#	ARTICLE	IF	CITATIONS
1	PRRT2 Mutant Leads to Dysfunction of Glutamate Signaling. International Journal of Molecular Sciences, 2015, 16, 9134-9151.	4.1	64
2	Genome-wide association study identifies 8p21.3 associated with persistent hepatitis B virus infection among Chinese. Nature Communications, 2016, 7, 11664.	12.8	54
3	Evaluation of susceptibility locus for response to interferon- λ based therapy in chronic hepatitis B patients in Chinese. Antiviral Research, 2012, 93, 297-300.	4.1	47
4	Genetic variations in STAT4,C2,HLA-DRB1 and HLA-DQ associated with risk of hepatitis B virus-related liver cirrhosis. Scientific Reports, 2015, 5, 16278.	3.3	43
5	Genetic variation in STAT4 predicts response to interferon- λ therapy for hepatitis B e antigen- ϵ positive chronic hepatitis B. Hepatology, 2016, 63, 1102-1111.	7.3	38
6	A missense polymorphism in <i>ATF6</i> gene is associated with susceptibility to hepatocellular carcinoma probably by altering ATF6 level. International Journal of Cancer, 2014, 135, 61-68.	5.1	35
7	Apolipoprotein M promoter polymorphisms alter promoter activity and confer the susceptibility to the development of type 1 diabetes. Clinical Biochemistry, 2009, 42, 17-21.	1.9	32
8	Activating transcription factor 6 reduces A β 1-42 and restores memory in Alzheimer's disease model mice. International Journal of Neuroscience, 2020, 130, 1015-1023.	1.6	29
9	PRRT2 deficiency induces paroxysmal kinesigenic dyskinesia by influencing synaptic function in the primary motor cortex of rats. Neurobiology of Disease, 2019, 121, 274-285.	4.4	26
10	A pharmacogenetic study of polymorphisms in interferon pathway genes and response to interferon- λ treatment in chronic hepatitis B patients. Antiviral Research, 2009, 83, 252-256.	4.1	22
11	Polymorphisms in the <i>VEGFA</i> promoter are associated with susceptibility to hepatocellular carcinoma by altering promoter activity. International Journal of Cancer, 2013, 133, 1085-1093.	5.1	22
12	Intron polymorphism in the <i>KIAA0350</i> gene is reproducibly associated with susceptibility to type 1 diabetes (T1D) in the Han Chinese population. Clinical Endocrinology, 2009, 71, 46-49.	2.4	19
13	Role of BDNF Val66Met functional polymorphism in temporal lobe epilepsy. International Journal of Neuroscience, 2016, 126, 436-441.	1.6	16
14	A functional polymorphism in <i>ADAR1</i> gene affects HBsAg seroclearance both spontaneously and interferon induced. Liver International, 2014, 34, 1560-1565.	3.9	14
15	ADAR1 Stimulation by IFN- λ Downregulates the Expression of MAVS via RNA Editing to Regulate the Anti-HBV Response. Molecular Therapy, 2021, 29, 1335-1348.	8.2	13
16	Polymorphisms in ADAR1 gene affect response to interferon alpha based therapy for chronic hepatitis B in Han Chinese. Antiviral Research, 2012, 94, 272-275.	4.1	10
17	Activating transcription factor 6 regulates cystathionine to increase autophagy and restore memory in Alzheimer's disease model mice. Biochemical and Biophysical Research Communications, 2022, 615, 109-115.	2.1	8
18	A 3' UTR SNP in COL18A1 Is Associated with Susceptibility to HBV Related Hepatocellular Carcinoma in Chinese: Three Independent Case-Control Studies. PLoS ONE, 2012, 7, e33855.	2.5	7

#	ARTICLE	IF	CITATIONS
19	ATF6 deficiency damages the development of spermatogenesis in male <i>Atf6</i> knockout mice. <i>Andrologia</i> , 2022, 54, e14350.	2.1	5
20	HBV suppresses thapsigargin-induced apoptosis via inhibiting CHOP expression in hepatocellular carcinoma cells. <i>Oncology Letters</i> , 2017, 14, 4403-4409.	1.8	3
