348.	2.2	10
49	Robust counterparts and robust efficient solutions in vector optimization under uncertainty. Operations Research Letters, 2015, 43, 293-298.	0.5	9
50	Modified alternating direction method of multipliers for convex quadratic semidefinite programming. Neurocomputing, 2016, 214, 575-586.	3.5	9
51	Switching event-triggered network-synchronization for chaotic systems with different dimensions. Neurocomputing, 2018, 311, 32-40.	3.5	9
52	Identification of amyloidogenic peptides via optimized integrated features space based on physicochemical properties and PSSM. Analytical Biochemistry, 2019, 583, 113362.	1.1	9
53	M optimal routes hops strategy: detecting sinkhole attacks in wireless sensor networks. Cluster Computing, 2019, 22, 7677-7685.	3.5	9
54	Gray image segmentation based on fuzzy c-means and artificial bee colony optimization. Journal of Intelligent and Fuzzy Systems, 2020, 38, 3647-3655.	0.8	9

#	ARTICLE	IF	CITATIONS
55	Distributed semi-supervised learning algorithms for random vector functional-link networks with distributed data splitting across samples and features. Knowledge-Based Systems, 2020, 195, 105577.	4.0	9
56	Cost-Aware Deployment of Check-In Nodes in Complex Networks. IEEE Transactions on Systems, Man, and Cybernetics: Systems, 2022, 52, 3378-3390.	5.9	9
57	Global algorithm for a class of multiplicative programs using piecewise linear approximation technique. Numerical Algorithms, 2023, 92, 1063-1082.	1.1	9
58	Optimality for (h,Ï†)-multiobjective programming involving generalized type-I functions. Journal of Global Optimization, 2008, 41, 147-161.	1.1	8
59	A distributed cooperative learning algorithm based on Zero-Gradient-Sum strategy using Radial Basis Function Network. Neurocomputing, 2019, 323, 244-255.	3.5	8
60	TRANSMISSION POWER CONTROL IN WIRELESS SENSOR NETWORKS UNDER THE MINIMUM CONNECTED AVERAGE NODE DEGREE CONSTRAINT. International Journal on Smart Sensing and Intelligent Systems, 2015, 8, 821.	0.4	8
61	Adaptive neural tracking control for stochastic nonlinear multi-agent periodic time-varying systems. Applied Mathematical Modelling, 2022, 102, 228-242.	2.2	8
62	Detrended cross-correlation coefficient: Application to predict apoptosis protein subcellular localization. Mathematical Biosciences, 2016, 282, 61-67.	0.9	7
63	A 2-block semi-proximal ADMM for solving the H-weighted nearest correlation matrix problem. Optimization, 2017, 66, 1-16.	1.0	7
64	An inertial subgradient extragradient algorithm with adaptive stepsizes for variational inequality problems. Optimization Methods and Software, 2022, 37, 1507-1526.	1.6	7
65	Fault tolerant control for strict-feedback nonlinear system via event-triggered adaptive algorithms. ISA Transactions, 2022, 126, 65-79.	3.1	7
66	Theoretical and Empirical Analyses of an Improved Harmony Search Algorithm Based on Differential Mutation Operator. Journal of Applied Mathematics, 2012, 2012, 1-20.	0.4	6
67	Approximating solution of <mml:math altimg="si1.gif" overflow="scroll" xmlns:xocs="http://www.elsevier.com/xml/xocs/dtd" xmlns:xs="http://www.w3.org/2001/XMLSchema" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" xmlns="http://www.elsevier.com/xml/ja/dtd" xmlns:ja="http://www.elsevier.com/xml/ja/dtd" xmlns:mml="http://www.w3.org/1998/Math/MathML" xmlns:tb="http://www.elsevier.com/xml/common/table/dtd" xmlns:sb="http://www.elsevier.com/xml/common/struct-bib/dtd" xmlns:ce="http://www.elsevier.com/xml/	0.5	6
68	The countable versus uncountable branching recurrences in computability logic. Journal of Applied Logic, 2012, 10, 431-446.	1.1	5
69	Propagation in CLG Bayesian networks based on semantic modeling. Artificial Intelligence Review, 2012, 38, 149-162.	9.7	5
70	A Bayesian Classifier Learning Algorithm Based on Optimization Model. Mathematical Problems in Engineering, 2013, 2013, 1-9.	0.6	5
71	A smoothing Newton method for symmetric cone complementarity problem. Journal of Applied Mathematics and Computing, 2015, 47, 175-191.	1.2	5
72	A note on the sufficient initial condition ensuring the convergence of directly extended 3-block ADMM for special semidefinite programming. Optimization, 2018, 67, 1729-1743.	1.0	5

#	ARTICLE	IF	CITATIONS
73	Distributed semi-supervised learning algorithm based on extreme learning machine over networks using event-triggered communication scheme. Neural Networks, 2019, 119, 261-272.	3.3	5
74	Generalized Peaceman–Rachford splitting method with substitution for convex programming. Optimization Letters, 2020, 14, 1781-1802.	0.9	5
75	Linearized symmetric multi-block ADMM with indefinite proximal regularization and optimal proximal parameter. Calcolo, 2020, 57, 1.	0.6	5
76	Inertial generalized proximal Peaceman–Rachford splitting method for separable convex programming. Calcolo, 2021, 58, 1.	0.6	5
77	A Tight Semidefinite Relaxation of the MAX CUT Problem. Journal of Combinatorial Optimization, 2003, 7, 237-245.	0.8	4
78	Using junction trees for structural learning of Bayesian networks. Journal of Systems Engineering and Electronics, 2012, 23, 286-292.	1.1	4
79	A Decomposition Algorithm for Learning Bayesian Networks Based on Scoring Function. Journal of Applied Mathematics, 2012, 2012, 1-17.	0.4	4
80	A New Impulsive Multi-Orders Fractional Differential Equation Involving Multipoint Fractional Integral Boundary Conditions. Abstract and Applied Analysis, 2014, 2014, 1-10.	0.3	4
81	Positive definite solutions and perturbation analysis of a class of nonlinear matrix equations. Journal of Applied Mathematics and Computing, 2017, 53, 245-269.	1.2	4
82	Modified Particle Swarm Optimization Algorithm for Engineering Structural Optimization Problem. , 2017, , .		4
83	Artificial Bee Colony Algorithm Combined With Previous Successful Search Experience. IEEE Access, 2019, 7, 34318-34332.	2.6	4
84	A Three-Operator Splitting Perspective of a Three-Block ADMM for Convex Quadratic Semidefinite Programming and Beyond. Asia-Pacific Journal of Operational Research, 2020, 37, 2040009.	0.9	4
85	A new nonmonotone smoothing Newton method for the symmetric cone complementarity problem with the Cartesian $$P_0$$-property. Mathematical Methods of Operations Research, 2020, 92, 229-247.	0.4	4
86	Predefined-time vector-polynomial-based synchronization among a group of chaotic systems and its application in secure information transmission. AIMS Mathematics, 2021, 6, 11005-11028.	0.7	4
87	A new approach to the axiomatization of rough sets. , 2010, , .		3
88	Hypersurfaces with two distinct principal curvatures in a real space form. Monatshefte Fur Mathematik, 2011, 164, 225-236.	0.5	3
89	An Approximate Proximal Point Algorithm for Maximal Monotone Inclusion Problems. Mathematical Problems in Engineering, 2011, 2011, 1-15.	0.6	3
90	Approximating Solution Of ∂ T(x) for an H-Monotone Operator in Hilbert Spaces. Acta Mathematica Scientia, 2013, 33, 1347-1360.	0.5	3
