

Katia De Angelis

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/4139012/katia-de-angelis-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

158
papers

#	Paper	IF	Citations
158	Effects of Postprandial Lipemia Combined With Disturbed Blood Flow on the Flow-Mediated Dilation, Oxidative Stress, and Endothelial Microvesicles in Healthy Subjects.. <i>Frontiers in Physiology</i> , 2022 , 13, 812942	4.6	
157	Saccharomyces boulardii exerts renoprotection by modulating oxidative stress, renin angiotensin system and uropathogenic microbiota in a murine model of diabetes.. <i>Life Sciences</i> , 2022 , 301, 120616	6.8	0
156	The Cholinergic Drug Galantamine Alleviates Oxidative Stress Alongside Anti-inflammatory and Cardio-Metabolic Effects in Subjects With the Metabolic Syndrome in a Randomized Trial. <i>Frontiers in Immunology</i> , 2021 , 12, 613979	8.4	2
155	Chronic exposure to PM2.5 aggravates SLE manifestations in lupus-prone mice. <i>Particle and Fibre Toxicology</i> , 2021 , 18, 15	8.4	1
154	Saccharomyces boulardii modulates oxidative stress and renin angiotensin system attenuating diabetes-induced liver injury in mice. <i>Scientific Reports</i> , 2021 , 11, 9189	4.9	5
153	Cholinergic stimulation with pyridostigmine modulates a heart-spleen axis after acute myocardial infarction in spontaneous hypertensive rats. <i>Scientific Reports</i> , 2021 , 11, 9563	4.9	1
152	The Cholinergic Drug Pyridostigmine Alleviates Inflammation During LPS-Induced Acute Respiratory Distress Syndrome. <i>Frontiers in Pharmacology</i> , 2021 , 12, 624895	5.6	0
151	Study of ER stress and apoptotic proteins in the heart and tumor exposed to doxorubicin. <i>Biochimica Et Biophysica Acta - Molecular Cell Research</i> , 2021 , 1868, 119039	4.9	3
150	Aerobic or resistance training improves autonomic control of circulation in oophorectomized rats with cardiometabolic dysfunctions: Impact on renal oxidative stress. <i>Experimental Gerontology</i> , 2021 , 145, 111181	4.5	
149	Systemic Inflammation and Oxidative Stress in Adults with Bronchiectasis: Association with Clinical and Functional Features. <i>Clinics</i> , 2021 , 76, e2474	2.3	2
148	Reduction of oxidative stress and inflammatory signaling in the commissural nucleus of the solitary tract (commNTS) and rostral ventrolateral medulla (RVLM) in treadmill trained rats. <i>Brain Research</i> , 2021 , 1769, 147582	3.7	
147	Increased bone resorption by long-term cigarette smoke exposure in animal model.. <i>Heliyon</i> , 2021 , 7, e08587	3.6	
146	Impact of combined exercise training on the development of cardiometabolic and neuroimmune complications induced by fructose consumption in hypertensive rats. <i>PLoS ONE</i> , 2020 , 15, e0233785	3.7	0
145	Early activation of ubiquitin-proteasome system at the diaphragm tissue occurs independently of left ventricular dysfunction in SHR rats. <i>Experimental Biology and Medicine</i> , 2020 , 245, 245-253	3.7	
144	A method to assess heart rate variability in neonate rats: validation in normotensive and hypertensive animals. <i>Brazilian Journal of Medical and Biological Research</i> , 2020 , 53, e9493	2.8	0
143	Effects of exercise training on metabolic and cardiovascular dysfunctions in offspring of fructose animals: role of cholinergic anti-inflammatory reflex.. <i>FASEB Journal</i> , 2020 , 34, 1-1	0.9	
142	Hypoglycemic effect and hepato protective role of Saccharomyces boulardii THT 500101 strain in a murine model of streptozotocin-induced diabetes. <i>FASEB Journal</i> , 2020 , 34, 1-1	0.9	

141	Physically Active Lifestyle as an Approach to Confronting COVID-19. <i>Arquivos Brasileiros De Cardiologia</i> , 2020 , 114, 601-602	1.2	23
140	Selective afferent renal denervation mitigates renal and splanchnic sympathetic nerve overactivity and renal function in chronic kidney disease-induced hypertension. <i>Journal of Hypertension</i> , 2020 , 38, 765-773	1.9	13
139	Characterization of the Oxidative Stress in Renal Ischemia/Reperfusion-Induced Cardiorenal Syndrome Type 3. <i>BioMed Research International</i> , 2020 , 2020, 1605358	3	6
138	Kinin B2 Receptor Activation Prevents the Evolution of Alzheimer's Disease Pathological Characteristics in a Transgenic Mouse Model. <i>Pharmaceuticals</i> , 2020 , 13,	5.2	2
137	Additional Improvement of Respiratory Technique on Vascular Function in Hypertensive Postmenopausal Women Following Yoga or Stretching Video Classes: The YOGINI Study. <i>Frontiers in Physiology</i> , 2020 , 11, 898	4.6	1
136	Impact of Overweight in Mens with Family History of Hypertension: Early Heart Rate Variability and Oxidative Stress Disarrangements. <i>Oxidative Medicine and Cellular Longevity</i> , 2020 , 2020, 3049831	6.7	1
135	Ovarian status modulates cardiovascular autonomic control and oxidative stress in target organs. <i>Biology of Sex Differences</i> , 2020 , 11, 15	9.3	1
134	SEDENTARY LIFESTYLE IN ADOLESCENTS IS ASSOCIATED WITH IMPAIRMENT IN AUTONOMIC CARDIOVASCULAR MODULATION. <i>Revista Brasileira De Medicina Do Esporte</i> , 2019 , 25, 191-195	0.5	1
133	Imbalance between nitric oxide and superoxide anion induced by uncoupled nitric oxide synthase contributes to human melanoma development. <i>International Journal of Biochemistry and Cell Biology</i> , 2019 , 115, 105592	5.6	9
132	Exercise training initiated at old stage of lifespan attenuates aging-and ovariectomy-induced cardiac and renal oxidative stress: Role of baroreflex. <i>Experimental Gerontology</i> , 2019 , 124, 110635	4.5	5
131	Night workers have lower levels of antioxidant defenses and higher levels of oxidative stress damage when compared to day workers. <i>Scientific Reports</i> , 2019 , 9, 4455	4.9	32
130	HEART RATE VARIABILITY IN TENNIS PLAYERS. <i>Revista Brasileira De Medicina Do Esporte</i> , 2019 , 25, 202-206	0.9	1
129	EXERCISE TRAINING ASSOCIATED WITH DIETARY ADJUSTMENT INDUCES METABOLIC AND CARDIOVASCULAR BENEFITS IN HIGH-FAT-FED MENOPAUSE RATS. <i>FASEB Journal</i> , 2019 , 33, 695.13	0.9	
128	Impact of active lifestyle on heart rate variability and oxidative stress markers in offspring of hypertensives. <i>FASEB Journal</i> , 2019 , 33, 692.14	0.9	
127	Acute Effects Using Light-Emitting Diode Therapy (LEDT) for Muscle Function during Isometric Exercise in Asthma Patients: A Pilot Study. <i>BioMed Research International</i> , 2019 , 2019, 7501870	3	1
126	Aerobic Training Is Better Than Resistance Training on Cardiac Function and Autonomic Modulation in Female ob/ob Mice. <i>Frontiers in Physiology</i> , 2019 , 10, 1464	4.6	4
125	Dynamic Resistance Training Improves Cardiac Autonomic Modulation and Oxidative Stress Parameters in Chronic Stroke Survivors: A Randomized Controlled Trial. <i>Oxidative Medicine and Cellular Longevity</i> , 2019 , 2019, 5382843	6.7	11
124	Exercise activates vagal induction of dopamine and attenuates systemic inflammation. <i>Brain, Behavior, and Immunity</i> , 2019 , 75, 181-191	16.6	14

123	Baroreflex Impairment Precedes Cardiometabolic Dysfunction in an Experimental Model of Metabolic Syndrome: Role of Inflammation and Oxidative Stress. <i>Scientific Reports</i> , 2018 , 8, 8578	4.9	8
122	Measurement of Mouse Heart Rate Variability using Echocardiographic System. <i>Journal of Cardiovascular Echography</i> , 2018 , 28, 90-94	0.6	6
121	THE IMPACT OF COMBINED EXERCISE TRAINING ON THE DEVELOPMENT OF CARDIOVASCULAR AND NEUROIMMUNE COMPLICATIONS INDUCED BY FRUCTOSE OVERLOAD IN HYPERTENSIVE RATS. <i>FASEB Journal</i> , 2018 , 32, 588.21	0.9	
120	CARDIOVASCULAR AND METABOLIC EFFECTS OF EXERCISE TRAINING IN HIGH-FAT DIET-FED OVARECTOMIZED MICE: COMPARISON BETWEEN MODERATE INTENSITY CONTINUOUS VS. HIGH INTENSITY INTERVAL TRAINING. <i>FASEB Journal</i> , 2018 , 32, lb259	0.9	
119	Hypertension induces additional cardiometabolic impairments and attenuates aerobic exercise training adaptations in fructose-fed ovariectomized rats. <i>Hypertension Research</i> , 2018 , 41, 88-95	4.7	2
118	The impact of sedentarism on heart rate variability (HRV) at rest and in response to mental stress in young women. <i>Physiological Reports</i> , 2018 , 6, e13873	2.6	23
117	Impaired baroreflex sensitivity and increased systolic blood pressure variability in chronic post-ischemic stroke. <i>Clinics</i> , 2018 , 73, e253	2.3	10
116	Combined Aerobic and Resistance Exercise Training Improve Hypertension Associated With Menopause. <i>Frontiers in Physiology</i> , 2018 , 9, 1471	4.6	13
115	Combined aerobic and resistance exercise training attenuates cardiac dysfunctions in a model of diabetes and menopause. <i>PLoS ONE</i> , 2018 , 13, e0202731	3.7	7
114	ACE gene dosage determines additional autonomic dysfunction and increases renal angiotensin II levels in diabetic mice. <i>Clinics</i> , 2018 , 73, e246	2.3	1
113	Aerobic Exercise Protects from Pseudomonas aeruginosa-Induced Pneumonia in Elderly Mice. <i>Journal of Innate Immunity</i> , 2018 , 10, 279-290	6.9	18
112	Photobiomodulation Leads to Reduced Oxidative Stress in Rats Submitted to High-Intensity Resistive Exercise. <i>Oxidative Medicine and Cellular Longevity</i> , 2018 , 2018, 5763256	6.7	10
111	Excessive consumption of fructose causes cardiometabolic dysfunctions through oxidative stress and inflammation. <i>Canadian Journal of Physiology and Pharmacology</i> , 2017 , 95, 1078-1090	2.4	15
110	Cholinergic Stimulation Improves Oxidative Stress and Inflammation in Experimental Myocardial Infarction. <i>Scientific Reports</i> , 2017 , 7, 13687	4.9	33
109	UMA SESSÃO DE EXERCÍCIO RESISTIDO DINÂMICO NÃO INDUZ HIPOTENSÃO PÓS-EXERCÍCIO EM RATAS SHR. <i>Revista Brasileira De Medicina Do Esporte</i> , 2017 , 23, 279-284	0.5	1
108	Interval and continuous aerobic exercise training similarly increase cardiac function and autonomic modulation in infarcted mice. <i>Journal of Exercise Rehabilitation</i> , 2017 , 13, 257-265	1.8	2
107	Exercise training on cardiovascular diseases: Role of animal models in the elucidation of the mechanisms. <i>Motriz Revista De Educacao Fisica</i> , 2017 , 23,	0.9	2
106	Vitamin C mitigates oxidative/nitrosative stress and inflammation in doxorubicin-induced cardiomyopathy. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2017 , 313, H795-H809 ^{5.2}		61

105	Impact of exercise training associated to pyridostigmine treatment on autonomic function and inflammatory profile after myocardial infarction in rats. <i>International Journal of Cardiology</i> , 2017 , 227, 757-765	3.2	20
104	Influence of Estimated Training Status on Anti and Pro-Oxidant Activity, Nitrite Concentration, and Blood Pressure in Middle-Aged and Older Women. <i>Frontiers in Physiology</i> , 2017 , 8, 122	4.6	6
103	Association between Diastolic Dysfunction with Inflammation and Oxidative Stress in Females ob/ob Mice. <i>Frontiers in Physiology</i> , 2017 , 8, 572	4.6	9
102	Bicycling for transportation improves heart rate variability in young adults. <i>Journal of Sports Medicine and Physical Fitness</i> , 2017 , 57, 299-304	1.4	5
101	Resistance or aerobic training decreases blood pressure and improves cardiovascular autonomic control and oxidative stress in hypertensive menopausal rats. <i>Journal of Applied Physiology</i> , 2016 , 121, 1032-1038	3.7	22
100	Early developmental exposure to high fructose intake in rats with NaCl stimulation causes cardiac damage. <i>European Journal of Nutrition</i> , 2016 , 55, 83-91	5.2	11
99	Hypertension, Blood Pressure Variability, and Target Organ Lesion. <i>Current Hypertension Reports</i> , 2016 , 18, 31	4.7	38
98	Exercise Training Prevents Cardiovascular Derangements Induced by Fructose Overload in Developing Rats. <i>PLoS ONE</i> , 2016 , 11, e0167291	3.7	11
97	Impact of aging on cardiac function in a female rat model of menopause: role of autonomic control, inflammation, and oxidative stress. <i>Clinical Interventions in Aging</i> , 2016 , 11, 341-50	4	22
96	Red and Infrared Low-Level Laser Therapy Prior to Injury with or without Administration after Injury Modulate Oxidative Stress during the Muscle Repair Process. <i>PLoS ONE</i> , 2016 , 11, e0153618	3.7	22
95	Impact of combined exercise training on cardiovascular autonomic control and mortality in diabetic ovariectomized rats. <i>Journal of Applied Physiology</i> , 2015 , 119, 656-62	3.7	11
94	Endothelium adjustments to acute resistance exercise are intensity-dependent in healthy animals. <i>Life Sciences</i> , 2015 , 142, 86-91	6.8	16
93	Cardiac autonomic dysfunction in chronic stroke women is attenuated after submaximal exercise test, as evaluated by linear and nonlinear analysis. <i>BMC Cardiovascular Disorders</i> , 2015 , 15, 105	2.3	10
92	Effects of a pulmonary rehabilitation program on physical capacity, peripheral muscle function and inflammatory markers in asthmatic children and adolescents: study protocol for a randomized controlled trial. <i>Trials</i> , 2015 , 16, 346	2.8	4
91	Effect of aerobic exercise training on regional blood flow and vascular resistance in diabetic rats. <i>Diabetology and Metabolic Syndrome</i> , 2015 , 7, 115	5.6	1
90	Aerobic exercise training promotes additional cardiac benefits better than resistance exercise training in postmenopausal rats with diabetes. <i>Menopause</i> , 2015 , 22, 534-41	2.5	19
89	Exercise training prevents increased intraocular pressure and sympathetic vascular modulation in an experimental model of metabolic syndrome. <i>Brazilian Journal of Medical and Biological Research</i> , 2015 , 48, 332-8	2.8	4
88	Dynamic resistance training decreases sympathetic tone in hypertensive ovariectomized rats. <i>Brazilian Journal of Medical and Biological Research</i> , 2015 , 48, 523-7	2.8	15

87	RC-3095, a selective gastrin-releasing peptide receptor antagonist, does not protect the lungs in an experimental model of lung ischemia-reperfusion injury. <i>BioMed Research International</i> , 2015 , 2015, 496378	3.2	2
86	Positive effect of combined exercise training in a model of metabolic syndrome and menopause: autonomic, inflammatory, and oxidative stress evaluations. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2015 , 309, R1532-9	3.2	37
85	Training Status as a Marker of the Relationship between Nitric Oxide, Oxidative Stress, and Blood Pressure in Older Adult Women. <i>Oxidative Medicine and Cellular Longevity</i> , 2015 , 2015, 8262383	6.7	6
84	Cardioprotection afforded by exercise training prior to myocardial infarction is associated with autonomic function improvement. <i>BMC Cardiovascular Disorders</i> , 2014 , 14, 84	2.3	12
83	Low intensity resistance training improves systolic function and cardiovascular autonomic control in diabetic rats. <i>Journal of Diabetes and Its Complications</i> , 2014 , 28, 273-8	3.2	15
82	Hemodynamic effect of laser therapy in spontaneously hypertensive rats. <i>Arquivos Brasileiros De Cardiologia</i> , 2014 , 103, 161-4	1.2	12
81	Resistance training after myocardial infarction in rats: its role on cardiac and autonomic function. <i>Arquivos Brasileiros De Cardiologia</i> , 2014 , 103, 60-8	1.2	17
80	Cardiovascular autonomic dysfunction and oxidative stress induced by fructose overload in an experimental model of hypertension and menopause. <i>BMC Cardiovascular Disorders</i> , 2014 , 14, 185	2.3	23
79	Role of exercise training on autonomic changes and inflammatory profile induced by myocardial infarction. <i>Mediators of Inflammation</i> , 2014 , 2014, 702473	4.3	11
78	Standardization of resistance exercise training: effects in diabetic ovariectomized rats. <i>International Journal of Sports Medicine</i> , 2014 , 35, 323-9	3.6	20
77	Diabetic hyperglycemia attenuates sympathetic dysfunction and oxidative stress after myocardial infarction in rats. <i>Cardiovascular Diabetology</i> , 2014 , 13, 131	8.7	16
76	Effects of a contraceptive containing drospirenone and ethinyl estradiol on blood pressure and autonomic tone: a prospective controlled clinical trial. <i>European Journal of Obstetrics, Gynecology and Reproductive Biology</i> , 2014 , 175, 62-6	2.4	20
75	Baroreflex deficiency induces additional impairment of vagal tone, diastolic function and calcium handling proteins after myocardial infarction. <i>American Journal of Translational Research (discontinued)</i> , 2014 , 6, 320-8	3	6
74	Influência dos hormônios sexuais no consumo de oxigênio de ratos. <i>Revista Brasileira De Medicina Do Esporte</i> , 2014 , 20, 421-423	0.5	0
73	Metabolic, hemodynamic and structural adjustments to low intensity exercise training in a metabolic syndrome model. <i>Cardiovascular Diabetology</i> , 2013 , 12, 89	8.7	17
72	Autonomic changes in young smokers: acute effects of inspiratory exercise. <i>Clinical Autonomic Research</i> , 2013 , 23, 201-7	4.3	6
71	Ventricular and autonomic benefits of exercise training persist after detraining in infarcted rats. <i>European Journal of Applied Physiology</i> , 2013 , 113, 1137-46	3.4	20
70	Walking promotes metabolic and baroreflex sensitivity improvement in fructose-fed male rats. <i>European Journal of Applied Physiology</i> , 2013 , 113, 41-9	3.4	16

69	Cardiovascular autonomic dysfunction in non-obese diabetic mice. <i>Autonomic Neuroscience: Basic and Clinical</i> , 2013 , 177, 143-7	2.4	7
68	Impact of myocardial infarction on cardiac autonomic function in diabetic rats. <i>Journal of Diabetes and Its Complications</i> , 2013 , 27, 16-22	3.2	13
67	Cholinergic stimulation with pyridostigmine improves autonomic function in infarcted rats. <i>Clinical and Experimental Pharmacology and Physiology</i> , 2013 , 40, 610-6	3	32
66	Preventive role of exercise training in autonomic, hemodynamic, and metabolic parameters in rats under high risk of metabolic syndrome development. <i>Journal of Applied Physiology</i> , 2013 , 114, 786-91	3.7	37
65	Impairment on cardiovascular and autonomic adjustments to maximal isometric exercise tests in offspring of hypertensive parents. <i>European Journal of Preventive Cardiology</i> , 2013 , 20, 480-5	3.9	9
64	Cardiovascular changes in animal models of metabolic syndrome. <i>Journal of Diabetes Research</i> , 2013 , 2013, 761314	3.9	23
63	Effect of simvastatin in the autonomic system is dependent on the increased gain/sensitivity of the baroreceptors. <i>Physiological Reports</i> , 2013 , 1, e00045	2.6	11
62	Pleiotropic effects of simvastatin in physically trained ovariectomized rats. <i>Brazilian Journal of Medical and Biological Research</i> , 2013 , 46, 447-53	2.8	3
61	Influência do número de sessões nos ajustes cardiovasculares e autonômicos ao exercício resistido em homens fisicamente ativos. <i>Revista Brasileira De Medicina Do Esporte</i> , 2013 , 19, 332-335	0.5	0
60	Cardiovascular autonomic dysfunction in primary ovarian insufficiency: clinical and experimental evidence. <i>American Journal of Translational Research (discontinued)</i> , 2013 , 6, 91-101	3	10
59	Cardiac and pulmonary arterial remodeling after sinoaortic denervation in normotensive rats. <i>Autonomic Neuroscience: Basic and Clinical</i> , 2012 , 166, 47-53	2.4	16
58	Aerobic exercise training delays cardiac dysfunction and improves autonomic control of circulation in diabetic rats undergoing myocardial infarction. <i>Journal of Cardiac Failure</i> , 2012 , 18, 734-44	3.3	23
57	Previous exercise training has a beneficial effect on renal and cardiovascular function in a model of diabetes. <i>PLoS ONE</i> , 2012 , 7, e48826	3.7	22
56	Acute exercise adjustments of cardiovascular autonomic control in diabetic rats. <i>Muscle and Nerve</i> , 2012 , 46, 96-101	3.4	1
55	Molecular mapping of the regenerative niche in a murine model of myocardial infarction. <i>International Journal of Molecular Medicine</i> , 2012 , 29, 479-84	4.4	7
54	Sympathetic overactivity precedes metabolic dysfunction in a fructose model of glucose intolerance in mice. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2012 , 302, R950-7	3.2	57
53	Monosodium glutamate neonatal treatment induces cardiovascular autonomic function changes in rodents. <i>Clinics</i> , 2012 , 67, 1209-14	2.3	7
52	Dynamic aerobic exercise induces baroreflex improvement in diabetic rats. <i>Experimental Diabetes Research</i> , 2012 , 2012, 108680		6

51	Low-dose enalapril reduces angiotensin II and attenuates diabetic-induced cardiac and autonomic dysfunctions. <i>Journal of Cardiovascular Pharmacology</i> , 2012 , 59, 58-65	3.1	9
50	Cardiometabolic benefits of exercise training in an experimental model of metabolic syndrome and menopause. <i>Menopause</i> , 2012 , 19, 562-8	2.5	21
49	Exercise training prevents diastolic dysfunction induced by metabolic syndrome in rats. <i>Clinics</i> , 2012 , 67, 815-20	2.3	23
48	ROLE OF ESTROGEN THERAPY ASSOCIATED WITH PHYSICAL TRAINING ON OXIDATIVE STRESS PROFILE IN OVARECTOMIZED RATS. <i>FASEB Journal</i> , 2012 , 26, 1142.37	0.9	
47	Hypercholesterolemia magnitude increases sympathetic modulation and coagulation in LDLr knockout mice. <i>Autonomic Neuroscience: Basic and Clinical</i> , 2011 , 159, 98-103	2.4	12
46	Moderate exercise training promotes adaptations in coronary blood flow and adenosine production in normotensive rats. <i>Clinics</i> , 2011 , 66, 2105-11	2.3	17
45	Treinamento Físico de natação promove remodelamento cardíaco e melhora a perfusão sanguínea no músculo cardíaco de SHR via mecanismo dependente de adenosina. <i>Revista Brasileira De Medicina Do Esporte</i> , 2011 , 17, 193-197	0.5	
44	Short-term diabetes attenuates left ventricular dysfunction and mortality rates after myocardial infarction in rodents. <i>Clinics</i> , 2011 , 66, 1437-42	2.3	8
43	Hyperglycemia can delay left ventricular dysfunction but not autonomic damage after myocardial infarction in rodents. <i>Cardiovascular Diabetology</i> , 2011 , 10, 26	8.7	27
42	Exercise training improves the soleus muscle morphology in experimental diabetic nerve regeneration. <i>Muscle and Nerve</i> , 2011 , 44, 571-82	3.4	8
41	Cardiac and peripheral adjustments induced by early exercise training intervention were associated with autonomic improvement in infarcted rats: role in functional capacity and mortality. <i>European Heart Journal</i> , 2011 , 32, 904-12	9.5	42
40	Simvastatin-induced cardiac autonomic control improvement in fructose-fed female rats. <i>Clinics</i> , 2011 , 66, 1793-6	2.3	10
39	História familiar positiva de diabetes altera a resposta cronotrópica ao exercício agudo. <i>Revista Brasileira De Medicina Do Esporte</i> , 2011 , 17, 389-392	0.5	1
38	Autonomic impairment after myocardial infarction: role in cardiac remodelling and mortality. <i>Clinical and Experimental Pharmacology and Physiology</i> , 2010 , 37, 447-52	3	46
37	Beneficial effects of treadmill training in experimental diabetic nerve regeneration. <i>Clinics</i> , 2010 , 65, 1329-37	2.3	33
36	Exercise training associated with estrogen therapy induced cardiovascular benefits after ovarian hormones deprivation. <i>Maturitas</i> , 2010 , 65, 267-71	5	35
35	Change in central kinin B2 receptor density after exercise training in rats. <i>Autonomic Neuroscience: Basic and Clinical</i> , 2010 , 158, 71-8	2.4	3
34	Effects of exercise training on autonomic dysfunction management in an experimental model of menopause and myocardial infarction. <i>Menopause</i> , 2010 , 17, 712-7	2.5	21

33	The beneficial effects of exercise in rodents are preserved after detraining: a phenomenon unrelated to GLUT4 expression. <i>Cardiovascular Diabetology</i> , 2010 , 9, 67	8.7	35
32	Benefits of exercise training in diabetic rats persist after three weeks of detraining. <i>Autonomic Neuroscience: Basic and Clinical</i> , 2009 , 145, 11-6	2.4	34
31	Diabetes and cardiovascular autonomic dysfunction: application of animal models. <i>Autonomic Neuroscience: Basic and Clinical</i> , 2009 , 145, 3-10	2.4	31
30	Exercise improves cardiovascular control in a model of dislipidemia and menopause. <i>Maturitas</i> , 2009 , 62, 200-4	5	12
29	A brief review of chronic exercise intervention to prevent autonomic nervous system changes during the aging process. <i>Clinics</i> , 2009 , 64, 253-8	2.3	31
28	Ester ^o de anabolizante inibe a angiog ^{en} ese induzida pelo treinamento f ^{is} ico de nata ^o em m ^{ul} culo s ^o leo de ratos normotensos. <i>Revista Brasileira De Educa^o F^{is}ica E Esporte: RBEFE</i> , 2009 , 23, 195-209	0.8	1
27	Systemic delivery of adult stem cells improves cardiac function in spontaneously hypertensive rats. <i>Clinical and Experimental Pharmacology and Physiology</i> , 2008 , 35, 113-9	3	22
26	In situ delivery of bone marrow cells and mesenchymal stem cells improves cardiovascular function in hypertensive rats submitted to myocardial infarction. <i>Journal of Biomedical Science</i> , 2008 , 15, 365-74	13.3	39
25	Fructose increases blood pressure and activates the brain angiotensin AT1 system. <i>FASEB Journal</i> , 2008 , 22, 950.9	0.9	
24	Autonomic modulation of arterial pressure and heart rate variability in hypertensive diabetic rats. <i>Clinics</i> , 2007 , 62, 477-82	2.3	20
23	Effect of a low-dose oral contraceptive on venous endothelial function in healthy young women: preliminary results. <i>Clinics</i> , 2007 , 62, 151-8	2.3	4
