#	ARTICLE	IF	CITATIONS
1	Photodynamic inactivation of antibiotic-resistant Gram-positive bacteria: Challenges and opportunities. <i>Translational Biophotonics</i> , 2020, 2, e201900030.	1.4	3
2	Fundamentals of 5-aminolevulinic acid photodynamic therapy and diagnosis: An overview. <i>Translational Biophotonics</i> , 2020, 2, e201900022.	1.4	14
3	The synergistic effect of PDT and oxacillin on clinical isolates of <i>Staphylococcus aureus</i> . <i>Lasers in Surgery and Medicine</i> , 2018, 50, 535-551.	1.1	50
4	Bi-functional prodrugs of 5-aminolevulinic acid and butyric acid increase erythropoiesis in anemic mice in an erythropoietin-independent manner. <i>European Journal of Pharmaceutical Sciences</i> , 2016, 91, 91-97.	1.9	5
5	Pros, cons and future prospects of ALA-photodiagnosis, phototherapy and pharmacology in cancer therapy – A mini review. <i>Photonics & Lasers in Medicine</i> , 2015, 4, .	0.3	6
6	Pdots nanoparticles load photosensitizers and enhance efficiently their photodynamic effect by FRET. <i>RSC Advances</i> , 2015, 5, 18482-18491.	1.7	11
7	Comparative kinetics of damage to the plasma and mitochondrial membranes by intra-cellularly synthesized and externally-provided photosensitizers using multi-color FACS. <i>Photochemical and Photobiological Sciences</i> , 2013, 13, 38-47.	1.6	8
8	Multifunctional 5-aminolevulinic acid prodrugs activating diverse cell-death pathways. <i>Investigational New Drugs</i> , 2012, 30, 1028-1038.	1.2	13
9	The centrality of PBGD expression levels on ALA-PDT efficacy. <i>Photochemical and Photobiological Sciences</i> , 2011, 10, 1310-1317.	1.6	18
10	Modulating ALA-PDT efficacy of multidrug resistant MCF-7 breast cancer cells using ALA prodrug. <i>Photochemical and Photobiological Sciences</i> , 2011, 10, 1926-1933.	1.6	31
11	Hybrid silica nanoparticles traceable by fluorescence and FT-IR spectroscopy: preparation, characterization and preliminary biological studies. <i>Journal of Materials Chemistry</i> , 2011, 21, 10883.	6.7	11
12	Silencing of ALA dehydratase affects ALA-photodynamic therapy efficacy in K562 erythroleukemic cells. <i>Photochemical and Photobiological Sciences</i> , 2009, 8, 1461.	1.6	18
13	Novel Multifunctional Acyloxyalkyl Ester Prodrugs of 5-Aminolevulinic Acid Display Improved Anticancer Activity Independent and Dependent on Photoactivation. <i>Journal of Medicinal Chemistry</i> , 2008, 51, 7356-7369.	2.9	38
14	Light absorption and fluorescence, and photoacclimation features in the marine macroalga <i>Porphyra leucosticta</i> (Rhodophyta). <i>Israel Journal of Plant Sciences</i> , 2008, 56, 61-68.	0.3	3
15	The anticancer prodrugs of butyric acid AN-7 and AN-9, possess antiangiogenic properties. <i>Cancer Letters</i> , 2007, 256, 39-48.	3.2	34
16	In Vitro and In Vivo Photosensitization by Protoporphyrins Possessing Different Lipophilicities and Vertical Localization in the Membrane. <i>Photochemistry and Photobiology</i> , 2006, 82, 1319.	1.3	29
17	In vivo and in vitro antitumor activity of butyroyloxymethyl-diethyl phosphate (AN-7), a histone deacetylase inhibitor, in human prostate cancer. <i>International Journal of Cancer</i> , 2005, 116, 226-235.	2.3	39
18	ALA induced photodynamic effects on Gram positive and negative bacteria. <i>Photochemical and Photobiological Sciences</i> , 2004, 3, 430.	1.6	164

#	ARTICLE	IF	CITATIONS
19	Mechanistic aspects of Escherichia coli photodynamic inactivation by cationic tetra-meso(N-methylpyridyl)porphine. <i>Photochemical and Photobiological Sciences</i> , 2004, 3, 423.	1.6	99
20	Eradication of Propionibacterium acnes by its endogenous porphyrins after illumination with high intensity blue light. <i>FEMS Immunology and Medical Microbiology</i> , 2003, 35, 17-24.	2.7	315
21	A porphobilinogen deaminase (PBGD) Ran-binding protein interaction is implicated in nuclear trafficking of PBGD in differentiating glioma cells. <i>Oncogene</i> , 2003, 22, 5221-5228.	2.6	29
22	Spectrally Resolved Microscopy of GFP Trafficking. <i>Journal of Histochemistry and Cytochemistry</i> , 2002, 50, 1205-1212.	1.3	8
23	The correlation between hydrophilicity of hypericins and helianthrone: internalization mechanisms, subcellular distribution and photodynamic action in colon carcinoma cells. <i>Photochemical and Photobiological Sciences</i> , 2002, 1, 483-491.	1.6	66
24	Nuclear transport of photosensitizers during photosensitization and oxidative stress. <i>Biology of the Cell</i> , 2001, 93, 285-291.	0.7	38
25	Spectral Imaging of MC540 During Murine and Human Colon Carcinoma Cell Differentiation. <i>Journal of Histochemistry and Cytochemistry</i> , 2001, 49, 147-153.	1.3	13
26	Mitochondrial localization and photodamage during photodynamic therapy with tetraphenylporphines. <i>Journal of Photochemistry and Photobiology B: Biology</i> , 2000, 59, 92-102.	1.7	31
27	Photothermic treatment of pigmented B16 melanoma using a broadband pulsed light delivery system. <i>Cancer Letters</i> , 2000, 157, 161-168.	3.2	4
28	Photodynamic Therapy of Cutaneous Lymphoma Using 5-Aminolevulinic Acid Topical Application. <i>Dermatologic Surgery</i> , 2000, 26, 765-770.	0.4	65
29	Dopamine-melanin is actively phagocytized by PC12 cells and cerebellar granular cells: possible implications for the etiology of Parkinson's disease. <i>Neuroscience Letters</i> , 1999, 260, 101-104.	1.0	31
30	Spectrally resolved morphometry of the nucleus in hepatocytes stained by four histological methods. <i>The Histochemical Journal</i> , 1998, 30, 539-547.	0.6	6
31	Photosensitization by the Near-IR-absorbing Photosensitizer Lutetium Texaphyrin: Spectroscopic, In Vitro and In Vivo Studies. <i>Journal of Porphyrins and Phthalocyanines</i> , 1998, 02, 383-390.	0.4	20
32	Herpes simplex virus proteins are damaged following photodynamic inactivation with phthalocyanines. <i>Journal of Photochemistry and Photobiology B: Biology</i> , 1998, 44, 77-83.	1.7	58
33	Spectral Morphometric Characterization of B-CLL Cells Versus Normal Small Lymphocytes. <i>Journal of Histochemistry and Cytochemistry</i> , 1998, 46, 1113-1118.	1.3	21
34	Chromatin Condensation in Erythropoiesis Resolved by Multipixel Spectral Imaging: Differentiation Versus Apoptosis. <i>Journal of Histochemistry and Cytochemistry</i> , 1997, 45, 1097-1108.	1.3	28
35	The kinetics of protoporphyrin fluorescence during ALA-PDT in human malignant skin tumors. <i>Cancer Letters</i> , 1997, 120, 229-234.	3.2	60
36	SINGLE-CELL PIGMENTATION OF PORPHYRA LINEARIS ANALYZED BY FOURIER TRANSFORM MULTI-PIXEL SPECTROSCOPY AND IMAGE ANALYSIS I. <i>Journal of Phycology</i> , 1997, 33, 425-432.	1.0	7

#	ARTICLE	IF	CITATIONS
37	Characterization of Smoking-Induced Nasopharyngeal Lymphoid Hyperplasia. <i>Laryngoscope</i> , 1997, 107, 1635-1642.	1.1	34
38	Subcellular Localization of Sulfonated Tetraphenyl Porphines in Colon Carcinoma Cells by Spectrally Resolved Imaging. <i>Photochemistry and Photobiology</i> , 1997, 65, 389-396.	1.3	46
39	In vivo photodynamic therapy with the new near-IR absorbing water soluble photosensitizer lutetium texaphyrin and a high intensity pulsed light delivery system. <i>Journal of Photochemistry and Photobiology B: Biology</i> , 1997, 39, 36-42.	1.7	29
40	Treatment of viral infections with 5-aminolevulinic acid and light. , 1997, 21, 351-358.		90
41	INHIBITION OF MALIGNANT CELL PROLIFERATION BY CULTURE MEDIA CONDITIONED BY CARDIAC OR SKELETAL MUSCLE. <i>Cell Biology International</i> , 1997, 21, 133-144.	1.4	5
42	Fourier Transform Multipixel Spectroscopy and Spectral Imaging of Protoporphyrin in Single Melanoma Cells. <i>Photochemistry and Photobiology</i> , 1996, 63, 608-614.	1.3	85
43	Photofrin II induces cytokine secretion by mouse spleen cells and human peripheral mononuclear cells. <i>Immunopharmacology</i> , 1996, 31, 195-204.	2.0	19
44	Multiple pathways are involved in protection of MCF-7 cells against death due to protein synthesis inhibition. <i>Journal of Cellular Physiology</i> , 1995, 163, 570-576.	2.0	38
45	Restrictin-P/Stromal Activin A, Kills its Target Cells Via an Apoptotic Mechanism. <i>Growth Factors</i> , 1995, 12, 277-287.	0.5	33
46	Temperature monitoring during photodynamic therapy of skin tumors with topical 5-aminolevulinic acid application. <i>Cancer Letters</i> , 1995, 93, 227-232.	3.2	53
47	Biochemical and morphological changes in rat muscle cultures caused by 28,000 mol. wt toxin of <i>Bacillus thuringiensis israelensis</i> . <i>Toxicon</i> , 1994, 32, 1125-1136.	0.8	3
48	The binding and photosensitization effects of tetrabenzoporphyrins and texaphyrin in bacterial cells. <i>Lasers in Medical Science</i> , 1993, 8, 197-203.	1.0	33
49	Electric depolarization of photosensitized cells: lipid vs. protein alterations. <i>Biochimica Et Biophysica Acta - Biomembranes</i> , 1993, 1151, 257-264.	1.4	32
50	The effect of EDTA and serum on endogenous porphyrin accumulation and photodynamic sensitization of human K562 leukemic cells. <i>Cancer Letters</i> , 1992, 65, 127-131.	3.2	117
51	An improved procedure for the isolation of plasmodesmata embedded in clean maize cell walls. <i>Plant Journal</i> , 1992, 2, 623-630.	2.8	43
52	Ultrastructural damage in photosensitized endothelial cells: Dependence on hematoporphyrin delivery pathways. <i>Journal of Photochemistry and Photobiology B: Biology</i> , 1992, 14, 359-368.	1.7	13
53	INACTIVATION OF GRAM-NEGATIVE BACTERIA BY PHOTOSENSITIZED PORPHYRINS. <i>Photochemistry and Photobiology</i> , 1992, 55, 89-96.	1.3	321
54	Cell-death induced by discrete processes: Its reflection in cellular ion content revealed by X-ray microanalysis. <i>Micron and Microscopica Acta</i> , 1992, 23, 369-370.	0.2	3

#	ARTICLE	IF	CITATIONS
55	Photodynamic inactivation of Gram-negative bacteria: Problems and possible solutions. <i>Journal of Photochemistry and Photobiology B: Biology</i> , 1992, 14, 262-266.	1.7	289
56	In vivo effects of porphyrins on bacterial DNA. <i>Journal of Photochemistry and Photobiology B: Biology</i> , 1991, 11, 295-306.	1.7	39
57	ERYTHROPOIETIC PROTOPORPHYRIA: PHOTODYNAMIC TRANSFER OF PROTOPORPHYRIN FROM INTACT ERYTHROCYTES TO OTHER CELLS. <i>Photochemistry and Photobiology</i> , 1990, 51, 573-577.	1.3	28
58	The bactericidal activity of a deuteroporphyrin-hemin mixture on gram-positive bacteria. A microbiological and spectroscopic study. <i>Journal of Photochemistry and Photobiology B: Biology</i> , 1990, 6, 419-430.	1.7	37
59	New trends in photobiology bactericidal effects of photoactivated porphyrins – An alternative approach to antimicrobial drugs. <i>Journal of Photochemistry and Photobiology B: Biology</i> , 1990, 5, 281-293.	1.7	295
60	The mechanism of photodynamic inactivation of <i>Staphylococcus aureus</i> by deuteroporphyrin. <i>Current Microbiology</i> , 1989, 19, 265-269.	1.0	58
61	Inactivation of erythrocytic, lymphocytic and myelocytic leukemic cells by photoexcitation of endogenous porphyrins. <i>Journal of Photochemistry and Photobiology B: Biology</i> , 1989, 4, 195-205.	1.7	62
62	PHOTOINDUCED DEGRADATION AND MODIFICATION OF PHOTOFRIN II IN CELLS in vitro. <i>Photochemistry and Photobiology</i> , 1988, 47, 363-367.	1.3	46
63	Photosensitization of differentiating friend erythroleukemic cells by hematoporphyrin derivative and the cholesterol effect. <i>International Journal of Cancer</i> , 1988, 42, 279-283.	2.3	4
64	Ultrastructural changes in the nuclei of human carcinoma cells after photodynamic treatment with haematoporphyrin derivative and tetrasodium-meso-tetra-(4-sulphonatophenyl)porphine. <i>Lasers in Medical Science</i> , 1988, 3, 195-206.	1.0	16
65	Effects of membrane physical parameters on hematoporphyrin-derivative binding to liposomes: A spectroscopic study. <i>Journal of Membrane Biology</i> , 1987, 97, 215-221.	1.0	16
66	Growth-inhibitory effect of hemin on staphylococci. <i>Current Microbiology</i> , 1987, 14, 279-284.	1.0	15
67	Photodynamic effects of deuteroporphyrin on Gram-positive bacteria. <i>Current Microbiology</i> , 1987, 15, 251-258.	1.0	57
68	Characterization of hemin antibacterial action on <i>Staphylococcus aureus</i> . <i>FEMS Microbiology Letters</i> , 1987, 48, 401-406.	0.7	25
69	FLUORESCENCE SPECTRAL CHANGES OF HEMATOPORPHYRIN DERIVATIVE UPON BINDING TO LIPID VESICLES, <i>Staphylococcus aureus</i> AND <i>Escherichia coli</i> CELLS. <i>Photochemistry and Photobiology</i> , 1985, 41, 429-435.	1.3	100
70	Cultured mouse marrow stromal cell lines. II. Distinct subtypes differing in morphology, collagen types, myelopoietic factors, and leukemic cell growth modulating activities. <i>Journal of Cellular Physiology</i> , 1985, 122, 81-90.	2.0	122
71	Cultured mouse marrow cell lines: Interactions between fibroblastoid cells and monocytes. <i>Journal of Cellular Physiology</i> , 1984, 118, 143-152.	2.0	86
72	Effect of photoactivated hematoporphyrin derivative on the viability of <i>Staphylococcus aureus</i> . <i>Current Microbiology</i> , 1983, 8, 279-284.	1.0	76

#	ARTICLE	IF	CITATIONS
73	Effect of Interferon on the Formation and Release of Intracellular Virions in NIH/3T3 Cells Chronically Infected with Moloney Murine Leukemia Virus. Journal of Interferon Research, 1983, 3, 33-44.	1.2	4
74	Destruction of erythroleukemia, myelocytic leukemia and burkitt lymphoma cells by photoactivated protoporphyrin. International Journal of Cancer, 1980, 26, 495-500.	2.3	62
75	Eradication of Propionibacterium acnes by its endogenic porphyrins after illumination with high intensity blue light. , 0, .		6
