96 papers	3,037 citations	172457 29 h-index	189892 50 g-index
104 all docs	104 docs citations	104 times ranked	4677 citing authors

#	Article	IF	Citations
1	Assessing the potential of invertebrate natural enemies of insect pests inhabiting Miscanthus x giganteus shelterbelts in pasture. New Zealand Journal of Agricultural Research, 2023, 66, 259-269.	1.6	0
2	Large-scale tree planting initiatives as an opportunity to derive carbon and biodiversity co-benefits: a case study from Aotearoa New Zealand. New Forests, 2022, 53, 589-602.	1.7	11
3	Directional changes over time in the species composition of tropical vascular epiphyte assemblages. Journal of Ecology, 2022, 110, 553-568.	4.0	5
4	LOTVS: A global collection of permanent vegetation plots. Journal of Vegetation Science, 2022, 33, .	2.2	4
5	Land-use history impacts spatial patterns and composition of woody plant species across a 35-hectare temperate forest plot. PeerJ, 2022, 10, e12693.	2.0	4
6	Environmental DNA sampling detects between-habitat variation in soil arthropod communities, but is a poor indicator of fine-scale spatial and seasonal variation. Ecological Indicators, 2022, 140, 109040.	6.3	3
7	Grassland plant and invertebrate species richness increases from mowing are mediated by impacts on soil chemistry. Basic and Applied Ecology, 2022, 63, 152-163.	2.7	2
8	Disentangling native and alien plant diversity in coastal sand dune ecosystems worldwide. Journal of Vegetation Science, 2021, 32, .	2.2	19
9	A global framework for linking alpineâ€treeline ecotone patterns to underlying processes. Ecography, 2021, 44, 265-292.	4.5	52
10	Measuring change in biological communities: multivariate analysis approaches for temporal datasets with low sample size. PeerJ, 2021, 9, e11096.	2.0	12
11	Changes in the analysis of temporal community dynamics data: a 29-year literature review. PeerJ, 2021, 9, e11250.	2.0	10
12	High light-induced photoinhibition is not limiting seedling establishment at abrupt treeline ecotones in New Zealand. Tree Physiology, 2021, 41, 2034-2045.	3.1	5
13	Livestock exclusion reduces the spillover effects of pastoral agriculture on soil bacterial communities in adjacent forest fragments. Environmental Microbiology, 2021, 23, 2919-2936.	3.8	6
14	Testing a global standard for quantifying species recovery and assessing conservation impact. Conservation Biology, 2021, 35, 1833-1849.	4.7	51
15	Identifying optimal bioinformatics protocols for aerosol microbial community data. PeerJ, 2021, 9, e12065.	2.0	1
16	Interactions between landscape structure and bird mobility traits affect the connectivity of agroecosystem networks. Ecological Indicators, 2021, 129, 107962.	6.3	7
17	Resource competition, not facilitation, structures gravel beach plant communities. Journal of Vegetation Science, 2021, 32, e13099.	2.2	0
18	Shoot flammability is decoupled from leaf flammability, but controlled by leaf functional traits. Journal of Ecology, 2020, 108, 641-653.	4.0	39

#	Article	IF	Citations
19	Measuring Homeâ€Range Changes Following Density Reduction of Australian Brushtail Possum. Journal of Wildlife Management, 2020, 84, 185-192.	1.8	2
20	Connecting through space and time: catchmentâ€scale distributions of bacteria in soil, stream water and sediment. Environmental Microbiology, 2020, 22, 1000-1010.	3.8	31
21	Temporal variation in soil bacterial communities can be confounded with spatial variation. FEMS Microbiology Ecology, 2020, 96, .	2.7	2
22	Using soil bacterial communities to predict physico-chemical variables and soil quality. Microbiome, 2020, 8, 79.	11.1	137
23	A Systematic Review of Sources of Variability and Uncertainty in eDNA Data for Environmental Monitoring. Frontiers in Ecology and Evolution, 2020, 8, .	2.2	42
24	From pine to pasture: land use history has long-term impacts on soil bacterial community composition and functional potential. FEMS Microbiology Ecology, 2020, 96, .	2.7	9
25	Shoot flammability of vascular plants is phylogenetically conserved and related to habitat fire-proneness and growth form. Nature Plants, 2020, 6, 355-359.	9.3	29
26	The roles of nonâ€production vegetation in agroecosystems: A research framework for filling process knowledge gaps in a socialâ€ecological context. People and Nature, 2020, 2, 292-304.	3.7	14
27	Restoring mature-phase forest tree species through enrichment planting in New Zealandâ€™s lowland landscapes. New Zealand Journal of Ecology, 2020, 44, .	1.1	8
28	Achieving win-win outcomes for pastoral farming and biodiversity conservation in New Zealand. New Zealand Journal of Ecology, 2020, 44, .	1.1	10
29	Hypothesis: Do invasive house geckos exacerbate dengue fever epidemics?. Biological Invasions, 2019, 21, 3533-3543.	2.4	4
30	Flame Temperatures Saturate with Increasing Dead Material in Ulex europaeus, but Flame Duration, Fuel Consumption and Overall Flammability Continue to Increase. Fire, 2019, 2, 6.	2.8	7
31	Perspectives on the Impact of Sampling Design and Intensity on Soil Microbial Diversity Estimates. Frontiers in Microbiology, 2019, 10, 1820.	3.5	14
32	Microbial assemblages and bioindicators as proxies for ecosystem health status: potential and limitations. Applied Microbiology and Biotechnology, 2019, 103, 6407-6421.	3.6	45
33	Species Diversity Associated with Foundation Species in Temperate and Tropical Forests. Forests, 2019, 10, 128.	2.1	21
34	Intractable: species in New Zealand that continue to decline despite conservation efforts. Journal of the Royal Society of New Zealand, 2019, 49, 301-319.	1.9	19
35	How many samples? Soil variability affects confidence in the use of common agroecosystem soil indicators. Ecological Indicators, 2019, 102, 401-409.	6.3	11
36	The New Zealand Beef and Sheep Sectorâ€™s Contribution to Biodiversity and Carbon Sequestration. Proceedings (mdpi), 2019, 8, 48.	0.2	0

#	Article	IF	Citations
37	Landscape variation influences trophic cascades in dengue vector food webs. Science Advances, 2018, 4, eaap9534.	10.3	26
38	Optimal extraction methods for the simultaneous analysis of <scp>DNA</scp> from diverse organisms and sample types. Molecular Ecology Resources, 2018, 18, 557-569.	4.8	65
39	Communityâ€level flammability declines over 25Âyears of plant invasion in grasslands. Journal of Ecology, 2018, 106, 1582-1594.	4.0	28
40	Sensitivity of Codispersion to Noise and Error in Ecological and Environmental Data. Forests, 2018, 9, 679.	2.1	4
41	Towards robust and repeatable sampling methods in <scp>eDNA</scp>â€based studies. Molecular Ecology Resources, 2018, 18, 940-952.	4.8	137
42	Using niche conservatism information to prioritize hotspots of invasion by nonâ€native freshwater invertebrates in New Zealand. Diversity and Distributions, 2018, 24, 1802-1815.	4.1	26
43	Patterns of range size in New Zealand ferns and lycophytes. , 2018, 42, .		5
44	Methods for the extraction, storage, amplification and sequencing of DNA from environmental samples. , 2018, , .		58
45	Aspect has a greater impact on alpine soil bacterial community structure than elevation. FEMS Microbiology Ecology, 2017, 93, fiw253.	2.7	28
46	Following Rapoport's Rule: the geographic range and genome size of bacterial taxa decline at warmer latitudes. Environmental Microbiology, 2017, 19, 3152-3162.	3.8	25
47	Bacteria as Emerging Indicators of Soil Condition. Applied and Environmental Microbiology, 2017, 83, .	3.1	202
48	Isolation of Polymorphic Microsatellite Loci in the New Zealand Endemic Sand-Binder,Ficinia spiralis(Cyperaceae). Applications in Plant Sciences, 2017, 5, 1700039.	2.1	0
49	When a foundation crumbles: forecasting forest dynamics following the decline of the foundation species Tsuga canadensis. Ecosphere, 2017, 8, e01893.	2.2	23
50	Bacterial and fungal communities respond differently to varying tillage depth in agricultural soils. PeerJ, 2017, 5, e3930.	2.0	42
51	Using codispersion analysis to quantify and understand spatial patterns in speciesâ€“environment relationships. New Phytologist, 2016, 211, 735-749.	7.3	15
52	Using codispersion analysis to characterize spatial patterns in species coâ€occurrences. Ecology, 2016, 97, 32-39.	3.2	17
53	Detecting Ecological Patterns Along Environmental Gradients: Alpine Treeline Ecotones. Chance, 2016, 29, 10-15.	0.2	3
54	Increased stem density and competition may diminish the positive effects of warming at alpine treeline. Ecology, 2016, 97, 1668-1679.	3.2	93

#	Article	IF	Citations
55	Experimental evidence that the effectiveness of conservation biological control depends on landscape complexity. Journal of Applied Ecology, 2015, 52, 1274-1282.	4.0	84
56	Density-dependent allometric functional response models. Ecological Modelling, 2015, 303, 12-18.	2.5	5
57	Isolation and co-culturing of symbionts in the genus Usnea. Symbiosis, 2015, 66, 123-132.	2.3	16
58	Predation rates of mixed instar Odonata naiads feeding on Aedes aegypti and Armigeres moultoni (Diptera: Culicidae) larvae. Journal of Asia-Pacific Entomology, 2015, 18, 1-8.	0.9	12
59	Local-scale topoclimate effects on treeline elevations: a country-wide investigation of New Zealandâ€™s southern beech treelines. PeerJ, 2015, 3, e1334.	2.0	12
60	Phylogenetic congruence of lichenised fungi and algae is affected by spatial scale and taxonomic diversity. PeerJ, 2014, 2, e573.	2.0	12
61	Multi-scale phylogenetic structure in coastal dune plant communities across the globe. Journal of Plant Ecology, 2014, 7, 101-114.	2.3	37
62	Functional traits of common New Zealand foredune species at New Brighton, Canterbury. New Zealand Journal of Botany, 2014, 52, 460-466.	1.1	1
63	Conservation of forest biodiversity and ecosystem properties in a pastoral landscape of the Ecuadorian Andes. Agroforestry Systems, 2014, 88, 369-381.	2.0	5
64	Container-breeding mosquitoes and predator community dynamics along an urban-forest gradient: The effects of habitat type and isolation. Basic and Applied Ecology, 2014, 15, 486-495.	2.7	13
65	Predation on Mosquitoes by Common Southeast Asian House-Dwelling Jumping Spiders (Salticidae). Arachnology, 2014, 16, 122-127.	0.4	12
66	Fine-scale spatial patterns in bacterial community composition and function within freshwater ponds. ISME Journal, 2014, 8, 1715-1726.	9.8	110
67	Microhabitat variation inUsneabiomass on mountain beech in Nina Valley, New Zealand. New Zealand Journal of Botany, 2013, 51, 328-333.	1.1	3
68	The founder space race: a response to Waters et al.. Trends in Ecology and Evolution, 2013, 28, 189-190.	8.7	10
69	Predicting foodâ€web structure with metacommunity models. Oikos, 2013, 122, 492-506.	2.7	37
70	The biogeography of stream bacteria. Global Ecology and Biogeography, 2013, 22, 544-554.	5.8	67
71	Both species sorting and neutral processes drive assembly of bacterial communities in aquatic microcosms. FEMS Microbiology Ecology, 2013, 86, 288-302.	2.7	44
72	Twenty-five years of plant community dynamics and invasion in New Zealand tussock grasslands. Austral Ecology, 2013, 38, 688-699.	1.5	15

#	Article	IF	Citations
73	Agricultural intensification drives landscapeâ€context effects on hostâ€“parasitoid interactions in agroecosystems. Journal of Applied Ecology, 2012, 49, 706-714.	4.0	77
74	Geographic variation in network structure of a nearctic aquatic food web. Global Ecology and Biogeography, 2012, 21, 579-591.	5.8	52
75	Invasion patterns across multiple scales by Hieracium species over 25 years in tussock grasslands of New Zealand's South Island. Austral Ecology, 2011, 36, 559-570.	1.5	18
76	Isolation affects tree-scale epiphytic lichen community structure on New Zealand mountain beech trees. Journal of Vegetation Science, 2011, 22, 1062-1071.	2.2	18
77	Searching behavior of an aphid parasitoid and its hyperparasitoid with and without floral nectar. Biological Control, 2011, 57, 79-84.	3.0	31
78	Climate and coastal dune vegetation: disturbance, recovery, and succession. Plant Ecology, 2010, 206, 97-104.	1.6	152
79	Understanding the role of species dynamics in abundanceâ€“occupancy relationships. Journal of Ecology, 2010, 98, 645-658.	4.0	60
80	Localâ€•to continentalâ€scale variation in the richness and composition of an aquatic food web. Global Ecology and Biogeography, 2010, 19, 711-723.	5.8	10
81	Adding floral nectar resources to improve biological control: Potential pitfalls of the fourth trophic level. Basic and Applied Ecology, 2009, 10, 554-562.	2.7	42
82	URban Biotopes of Aotearoa New Zealand (URBANZ) (I): composition and diversity of temperate urban lawns in Christchurch. Urban Ecosystems, 2009, 12, 233-248.	2.4	48
83	Interacting effects of management and environmental variability at multiple scales on invasive species distributions. Journal of Applied Ecology, 2009, 46, 1210-1218.	4.0	22
84	URban Biotopes of Aotearoa New Zealand (URBANZ) II: Floristics, biodiversity and conservation values of urban residential and public woodlands, Christchurch. Urban Forestry and Urban Greening, 2009, 8, 149-162.	5.3	49
85	Implications of floral resources for predation by an omnivorous lacewing. Basic and Applied Ecology, 2008, 9, 172-181.	2.7	54
86	Floral diversity, parasitoids and hyperparasitoids â€“ A laboratory approach. Basic and Applied Ecology, 2008, 9, 588-597.	2.7	44
87	Patterns of host damage by the cabbage tree monophageEpiphryne verriculataFeld (Lepidoptera:) Tj ETQq1 1 0.784314 rgBT /Overloc 77-88.	0.3	1
88	Evaluating Support for the Resourceâ€Ratio Hypothesis: A Reply to Wilson et al.. American Naturalist, 2007, 169, 707-708.	2.1	8
89	A Critical Review of Twenty Yearsâ€™ Use of the Resourceâ€Ratio Theory. American Naturalist, 2005, 165, 439-448.	2.1	209
90	Morphological variation in Sarracenia purpurea (Sarraceniaceae): geographic, environmental, and taxonomic correlates. American Journal of Botany, 2004, 91, 1930-1935.	1.7	62

#	Article	IF	Citations
91	Small-scale patterns in community structure of Sarracenia purpurea inquilines. Community Ecology, 2004, 5, 181-188.	0.9	12
92	Reverse latitudinal trends in species richness of pitcher-plant food webs. Ecology Letters, 2003, 6, 825-829.	6.4	82
93	Small-scale species richness in forest canopy gaps: the role of niche limitation versus the size of the species pool. Journal of Vegetation Science, 1998, 9, 455-460.	2.2	26
94	Managing and protecting native biodiversity on-farm â€“ what do sheep and beef farmers think?. New Zealand Journal of Ecology, 0, , .	1.1	2
95	The significance of sheep and beef farms to conservation of native vegetation in New Zealand. New Zealand Journal of Ecology, 0, , .	1.1	2
96	Factors affecting home range size of feral cats: a meta-analysis. New Zealand Journal of Ecology, 0, , .	1.1	2
