#	ARTICLE	IF	CITATIONS
1	Modeling allelic analyte signals for aSTRs in NGS DNA profiles. <i>Journal of Forensic Sciences</i> , 2021, 66, 1234-1245.	0.9	8
2	Validation of NGS for mitochondrial DNA casework at the FBI Laboratory. <i>Forensic Science International: Genetics</i> , 2020, 44, 102151.	1.6	48
3	Variability and additivity of read counts for aSTRs in NGS DNA profiles. <i>Forensic Science International: Genetics</i> , 2020, 48, 102351.	1.6	5
4	Sequence-based autosomal STR characterization in four US populations using PowerSeq <sup>®</sup> , <sup>®</sup> Auto/Y system. <i>Forensic Science International: Genetics</i> , 2020, 48, 102311.	1.6	11
5	An examination of STR nomenclatures, filters and models for MPS mixture interpretation. <i>Forensic Science International: Genetics</i> , 2020, 48, 102319.	1.6	10
6	Automation of high volume MPS mixture interpretation using CaseSolver. <i>Forensic Science International: Genetics Supplement Series</i> , 2019, 7, 14-15.	0.1	2
7	Use of the LUS in sequence allele designations to facilitate probabilistic genotyping of NGS-based STR typing results. <i>Forensic Science International: Genetics</i> , 2018, 34, 197-205.	1.6	29
8	A closer look at Verogen's ForenSeq <sup>®</sup> , <sup>®</sup> DNA Signature Prep kit autosomal and Y-STR data for streamlined analysis of routine reference samples. <i>Electrophoresis</i> , 2018, 39, 2685-2693.	1.3	34
9	Performance and concordance of the ForenSeq <sup>®</sup> , <sup>®</sup> system for autosomal and Y chromosome short tandem repeat sequencing of reference-type specimens. <i>Forensic Science International: Genetics</i> , 2017, 28, 1-9.	1.6	76
10	Internal validation of STRmix <sup>®</sup> , <sup>®</sup> for the interpretation of single source and mixed DNA profiles. <i>Forensic Science International: Genetics</i> , 2017, 29, 126-144.	1.6	74
11	The mitochondrial landscape of African Americans: An examination of more than 2500 control region haplotypes from 22 U.S. locations. <i>Forensic Science International: Genetics</i> , 2016, 22, 139-148.	1.6	10
12	Mitochondrial DNA heteroplasmy in the emerging field of massively parallel sequencing. <i>Forensic Science International: Genetics</i> , 2015, 18, 131-139.	1.6	118
13	Full mtGenome reference data: Development and characterization of 588 forensic-quality haplotypes representing three U.S. populations. <i>Forensic Science International: Genetics</i> , 2015, 14, 141-155.	1.6	78
14	Short tandem repeat typing on the 454 platform: Strategies and considerations for targeted sequencing of common forensic markers. <i>Forensic Science International: Genetics</i> , 2014, 12, 107-119.	1.6	68
15	Questioning the prevalence and reliability of human mitochondrial DNA heteroplasmy from massively parallel sequencing data. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014, 111, E4546-7.	3.3	25
16	Development of forensic-quality full mtGenome haplotypes: Success rates with low template specimens. <i>Forensic Science International: Genetics</i> , 2014, 10, 73-79.	1.6	18
17	Characterization of a modified amplification approach for improved STR recovery from severely degraded skeletal elements. <i>Forensic Science International: Genetics</i> , 2012, 6, 578-587.	1.6	18
18	Assessing the potential of next generation sequencing technologies for missing persons identification efforts. <i>Forensic Science International: Genetics Supplement Series</i> , 2011, 3, e447-e448.	0.1	19

#	ARTICLE	IF	CITATIONS
19	Short tandem repeat sequencing on the 454 platform. Forensic Science International: Genetics Supplement Series, 2011, 3, e357-e358.	0.1	18
20	Evaluation of automatable silica-based extraction methods for low quantity samples. Forensic Science International: Genetics Supplement Series, 2011, 3, e504-e505.	0.1	4
21	Titanic's unknown child: The critical role of the mitochondrial DNA coding region in a re-identification effort. Forensic Science International: Genetics, 2011, 5, 231-235.	1.6	17
22	mtGenome reference population databases and the future of forensic mtDNA analysis. Forensic Science International: Genetics, 2011, 5, 222-225.	1.6	33
23	The Use of Mitochondrial DNA Single Nucleotide Polymorphisms to Assist in the Resolution of Three Challenging Forensic Cases. Journal of Forensic Sciences, 2009, 54, 887-891.	0.9	32
24	Mitochondrial control region sequences from an African American population sample. Forensic Science International: Genetics, 2009, 4, e45-e52.	1.6	15
25	Identification of West Eurasian mitochondrial haplogroups by mtDNA SNP screening: Results of the 2006-2007 EDNAP collaborative exercise. Forensic Science International: Genetics, 2008, 2, 61-68.	1.6	13
26	Mitochondrial control region sequences from a U.S. "Hispanic" population sample. Forensic Science International: Genetics, 2008, 2, e19-e23.	1.6	15
27	Complete mitochondrial genome sequences for 265 African American and U.S. "Hispanic" individuals. Forensic Science International: Genetics, 2008, 2, e45-e48.	1.6	38
28	The application of mtDNA SNPs to a forensic case. Forensic Science International: Genetics Supplement Series, 2008, 1, 295-297.	0.1	4
29	Development and expansion of high-quality control region databases to improve forensic mtDNA evidence interpretation. Forensic Science International: Genetics, 2007, 1, 154-157.	1.6	49
30	DNA Identification of "Earthquake McGoon" 50 Years Postmortem. Journal of Forensic Sciences, 2007, 52, 1115-1118.	0.9	37
31	Effective strategies for forensic analysis in the mitochondrial DNA coding region. International Journal of Legal Medicine, 2006, 120, 27-32.	1.2	34
32	Single nucleotide polymorphisms over the entire mtDNA genome that increase the power of forensic testing in Caucasians. International Journal of Legal Medicine, 2004, 118, 137-146.	1.2	195
33	A multiplex allele-specific primer extension assay for forensically informative SNPs distributed throughout the mitochondrial genome. International Journal of Legal Medicine, 2004, 118, 147-157.	1.2	125
