| #  | ARTICLE                                                                                                                                                                                                                                                                | IF   | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 1  | Internalizing Symptoms and Adverse Childhood Experiences Associated With Functional Connectivity in a Middle Childhood Sample. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2024, 9, 50-59.                                                 | 1.5  | 2         |
| 2  | Psychotic-like Experiences and Polygenic Liability in the Adolescent Brain Cognitive Development Study. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2022, 7, 45-55.                                                                        | 1.5  | 16        |
| 3  | Associations between long-term psychosis risk, probabilistic category learning, and attenuated psychotic symptoms with cortical surface morphometry. <i>Brain Imaging and Behavior</i> , 2022, 16, 91-106.                                                             | 2.1  | 2         |
| 4  | Early Childhood Socioeconomic Status and Cognitive and Adaptive Outcomes at the Transition to Adulthood: The Mediating Role of Gray Matter Development Across Five Scan Waves. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2022, 7, 34-44. | 1.5  | 13        |
| 5  | Persistent and distressing psychotic-like experiences using adolescent brain cognitive developmentâ„ study data. <i>Molecular Psychiatry</i> , 2022, 27, 1490-1501.                                                                                                    | 7.9  | 19        |
| 6  | Advances and Future Directions in Understanding Associations Between Stressful Events and Cortical Thickness in Psychosis Risk. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2022, 7, 124-126.                                              | 1.5  | 0         |
| 7  | Associations between social behaviors and experiences with neural correlates of implicit emotion regulation in middle childhood. <i>Neuropsychopharmacology</i> , 2022, 47, 1169-1179.                                                                                 | 5.4  | 2         |
| 8  | Reinventing schizophrenia â€“ Embracing complexity and complication. <i>Schizophrenia Research</i> , 2022, 242, 7-11.                                                                                                                                                  | 2.0  | 3         |
| 9  | Understanding Associations Between Race/Ethnicity, Experiences of Discrimination, and Psychotic-like Experiences in Middle Childhood. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2022, 61, 1262-1272.                                 | 0.5  | 13        |
| 10 | Psychotic-like experiences in childhood and early adolescence: Clarifying the construct and future directions. <i>Schizophrenia Research</i> , 2022, 246, 205-206.                                                                                                     | 2.0  | 2         |
| 11 | Environmental Risk Factors and Psychotic-like Experiences in Children Aged 9â€“10. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2021, 60, 490-500.                                                                                      | 0.5  | 39        |
| 12 | The ABCD study: understanding the development of risk for mental and physical health outcomes. <i>Neuropsychopharmacology</i> , 2021, 46, 131-142.                                                                                                                     | 5.4  | 151       |
| 13 | Associations Between Resting-State Functional Connectivity and a Hierarchical Dimensional Structure of Psychopathology in Middle Childhood. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2021, 6, 508-517.                                  | 1.5  | 18        |
| 14 | Associations Between Prenatal Cannabis Exposure and Childhood Outcomes. <i>JAMA Psychiatry</i> , 2021, 78, 64.                                                                                                                                                         | 11.0 | 156       |
| 15 | Psychotic Like Experiences are Associated with Suicide Ideation and Behavior in 9 to 10-Year Old Children in the United States. <i>Research on Child and Adolescent Psychopathology</i> , 2021, 49, 255-265.                                                           | 2.3  | 16        |
| 16 | Rates of Incidental Findings in Brain Magnetic Resonance Imaging in Children. <i>JAMA Neurology</i> , 2021, 78, 578.                                                                                                                                                   | 9.0  | 28        |
| 17 | Substance use patterns in 9-10 year olds: Baseline findings from the adolescent brain cognitive development (ABCD) study. <i>Drug and Alcohol Dependence</i> , 2021, 227, 108946.                                                                                      | 3.2  | 19        |
| 18 | Demographic and mental health assessments in the adolescent brain and cognitive development study: Updates and age-related trajectories. <i>Developmental Cognitive Neuroscience</i> , 2021, 52, 101031.                                                               | 4.0  | 34        |

| #  | ARTICLE                                                                                                                                                                                                                                                            | IF   | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 19 | Examining associations between two different jumping to conclusions scores with positive schizotypy and recent distress. <i>Cognitive Neuropsychiatry</i> , 2020, 25, 45-56.                                                                                       | 1.3  | 2         |
| 20 | Replication of Associations With Psychotic-Like Experiences in Middle Childhood From the Adolescent Brain Cognitive Development (ABCD) Study. <i>Schizophrenia Bulletin Open</i> , 2020, 1, sgaa009.                                                               | 1.7  | 26        |
| 21 | S28. ADVERSE CHILDHOOD EXPERIENCES AND PSYCHOTIC-LIKE EXPERIENCES ARE ASSOCIATED ABOVE AND BEYOND SHARED CORRELATES: FINDINGS FROM THE ADOLESCENT AND BRAIN COGNITIVE DEVELOPMENT (ABCD) STUDY. <i>Schizophrenia Bulletin</i> , 2020, 46, S41-S42.                 | 4.3  | 0         |
| 22 | Adverse childhood experiences and psychotic-like experiences are associated above and beyond shared correlates: Findings from the adolescent brain cognitive development study. <i>Schizophrenia Research</i> , 2020, 222, 235-242.                                | 2.0  | 24        |
| 23 | Psychosis risk is associated with decreased white matter integrity in limbic network corticostriatal tracts. <i>Psychiatry Research - Neuroimaging</i> , 2020, 301, 111089.                                                                                        | 1.8  | 3         |
| 24 | Examining Specificity of Neural Correlates of Childhood Psychotic-like Experiences During an Emotional n-Back Task. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2020, 5, 580-590.                                                      | 1.5  | 2         |
| 25 | Correspondence Between Perceived Pubertal Development and Hormone Levels in 9-10 Year-Olds From the Adolescent Brain Cognitive Development Study. <i>Frontiers in Endocrinology</i> , 2020, 11, 549928.                                                            | 3.5  | 45        |
| 26 | An item response theory analysis of the Prodromal Questionnaire-Brief Child Version: Developing a screening form that informs understanding of self-reported psychotic-like experiences in childhood.. <i>Journal of Abnormal Psychology</i> , 2020, 129, 293-304. | 1.9  | 12        |
| 27 | Probabilistic Category Learning and Striatal Functional Activation in Psychosis Risk. <i>Schizophrenia Bulletin</i> , 2019, 45, 396-404.                                                                                                                           | 4.3  | 16        |
| 28 | Striatum-related functional activation during reward- versus punishment-based learning in psychosis risk. <i>Neuropsychopharmacology</i> , 2019, 44, 1967-1974.                                                                                                    | 5.4  | 3         |
| 29 | Functional Connectivity of the Striatum in Schizophrenia and Psychotic Bipolar Disorder. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2019, 4, 956-965.                                                                                 | 1.5  | 39        |
| 30 | The subjective-objective deficit paradox in schizotypy extends to emotion regulation and awareness. <i>Journal of Psychiatric Research</i> , 2019, 111, 160-168.                                                                                                   | 3.1  | 17        |
| 31 | Resting-State Functional Connectivity and Psychotic-like Experiences in Childhood: Results From the Adolescent Brain Cognitive Development Study. <i>Biological Psychiatry</i> , 2019, 86, 7-15.                                                                   | 1.3  | 116       |
| 32 | 7.1 PREDICTORS OF DISTRESSING PSYCHOTIC-LIKE EXPERIENCES IN SCHOOL-AGE CHILDREN. <i>Schizophrenia Bulletin</i> , 2019, 45, S97-S98.                                                                                                                                | 4.3  | 0         |
| 33 | Association of Prenatal Cannabis Exposure With Psychosis Proneness Among Children in the Adolescent Brain Cognitive Development (ABCD) Study. <i>JAMA Psychiatry</i> , 2019, 76, 762.                                                                              | 11.0 | 70        |
| 34 | Genetic Predisposition vs Individual-Specific Processes in the Association Between Psychotic-like Experiences and Cannabis Use. <i>JAMA Psychiatry</i> , 2019, 76, 87.                                                                                             | 11.0 | 40        |
| 35 | Cognitive Deficits in Psychotic Disorders: A Lifespan Perspective. <i>Neuropsychology Review</i> , 2018, 28, 509-533.                                                                                                                                              | 4.9  | 279       |
| 36 | Assessment of the Prodromal Questionnaire–Brief Child Version for Measurement of Self-reported Psychoticlike Experiences in Childhood. <i>JAMA Psychiatry</i> , 2018, 75, 853.                                                                                     | 11.0 | 113       |

| #  | ARTICLE                                                                                                                                                                                                          | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Evidence that communication impairment in schizophrenia is associated with generalized poor task performance. <i>Psychiatry Research</i> , 2017, 249, 172-179.                                                   | 3.3 | 13        |
| 38 | An electrophysiological investigation of emotional abnormalities in groups at risk for schizophrenia-spectrum personality disorders. <i>Biological Psychology</i> , 2017, 124, 119-132.                          | 2.2 | 18        |
| 39 | Emotional word usage in groups at risk for schizophrenia-spectrum disorders: An objective investigation of attention to emotion. <i>Psychiatry Research</i> , 2017, 252, 29-37.                                  | 3.3 | 14        |
| 40 | Associations between Electrophysiological Evidence of Reward and Punishment-Based Learning and Psychotic Experiences and Social Anhedonia in At-Risk Groups. <i>Neuropsychopharmacology</i> , 2017, 42, 925-932. | 5.4 | 7         |
| 41 | Social Anhedonia Is Not Just Extreme Introversion: Empirical Evidence of Distinct Constructs. <i>Journal of Personality Disorders</i> , 2016, 30, 451-468.                                                       | 1.4 | 21        |
| 42 | Examining associations between psychosis risk, social anhedonia, and performance of striatum-related behavioral tasks.. <i>Journal of Abnormal Psychology</i> , 2015, 124, 507-518.                              | 1.9 | 24        |
| 43 | An Experimental Examination of the Aberrant Salience Hypothesis Using a Salience Manipulation and a Behavioral Magical Thinking Task. <i>Journal of Experimental Psychopathology</i> , 2015, 6, 297-312.         | 0.8 | 7         |
| 44 | Sex differences in magical ideation: A community-based twin study.. <i>Personality Disorders: Theory, Research, and Treatment</i> , 2014, 5, 212-219.                                                            | 1.3 | 12        |
| 45 | Magical ideation, schizotypy and the impact of emotions. <i>Psychiatry Research</i> , 2012, 197, 36-40.                                                                                                          | 3.3 | 24        |
