#	ARTICLE	IF	CITATIONS
1	Severe acute respiratory coronavirus virus 2 (SARS-CoV-2) seroconversion and occupational exposure of employees at a Swiss university hospital: A large longitudinal cohort study. <i>Infection Control and Hospital Epidemiology</i> , 2022, 43, 326-333.	1.8	16
2	Risk of Reinfection After Seroconversion to Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2): A Population-based Propensity-score Matched Cohort Study. <i>Clinical Infectious Diseases</i> , 2022, 74, 622-629.	5.8	61
3	Systematic review on factors influencing the effectiveness of alcohol-based hand rubbing in healthcare. <i>Antimicrobial Resistance and Infection Control</i> , 2022, 11, 16.	4.1	6
4	Tolerability and acceptability of three alcohol-based hand-rub gel formulations: a randomized crossover study. <i>Journal of Hospital Infection</i> , 2022, 123, 112-118.	2.9	4
5	“My Five Moments”™: understanding a user-centred approach to hand hygiene improvement within a broader implementation strategy. <i>BMJ Quality and Safety</i> , 2022, 31, 259-262.	3.7	5
6	Comparing the effectiveness of hand hygiene techniques in reducing the microbial load and covering hand surfaces in healthcare workers: Updated systematic review. <i>American Journal of Infection Control</i> , 2022, 50, 1079-1090.	2.3	5
7	Impact of environmental hygiene interventions on healthcare-associated infections and patient colonization: a systematic review. <i>Antimicrobial Resistance and Infection Control</i> , 2022, 11, 38.	4.1	25
8	Implementation of hand hygiene in health-care facilities: results from the WHO Hand Hygiene Self-Assessment Framework global survey 2019. <i>Lancet Infectious Diseases</i> , The, 2022, 22, 835-844.	9.1	29
9	To our friend, John. <i>Lancet Infectious Diseases</i> , The, 2022, , .	9.1	0
10	Association between SARS-CoV-2 Seroprevalence in Nursing Home Staff and Resident COVID-19 Cases and Mortality: A Cross-Sectional Study. <i>Viruses</i> , 2022, 14, 43.	3.3	6
11	Occupational risk of SARS-CoV-2 infection and reinfection during the second pandemic surge: a cohort study. <i>Occupational and Environmental Medicine</i> , 2022, 79, 116-119.	2.8	7
12	“Unite for safety” “clean your hands” the 5 May 2022 World Health Organization SAVE LIVES “Clean Your Hands” campaign. <i>Antimicrobial Resistance and Infection Control</i> , 2022, 11, 63.	4.1	4
13	Ethanol is indispensable for virucidal hand antiseptics: memorandum from the alcohol-based hand rub (ABHR) Task Force, WHO Collaborating Centre on Patient Safety, and the Commission for Hospital Hygiene and Infection Prevention (KRINKO), Robert Koch Institute, Berlin, Germany. <i>Antimicrobial Resistance and Infection Control</i> , 2022, 11, .	4.1	8
14	Acceptability of an alcohol-based handrub gel with superfatting agents among healthcare workers: a randomized crossover controlled study. <i>Antimicrobial Resistance and Infection Control</i> , 2022, 11, .	4.1	0
15	Neonates, Sepsis, and Antimicrobial Resistance—Steps to Tackle Difficult Issues in Our Most Vulnerable Population. <i>Journal of Obstetrics and Gynaecology Canada</i> , 2021, 43, 425-426.	0.7	0
16	Nouveau-nés, sepsis et résistance antimicrobienne — Mesures pour s'attaquer aux problèmes difficiles dans notre population la plus vulnérable. <i>Journal of Obstetrics and Gynaecology Canada</i> , 2021, 43, 427-428.	0.7	0
17	Addressing the global challenge of access to supplies during COVID-19. , 2021, , 419-441.		1
18	Nosocomial transmission and outbreaks of coronavirus disease 2019: the need to protect both patients and healthcare workers. <i>Antimicrobial Resistance and Infection Control</i> , 2021, 10, 7.	4.1	207

#	ARTICLE	IF	CITATIONS
19	Effect of Wearing a Novel Electronic Wearable Device on Hand Hygiene Compliance Among Health Care Workers. <i>JAMA Network Open</i> , 2021, 4, e2035331.	5.9	12
20	A Complexity Lens on the COVID-19 Pandemic. <i>International Journal of Health Policy and Management</i> , 2021, , .	0.9	14
21	The COVID-19 pandemic and N95 masks: reusability and decontamination methods. <i>Antimicrobial Resistance and Infection Control</i> , 2021, 10, 83.	4.1	11
22	Seroprevalence of anti-SARS-CoV-2 antibodies after the second pandemic peak. <i>Lancet Infectious Diseases</i> , The, 2021, 21, 600-601.	9.1	59
23	Large variation in anti-SARS-CoV-2 antibody prevalence among essential workers in Geneva, Switzerland. <i>Nature Communications</i> , 2021, 12, 3455.	12.8	30
24	Building a multisystemic understanding of societal resilience to the COVID-19 pandemic. <i>BMJ Global Health</i> , 2021, 6, e006794.	4.7	20
25	Persistence of anti-SARS-CoV-2 antibodies: immunoassay heterogeneity and implications for serosurveillance. <i>Clinical Microbiology and Infection</i> , 2021, 27, 1695.e7-1695.e12.	6.0	38
26	Hand hygiene in health care: 20 years of ongoing advances and perspectives. <i>Lancet Infectious Diseases</i> , The, 2021, 21, e209-e221.	9.1	76
27	Comparison of Routine Replacement With Clinically Indicated Replacement of Peripheral Intravenous Catheters. <i>JAMA Internal Medicine</i> , 2021, 181, 1471.	5.1	26
28	Seroprevalence of anti-SARS-CoV-2 antibodies 6 months into the vaccination campaign in Geneva, Switzerland, 1 June to 7 July 2021. <i>Eurosurveillance</i> , 2021, 26, .	7.0	44
29	Assessing the accuracy of a new hand hygiene monitoring device (SmartRub <sup>®</sup> ): from the laboratory to clinical practice. <i>Antimicrobial Resistance and Infection Control</i> , 2021, 10, 158.	4.1	2
30	Missed vaccinations and critical care admission: all you may wish to know or rediscoverâ€”a narrative review. <i>Intensive Care Medicine</i> , 2020, 46, 202-214.	8.2	7
31	Promises and limitations of a digitalized infection control program. <i>Journal of Advanced Nursing</i> , 2020, 76, 1876-1878.	3.3	2
32	Evidence for action: a One Health learning platform on interventions to tackle antimicrobial resistance. <i>Lancet Infectious Diseases</i> , The, 2020, 20, e307-e311.	9.1	37
33	Evaluation of World Health Organizationâ€™ Recommended Hand Hygiene Formulations. <i>Emerging Infectious Diseases</i> , 2020, 26, 2064-2068.	4.3	12
34	Applying thematic synthesis to interpretation and commentary in epidemiological studies: identifying what contributes to successful interventions to promote hand hygiene in patient care. <i>BMJ Quality and Safety</i> , 2020, 29, 756-763.	3.7	10
35	WHO Year of the Nurse and Midwife: More clean and educated hands for all. <i>Journal of Infection Prevention</i> , 2020, 21, 166-169.	0.9	2
36	The duality of nursesâ€™ work: How can the profession that saves the most lives in the world avoid spreading disease?. <i>International Journal of Nursing Studies</i> , 2020, 107, 103616.	5.6	0

#	ARTICLE	IF	CITATIONS
37	“Nurses and midwives: Clean care is in your hands” The 5th May 2020 World Health Organization SAVE LIVES: Clean Your Hands campaign. American Journal of Infection Control, 2020, 48, 471-472.	2.3	0
38	“Nurses and Midwives: clean care is in your hands”™: the 5 May 2020 World Health Organization <i>SAVE LIVES: Clean Your Hands</i> campaign. Journal of Infection Prevention, 2020, 21, 127-128.	0.9	0
39	Critical Reliability Issues of Common Type Alcohol-Based Handrub Dispensers. Antimicrobial Resistance and Infection Control, 2020, 9, 90.	4.1	11
40	“Infection prevention and control idea challenge” contest: a fresh view on medical education and problem solving. Antimicrobial Resistance and Infection Control, 2020, 9, 26.	4.1	5
41	Emojis in public health and how they might be used for hand hygiene and infection prevention and control. Antimicrobial Resistance and Infection Control, 2020, 9, 27.	4.1	20
42	Assessment of hand hygiene facilities and staff compliance in a large tertiary health care facility in northern Nigeria: a cross sectional study. Antimicrobial Resistance and Infection Control, 2020, 9, 30.	4.1	29
43	Hand hygiene promotion delivered by change agents”Two attitudes, similar outcome. Infection Control and Hospital Epidemiology, 2020, 41, 273-279.	1.8	6
44	“Nurses and midwives: Clean care is in your hands” The May 5, 2020, World Health Organization SAVE LIVES: Clean Your Hands campaign. Infection Control and Hospital Epidemiology, 2020, 41, 620-621.	1.8	8
45	Sustained effects of a multimodal campaign aiming at hand hygiene improvement on compliance and healthcare-associated infections in a large gynaecology/obstetrics tertiary-care centre in Vietnam. Antimicrobial Resistance and Infection Control, 2020, 9, 51.	4.1	12
46	The voice of nurses in hospital epidemiology and infection control: An example from the 19th century. International Journal of Infectious Diseases, 2020, 96, 119-120.	3.3	2
47	The economics of infection prevention: why it is crucial to invest in hand hygiene and nurses during the novel coronavirus pandemic. Journal of Infection, 2020, 81, 318-356.	3.3	9
48	A Serious Game Designed to Promote Safe Behaviors Among Health Care Workers During the COVID-19 Pandemic: Development of “Escape COVID-19” JMIR Serious Games, 2020, 8, e24986.	3.1	31
49	The Crucial Role of Midwives in Preventing Maternal Sepsis: It All Started in a Maternity Ward. Journal of Epidemiology and Global Health, 2020, 10, 113.	2.9	0
50	Glycerol content within the WHO ethanol-based handrub formulation: balancing tolerability with antimicrobial efficacy. Antimicrobial Resistance and Infection Control, 2019, 8, 109.	4.1	26
51	Acceptability and tolerability of alcohol-based hand hygiene products for elderly residents in long-term care: a crossover study. Antimicrobial Resistance and Infection Control, 2019, 8, 165.	4.1	4
52	Endovascular Infections and Endocarditis. , 2019, , 273-290.		0
53	Implementation research for the prevention of antimicrobial resistance and healthcare-associated infections; 2017 Geneva infection prevention and control (IPC)-think tank (part 1). Antimicrobial Resistance and Infection Control, 2019, 8, 87.	4.1	33
54	Infection prevention: laying an essential foundation for quality universal health coverage. The Lancet Global Health, 2019, 7, e698-e700.	6.3	10
