citing authors

#	ARTICLE	IF	CITATIONS
1	A systematic review of the relationship between eating, weight and inhibitory control using the stop signal task. <i>Neuroscience and Biobehavioral Reviews</i> , 2016, 64, 35-62.	6.1	162
2	A meta-analysis of cytokine concentrations in eating disorders. <i>Journal of Psychiatric Research</i> , 2018, 103, 252-264.	3.1	133
3	A systematic review of temporal discounting in eating disorders and obesity: Behavioural and neuroimaging findings. <i>Neuroscience and Biobehavioral Reviews</i> , 2016, 71, 506-528.	6.1	77
4	Single-Session Transcranial Direct Current Stimulation Temporarily Improves Symptoms, Mood, and Self-Regulatory Control in Bulimia Nervosa: A Randomised Controlled Trial. <i>PLoS ONE</i> , 2017, 12, e0167606.	2.5	64
5	The origins of repetitive thought in rumination: Separating cognitive style from deficits in inhibitory control over memory. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2015, 47, 1-8.	1.2	58
6	Randomised controlled feasibility trial of real versus sham repetitive transcranial magnetic stimulation treatment in adults with severe and enduring anorexia nervosa: the TIARA study. <i>BMJ Open</i> , 2018, 8, e021531.	1.9	53
7	Two-year follow-up of the MOSAIC trial: A multicenter randomized controlled trial comparing two psychological treatments in adult outpatients with broadly defined anorexia nervosa. <i>International Journal of Eating Disorders</i> , 2016, 49, 793-800.	4.0	52
8	Physical activity and the drive to exercise in anorexia nervosa. <i>International Journal of Eating Disorders</i> , 2015, 48, 46-54.	4.0	51
9	The Potential of Neurofeedback in the Treatment of Eating Disorders: A Review of the Literature. <i>European Eating Disorders Review</i> , 2013, 21, 456-463.	4.1	50
10	Identifying disordered eating behaviours in adolescents: how do parent and adolescent reports differ by sex and age?. <i>European Child and Adolescent Psychiatry</i> , 2017, 26, 691-701.	4.7	48
11	The effect of repetitive transcranial magnetic stimulation on food choice-related self-control in patients with severe, enduring anorexia nervosa. <i>International Journal of Eating Disorders</i> , 2020, 53, 1326-1336.	4.0	41
12	Neurostimulation in Clinical and Sub-clinical Eating Disorders: A Systematic Update of the Literature. <i>Current Neuropharmacology</i> , 2018, 16, 1174-1192.	2.9	39
13	Increased temporal discounting in bulimia nervosa. <i>International Journal of Eating Disorders</i> , 2016, 49, 1077-1081.	4.0	37
14	Proactive and reactive inhibitory control in eating disorders. <i>Psychiatry Research</i> , 2017, 255, 432-440.	3.3	35
15	Temporal Discounting and the Tendency to Delay Gratification across the Eating Disorder Spectrum. <i>European Eating Disorders Review</i> , 2017, 25, 344-350.	4.1	31
16	Neural Correlates of Failed Inhibitory Control as an Early Marker of Disordered Eating in Adolescents. <i>Biological Psychiatry</i> , 2019, 85, 956-965.	1.3	29
17	Clinical outcomes and neural correlates of 20 sessions of repetitive transcranial magnetic stimulation in severe and enduring anorexia nervosa (the TIARA study): study protocol for a randomised controlled feasibility trial. <i>Trials</i> , 2015, 16, 548.	1.6	24
18	Repetitive transcranial magnetic stimulation treatment in severe, enduring anorexia nervosa: An open longer-term follow-up. <i>European Eating Disorders Review</i> , 2020, 28, 773-781.	4.1	19

#	ARTICLE	IF	CITATIONS
19	Bad Things Come to Those Who Do Not Wait: Temporal Discounting Is Associated With Compulsive Overeating, Eating Disorder Psychopathology and Food Addiction. <i>Frontiers in Psychiatry</i> , 2020, 10, 978.	2.6	17
20	Increasing Cognitive Load Reduces Interference from Masked Appetitive and Aversive but Not Neutral Stimuli. <i>PLoS ONE</i> , 2014, 9, e94417.	2.5	17
21	Treatment of anorexia nervosa: a multimethod investigation translating experimental neuroscience into clinical practice. <i>Programme Grants for Applied Research</i> , 2017, 5, 1-208.	1.0	14
22	Task-Based and Questionnaire Measures of Inhibitory Control Are Differentially Affected by Acute Food Restriction and by Motivationally Salient Food Stimuli in Healthy Adults. <i>Frontiers in Psychology</i> , 2016, 7, 1303.	2.1	10
23	Written case formulations in the treatment of anorexia nervosa: Evidence for therapeutic benefits. <i>International Journal of Eating Disorders</i> , 2016, 49, 874-882.	4.0	10
24	A pilot study exploring the effect of repetitive transcranial magnetic stimulation (rTMS) treatment on cerebral blood flow and its relation to clinical outcomes in severe enduring anorexia nervosa. <i>Journal of Eating Disorders</i> , 2021, 9, 84.	2.7	10
25	Proactive inhibition: An element of inhibitory control in eating disorders. <i>Neuroscience and Biobehavioral Reviews</i> , 2016, 71, 1-6.	6.1	9
26	“My dad was like ‘it’s your brain, what are you doing?’”: Participant experiences of repetitive transcranial magnetic stimulation treatment in severe enduring anorexia nervosa. <i>European Eating Disorders Review</i> , 2022, 30, 237-249.	4.1	7
27	Therapist written goodbye letters: evidence for therapeutic benefits in the treatment of anorexia nervosa. <i>Behavioural and Cognitive Psychotherapy</i> , 2020, 48, 419-431.	1.2	2
28	A preliminary exploration of the effect of concurrent antidepressant medication on responses to high-frequency repetitive transcranial magnetic stimulation (rTMS) in severe, enduring anorexia nervosa. <i>Journal of Eating Disorders</i> , 2021, 9, 16.	2.7	2
29	Clinicians’ views on neuromodulation as a treatment for eating disorders: A qualitative study. <i>Neuropsychiatry</i> , 2020, 35, 84-91.	2.5	1
