#	Article	IF	CITATIONS
1	A catalog of white light coronal mass ejections observed by the SOHO spacecraft. Journal of Geophysical Research, 2004, 109, .	3.3	870
2	Solar and interplanetary sources of major geomagnetic storms (<i>Dst</i> ≤^'100 nT) during 1996–2005. Journal of Geophysical Research, 2007, 112, .	3.3	485
3	The SOHO/LASCO CME Catalog. Earth, Moon and Planets, 2009, 104, 295-313.	0.6	451
4	Interplanetary acceleration of coronal mass ejections. Geophysical Research Letters, 2000, 27, 145-148.	4.0	437
5	Corotating solar wind streams and recurrent geomagnetic activity: A review. Journal of Geophysical Research, 2006, 111, .	3.3	396
6	Predicting the 1-AU arrival times of coronal mass ejections. Journal of Geophysical Research, 2001, 106, 29207-29217.	3.3	368
7	Prominence Eruptions and Coronal Mass Ejection: A Statistical Study Using Microwave Observations. Astrophysical Journal, 2003, 586, 562-578.	4.5	292
8	Radio Signatures of Coronal Mass Ejection Interaction: Coronal Mass Ejection Cannibalism?. Astrophysical Journal, 2001, 548, L91-L94.	4.5	281
9	Understanding space weather to shield society: A global road map for 2015–2025 commissioned by COSPAR and ILWS. Advances in Space Research, 2015, 55, 2745-2807.	2.6	256
10	Intensity variation of large solar energetic particle events associated with coronal mass ejections. Journal of Geophysical Research, 2004, 109, .	3.3	248
11	Properties of Ground Level Enhancement Events and the Associated Solar Eruptions During Solar Cycle 23. Space Science Reviews, 2012, 171, 23-60.	8.1	237
12	Energy partition in two solar flare/CME events. Journal of Geophysical Research, 2004, 109, .	3.3	223
13	Interacting Coronal Mass Ejections and Solar Energetic Particles. Astrophysical Journal, 2002, 572, L103-L107.	4.5	221
14	Characteristics of coronal mass ejections associated with long-wavelength type II radio bursts. Journal of Geophysical Research, 2001, 106, 29219-29229.	3.3	198
15	Different Power-Law Indices in the Frequency Distributions of Flares with and without Coronal Mass Ejections. Astrophysical Journal, 2006, 650, L143-L146.	4.5	198
16	Near-Sun and near-Earth manifestations of solar eruptions. Journal of Geophysical Research, 2001, 106, 25261-25277.	3.3	182
17	A Statistical Study of Two Classes of Coronal Mass Ejections. Astrophysical Journal, 2002, 581, 694-702.	4.5	182
18	Geoeffectiveness of halo coronal mass ejections. Journal of Geophysical Research, 2007, 112, n/a-n/a.	3.3	176

#	Article	IF	CITATIONS
19	ls in vivo measurement of size of polyps during colonoscopy accurate?. Gastrointestinal Endoscopy, 1997, 46, 497-502.	1.0	157
20	Coronal mass ejections and other extreme characteristics of the 2003 October-November solar eruptions. Journal of Geophysical Research, 2005, 110, .	3.3	153
21	CME interactions with coronal holes and their interplanetary consequences. Journal of Geophysical Research, 2009, 114, .	3.3	150
22	Coronal Mass Ejections and Solar Polarity Reversal. Astrophysical Journal, 2003, 598, L63-L66.	4.5	145
23	Origin of coronal and interplanetary shocks: A new look with Wind spacecraft data. Journal of Geophysical Research, 1998, 103, 307-316.	3.3	144
24	EUV WAVE REFLECTION FROM A CORONAL HOLE. Astrophysical Journal, 2009, 691, L123-L127.	4.5	137
25	Relation Between Type II Bursts and CMEs Inferred from STEREO Observations. Solar Physics, 2009, 259, 227-254.	2.5	136
26	Visibility of coronal mass ejections as a function of flare location and intensity. Journal of Geophysical Research, 2005, 110, .	3.3	131
27	Band-splitting of coronal and interplanetary type II bursts. Astronomy and Astrophysics, 2001, 377, 321-329.	5.1	125
28	Impact of space weather on climate and habitability of terrestrial-type exoplanets. International Journal of Astrobiology, 2020, 19, 136-194.	1.6	125
29	Influence of the aerodynamic drag on the motion of interplanetary ejecta. Journal of Geophysical Research, 2002, 107, SSH 2-1-SSH 2-6.	3.3	123
30	A New Method for Estimating Widths, Velocities, and Source Location of Halo Coronal Mass Ejections. Astrophysical Journal, 2003, 584, 472-478.	4.5	120
31	Type II radio bursts and energetic solar eruptions. Journal of Geophysical Research, 2005, 110, .	3.3	120
32	Coronal mass ejections of solar cycle 23. Journal of Astrophysics and Astronomy, 2006, 27, 243-254.	1.0	119
33	Coronal mass ejections, type II radio bursts, and solar energetic particle events in the SOHO era. Annales Geophysicae, 2008, 26, 3033-3047.	1.6	119
34	Properties of Interplanetary Coronal Mass Ejections. Space Science Reviews, 2007, 124, 145-168.	8.1	118
35	Solar Sources of Impulsive Solar Energetic Particle Events and Their Magnetic Field Connection to the Earth. Astrophysical Journal, 2006, 650, 438-450.	4.5	116
36	Percutaneous endoscopic gastrostomy: a randomized prospective comparison of early and delayed feeding. Gastrointestinal Endoscopy, 1996, 44, 164-167.	1.0	113

#	Article	IF	CITATIONS
37	Influence of coronal mass ejection interaction on propagation of interplanetary shocks. Journal of Geophysical Research, 2004, 109, .	3.3	113
38	Kinematics of coronal mass ejections between 2 and 30 solar radii. Astronomy and Astrophysics, 2004, 423, 717-728.	5.1	113
39	Anomalous expansion of coronal mass ejections during solar cycle 24 and its space weather implications. Geophysical Research Letters, 2014, 41, 2673-2680.	4.0	113
40	A Global Picture of CMEs in the Inner Heliosphere. Astrophysics and Space Science Library, 2004, , 201-251.	2.7	113
41	Observations of the 24 September 1997 Coronal Flare Waves. Solar Physics, 2000, 193, 161-180.	2.5	111
42	IMPLICATIONS OF MASS AND ENERGY LOSS DUE TO CORONAL MASS EJECTIONS ON MAGNETICALLY ACTIVE STARS. Astrophysical Journal, 2013, 764, 170.	4.5	111
43	The Energetic Particle Detector. Astronomy and Astrophysics, 2020, 642, A7.	5.1	107
44	Properties and geoeffectiveness of magnetic clouds during solar cycles 23 and 24. Journal of Geophysical Research: Space Physics, 2015, 120, 9221-9245.	2.4	106
45	History and development of coronal mass ejections as a key player in solar terrestrial relationship. Geoscience Letters, 2016, 3, .	3.3	105
46	Solar sources and geospace consequences of interplanetary magnetic clouds observed during solar cycle 23. Journal of Atmospheric and Solar-Terrestrial Physics, 2008, 70, 245-253.	1.6	104
47	Solar source of the largest geomagnetic storm of cycle 23. Geophysical Research Letters, 2005, 32, n/a-n/a.	4.0	103
48	Statistical Distributions of Speeds of Coronal Mass Ejections. Astrophysical Journal, 2005, 619, 599-603.	4.5	98
49	THE STRENGTH AND RADIAL PROFILE OF THE CORONAL MAGNETIC FIELD FROM THE STANDOFF DISTANCE OF A CORONAL MASS EJECTION-DRIVEN SHOCK. Astrophysical Journal Letters, 2011, 736, L17.	8.3	98
50	THE FIRST GROUND LEVEL ENHANCEMENT EVENT OF SOLAR CYCLE 24: DIRECT OBSERVATION OF SHOCK FORMATION AND PARTICLE RELEASE HEIGHTS. Astrophysical Journal Letters, 2013, 765, L30.	8.3	97
51	Major solar eruptions and high-energy particle events during solar cycle 24. Earth, Planets and Space, 2014, 66, .	2.5	97
52	INTERPLANETARY SHOCKS LACKING TYPE II RADIO BURSTS. Astrophysical Journal, 2010, 710, 1111-1126.	4.5	94
53	MINIFILAMENT ERUPTIONS THAT DRIVE CORONAL JETS IN A SOLAR ACTIVE REGION. Astrophysical Journal, 2016, 821, 100.	4.5	94
54	SOHO and radio observations of a CME shock wave. Geophysical Research Letters, 2000, 27, 1439-1442.	4.0	92

#	Article	IF	CITATIONS
55	CORONAL MAGNETIC FIELD MEASUREMENT FROM EUV IMAGES MADE BY THE <i>SOLAR DYNAMICS OBSERVATORY</i> . Astrophysical Journal, 2012, 744, 72.	4.5	91
56	An empirical model to predict the 1-AU arrival of interplanetary shocks. Advances in Space Research, 2005, 36, 2289-2294.	2.6	89
57	Radio-rich solar eruptive events. Geophysical Research Letters, 2000, 27, 1427-1430.	4.0	87
58	Coronal Dimming Associated with a Giant Prominence Eruption. Astrophysical Journal, 1998, 498, L179-L182.	4.5	85
59	Properties of Interplanetary Coronal Mass Ejections. Space Sciences Series of ISSI, 2007, , 145-168.	0.0	84
60	Large solar energetic particle events of cycle 23: A global view. Geophysical Research Letters, 2003, 30,	4.0	83
61	On the relationship between coronal mass ejections and magnetic clouds. Geophysical Research Letters, 1998, 25, 2485-2488.	4.0	82
62	A comparison of coronal mass ejections identified by manual and automatic methods. Annales Geophysicae, 2008, 26, 3103-3112.	1.6	82
63	Introduction to the special section: Violent Sun-Earth connection events of October–November 2003. Geophysical Research Letters, 2005, 32, .	4.0	81
64	Height of shock formation in the solar corona inferred from observations of type II radio bursts and coronal mass ejections. Advances in Space Research, 2013, 51, 1981-1989.	2.6	81
65	Early life of coronal mass ejections. Journal of Atmospheric and Solar-Terrestrial Physics, 2000, 62, 1457-1469.	1.6	77
66	On the Rates of Coronal Mass Ejections: Remote Solar and In Situ Observations. Astrophysical Journal, 2006, 647, 648-653.	4.5	77
67	LARGE SOLAR ENERGETIC PARTICLE EVENTS ASSOCIATED WITH FILAMENT ERUPTIONS OUTSIDE ACTIVE REGIONS. Astrophysical Journal, 2015, 806, 8.	4.5	77
68	Millimeter, microwave, hard X-ray, and soft X-ray observations of energetic electron populations in solar flares. Astrophysical Journal, Supplement Series, 1994, 90, 599.	7.7	75
69	Coronal Mass Ejections and Non-recurrent Forbush Decreases. Solar Physics, 2014, 289, 3949-3960.	2.5	74
70	A statistical study of CMEs associated with metric type II bursts. Geophysical Research Letters, 2003, 30, .	4.0	73
71	The Pre-CME Sun. Space Science Reviews, 2006, 123, 303-339.	8.1	73
72	Radioâ€Quiet Fast and Wide Coronal Mass Ejections. Astrophysical Journal, 2008, 674, 560-569.	4.5	73

#	Article	IF	CITATIONS
73	Coronal Observations of CMEs. Space Science Reviews, 2006, 123, 127-176.	8.1	72
74	Solar connections of geoeffective magnetic structures. Journal of Atmospheric and Solar-Terrestrial Physics, 2008, 70, 2078-2100.	1.6	70
75	THE PECULIAR BEHAVIOR OF HALO CORONAL MASS EJECTIONS IN SOLAR CYCLE 24. Astrophysical Journal Letters, 2015, 804, L23.	8.3	70
76	Spatial Relationship between Solar Flares and Coronal Mass Ejections. Astrophysical Journal, 2008, 673, 1174-1180.	4.5	68
77	The solar origin of the January 1997 coronal mass ejection, magnetic cloud and geomagnetic storm. Geophysical Research Letters, 1998, 25, 2469-2472.	4.0	67
78	Long-lived geomagnetic storms and coronal mass ejections. Journal of Geophysical Research, 2006, 111,	3.3	67
79	Extreme Kinematics of the 2017 September 10 Solar Eruption and the Spectral Characteristics of the Associated Energetic Particles. Astrophysical Journal Letters, 2018, 863, L39.	8.3	66
80	Estimation of the mass of a coronal mass ejection from radio observations. Astrophysical Journal, 1992, 390, L37.	4.5	65
81	Geometrical Relationship Between Interplanetary Flux Ropes and Their Solar Sources. Solar Physics, 2015, 290, 1371-1397.	2.5	64
82	Non-radial motion of eruptive filaments. Solar Physics, 2001, 203, 119-130.	2.5	63
83	Estimation of Reconnection Flux Using Post-eruption Arcades and Its Relevance to Magnetic Clouds at 1 AU. Solar Physics, 2017, 292, 1.	2.5	62
84	Coronal Mass Ejections from Sunspot and Non-Sunspot Regions. Thirty Years of Astronomical Discovery With UKIRT, 2010, , 289-307.	0.3	61
85	Interplanetary radio emission due to interaction between two coronal mass ejections. Geophysical Research Letters, 2002, 29, 106-1-106-4.	4.0	59
86	Arrival time of halo coronal mass ejections in the vicinity of the Earth. Astronomy and Astrophysics, 2004, 423, 729-736.	5.1	59
87	Introduction to violent Sun-Earth connection events of October-November 2003. Journal of Geophysical Research, 2005, 110, .	3.3	58
88	Conservation of open solar magnetic flux and the floor in the heliospheric magnetic field. Geophysical Research Letters, 2008, 35, .	4.0	58
89	GROUND LEVEL ENHANCEMENT IN THE 2014 JANUARY 6 SOLAR ENERGETIC PARTICLE EVENT. Astrophysical Journal Letters, 2014, 790, L13.	8.3	58
90	THE 2012 JULY 23 BACKSIDE ERUPTION: AN EXTREME ENERGETIC PARTICLE EVENT?. Astrophysical Journal, 2016, 833, 216.	4.5	58

#	Article	IF	CITATIONS
91	BEHAVIOR OF SOLAR CYCLES 23 AND 24 REVEALED BY MICROWAVE OBSERVATIONS. Astrophysical Journal Letters, 2012, 750, L42.	8.3	57
92	Earth-affecting solar transients: a review of progresses in solar cycle 24. Progress in Earth and Planetary Science, 2021, 8, 56.	3.0	56
93	Xâ€Ray and Radio Studies of a Coronal Eruption: Shock Wave, Plasmoid, and Coronal Mass Ejection. Astrophysical Journal, 1997, 486, 1036-1044.	4.5	53
94	Radial Evolution and Turbulence Characteristics of a Coronal Mass Ejection. Astrophysical Journal, 2000, 530, 1061-1070.	4.5	53
95	Statistical analysis of coronal shock dynamics implied by radio and white-light observations. Journal of Geophysical Research, 2001, 106, 25279-25289.	3.3	52
96	A Quarter Century of <i>Wind</i> Spacecraft Discoveries. Reviews of Geophysics, 2021, 59, e2020RG000714.	23.0	52
97	Relationships Among Magnetic Clouds, CMES, and Geomagnetic Storms. Solar Physics, 2006, 239, 449-460.	2.5	50
98	Earth-Affecting Solar Causes Observatory (EASCO): A potential International Living with a Star Mission from Sun–Earth L5. Journal of Atmospheric and Solar-Terrestrial Physics, 2011, 73, 658-663.	1.6	50
99	Type II radio emissions in the frequency range from 1-14 MHz associated with the April 7, 1997 solar event. Geophysical Research Letters, 1998, 25, 2501-2504.	4.0	49
100	Testing the empirical shock arrival model using quadrature observations. Space Weather, 2013, 11, 661-669.	3.7	48
101	Coronal Hole Influence on the Observed Structure of Interplanetary CMEs. Solar Physics, 2013, 284, 59-75.	2.5	47
102	Structure and dynamics of the corona surrounding an eruptive prominence. Advances in Space Research, 2000, 25, 1851-1854.	2.6	46
103	Coronal Mass Ejections and Type II Radio Bursts. , 2006, , 207.		46
104	Microwave enhancement and variability in the elephant's trunk coronal hole: Comparison with SOHO observations. Journal of Geophysical Research, 1999, 104, 9767-9779.	3.3	45
105	Short-term variability of the Sun-Earth system: an overview of progress made during the CAWSES-II period. Progress in Earth and Planetary Science, 2015, 2, .	3.0	45
106	Statistical relationship between solar flares and coronal mass ejections. Proceedings of the International Astronomical Union, 2008, 4, 233-243.	0.0	44
107	Magnetic storms caused by corotating solar wind streams. Geophysical Monograph Series, 2006, , 1-17.	0.1	43
108	THE LOCATION OF SOLAR METRIC TYPE II RADIO BURSTS WITH RESPECT TO THE ASSOCIATED CORONAL MASS EJECTIONS. Astrophysical Journal, 2012, 752, 107.	4.5	42
