#	ARTICLE	IF	CITATIONS
1	Cross friction algometry (CFA): Comparison of pressure pain thresholds between patients with chronic non-specific low back pain and healthy subjects. <i>Journal of Bodywork and Movement Therapies</i> , 2016, 20, 224-234.	1.2	14
2	Exploration of the validity and reliability of the "backache disability index" (BADIX) in patients with non-specific low back pain. <i>Journal of Back and Musculoskeletal Rehabilitation</i> , 2013, 26, 451-459.	1.1	10
3	Development of a Spanish version of the "Backache Index". <i>Journal of Back and Musculoskeletal Rehabilitation</i> , 2010, 23, 105-110.	1.1	10
4	Release of Myofascial Pain with Deep Cross-Friction Named "Roptrotherapy". <i>International Journal of Therapeutic Massage &amp; Bodywork</i> , 2010, 3, .	0.2	1
5	Übertragener Muskelschmerz ist primär peripheren Ursprungs: die Barrier-Dam-Hypothese. <i>Osteopathische Medizin</i> , 2010, 11, 4-9.	0.2	0
6	Release of myofascial pain with deep cross-friction named "roptrotherapy". <i>International Journal of Therapeutic Massage &amp; Bodywork</i> , 2010, 3, 36-7.	0.2	1
7	Validity of Cross-friction Algometry Procedure in Referred Muscle Pain Syndromes. <i>Clinical Journal of Pain</i> , 2008, 24, 456-462.	1.9	34
8	Effect of Roptrotherapy on Pressure-Pain Thresholds in Patients with Subacute Nonspecific Low Back Pain. <i>Journal of Musculoskeletal Pain</i> , 2007, 15, 41-53.	0.3	16
9	Referred muscle pain is primarily peripheral in origin: The "barrier-dam" theory. <i>Medical Hypotheses</i> , 2007, 68, 144-150.	1.5	17
10	Validity of the new Backache Index (BAI) in patients with low back pain. <i>Spine Journal</i> , 2006, 6, 565-571.	1.3	13
11	A pilot randomized placebo-controlled trial of roptrotherapy in patients with subacute non-specific low back pain. <i>Journal of Back and Musculoskeletal Rehabilitation</i> , 2006, 19, 111-117.	1.1	16
12	The influence of non-specific low back pain on pressure pain thresholds and disability. <i>European Journal of Pain</i> , 2005, 9, 375-375.	2.8	89
13	Pressure pain thresholds in healthy subjects: influence of physical activity, history of lower back pain factors and the use of endermology as a placebo-like treatment. <i>Journal of Bodywork and Movement Therapies</i> , 2003, 7, 53-61.	1.2	45
14	The decrease of the cranial rhythmic impulse during maximal physical exertion: an argument for the hypothesis of venomotion?. <i>Journal of Bodywork and Movement Therapies</i> , 2001, 5, 56-69.	1.2	0
