#	ARTICLE	IF	CITATIONS
1	Engaging children, young people, parents and health professionals in interviews: Using an interactive ranking exercise within the co-design of multimedia websites. <i>Journal of Child Health Care</i> , 2024, 28, 181-195.	0.7	1
2	Information provision for stroke survivors and their carers. <i>The Cochrane Library</i> , 2023, 2023, CDO01919.	1.5	37
3	Predictors of meningococcal vaccine uptake in university and college students: a systematic review and meta-analysis. <i>Journal of American College Health</i> , 2022, 70, 1738-1753.	0.8	5
4	What, how, when and who of trial results summaries for trial participants: stakeholder-informed guidance from the RECAP project. <i>BMJ Open</i> , 2022, 12, e057019.	0.8	9
5	Information Provision for Stroke Survivors and Their Carers: Cochrane Review. <i>Stroke</i> , 2022, 53, .	1.0	1
6	Does digital, multimedia information increase recruitment and retention in a children's wrist fracture treatment trial, and what do people think of it? A randomised controlled Study Within A Trial (SWAT). <i>BMJ Open</i> , 2022, 12, e057508.	0.8	4
7	Barriers to attending initial psychological therapy service appointments for common mental health problems: A mixed-methods systematic review. <i>Journal of Affective Disorders</i> , 2021, 284, 44-63.	2.0	7
8	Providing trial results to participants in phase III pragmatic effectiveness RCTs: a scoping review. <i>Trials</i> , 2021, 22, 361.	0.7	10
9	Evaluating the use of multimedia information when recruiting adolescents to orthodontics research: A randomised controlled trial. <i>Journal of Orthodontics</i> , 2021, 48, 343-351.	0.4	9
10	Can we achieve better recruitment by providing better information? Meta-analysis of 'studies within a trial' (SWATs) of optimised participant information sheets. <i>BMC Medicine</i> , 2021, 19, 218.	2.3	12
11	Rehabilitation strategies following oesophagogastric and Hepatopancreaticobiliary cancer (ReStOre) Tj ETQq1 1 0.784314 rgBT /Overlo	1.1	17
12	Children and young people's concerns and needs relating to their use of health technology to self-manage long-term conditions: a scoping review. <i>Archives of Disease in Childhood</i> , 2020, 105, 1093-1104.	1.0	19
13	Why do patients take part in research? An overview of systematic reviews of psychosocial barriers and facilitators. <i>Trials</i> , 2020, 21, 259.	0.7	71
14	Frequency of anxiety after stroke: An updated systematic review and meta-analysis of observational studies. <i>International Journal of Stroke</i> , 2020, 15, 244-255.	2.9	76
15	Optimised patient information materials and recruitment to a study of behavioural activation in older adults: an embedded study within a trial. <i>F1000Research</i> , 2020, 9, 417.	0.8	3
16	Using the Human Factors Framework to understand the origins of medication safety problems in community pharmacy: A qualitative study. <i>Research in Social and Administrative Pharmacy</i> , 2019, 15, 558-567.	1.5	13
17	Patient non-attendance at urgent referral appointments for suspected cancer and its links to cancer diagnosis and one year mortality: A cohort study of patients referred on the Two Week Wait pathway. <i>Cancer Epidemiology</i> , 2019, 63, 101588.	0.8	20
18	Prevention of mood disorder after stroke: a randomised controlled trial of problem solving therapy versus volunteer support. <i>BMC Neurology</i> , 2019, 19, 128.	0.8	17

#	ARTICLE	IF	CITATIONS
19	How effective are treatments for anxiety after stroke? â€œ A Cochrane Review summary with commentary. <i>NeuroRehabilitation</i> , 2019, 44, 457-458.	0.5	4
20	SWATted away: the challenging experience of setting up a programme of SWATs in paediatric trials. <i>Trials</i> , 2019, 20, 141.	0.7	12
21	Supporting children and young people when making decisions about joining clinical trials: qualitative study to inform multimedia website development. <i>BMJ Open</i> , 2019, 9, e023984.	0.8	19
22	Non-attendance at urgent referral appointments for suspected cancer: a qualitative study to gain understanding from patients and GPs. <i>British Journal of General Practice</i> , 2019, 69, e850-e859.	0.7	12
23	Medication safety problems priorities in community pharmacy in Saudi Arabia: a multi-stakeholder Delphi study using the human factors framework. <i>BMJ Open</i> , 2019, 9, e032419.	0.8	17
24	User testing digital, multimedia information to inform children, adolescents and their parents about healthcare trials. <i>Journal of Child Health Care</i> , 2019, 23, 468-482.	0.7	17
25	Patient and family co-developed participant information to improve recruitment rates, retention, and patient understanding in the Rehabilitation Strategies Following Oesophago-gastric and Hepatopancreaticobiliary Cancer (ReStOre II) trial: Protocol for a study within a trial (SWAT). <i>HRB Open Research</i> , 2019, 2, 27.	0.3	2
26	Non-attendance at urgent referral appointments for suspected cancer: a qualitative study to gain understanding from patients and GPs. <i>British Journal of General Practice</i> , 2019, , bjgp1919X706625.	0.7	2
27	The effect of counseling on willingness to use a hypothetical medication and perceptions of medication safety. <i>Research in Social and Administrative Pharmacy</i> , 2018, 14, 295-302.	1.5	3
28	The effect of optimised patient information materials on recruitment in a lung cancer screening trial: an embedded randomised recruitment trial. <i>Trials</i> , 2018, 19, 503.	0.7	18
29	Should patients still be copied into their letters? A rapid review. <i>Patient Education and Counseling</i> , 2018, 101, 2065-2082.	1.0	10
30	Written information about individual medicines for consumers. <i>The Cochrane Library</i> , 2017, 2017, CD002104.	1.5	41
31	Interventions for treating anxiety after stroke. <i>The Cochrane Library</i> , 2017, 2017, CD008860.	1.5	59
32	Developing and evaluating multimedia information resources to improve engagement of children, adolescents, and their parents with trials (TRECA study): Study protocol for a series of linked randomised controlled trials. <i>Trials</i> , 2017, 18, 265.	0.7	23
33	An optimised patient information sheet did not significantly increase recruitment or retention in a falls prevention study: an embedded randomised recruitment trial. <i>Trials</i> , 2017, 18, 144.	0.7	30
34	How much information about the benefits of medicines is included in patient leaflets in the European Union? â€œ A survey. <i>International Journal of Pharmacy Practice</i> , 2017, 25, 147-158.	0.3	6
35	Providing additional information about the benefits of statins in a leaflet for patients with coronary heart disease: a qualitative study of the impact on attitudes and beliefs. <i>BMJ Open</i> , 2016, 6, e012000.	0.8	4
36	Assessment of the quality and content of website health information about herbal remedies for menopausal symptoms. <i>Maturitas</i> , 2016, 88, 16-22.	1.0	15

#	ARTICLE	IF	CITATIONS
37	Communicating information concerning potential medication harms and benefits: What gist do numbers convey?. <i>Patient Education and Counseling</i> , 2016, 99, 1964-1970.	1.0	19
38	Creating a better picture of chronic pain: improving pain pictogram designs through systematic evaluation of user responses. <i>British Journal of Pain</i> , 2016, 10, 177-185.	0.7	4
39	Do Patients Use a Headline Section in a Leaflet to Find Key Information About Their Medicines? Findings From a User-Test Study. <i>Therapeutic Innovation and Regulatory Science</i> , 2016, 50, 581-591.	0.8	5
40	Combined verbal and numerical expressions increase perceived risk of medicine side effects: a randomized controlled trial of EMA recommendations. <i>Health Expectations</i> , 2016, 19, 264-274.	1.1	25
41	Can pictorial images communicate the quality of pain successfully?. <i>British Journal of Pain</i> , 2015, 9, 173-180.	0.7	3
42	A systematic review of research into black and ethnic minority patients' views on self-management of type 2 diabetes. <i>Health Expectations</i> , 2015, 18, 625-642.	1.1	37
43	British-Pakistani women's perspectives of diabetes self-management: the role of identity. <i>Journal of Clinical Nursing</i> , 2015, 24, 2571-2580.	1.4	14
44	Changes in Side Effect Risk Communication in Patient Information Leaflets over the Past Decade: Results of a Survey. <i>Drug Safety</i> , 2015, 38, 721-727.	1.4	9
45	Rehabilitation for post-stroke cognitive impairment: an overview of recommendations arising from systematic reviews of current evidence. <i>Clinical Rehabilitation</i> , 2015, 29, 120-128.	1.0	62
46	Systematic techniques for assisting recruitment to trials (START): study protocol for embedded, randomized controlled trials. <i>Trials</i> , 2014, 15, 407.	0.7	61
47	Assessing the Quality and Usability of Smartphone Apps for Pain Self-Management. <i>Pain Medicine</i> , 2014, 15, 898-909.	0.9	222
48	Mixture modelling analysis of one-month disability after stroke: stroke outcomes study (SOS1). <i>Quality of Life Research</i> , 2014, 23, 2267-2275.	1.5	2
49	Balance appointment information leaflets: Employing performance-based user-testing to improve understanding. <i>International Journal of Audiology</i> , 2013, 52, 162-168.	0.9	9
50	Frequency of Anxiety after Stroke: A Systematic Review and Meta-Analysis of Observational Studies. <i>International Journal of Stroke</i> , 2013, 8, 545-559.	2.9	313
51	Worlds apart? An exploration of prescribing and medicine-taking decisions by patients, GPs and local policy makers. <i>Health Policy</i> , 2013, 112, 264-272.	1.4	6
52	A multimedia intervention to enhance recruitment to clinical trials in primary care and community settings: process of development and evaluation. <i>Trials</i> , 2013, 14, .	0.7	4
53	Suits you? A qualitative study exploring preferences regarding the tailoring of consumer medicines information. <i>International Journal of Pharmacy Practice</i> , 2013, 21, 207-215.	0.3	21
54	Evaluating a combined (frequency and percentage) risk expression to communicate information on medicine side effects to patients. <i>International Journal of Pharmacy Practice</i> , 2013, 21, 226-232.	0.3	12

#	ARTICLE	IF	CITATIONS
55	It's for your benefit: exploring patients' opinions about the inclusion of textual and numerical benefit information in medicine leaflets. <i>International Journal of Pharmacy Practice</i> , 2013, 21, 216-225.	0.3	19
56	The interpretation of triangular borders to indicate warning in medicines pictograms and the potential influence of being a driver. <i>Information Design Journal</i> , 2013, 20, 161-170.	0.4	3
57	Hearing Aid Instruction Booklets: Employing Usability Testing to Determine Effectiveness. <i>American Journal of Audiology</i> , 2012, 21, 206-214.	0.5	16
58	A Systematic Review of Nonpharmacological Perceptual Rehabilitation After Stroke and Other Adult-Acquired Nonprogressive Brain Injury. <i>Stroke</i> , 2012, 43, .	1.0	0
59	Information provision for stroke patients and their caregivers. <i>The Cochrane Library</i> , 2012, 11, CD001919.	1.5	175
60	Is There a Co-Association Between Renal or Retroperitoneal Tumours and Scrotal Varicoceles? A Systematic Review. <i>Ultrasound</i> , 2012, 20, 182-191.	0.3	7
61	The Authors's Reply. <i>Drugs and Aging</i> , 2012, 29, 250.	1.3	0
62	The compatibility of prescribing guidelines and the doctor-patient partnership: a primary care mixed-methods study. <i>British Journal of General Practice</i> , 2012, 62, e275-e281.	0.7	26
63	Interventions for treating anxiety after stroke. , 2011, , CD008860.		40
64	How Do the Attitudes and Beliefs of Older People and Healthcare Professionals Impact on the Use of Multi-Compartment Compliance Aids?. <i>Drugs and Aging</i> , 2011, 28, 403-414.	1.3	28
65	Headline section in patient information leaflets: Does it improve reading performance and perception?. <i>Information Design Journal</i> , 2011, 19, 46-57.	0.4	8
66	“User-testing” as a method for testing the fitness-for-purpose of written medicine information. <i>Patient Education and Counseling</i> , 2011, 83, 404-410.	1.0	55
67	Can user testing of a clinical trial patient information sheet make it fit-for-purpose? - a randomized controlled trial. <i>BMC Medicine</i> , 2011, 9, 89.	2.3	70
68	Buyer beware? Does the information provided with herbal products available over the counter enable safe use?. <i>BMC Medicine</i> , 2011, 9, 94.	2.3	113
69	The effect of numeracy on the comprehension of information about medicines in users of a patient information website. <i>Patient Education and Counseling</i> , 2011, 83, 398-403.	1.0	43
70	Combining Concurrent and Sequential Methods to Examine the Usability and Readability of Websites With Information About Medicines. <i>Journal of Mixed Methods Research</i> , 2011, 5, 25-51.	1.8	6
71	Evaluation of website medicines information content, in comparison with official patient information. <i>International Journal of Pharmacy Practice</i> , 2010, 14, 189-195.	0.3	2
72	Perceived risk of tamoxifen side effects: A study of the use of absolute frequencies or frequency bands, with or without verbal descriptors. <i>Patient Education and Counseling</i> , 2010, 79, 267-271.	1.0	26

#	ARTICLE	IF	CITATIONS
73	Long-term prescribing of antidepressants in the older population: a qualitative study. <i>British Journal of General Practice</i> , 2010, 60, e144-e155.	0.7	42
74	Psychological Disorders After Stroke Are an Important Influence on Functional Outcomes. <i>Stroke</i> , 2010, 41, 1723-1727.	1.0	54
75	Developing and testing a patient information booklet for thrombolysis used in acute stroke. <i>International Journal of Pharmacy Practice</i> , 2010, 18, 362-369.	0.3	14
76	Performance-based readability testing of participant information for a Phase 3 IVF trial. <i>Trials</i> , 2009, 10, 79.	0.7	37
77	A questionnaire to measure health practitioners' attitudes to partnership in medicine taking: LATCon II. <i>Health Expectations</i> , 2009, 12, 175-186.	1.1	33
78	Communicating the Risk of Side Effects to Patients. <i>Drug Safety</i> , 2009, 32, 837-849.	1.4	38
79	The Coach-Athlete Relationship: A Tripartite Efficacy Perspective. <i>Sport Psychologist</i> , 2009, 23, 203-232.	0.4	34
80	Adequacy of Patient Information on Adverse Effects. <i>Drug Safety</i> , 2008, 31, 305-312.	1.4	37
81	Origins and Consequences of Tripartite Efficacy Beliefs Within Elite Athlete Dyads. <i>Journal of Sport and Exercise Psychology</i> , 2008, 30, 512-540.	0.7	41
82	Information provision for stroke patients and their caregivers. , 2008, , CD001919.		58
83	A Graphic Tool for Pain Self Care. <i>Australasian Medical Journal</i> , 2008, , 97-103.	0.1	0
84	Consumer medication information in the United States, Europe, and Australia: A comparative evaluation. <i>Journal of the American Pharmacists Association: JAPhA</i> , 2007, 47, 717-726a.	0.7	61
85	Relational Efficacy Beliefs in Athlete Dyads: An Investigation Using Actor-Partner Interdependence Models. <i>Journal of Sport and Exercise Psychology</i> , 2007, 29, 170-189.	0.7	53
86	The role and value of written information for patients about individual medicines: a systematic review. <i>Health Expectations</i> , 2007, 10, 286-298.	1.1	114
87	Promoting adherence to antibiotics: A test of implementation intentions. <i>Patient Education and Counseling</i> , 2006, 61, 212-218.	1.0	27
88	Expressing medicine side effects: Assessing the effectiveness of absolute risk, relative risk, and number needed to harm, and the provision of baseline risk information. <i>Patient Education and Counseling</i> , 2006, 63, 89-96.	1.0	39
89	Do themes in consumer medicines information literature reviews reflect those important to stakeholders?. <i>Patient Education and Counseling</i> , 2006, 64, 112-118.	1.0	12
90	Prevalence, duration and indications for prescribing of antidepressants in primary care. <i>Age and Ageing</i> , 2006, 35, 523-526.	0.7	81

#	ARTICLE	IF	CITATIONS
91	Beyond intention: do specific plans increase health behaviours in patients in primary care? A study of fruit and vegetable consumption. <i>Social Science and Medicine</i> , 2005, 60, 2383-2391.	1.8	115
92	Psychological services for people with stroke: compliance with the UK National Clinical Guidelines. <i>Clinical Rehabilitation</i> , 2005, 19, 323-330.	1.0	28
93	Interpretation of Medication Pictograms by Adults in the UK. <i>Annals of Pharmacotherapy</i> , 2005, 39, 1227-1233.	0.9	71
94	Over the counter medicines and the need for immediate action: a further evaluation of European Commission recommended wordings for communicating risk. <i>Patient Education and Counseling</i> , 2004, 53, 129-134.	1.0	54
95	We are the experts: people with asthma talk about their medicine information needs. <i>Patient Education and Counseling</i> , 2004, 53, 167-174.	1.0	109
96	Patients?? Understanding of Risk Associated with Medication Use. <i>Drug Safety</i> , 2003, 26, 1-11.	1.4	101
97	Official warnings on thromboembolism risk with oral contraceptives fail to inform users adequately. <i>Contraception</i> , 2002, 66, 305-307.	0.8	16
98	Mortality at 12 and 24 Months After Stroke May Be Associated With Depressive Symptoms at 1 Month. <i>Stroke</i> , 2001, 32, 696-701.	1.0	358
99	Disagreement in Patient and Carer Assessment of Functional Abilities After Stroke. <i>Stroke</i> , 1999, 30, 934-938.	1.0	57
100	What are the barriers and facilitators to participation in active recreation for people with learning disabilities? A scoping review. <i>British Journal of Learning Disabilities</i> , 0, , .	0.8	0
101	Patient recruitment to a diabetic retinopathy screening trial through optimised patient information materials: an embedded study within a trial (SWAT). <i>F1000Research</i> , 0, 9, 779.	0.8	3
102	Patient and public involvement in a study of multimedia clinical trial information for children, young people and families. <i>Research for All</i> , 0, 4, .	0.1	7
103	Patient and family co-developed participant information to improve recruitment rates, retention, and patient understanding in the Rehabilitation Strategies Following Oesophago-gastric and Hepatopancreaticobiliary Cancer (ReStOre II) trial: Protocol for a study within a trial (SWAT). <i>HRB Open Research</i> , 0, 2, 27.	0.3	1
104	The effects of multimedia information on recruitment and retention in a childrenâ€™s cardiac surgery trial: a randomised controlled SWAT (study within a trial). <i>F1000Research</i> , 0, 11, 340.	0.8	3
