Jeroen B J Smeets

List of Publications by Year in Descending Order

293 papers	6,503 citations	41 h-index	67 g-index
305 ext. papers	7,261 ext. citations	2.3 avg, IF	6.14 L-index

#	Paper	IF	Citations
293	The influences of target size and recent experience on the vigour of adjustments to ongoing movements.. *Experimental Brain Research*, **2022**, 1	2.3	0
292	Hand movements respond to any motion near the endpoint.. *Attention, Perception, and Psychophysics*, **2022**, 1	2	0
291	Sprint Performance in Arms-Only Front Crawl Swimming Is Strongly Associated With the Power-To-Drag Ratio.. *Frontiers in Sports and Active Living*, **2022**, 4, 758095	2.3	
290	Size, weight, and expectations.. *Perception*, **2022**, 3010066221087404	1.2	
289	Having several options does not increase the time it takes to make a movement to an adequate end point.. *Experimental Brain Research*, **2022**, 1	2.3	0
288	The response to background motion: Characteristics of a movement stabilization mechanism. *Journal of Vision*, **2021**, 21, 3	0.4	2
287	Searching for Strangely Shaped Cookies - Is Taking a Bite Out of a Cookie Similar to Occluding Part of It?. *Perception*, **2021**, 50, 140-153	1.2	
286	Effects of ageing on responses to stepping-target displacements during walking. *European Journal of Applied Physiology*, **2021**, 121, 127-140	3.4	3
285	Pitfalls in quantifying exploration in reward-based motor learning and how to avoid them. *Biological Cybernetics*, **2021**, 115, 365-382	2.8	1
284	How feelings of unpleasantness develop during the progression of motion sickness symptoms. *Experimental Brain Research*, **2021**, 239, 3615-3624	2.3	3
283	A nearby distractor does not influence hand movements. *Cortex*, **2021**, 142, 204-212	3.8	0
282	Learning a reach trajectory based on binary reward feedback. *Scientific Reports*, **2021**, 11, 2667	4.9	1
281	Why some size illusions affect grip aperture. *Experimental Brain Research*, **2020**, 238, 969-979	2.3	8
280	Fast responses to stepping-target displacements when walking. *Journal of Physiology*, **2020**, 598, 1987-2000	3.9	9
279	Visual information is required to reduce the global effect. *Attention, Perception, and Psychophysics*, **2020**, 82, 2340-2347	2	5
278	Quantifying exploration in reward-based motor learning. *PLoS ONE*, **2020**, 15, e0226789	3.7	11
277	Looking Precisely at Your Fingertip Requires Visual Guidance of Gaze. *Perception*, **2020**, 49, 1252-1259	1.2	

276	When Is Moving a Cursor With a Computer Mouse Intuitive?. *Perception*, **2020**, 49, 484-487	1.2	4
275	Quantifying exploration in reward-based motor learning **2020**, 15, e0226789		
274	Quantifying exploration in reward-based motor learning **2020**, 15, e0226789		
273	Quantifying exploration in reward-based motor learning **2020**, 15, e0226789		
272	Quantifying exploration in reward-based motor learning **2020**, 15, e0226789		
271	Forget binning and get SMART: Getting more out of the time-course of response data. *Attention, Perception, and Psychophysics*, **2019**, 81, 2956-2967	2	16
270	The Limits of Predictive Remapping of Attention Across Eye Movements. *Frontiers in Psychology*, **2019**, 10, 1146	3.4	7
269	The predictability of a target's motion influences gaze, head, and hand movements when trying to intercept it. *Journal of Neurophysiology*, **2019**, 121, 2416-2427	3.2	7
268	When Does One Decide How Heavy an Object Feels While Picking It Up?. *Psychological Science*, **2019** , 30, 822-829	7.9	7
267	A visual illusion that influences perception and action through the dorsal pathway. *Communications Biology*, **2019**, 2, 38	6.7	12
266	Accuracy of Intercepting Moving Tactile Targets. *Perception*, **2019**, 48, 685-701	1.2	1
265	A review of grasping as the movements of digits in space. *Journal of Neurophysiology*, **2019**, 122, 1578-1597	3.2	13
264	Some Illusions Are More Inconsistent Than Others. *Perception*, **2019**, 48, 638-641	1.2	5
263	Is the manual following response an attempt to compensate for inferred self-motion?. *Experimental Brain Research*, **2019**, 237, 2549-2558	2.3	3
262	Reward-based motor adaptation can generalize across actions. *Journal of Experimental Psychology: Learning Memory and Cognition*, **2019**, 45, 71-81	2.2	10
261	Correcting for natural visuo-proprioceptive matching errors based on reward as opposed to error feedback does not lead to higher retention. *Experimental Brain Research*, **2019**, 237, 735-741	2.3	7
260	Visuo-Proprioceptive Matching Errors Are Consistent with Biases in Distance Judgments. *Journal of Motor Behavior*, **2019**, 51, 572-579	1.4	4
259	How Can You Best Measure Reaction Times?. *Journal of Motor Behavior*, **2019**, 51, 486-495	1.4	9

258	Depth Perception **2018**, 1-30		6
257	Postural responses to target jumps and background motion in a fast pointing task. *Experimental Brain Research*, **2018**, 236, 1573-1581	2.3	10
256	Haptic Guidance on Demand: A Grip-Force Based Scheduling of Guidance Forces. *IEEE Transactions on Haptics*, **2018**, 11, 255-266	2.7	1
255	Errors in interception can be predicted from errors in perception. *Cortex*, **2018**, 98, 49-59	3.8	13
254	Dynamic representations of visual space for perception and action. *Cortex*, **2018**, 98, 194-202	3.8	12
253	Spatial Representation of the Workspace in Blind, Low Vision, and Sighted Human Participants. *I-Perception*, **2018**, 9, 2041669518781877	1.2	5
252	Beyond binning: Getting more out of the time course of one-sample-per-trial data. *Journal of Vision*, **2018**, 18, 335	0.4	1
251	Gaze when reaching to grasp a glass. *Journal of Vision*, **2018**, 18, 16	0.4	10
250	Target-distractor competition cannot be resolved across a saccade. *Scientific Reports*, **2018**, 8, 15709	4.9	7
249	Effects of Aging on Postural Responses to Visual Perturbations During Fast Pointing. *Frontiers in Aging Neuroscience*, **2018**, 10, 401	5.3	6
248	Continuously updating one's predictions underlies successful interception. *Journal of Neurophysiology*, **2018**, 120, 3257-3274	3.2	18
247	The target as an obstacle: Grasping an object at different heights. *Human Movement Science*, **2018**, 61, 189-196	2.4	1
246	How many objects are inside this box? **2017**,		2
245	Potential Systematic Interception Errors are Avoided When Tracking the Target with One's Eyes. *Scientific Reports*, **2017**, 7, 10793	4.9	16
244	Matching locations is not just matching sensory representations. *Experimental Brain Research*, **2017**, 235, 533-545	2.3	21
243	Vector and position coding in goal-directed movements. *Experimental Brain Research*, **2017**, 235, 681-689	2.3	7
242	Effective Propulsion in Swimming: Grasping the Hydrodynamics of Hand and Arm Movements. *Journal of Applied Biomechanics*, **2017**, 33, 87-100	1.2	8
241	Accumulating visual information for action. *Progress in Brain Research*, **2017**, 236, 75-95	2.9	6

240	Unusual prism adaptation reveals how grasping is controlled. *ELife*, **2017**, 6,	8.9	7
239	Adjusting Haptic Guidance to Idiosyncratic Visuo-Haptic Matching Errors Improves Perceptual Consistency in Reaching. *IEEE Transactions on Human-Machine Systems*, **2016**, 46, 921-925	4.1	2
238	Movement Adjustments Have Short Latencies Because There is No Need to Detect Anything. *Motor Control*, **2016**, 20, 137-48	1.3	38
237	Reacting With or Without Detecting. *Motor Control*, **2016**, 20, 200-5	1.3	1
236	Temporally stable adaptation is robust, incomplete and specific. *European Journal of Neuroscience*, **2016**, 44, 2708-2715	3.5	14
235	Keeping a target in memory does not increase the effect of the M[l]er-Lyer illusion on saccades. *Experimental Brain Research*, **2016**, 234, 977-83	2.3	6
234	How Can People Be so Good at Intercepting Accelerating Objects if They Are so Poor at Visually Judging Acceleration?. *I-Perception*, **2016**, 7, 2041669515624317	1.2	12
233	Errors in visuo-haptic and haptic-haptic location matching are stable over long periods of time. *Acta Psychologica*, **2016**, 166, 31-6	1.7	27
232	Exposing sequence learning in a double-step task. *Experimental Brain Research*, **2016**, 234, 1701-12	2.3	3
231	Contributions of gaze-centered and object-centered coding in a double-step saccade task. *Journal of Vision*, **2016**, 16, 12	0.4	2
230	Moving your head reduces perisaccadic compression. *Journal of Vision*, **2016**, 16, 5	0.4	0
229	Fixation Biases towards the Index Finger in Almost-Natural Grasping. *PLoS ONE*, **2016**, 11, e0146864	3.7	16
228	Haptic Guidance Needs to Be Intuitive Not Just Informative to Improve Human Motor Accuracy. *PLoS ONE*, **2016**, 11, e0150912	3.7	6
227	Proprioceptive Localization of the Hand Changes When Skin Stretch around the Elbow Is Manipulated. *Frontiers in Psychology*, **2016**, 7, 1620	3.4	9
226	How various aspects of motion parallax influence distance judgments, even when we think we are standing still. *Journal of Vision*, **2016**, 16, 8	0.4	11
225	How Heavy Is an Illusory Length?. *I-Perception*, **2016**, 7, 2041669516669155	1.2	2
224	Synergies in Grasping. *Advances in Experimental Medicine and Biology*, **2016**, 957, 21-34	3.6	6
223	Using position dependent damping forces around reaching targets for transporting heavy objects: A Fitts' law approach **2016**,		1

222	Torques do not influence proprioceptive localization of the hand. *Experimental Brain Research*, **2015**, 233, 61-8	2.3	12
221	Optimising filtering parameters for a 3D motion analysis system. *Journal of Electromyography and Kinesiology*, **2015**, 25, 808-14	2.5	25
220	Quickly making the correct choice. *Vision Research*, **2015**, 113, 198-210	2.1	5
219	Hitting a target is fundamentally different from avoiding obstacles. *Vision Research*, **2015**, 110, 166-78	2.1	6
218	Grasping an object comfortably: orientation information is held in memory. *Experimental Brain Research*, **2015**, 233, 2663-72	2.3	6
217	The Müller-Lyer illusion affects visuomotor updating in the dorsal visual stream. *Neuropsychologia*, **2015**, 77, 119-27	3.2	8
216	How people achieve their amazing temporal precision in interception. *Journal of Vision*, **2015**, 15,	0.4	39
215	How moving backgrounds influence interception. *PLoS ONE*, **2015**, 10, e0119903	3.7	19
214	The Role of Temporal Information in Perisaccadic Mislocalization. *PLoS ONE*, **2015**, 10, e0134081	3.7	2
213	Visuomotor adaptation: how forgetting keeps us conservative. *PLoS ONE*, **2015**, 10, e0117901	3.7	27
212	Delays in Admittance-Controlled Haptic Devices Make Simulated Masses Feel Heavier. *PLoS ONE*, **2015**, 10, e0138023	3.7	4
211	Object size can influence perceived weight independent of visual estimates of the volume of material. *Scientific Reports*, **2015**, 5, 17719	4.9	10
210	Center or side: biases in selecting grasp points on small bars. *Experimental Brain Research*, **2014**, 232, 2061-72	2.3	16
209	Online manual movement adjustments in response to target position changes and apparent target motion. *Motor Control*, **2014**, 18, 44-54	1.3	4
208	Does perisaccadic compression require foveal vision?. *Perception*, **2014**, 43, 1214-24	1.2	1
207	Time course of the effect of the Muller-Lyer illusion on saccades and perceptual judgments. *Journal of Vision*, **2014**, 14,	0.4	28
206	Structure learning and the Occam's razor principle: a new view of human function acquisition. *Frontiers in Computational Neuroscience*, **2014**, 8, 121	3.5	8
205	Precise timing when hitting falling balls. *Frontiers in Human Neuroscience*, **2014**, 8, 342	3.3	13

204	Simultaneous adaptation of the thumb and index finger of the same hand to opposite prism displacements. *Journal of Neurophysiology*, **2014**, 111, 2554-9	3.2	5
203	Differences in curvature between constrained and unconstrained goal-directed movements to haptic targets. *Experimental Brain Research*, **2014**, 232, 3445-51	2.3	1
202	The influence of target object shape on maximum grip aperture in human grasping movements. *Experimental Brain Research*, **2014**, 232, 3569-78	2.3	8
201	Misjudgment of direction contributes to curvature in movements toward haptically defined targets. *Journal of Experimental Psychology: Human Perception and Performance*, **2014**, 40, 802-12	2.6	4
200	The influence of object height on maximum grip aperture in empirical and modeled data. *Journal of Experimental Psychology: Human Perception and Performance*, **2014**, 40, 889-96	2.6	3
199	Adapting haptic guidance authority based on user grip **2014**,		6
198	Analysis of methods to determine the latency of online movement adjustments. *Behavior Research Methods*, **2014**, 46, 131-9	6.1	24
197	Why does an obstacle just below the digits' paths not influence a grasping movement while an obstacle to the side of their paths does?. *Experimental Brain Research*, **2014**, 232, 103-12	2.3	4
196	Proprioceptive Biases in Different Experimental Designs. *Lecture Notes in Computer Science*, **2014**, 18-24	0.9	8
195	Why are the digits' paths curved vertically in human grasping movements?. *Experimental Brain Research*, **2013**, 224, 59-68	2.3	5
194	Shifted visual feedback of the hand affects reachability judgments in interception. *Vision Research*, **2013**, 88, 30-7	2.1	7
193	Gravity affects the vertical curvature in human grasping movements. *Journal of Motor Behavior*, **2013**, 45, 325-32	1.4	5
192	The effect of different inter-pad distances on the determination of active drag using the Measuring Active Drag system. *Journal of Biomechanics*, **2013**, 46, 1933-7	2.9	7
191	Comparing online adjustments to distance and direction in fast pointing movements. *Journal of Motor Behavior*, **2013**, 45, 395-404	1.4	18
190	Studying the role of vision in cycling: critique on restricting research to fixation behaviour. *Accident Analysis and Prevention*, **2013**, 59, 466-8	6.1	5
189	Random walk of motor planning in task-irrelevant dimensions. *Journal of Neurophysiology*, **2013**, 109, 969-77	3.2	59
188	Alignment to natural and imposed mismatches between the senses. *Journal of Neurophysiology*, **2013**, 109, 1890-9	3.2	27
187	Sensorimotor priors in nonstationary environments. *Journal of Neurophysiology*, **2013**, 109, 1259-67	3.2	15

186	The influence of previously seen objects' sizes in distance judgments. *Journal of Vision*, **2013**, 13, 2	0.4	6
185	How the statistics of sequential presentation influence the learning of structure. *PLoS ONE*, **2013**, 8, e62276	3.7	8
184	Proprioception is robust under external forces. *PLoS ONE*, **2013**, 8, e74236	3.7	20
183	Ultra-fast selection of grasping points. *Journal of Neurophysiology*, **2013**, 110, 1484-9	3.2	23
182	Is mislocalization during saccades related to the position of the saccade target within the image or to the gaze position at the end of the saccade?. *PLoS ONE*, **2013**, 8, e62436	3.7	3
181	Luminance contrast in the background makes flashes harder to detect during saccades. *Vision Research*, **2012**, 60, 22-7	2.1	4
180	Do we use a priori knowledge of gravity when making elbow rotations?. *Experimental Brain Research*, **2012**, 217, 163-73	2.3	5
179	Conclusions on motor control depend on the type of model used to represent the periphery. *Biological Cybernetics*, **2012**, 106, 441-51	2.8	14
178	Do humans prefer to see their grasping points?. *Journal of Motor Behavior*, **2012**, 44, 295-304	1.4	19
177	Do obstacles affect the selection of grasping points?. *Human Movement Science*, **2012**, 31, 1090-102	2.4	20
176	Introduction of the "Rotterdam mandibular distractor" and a biomechanical skull analysis of mandibular midline distraction. *British Journal of Oral and Maxillofacial Surgery*, **2012**, 50, 519-22	1.4	6
175	Timing the moment of impact in fast human movements. *Acta Psychologica*, **2012**, 141, 104-11	1.7	11
174	Mass is all that matters in the size-weight illusion. *PLoS ONE*, **2012**, 7, e42518	3.7	20
173	The effect of variability in other objects' sizes on the extent to which people rely on retinal image size as a cue for judging distance. *Journal of Vision*, **2012**, 12, 6	0.4	4
172	Are people adapted to their own glasses?. *Perception*, **2012**, 41, 991-3	1.2	9
171	Does size matter?. *Perception*, **2012**, 41, 1532-4	1.2	8
170	Grasping kinematics from the perspective of the individual digits: a modelling study. *PLoS ONE*, **2012**, 7, e33150	3.7	22
169	Moving the weber fraction: the perceptual precision for moment of inertia increases with exploration force. *PLoS ONE*, **2012**, 7, e42941	3.7	8

168	The Precision of Haptic Rod Length Perception Is Reduced by Lack of Visual Precision. *Lecture Notes in Computer Science*, **2012**, 19-24	0.9	
167	Is the Curvature in Hand Movements to Haptic Targets in the Mid Sagittal Plane Caused by a Misjudgment in Direction?. *Lecture Notes in Computer Science*, **2012**, 31-36	0.9	
166	Motor commands for fast point-to-point arm movements are customized for small changes in inertial load. *Journal of Electromyography and Kinesiology*, **2011**, 21, 960-7	2.5	3
165	Objects can be localized at positions that are inconsistent with the relative disparity between them. *Journal of Vision*, **2011**, 11,	0.4	4
164	Judgments of reachability are independent of visuomotor adaptation. *Perception*, **2011**, 40, 962-74	1.2	4
163	Integration of tactile input across fingers in a patient with finger agnosia. *Neuropsychologia*, **2011**, 49, 138-46	3.2	7
162	Peri-saccadic mislocalization is not influenced by the predictability of the saccade target location. *Vision Research*, **2011**, 51, 154-9	2.1	11
161	Better performance with two eyes than with one in stereo-blind subjects' judgments of motion in depth. *Vision Research*, **2011**, 51, 1249-53	2.1	7
160	Continuous visual control of interception. *Human Movement Science*, **2011**, 30, 475-94	2.4	50
159	Haptic subitizing across the fingers. *Attention, Perception, and Psychophysics*, **2011**, 73, 1579-85	2	18
158	Relative finger position influences whether you can localize tactile stimuli. *Experimental Brain Research*, **2011**, 208, 245-55	2.3	26
157	Number magnitude to finger mapping is disembodied and topological. *Experimental Brain Research*, **2011**, 209, 395-400	2.3	14
156	Misjudging where you felt a light switch in a dark room. *Experimental Brain Research*, **2011**, 213, 223-7	2.3	7
155	Grasping and hitting moving objects. *Experimental Brain Research*, **2011**, 212, 487-96	2.3	4
154	Quickly 'learning' to move optimally. *Experimental Brain Research*, **2011**, 213, 153-61	2.3	21
153	Fast and fine-tuned corrections when the target of a hand movement is displaced. *Experimental Brain Research*, **2011**, 214, 453-62	2.3	57
152	Reweighting visual cues by touch. *Journal of Vision*, **2011**, 11,	0.4	22
151	Temporal uncertainty separates flashes from their background during saccades. *Journal of Neuroscience*, **2011**, 31, 3708-11	6.6	18

150	Judging an unfamiliar object's distance from its retinal image size. *Journal of Vision*, **2011**, 11,	0.4	15
149	Using a stick does not necessarily alter judged distances or reachability. *PLoS ONE*, **2011**, 6, e16697	3.7	18
148	The use of the saccade target as a visual reference when localizing flashes during saccades. *Journal of Vision*, **2010**, 10, 7.1-9	0.4	12
147	Vision for action is not veridical. *Cognitive Neuroscience*, **2010**, 1, 69	1.7	1
146	Exploratory movements determine cue weighting in haptic length perception of handheld rods. *Journal of Neurophysiology*, **2010**, 104, 2821-30	3.2	9
145	Isometric torque-angle relationships of the elbow flexors and extensors in the transverse plane. *Journal of Electromyography and Kinesiology*, **2010**, 20, 923-31	2.5	9
144	Eye-hand coupling is not the cause of manual return movements when searching. *Experimental Brain Research*, **2010**, 201, 221-7	2.3	
143	Serial search for fingers of the same hand but not for fingers of different hands. *Experimental Brain Research*, **2010**, 202, 261-4	2.3	12
142	Similarities between digits' movements in grasping, touching and pushing. *Experimental Brain Research*, **2010**, 203, 339-46	2.3	13
141	Posture of the arm when grasping spheres to place them elsewhere. *Experimental Brain Research*, **2010**, 204, 163-71	2.3	24
140	Does planning a different trajectory influence the choice of grasping points?. *Experimental Brain Research*, **2010**, 206, 15-24	2.3	19
139	Catching a gently thrown ball. *Experimental Brain Research*, **2010**, 206, 409-17	2.3	42
138	How well can people judge when something happened?. *Vision Research*, **2010**, 50, 1101-8	2.1	10
137	A new binocular cue for absolute distance: Disparity relative to the most distant structure. *Vision Research*, **2010**, 50, 1786-92	2.1	36
136	Robust movement segmentation by combining multiple sources of information. *Journal of Neuroscience Methods*, **2010**, 187, 147-55	3	63
135	Muscular Torque Can Explain Biases in Haptic Length Perception: A Model Study on the Radial-Tangential Illusion. *Lecture Notes in Computer Science*, **2010**, 392-397	0.9	4
134	Can illumination estimates provide the basis for color constancy?. *Journal of Vision*, **2009**, 9, 18.1-11	0.4	18
133	Slant cues are processed with different latencies for the online control of movement. *Journal of Vision*, **2009**, 9, 25.1-8	0.4	15

132	Temporal information can influence spatial localization. *Journal of Neurophysiology*, **2009**, 102, 490-5	3.2	29
131	Maybe they are all circles: clues and cues. *Journal of Vision*, **2009**, 9, 10.1-5	0.4	4
130	Different cue weights at the same place. *Journal of Vision*, **2009**, 9, 26.1-5	0.4	1
129	Reliable identification by color under natural conditions. *Journal of Vision*, **2009**, 9, 39.1-8	0.4	11
128	Relapse and stability of surgically assisted rapid maxillary expansion: an anatomic biomechanical study. *Journal of Oral and Maxillofacial Surgery*, **2009**, 67, 10-4	1.8	46
127	Testing a counter-intuitive prediction of optimal cue combination. *Vision Research*, **2009**, 49, 134-9	2.1	8
