#	ARTICLE	IF	CITATIONS
1	Amygdala Hypoactivity to Fearful Faces in Boys With Conduct Problems and Callous-Unemotional Traits. <i>American Journal of Psychiatry</i> , 2009, 166, 95-102.	4.0	517
2	Prevention and early intervention for anxiety disorders: A controlled trial.. <i>Journal of Consulting and Clinical Psychology</i> , 1997, 65, 627-635.	1.6	389
3	Systematic meta-review and quality assessment of the structural brain alterations in schizophrenia. <i>Neuroscience and Biobehavioral Reviews</i> , 2012, 36, 1342-1356.	2.9	361
4	Neural sources involved in auditory target detection and novelty processing: An event-related fMRI study. <i>Psychophysiology</i> , 2001, 38, 133-142.	1.2	333
5	Childhood adversity in schizophrenia: a systematic meta-analysis. <i>Psychological Medicine</i> , 2013, 43, 225-238.	2.7	316
6	Size matters: Increased grey matter in boys with conduct problems and callousâ€“unemotional traits. <i>Brain</i> , 2009, 132, 843-852.	3.7	271
7	Early intervention and prevention of anxiety disorders in children: Results at 2-year follow-up.. <i>Journal of Consulting and Clinical Psychology</i> , 1999, 67, 145-150.	1.6	233
8	An adaptive reflexive processing model of neurocognitive function: supporting evidence from a large scale (n = 100) fMRI study of an auditory oddball task. <i>NeuroImage</i> , 2005, 25, 899-915.	2.1	229
9	Community screening for psychotic-like experiences and other putative antecedents of schizophrenia in children aged 9â€“12 years. <i>Schizophrenia Research</i> , 2007, 90, 130-146.	1.1	202
10	Meta-analyses of cognitive and motor function in youth aged 16 years and younger who subsequently develop schizophrenia. <i>Psychological Medicine</i> , 2012, 42, 743-755.	2.7	174
11	Systematic Meta-Analysis of Insula Volume in Schizophrenia. <i>Biological Psychiatry</i> , 2012, 72, 775-784.	0.7	166
12	Rostral anterior cingulate cortex dysfunction during error processing in schizophrenia. <i>Brain</i> , 2003, 126, 610-622.	3.7	154
13	Error-related negativity and correct response negativity in schizophrenia. <i>Clinical Neurophysiology</i> , 2002, 113, 1454-1463.	0.7	144
14	Psychotic-like experiences in a community sample of 8000 children aged 9 to 11 years: an item response theory analysis. <i>Psychological Medicine</i> , 2012, 42, 1495-1506.	2.7	144
15	A systematic meta-review grading the evidence for non-genetic risk factors and putative antecedents of schizophrenia. <i>Schizophrenia Research</i> , 2011, 133, 133-142.	1.1	130
16	Mental health-related stigma and pathways to care for people at risk of psychotic disorders or experiencing first-episode psychosis: a systematic review. <i>Psychological Medicine</i> , 2017, 47, 1867-1879.	2.7	108
17	The Role of the Anterior Cingulate Cortex in Conflict Processing: Evidence from Reverse Stroop Interference. <i>NeuroImage</i> , 2001, 14, 1150-1158.	2.1	102
18	Common or distinct pathways to psychosis? A systematic review of evidence from prospective studies for developmental risk factors and antecedents of the schizophrenia spectrum disorders and affective psychoses. <i>BMC Psychiatry</i> , 2015, 15, 205.	1.1	99

#	ARTICLE	IF	CITATIONS
19	An Event-Related fMRI Study of Visual and Auditory Oddball Tasks. <i>Journal of Psychophysiology</i> , 2001, 15, 221-240.	0.3	96
20	Attention orienting dysfunction during salient novel stimulus processing in schizophrenia. <i>Schizophrenia Research</i> , 2005, 75, 159-171.	1.1	94
21	Brain potentials implicate temporal lobe abnormalities in criminal psychopaths.. <i>Journal of Abnormal Psychology</i> , 2006, 115, 443-453.	2.0	90
22	Psychotic-like experiences and depressive symptoms in a community sample of adolescents. <i>European Psychiatry</i> , 2011, 26, 396-401.	0.1	87
23	Reading Anomalous Sentences: An Event-Related fMRI Study of Semantic Processing. <i>NeuroImage</i> , 2002, 17, 842-850.	2.1	83
24	Persisting psychotic-like experiences are associated with both externalising and internalising psychopathology in a longitudinal general population child cohort. <i>Schizophrenia Research</i> , 2013, 144, 99-104.	1.1	77
25	Multivariate neuroanatomical classification of cognitive subtypes in schizophrenia: A support vector machine learning approach. <i>NeuroImage: Clinical</i> , 2014, 6, 229-236.	1.4	70
26	Changes in distributed neural circuitry function in patients with first-episode schizophrenia. <i>British Journal of Psychiatry</i> , 2004, 185, 205-214.	1.7	67
27	Low-frequency EEG oscillations associated with information processing in schizophrenia. <i>Schizophrenia Research</i> , 2009, 115, 222-230.	1.1	66
28	Cortisol awakening response and diurnal cortisol among children at elevated risk for schizophrenia: Relationship to psychosocial stress and cognition. <i>Psychoneuroendocrinology</i> , 2014, 46, 1-13.	1.3	66
29	Comorbidity of conduct disorder symptoms and internalising problems in children: investigating a community and a clinical sample. <i>European Child and Adolescent Psychiatry</i> , 2012, 21, 31-38.	2.8	65
30	Psychotic-like experiences and other antecedents of schizophrenia in children aged 9-12 years: a comparison of ethnic and migrant groups in the United Kingdom. <i>Psychological Medicine</i> , 2008, 38, 1103-1111.	2.7	64
31	New South Wales Child Development Study (NSW-CDS): an Australian multiagency, multigenerational, longitudinal record linkage study. <i>BMJ Open</i> , 2016, 6, e009023.	0.8	56
32	Systematic meta-analysis of childhood social withdrawal in schizophrenia, and comparison with data from at-risk children aged 9-14 years. <i>Journal of Psychiatric Research</i> , 2013, 47, 1061-1068.	1.5	51
33	Error-Related Processing Dysfunction in Children Aged 9 to 12 Years Presenting Putative Antecedents of Schizophrenia. <i>Biological Psychiatry</i> , 2010, 67, 238-245.	0.7	50
34	Toward earlier identification and preventative intervention in schizophrenia: evidence from the London Child Health and Development Study. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2016, 51, 475-491.	1.6	50
35	Abnormal function of the brain system supporting motivated attention in medicated patients with schizophrenia: an fMRI study. <i>Psychological Medicine</i> , 2006, 36, 1097-1108.	2.7	48
36	Trajectories of childhood internalizing and externalizing psychopathology and psychotic-like experiences in adolescence: A prospective population-based cohort study. <i>Development and Psychopathology</i> , 2016, 28, 527-536.	1.4	47

#	ARTICLE	IF	CITATIONS
37	A supramodal limbic-paralimbic-neocortical network supports goal-directed stimulus processing. <i>Human Brain Mapping</i> , 2005, 24, 35-49.	1.9	45
38	Academic achievement and schizophrenia: a systematic meta-analysis. <i>Psychological Medicine</i> , 2020, 50, 1949-1965.	2.7	45
39	“Theory of Mind”™, psychotic-like experiences and psychometric schizotypy in adolescents from the general population. <i>Psychiatry Research</i> , 2011, 186, 225-231.	1.7	44
40	Identification of Children at Risk of Schizophrenia via Deep Learning and EEG Responses. <i>IEEE Journal of Biomedical and Health Informatics</i> , 2021, 25, 69-76.	3.9	44
41	Abnormal processing of speech during oddball target detection in schizophrenia. <i>NeuroImage</i> , 2003, 20, 889-897.	2.1	43
42	Temporal Lobe Volume Abnormalities Precede the Prodrome: A Study of Children Presenting Antecedents of Schizophrenia. <i>Schizophrenia Bulletin</i> , 2013, 39, 1318-1327.	2.3	43
43	Cohort Profile: The New South Wales Child Development Study (NSW-CDS) “Wave 2 (child age 13) Tj ETQq1 1 0,784314 rgBT /Ov	0.9	43
44	Neurocognitive performance in children aged 9-12 years who present putative antecedents of schizophrenia. <i>Schizophrenia Research</i> , 2010, 121, 15-23.	1.1	42
45	Daily stressors and negative life events in children at elevated risk of developing schizophrenia. <i>British Journal of Psychiatry</i> , 2014, 204, 354-360.	1.7	38
46	Mental Health Service Use by Young People: The Role of Caregiver Characteristics. <i>PLoS ONE</i> , 2015, 10, e0120004.	1.1	36
47	Cognitive impairment among children at-risk for schizophrenia. <i>Journal of Psychiatric Research</i> , 2014, 50, 92-99.	1.5	34
48	The impact of parental mental illness across the full diagnostic spectrum on externalising and internalising vulnerabilities in young offspring. <i>Psychological Medicine</i> , 2018, 48, 2257-2263.	2.7	33
49	The 2015 Middle Childhood Survey (MCS) of mental health and well-being at age 11 years in an Australian population cohort. <i>BMJ Open</i> , 2017, 7, e016244.	0.8	33
50	The relationship between salivary C-reactive protein and cognitive function in children aged 11-14 years: Does psychopathology have a moderating effect?. <i>Brain, Behavior, and Immunity</i> , 2017, 66, 221-229.	2.0	32
51	Mental disorders in children known to child protection services during early childhood. <i>Medical Journal of Australia</i> , 2020, 212, 22-28.	0.8	29
52	Shared intermediate phenotypes for schizophrenia and bipolar disorder: neuroanatomical features of subtypes distinguished by executive dysfunction. <i>Journal of Psychiatry and Neuroscience</i> , 2015, 40, 58-68.	1.4	28
53	Euthanasia: the role of the psychiatrist. <i>British Journal of Psychiatry</i> , 2006, 188, 405-409.	1.7	27
54	Modelling psychosocial influences on the distress and impairment caused by psychotic-like experiences in children and adolescents. <i>European Child and Adolescent Psychiatry</i> , 2014, 23, 715-722.	2.8	27

#	ARTICLE	IF	CITATIONS
55	Mismatch negativity (MMN) and sensory auditory processing in children aged 9â€“12years presenting with putative antecedents of schizophrenia. <i>International Journal of Psychophysiology</i> , 2013, 89, 374-380.	0.5	26
56	Movement abnormalities and psychotic-like experiences in childhood: markers of developing schizophrenia?. <i>Psychological Medicine</i> , 2012, 42, 99-109.	2.7	25
57	Latent profiles of early developmental vulnerabilities in a New South Wales child population at age 5â€“6years. <i>Australian and New Zealand Journal of Psychiatry</i> , 2018, 52, 530-541.	1.3	25
58	Effects of maltreatment and parental schizophrenia spectrum disorders on early childhood social-emotional functioning: a population record linkage study. <i>Epidemiology and Psychiatric Sciences</i> , 2017, 26, 612-623.	1.8	24
59	Child Maltreatment and Long-Term Physical and Mental Health Outcomes: An Exploration of Biopsychosocial Determinants and Implications for Prevention. <i>Child Psychiatry and Human Development</i> , 2023, 54, 421-435.	1.1	24
60	Trajectories of cognitive development during adolescence among youth atâ€risk for schizophrenia. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2018, 59, 1215-1224.	3.1	23
61	Neural memory plasticity for medical anomaly detection. <i>Neural Networks</i> , 2020, 127, 67-81.	3.3	23
62	Conditional Disclosure on Pathways to Care: Coping Preferences of Young People at Risk of Psychosis. <i>Qualitative Health Research</i> , 2017, 27, 1842-1855.	1.0	22
63	Reading anomalous sentences: an event-related fMRI study of semantic processing. <i>NeuroImage</i> , 2002, 17, 842-50.	2.1	22
64	Pervasive influence of maternal and paternal criminal offending on early childhood development: a population data linkage study. <i>Psychological Medicine</i> , 2017, 47, 889-901.	2.7	21
65	Misperceptions of Facial Emotions Among Youth Aged 9â€“14 Years Who Present Multiple Antecedents of Schizophrenia. <i>Schizophrenia Bulletin</i> , 2014, 40, 460-468.	2.3	20
66	The Coping with Unusual Experiences for Children Study (<scp>CUES</scp>): A pilot randomized controlled evaluation of the acceptability and potential clinical utility of a cognitive behavioural intervention package for young people aged 8â€“14 years with unusual experiences and emotional symptoms. <i>British Journal of Clinical Psychology</i> , 2018, 57, 328-350.	1.7	20
67	Environmental Risk Factors in Bipolar Disorder and Psychotic Depression: A Systematic Review and Meta-Analysis of Prospective Studies. <i>Schizophrenia Bulletin</i> , 2021, 47, 959-974.	2.3	20
68	Childhood Maltreatment and Early Developmental Vulnerabilities at Age 5 Years. <i>Child Development</i> , 2018, 89, 1599-1612.	1.7	19
69	Connection to the Natural Environment and Well-Being in Middle Childhood. <i>Ecopsychology</i> , 2018, 10, 270-279.	0.8	19
70	Pituitary gland volume and psychosocial stress among children at elevated risk for schizophrenia. <i>Psychological Medicine</i> , 2015, 45, 3281-3292.	2.7	17
71	Cognitive Behavioural Therapy for Unusual Experiences in Children: A Case Series. <i>Behavioural and Cognitive Psychotherapy</i> , 2013, 41, 344-358.	0.9	16
72	A preliminary investigation of schematic beliefs and unusual experiences in children. <i>European Psychiatry</i> , 2015, 30, 569-575.	0.1	16

#	ARTICLE	IF	CITATIONS
73	Prenatal maternal smoking, maternal offending, and offspring behavioural and cognitive outcomes in early childhood. <i>Criminal Behaviour and Mental Health</i> , 2018, 28, 397-408.	0.4	16
74	Early developmental risk for subsequent childhood mental disorders in an Australian population cohort. <i>Australian and New Zealand Journal of Psychiatry</i> , 2019, 53, 304-315.	1.3	15
75	Adolescent trajectories of fine motor and coordination skills and risk for schizophrenia. <i>Schizophrenia Research</i> , 2020, 215, 263-269.	1.1	15
76	Criterion validity of the Psychotic-Like Experiences Questionnaire for Children (PLEQ-C). <i>Schizophrenia Research</i> , 2020, 220, 78-84.	1.1	15
77	Birth outcomes and academic achievement in childhood: A population record linkage study. <i>Journal of Early Childhood Research</i> , 2014, 12, 234-250.	0.9	14
78	Timing of the first report and highest level of child protection response in association with early developmental vulnerabilities in an Australian population cohort. <i>Child Abuse and Neglect</i> , 2019, 93, 1-12.	1.3	14
79	Population profiles of child-reported psychotic-like experiences and their differential association with other psychopathologies. <i>British Journal of Clinical Psychology</i> , 2020, 59, 22-38.	1.7	14
80	Hospital admission for infection during early childhood influences developmental vulnerabilities at age 5½ years. <i>Journal of Paediatrics and Child Health</i> , 2016, 52, 882-888.	0.4	13
81	The impact of parental offending on offspring aggression in early childhood: a population-based record linkage study. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2017, 52, 445-455.	1.6	13
82	Childhood developmental vulnerabilities associated with early life exposure to infectious and noninfectious diseases and maternal mental illness. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2018, 59, 801-810.	3.1	13
83	Variation in psychosocial influences according to the dimensions and content of children's unusual experiences: potential routes for the development of targeted interventions. <i>European Child and Adolescent Psychiatry</i> , 2016, 25, 311-319.	2.8	12
84	Coping with Unusual Experiences for 12-18 year olds (CUES+): a transdiagnostic randomised controlled trial of the effectiveness of cognitive therapy in reducing distress associated with unusual experiences in adolescent mental health services: study protocol for a randomised controlled trial. <i>Trials</i> , 2017, 18, 586.	0.7	12
85	Inter-agency indicators of out-of-home-care placement by age 13-14 years: A population record linkage study. <i>Child Abuse and Neglect</i> , 2019, 93, 91-102.	1.3	12
86	Comparing algorithms for deriving psychosis diagnoses from longitudinal administrative clinical records. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2014, 49, 1729-1737.	1.6	11
87	Cortisol Levels in Childhood Associated With Emergence of Attenuated Psychotic Symptoms in Early Adulthood. <i>Biological Psychiatry</i> , 2022, 91, 226-235.	0.7	11
88	School-Based Mental Health Promotion and Early Intervention Programs in New South Wales, Australia: Mapping Practice to Policy and Evidence. <i>School Mental Health</i> , 2022, 14, 582-597.	1.1	11
89	The hemodynamics of oddball processing during single-tone and two-tone target detection tasks. <i>International Journal of Psychophysiology</i> , 2006, 60, 292-303.	0.5	10
90	Psychopathy and semantic processing: An examination of the N400. <i>Personality and Individual Differences</i> , 2006, 40, 293-304.	1.6	10

#	ARTICLE	IF	CITATIONS
91	Cognitive bias and unusual experiences in childhood. <i>European Child and Adolescent Psychiatry</i> , 2015, 24, 949-957.	2.8	10
92	Understanding the relationship between schematic beliefs, bullying, and unusual experiences in 8-14 year olds. <i>European Psychiatry</i> , 2015, 30, 920-923.	0.1	10
93	Reading and numeracy attainment of children reported to child protection services: A population record linkage study controlling for other adversities. <i>Child Abuse and Neglect</i> , 2020, 101, 104326.	1.3	10
94	Children's contact with police as a victim, person of interest and witness in New South Wales, Australia. <i>Australian and New Zealand Journal of Criminology</i> , 2020, 53, 387-410.	2.5	9
95	Earlier Contact with Child Protection Services Among Children of Parents With Criminal Convictions and Mental Disorders. <i>Child Maltreatment</i> , 2021, 26, 63-73.	2.0	9
96	Chronic Physical Health Conditions, Mental Health, and Sources of Support in a Longitudinal Australian Child Population Cohort. <i>Journal of Pediatric Psychology</i> , 2019, 44, 1083-1096.	1.1	8
97	Childhood bullying victimization, self-labelling, and help-seeking for mental health problems. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2020, 55, 81-88.	1.6	8
98	Overrepresentation of Indigenous students in school suspension, exclusion, and enrolment cancellation in Queensland: is there a case for systemic inclusive school reform?. <i>Australian Educational Researcher</i> , 2023, 50, 167-201.	1.6	8
99	The Survey of School Promotion of Emotional and Social Health (SSPESH): A Brief Measure of the Implementation of Whole-School Mental Health Promotion. <i>School Mental Health</i> , 2019, 11, 294-308.	1.1	7
100	The influence of parental offending on the continuity and discontinuity of children's internalizing and externalizing difficulties from early to middle childhood. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2019, 54, 965-975.	1.6	7
101	Gender and the intergenerational transmission of antisocial behavior. <i>Journal of Criminal Justice</i> , 2020, 67, 101670.	1.5	7
102	Psychosocial predictors of distressing unusual experiences in adolescence: Testing the fit of an adult cognitive model of psychosis. <i>Schizophrenia Research</i> , 2021, 237, 1-8.	1.1	7
103	Item Response Theory Analysis of the Big Five Questionnaire for Children's Short Form (BFC-SF): A Self-Report Measure of Personality in Children Aged 11-12 Years. <i>Journal of Personality Disorders</i> , 2020, 34, 40-63.	0.8	6
104	Costs for physical and mental health hospitalizations in the first 13 years of life among children engaged with Child Protection Services. <i>Child Abuse and Neglect</i> , 2020, 99, 104280.	1.3	6
105	Influence of stigma, sociodemographic and clinical characteristics on mental health-related service use and associated costs among young people in the United Kingdom. <i>European Child and Adolescent Psychiatry</i> , 2023, 32, 1363-1373.	2.8	6
106	Developmental profiles of schizotypy in the general population: A record linkage study of Australian children aged 11-12 years. <i>British Journal of Clinical Psychology</i> , 2022, 61, 836-858.	1.7	6
107	Examining the overlap of young people's early contact with the police as a person of interest and victim or witness. <i>Journal of Criminology</i> , 2021, 54, 501-520.	0.4	5
108	Self-reported mental health of children known to child protection services: an Australian population-based record linkage study. <i>European Child and Adolescent Psychiatry</i> , 2023, 32, 101-112.	2.8	5

#	ARTICLE	IF	CITATIONS
109	Profiles of Resilience from Early to Middle Childhood among Children Known to Child Protection Services. <i>Journal of Clinical Child and Adolescent Psychology</i> , 2023, 52, 533-545.	2.2	5
