

Ana Alonso-Simon

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/4366979/ana-alonso-simon-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
16	Hydrothermal Carbonization of Olive Tree Pruning as a Sustainable Way for Improving Biomass Energy Potential: Effect of Reaction Parameters on Fuel Properties. <i>Processes</i> , 2020 , 8, 1201	2.9	21
15	Characterization of structural cell wall polysaccharides in cattail (<i>Typha latifolia</i>): Evaluation as potential biofuel feedstock. <i>Carbohydrate Polymers</i> , 2017 , 175, 679-688	10.3	18
14	Quinclorac-habituation of bean (<i>Phaseolus vulgaris</i>) cultured cells is related to an increase in their antioxidant capacity. <i>Plant Physiology and Biochemistry</i> , 2016 , 107, 257-263	5.4	3
13	Fourier transform mid infrared spectroscopy applications for monitoring the structural plasticity of plant cell walls. <i>Frontiers in Plant Science</i> , 2014 , 5, 303	6.2	52
12	Purification and characterization of a soluble β 1,4-glucan from bean (<i>Phaseolus vulgaris</i> L.)-cultured cells dehabituated to dichlobenil. <i>Planta</i> , 2013 , 237, 1475-82	4.7	2
11	Cellulose biosynthesis inhibitors: comparative effect on bean cell cultures. <i>International Journal of Molecular Sciences</i> , 2012 , 13, 3685-702	6.3	11
10	The use of FTIR spectroscopy to monitor modifications in plant cell wall architecture caused by cellulose biosynthesis inhibitors. <i>Plant Signaling and Behavior</i> , 2011 , 6, 1104-10	2.5	56
9	High-throughput microarray profiling of cell wall polymers during hydrothermal pre-treatment of wheat straw. <i>Biotechnology and Bioengineering</i> , 2010 , 105, 509-14	4.9	24
8	Characterization of the primary cell walls of seedlings of <i>Brachypodium distachyon</i> --a potential model plant for temperate grasses. <i>Phytochemistry</i> , 2010 , 71, 62-9	4	52
7	The phenolic profile of maize primary cell wall changes in cellulose-deficient cell cultures. <i>Phytochemistry</i> , 2010 , 71, 1684-9	4	17
6	Habituation and dehabituating to dichlobenil: simply the equivalent of Penelope's weaving and unweaving process?. <i>Plant Signaling and Behavior</i> , 2009 , 4, 1069-71	2.5	3
5	Novel type II cell wall architecture in dichlobenil-habituated maize calluses. <i>Planta</i> , 2009 , 229, 617-31	4.7	33
4	High peroxidase activity and stable changes in the cell wall are related to dichlobenil tolerance. <i>Journal of Plant Physiology</i> , 2009 , 166, 1229-1240	3.6	19
3	Habituation of bean (<i>Phaseolus vulgaris</i>) cell cultures to Quinclorac and analysis of the subsequent cell wall modifications. <i>Annals of Botany</i> , 2008 , 101, 1329-39	4.1	6
2	Immunocytochemical characterization of the cell walls of bean cell suspensions during habituation and dehabituating to dichlobenil. <i>Physiologia Plantarum</i> , 2006 , 127, 87-99	4.6	24
1	FTIR spectroscopy monitoring of cell wall modifications during the habituation of bean (<i>Phaseolus vulgaris</i> L.) callus cultures to dichlobenil. <i>Plant Science</i> , 2004 , 167, 1273-1281	5.3	53
