citing authors

#	ARTICLE	IF	CITATIONS
1	Optimal feedback control of two-qubit entanglement in dissipative environments. Physical Review A, 2016, 94, .	2.5	24
2	Universal feedback control of two-qubit entanglement. Physical Review A, 2017, 96, .	2.5	17
3	What's inside a hairy black hole in massive gravity?. Journal of High Energy Physics, 2021, 2021, 1.	4.7	16
4	Stationary and uniform entanglement distribution in qubit networks with quasilocal dissipation. Physical Review A, 2012, 85, .	2.5	14
5	Universal criticality of thermodynamic geometry for boundary conformal field theories in gauge/gravity duality. Physical Review D, 2022, 105, .	4.7	11
6	Universal criticality of thermodynamic curvatures for charged AdS black holes. Physical Review D, 2020, 102, .	4.7	9
7	Enforcing dissipative entanglement by feedback. Physics Letters, Section A: General, Atomic and Solid State Physics, 2020, 384, 126748.	2.1	5
8	Stationary entanglement and discord for dissipating qubits by local magnetic field. European Physical Journal D, 2014, 68, 1.	1.3	4
9	Synchronization of a periodic modulation of mirrors in an optomechanical system. Quantum Information Processing, 2019, 18, 1.	2.2	4
10	Long-distance entanglement generation by local rotational protocols in spin chains. Physical Review A, 2013, 87, .	2.5	2
11	Noise to lubricate qubit transfer in a spin network. Physical Review A, 2013, 88, .	2.5	2
12	Measurement enhances long-distance entanglement generation in spin chains with dissipative processes. European Physical Journal D, 2018, 72, 1.	1.3	2
13	Irreversible entropy production rate in a parametrically driven-dissipative system: The role of self-correlation between noncommuting observables. Physical Review A, 2022, 105, .	2.5	2
