1	What works? Interventions for maternal and child undernutrition and survival. Lancet, The, 2008, 371, 417-440.	13.7	1,682
2	Nutrition and brain development in early life. Nutrition Reviews, 2014, 72, 267-284.	5.8	691
3	Systematic review of the efficacy and effectiveness of complementary feeding interventions in developing countries. Maternal and Child Nutrition, 2008, 4, 24-85.	3.0	690
4	Longâ€term consequences of stunting in early life. Maternal and Child Nutrition, 2011, 7, 5-18.	3.0	675
5	Risk Factors for Suboptimal Infant Breastfeeding Behavior, Delayed Onset of Lactation, and Excess Neonatal Weight Loss. Pediatrics, 2003, 112, 607-619.	2.1	605
6	Gut bacteria that prevent growth impairments transmitted by microbiota from malnourished children. Science, 2016, 351, .	12.6	580
7	Update on Technical issues concerning Complementary Feeding of Young Children in Developing Countries and Implications for Intervention Programs. Food and Nutrition Bulletin, 2003, 24, 5-28.	1.4	562
8	Effects of water quality, sanitation, handwashing, and nutritional interventions on diarrhoea and child growth in rural Bangladesh: a cluster randomised controlled trial. The Lancet Global Health, 2018, 6, e302-e315.	6.3	498
9	Sialylated Milk Oligosaccharides Promote Microbiota-Dependent Growth in Models of Infant Undernutrition. Cell, 2016, 164, 859-871.	28.9	497
10	Effects of water quality, sanitation, handwashing, and nutritional interventions on diarrhoea and child growth in rural Kenya: a cluster-randomised controlled trial. The Lancet Global Health, 2018, 6, e316-e329.	6.3	427
11	Differences in morbidity between breast-fed and formula-fed infants. Journal of Pediatrics, 1995, 126, 696-702.	1.8	424
12	Contextualising complementary feeding in a broader framework for stunting prevention. Maternal and Child Nutrition, 2013, 9, 27-45.	3.0	420
13	Growth of Breast-Fed and Formula-Fed Infants From 0 to 18 Months: The DARLING Study. Pediatrics, 1992, 89, 1035-1041.	2.1	326
14	The <scp>W</scp>orld <scp>H</scp>ealth <scp>O</scp>rganization's global target for reducing childhood stunting by 2025: rationale and proposed actions. Maternal and Child Nutrition, 2013, 9, 6-26.	3.0	295
15	Randomized comparison of 3 types of micronutrient supplements for home fortification of complementary foods in Ghana: effects on growth and motor development. American Journal of Clinical Nutrition, 2007, 86, 412-420.	4.7	286
16	Functional characterization of IgA-targeted bacterial taxa from undernourished Malawian children that produce diet-dependent enteropathy. Science Translational Medicine, 2015, 7, 276ra24.	12.4	280
17	Effect of timing of umbilical cord clamping on iron status in Mexican infants: a randomised controlled trial. Lancet, The, 2006, 367, 1997-2004.	13.7	262
18	In-Hospital Formula Use Increases Early Breastfeeding Cessation Among First-Time Mothers Intending to Exclusively Breastfeed. Journal of Pediatrics, 2014, 164, 1339-1345.e5.	1.8	248

#	Article	IF	Citations
19	Growth Characteristics of Breast-Fed Compared to Formula-Fed Infants. Neonatology, 1998, 74, 94-105.	2.0	236
20	Is Breastfeeding Protective Against Child Obesity?. Journal of Human Lactation, 2003, 19, 9-18.	1.6	235
21	Maternal and Fetal Stress Are Associated with Impaired Lactogenesis in Humans. Journal of Nutrition, 2001, 131, 3012S-3015S.	2.9	233
22	Delayed onset of lactogenesis among first-time mothers is related to maternal obesity and factors associated with ineffective breastfeeding. American Journal of Clinical Nutrition, 2010, 92, 574-584.	4.7	228
23	Iron Supplementation Affects Growth and Morbidity of Breast-Fed Infants: Results of a Randomized Trial in Sweden and Honduras. Journal of Nutrition, 2002, 132, 3249-3255.	2.9	225
24	Validation of a new pediatric air-displacement plethysmograph for assessing body composition in infants. American Journal of Clinical Nutrition, 2004, 79, 653-660.	4.7	222
25	The Diagnostic Criteria for Iron Deficiency in Infants Should Be Reevaluated. Journal of Nutrition, 2002, 132, 3680-3686.	2.9	218
26	The Challenge of Meeting Nutrient Needs of Infants and Young Children during the Period of Complementary Feeding: An Evolutionary Perspective. Journal of Nutrition, 2013, 143, 2050-2054.	2.9	214
27	Dietary Diversity Is a Good Predictor of the Micronutrient Density of the Diet of 6- to 23-Month-Old Children in Madagascar3. Journal of Nutrition, 2008, 138, 2448-2453.	2.9	212
28	Growth of Breast-Fed Infants Deviates From Current Reference Data: A Pooled Analysis of US, Canadian, and European Data Sets. Pediatrics, 1995, 96, 497-503.	2.1	206
29	A Randomized Study of the Effects of Aerobic Exercise by Lactating Women on Breast-Milk Volume and Composition. New England Journal of Medicine, 1994, 330, 449-453.	27.0	203
30	Nutrition, Growth, and Complementary Feeding of The Brestfed Infant. Pediatric Clinics of North America, 2001, 48, 87-104.	1.8	193
31	Cluster-randomised controlled trials of individual and combined water, sanitation, hygiene and nutritional interventions in rural Bangladesh and Kenya: the WASH Benefits study design and rationale. BMJ Open, 2013, 3, e003476.	1.9	188
32	Effects of Exclusive Breastfeeding for Four versus Six Months on Maternal Nutritional Status and Infant Motor Development: Results of Two Randomized Trials in Honduras. Journal of Nutrition, 2001, 131, 262-267.	2.9	183
33	Does birth spacing affect maternal or child nutritional status? A systematic literature review. Maternal and Child Nutrition, 2007, 3, 151-173.	3.0	183
34	Lactation and Progression to Type 2 Diabetes Mellitus After Gestational Diabetes Mellitus. Annals of Internal Medicine, 2015, 163, 889-898.	3.9	183
35	Iron, zinc, and copper concentrations in breast milk are independent of maternal mineral status. American Journal of Clinical Nutrition, 2004, 79, 111-115.	4.7	182
36	A randomized, community-based trial of the effects of improved, centrally processed complementary foods on growth and micronutrient status of Ghanaian infants from 6 to 12 mo of age. American Journal of Clinical Nutrition, 1999, 70, 391-404.	4.7	179

#	Article	IF	Citations
37	Early child growth: how do nutrition and infection interact?. Maternal and Child Nutrition, 2011, 7, 129-142.	3.0	176
38	Iron supplementation of breast-fed Honduran and Swedish infants from 4 to 9 months of age. Journal of Pediatrics, 2001, 138, 679-687.	1.8	172
39	Home fortification of complementary foods with micronutrient supplements is well accepted and has positive effects on infant iron status in Ghana. American Journal of Clinical Nutrition, 2008, 87, 929-938.	4.7	172
40	Considerations in developing lipidâ€based nutrient supplements for prevention of undernutrition: experience from the <scp>I</scp>nternational <scp>L</scp>ipidâ€<scp>B</scp>ased <scp>N</scp>utrient <scp>S</scp>upplements (<scp>iLiNS</scp>) <scp>P</scp>roject. Maternal and Child Nutrition, 2015, 11, 31-61.	3.0	172
41	Feeding effects on growth during infancy. Journal of Pediatrics, 2004, 145, 600-605.	1.8	167
42	Undernutrition, Poor Feeding Practices, and Low Coverage of Key Nutrition Interventions. Pediatrics, 2011, 128, e1418-e1427.	2.1	165
43	Milk and Nutrient Intake of Breast-Fed Infants from 1 to 6 Months. Journal of Pediatric Gastroenterology and Nutrition, 1983, 2, 497-506.	1.8	162
44	The Human Gut Microbiota and Undernutrition. Science Translational Medicine, 2012, 4, 137ps12.	12.4	162
45	Breastfeeding Concerns at 3 and 7 Days Postpartum and Feeding Status at 2 Months. Pediatrics, 2013, 132, e865-e875.	2.1	162
46	Modifiers of the effect of maternal multiple micronutrient supplementation on stillbirth, birth outcomes, and infant mortality: a meta-analysis of individual patient data from 17 randomised trials in low-income and middle-income countries. The Lancet Global Health, 2017, 5, e1090-e1100.	6.3	162
47			

#	Article	IF	Citations
55	Intake and growth of breastâ€fed and formulaâ€fed infants in relation to the timing of introduction of complementary foods: the DARLING study. Acta Paediatrica, International Journal of Paediatrics, 1993, 82, 999-1006.	1.5	128
56	Proposed Nutrient Composition for Fortified Complementary Foods. Journal of Nutrition, 2003, 133, 3011S-3020S.	2.9	128
57	Reducing stunting by improving maternal, infant and young child nutrition in regions such as South Asia: evidence, challenges and opportunities. Maternal and Child Nutrition, 2016, 12, 27-38.	3.0	128
58	Maternal Versus Infant Factors Related to Breast Milk Intake and Residual Milk Volume: The DARLING Study. Pediatrics, 1991, 87, 829-837.	2.1	128
59	The impact of lipid-based nutrient supplement provision to pregnant women on newborn size in rural Malawi: a randomized controlled trial. American Journal of Clinical Nutrition, 2015, 101, 387-397.	4.7	123
60	Lipid-based nutrient supplement increases the birth size of infants of primiparous women in Ghana. American Journal of Clinical Nutrition, 2015, 101, 835-846.	4.7	123
61	Food sources and intake of nâ€6 and nâ€3 fatty acids in lowâ€income countries with emphasis on infants, young children (6â€“24 months), and pregnant and lactating women. Maternal and Child Nutrition, 2011, 7, 124-140.	3.0	120
62	Supplementation of Maternal Diets during Pregnancy and for 6 Months Postpartum and Infant Diets Thereafter with Small-Quantity Lipid-Based Nutrient Supplements Does Not Promote Child Growth by 18 Months of Age in Rural Malawi: A Randomized Controlled Trial. Journal of Nutrition, 2015, 145, 1345-1353.	2.9	119
63	Randomized trial of the short-term effects of dieting compared with dieting plus aerobic exercise on lactation performance. American Journal of Clinical Nutrition, 1999, 69, 959-967.	4.7	114
64	Age of introduction of complementary foods and growth of term, low-birth-weight, breast-fed infants: a randomized intervention study in Honduras. American Journal of Clinical Nutrition, 1999, 69, 679-686.	4.7	114
65	Health effects of breast feeding for mothers: a critical review. Nutrition Research Reviews, 1997, 10, 35-56.	4.1	113
66	Precision, accuracy, and reliability of hemoglobin assessment with use of capillary blood. American Journal of Clinical Nutrition, 1999, 69, 1243-1248.	4.7	113
67	Low Nutrient Intakes among Infants in Rural Bangladesh Are Attributable to Low Intake and Micronutrient Density of Complementary Foods. Journal of Nutrition, 2005, 135, 444-451.	2.9	109
68	Effects of age of introduction of complementary foods on iron status of breast-fed infants in Honduras. American Journal of Clinical Nutrition, 1998, 67, 878-884.	4.7	108
69	Small-quantity, lipid-based nutrient supplements provided to women during pregnancy and 6 mo postpartum and to their infants from 6 mo of age increase the mean attained length of 18-mo-old children in semi-urban Ghana: a randomized controlled trial,. American Journal of Clinical Nutrition, 2016, 104, 797-808.	4.7	106
70	Session 4: Mineral metabolism and body composition Iron status of breast-fed infants. Proceedings of the Nutrition Society, 2007, 66, 412-422.	1.0	105
71	Development and Validation of the Infant Feeding Intentions Scale. Maternal and Child Health Journal, 2009, 13, 334-342.	1.5	102
72	Lipid-based nutrient supplements for pregnant women reduce newborn stunting in a cluster-randomized controlled effectiveness trial in Bangladesh. American Journal of Clinical Nutrition, 2016, 103, 236-249.	4.7	101

#	Article	IF	Citations
73	Bacterial communities found in placental tissues are associated with severe chorioamnionitis and adverse birth outcomes. PLoS ONE, 2017, 12, e0180167.	2.5	97
74	Factors Associated with Perceived Insufficient Milk in a Low-Income Urban Population in Mexico. Journal of Nutrition, 1994, 124, 202-212.	2.9	96
75	Systematic review and metaâ€•analysis of home fortification of complementary foods. Maternal and Child Nutrition, 2009, 5, 283-321.	3.0	96
76	Comfort with the Idea of Formula Feeding Helps Explain Ethnic Disparity in Breastfeeding Intentions Among Expectant First-Time Mothers. Breastfeeding Medicine, 2010, 5, 25-33.	1.7	94
77	Excess Weight Loss in First-Born Breastfed Newborns Relates to Maternal Intrapartum Fluid Balance. Pediatrics, 2011, 127, e171-e179.	2.1	94
78	Babies, soft drinks and snacks: a concern in lowâ€•and middleâ€•income countries?. Maternal and Child Nutrition, 2014, 10, 562-574.	3.0	92
79	Provision of 10â€“40 g/d Lipid-Based Nutrient Supplements from 6 to 18 Months of Age Does Not Prevent Linear Growth Faltering in Malawi. Journal of Nutrition, 2015, 145, 1909-1915.	2.9	80
80	Effect of complementary feeding with lipidâ€•based nutrient supplements and cornâ€“soy blend on the incidence of stunting and linear growth among 6â€•to 18â€•monthâ€•old infants and children in rural <scp>M</scp>alawi. Maternal and Child Nutrition, 2015, 11, 132-143.	3.0	79
81	Lipid-based nutrient supplementation in the first 1000 d improves child growth in Bangladesh: a cluster-randomized effectiveness trial. American Journal of Clinical Nutrition, 2017, 105, 944-957.	4.7	79
82	Acceptability of lipid-based nutrient supplements (LNS) among Ghanaian infants and pregnant or lactating women. Maternal and Child Nutrition, 2011, 7, 344-356.	3.0	77
83	Use of lipidâ€•based nutrient supplements (LNS) to improve the nutrient adequacy of general food distribution rations for vulnerable subâ€•groups in emergency settings. Maternal and Child Nutrition, 2010, 6, 1-69.	3.0	75
84	Prevalence and predictors of iron deficiency in fully breastfed infants at 6 mo of age: comparison of data from 6 studies. American Journal of Clinical Nutrition, 2009, 89, 1433-1440.	4.7	72
85	Anemia, iron deficiency, and iron deficiency anemia in 12â€“36-mo-old children from low-income families. American Journal of Clinical Nutrition, 2005, 82, 1269-1275.	4.7	67
86	Serotonin Transport and Metabolism in the Mammary Gland Modulates Secretory Activation and Involution. Journal of Clinical Endocrinology and Metabolism, 2010, 95, 837-846.	3.6	64
87	Cross-cultural patterns of growth and nutritional status of breast-fed infants. American Journal of Clinical Nutrition, 1998, 67, 10-17.	4.7	60
88	Promoting equity through integrated early child development and nutrition interventions. Annals of the New York Academy of Sciences, 2014, 1308, 1-10.	3.8	60
89	Predictors and pathways of language and motor development in four prospective cohorts of young children in Ghana, Malawi, and Burkina Faso. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2017, 58, 1264-1275.	5.2	60
90	Effects of exercise on plasma lipids and metabolism of lactating women. Medicine and Science in Sports and Exercise, 1995, 27, 22???28.	0.4	59

#	Article	IF	Citations
91	Doula Care, Early Breastfeeding Outcomes, and Breastfeeding Status at 6 Weeks Postpartum Among Low-Income Primiparae. JOGNN - Journal of Obstetric, Gynecologic, and Neonatal Nursing, 2009, 38, 157-173.	0.5	59
92	Effects of Shortâ€Term Caloric Restriction on Lactational Performance of Wellâ€Nourished Women. Acta Paediatrica, International Journal of Paediatrics, 1986, 75, 222-229.	1.5	57
93	Educational Intervention to Modify Bottle-feeding Behaviors among Formula-feeding Mothers in the WIC Program: Impact on Infant Formula Intake and Weight Gain. Journal of Nutrition Education and Behavior, 2008, 40, 244-250.	0.7	55
94	Review of the evidence regarding the use of antenatal multiple micronutrient supplementation in lowâ€• and middleâ€income countries. Annals of the New York Academy of Sciences, 2019, 1444, 6-21.	3.8	55
95	Feeding of Nonbreastfed Children from 6 to 24 Months of Age in Developing Countries. Food and Nutrition Bulletin, 2004, 25, 377-402.	1.4	54
96	Complementary feeding and micronutrient status: a systematic review. American Journal of Clinical Nutrition, 2019, 109, 852S-871S.	4.7	54
97	Maternal, Infant, and Young Child Nutrition: Combining Efforts to Maximize Impacts on Child Growth and Micronutrient Status. Food and Nutrition Bulletin, 2009, 30, S187-S189.	1.4	53
98	Determinants of infant feeding choices among Southeast Asian immigrants in northern California. Journal of the American Dietetic Association, 1994, 94, 282-286.	1.1	51
99	Acceptability of three novel lipid-based nutrient supplements among Malawian infants and their caregivers. Maternal and Child Nutrition, 2011, 7, 368-377.	3.0	51
100	Lipid-based nutrient supplements and all-cause mortality in children 6â€“24 months of age: a meta-analysis of randomized controlled trials. American Journal of Clinical Nutrition, 2020, 111, 207-218.	4.7	51
101	Impact of Breastfeeding on Maternal Nutritional Status. Advances in Experimental Medicine and Biology, 2004, 554, 91-100.	1.6	51
102	Lactation intensity and fasting plasma lipids, lipoproteins, non-esterified free fatty acids, leptin and adiponectin in postpartum women with recent gestational diabetes mellitus: The SWIFT cohort. Metabolism: Clinical and Experimental, 2014, 63, 941-950.	3.4	48
103	Diagnostic Value of Signs and Symptoms of Mammary Candidosis among Lactating Women. Journal of Human Lactation, 2004, 20, 288-295.	1.6	47
104	Lipid-Based Nutrient Supplements: How Can They Combat Child Malnutrition?. PLoS Medicine, 2012, 9, e1001314.	8.4	47
105	Effects of maternal and child lipid-based nutrient supplements on infant development: a randomized trial in Malawi. American Journal of Clinical Nutrition, 2016, 103, 784-793.	4.7	47
106	Complementary feeding and food allergy, atopic dermatitis/eczema, asthma, and allergic rhinitis: a systematic review. American Journal of Clinical Nutrition, 2019, 109, 890S-934S.	4.7	47
107	Inorganic Constituents of Breast Milk from Vegetarian and Nonvegetarian Women: Relationships with Each Other and with Organic Constituents. Journal of Nutrition, 1985, 115, 772-781.	2.9	46
108	Malaria, malnutrition, and birthweight: A meta-analysis using individual participant data. PLoS Medicine, 2017, 14, e1002373.	8.4	46

#	Article	IF	Citations
109	Private fears, global loss: A crossâ€cultural study of the insufficient milk syndrome. Medical Anthropology: Cross Cultural Studies in Health and Illness, 1985, 9, 225-243.	1.2	45
110	Effects of Maternal Caloric Restriction and Exercise during Lactation. Journal of Nutrition, 1998, 128, 386S-389S.	2.9	44
111	Growth of Breastfed Infants. Breastfeeding Medicine, 2009, 4, S-45-S-49.	1.7	42
112	Timing of introduction of complementary foods and beverages and growth, size, and body composition: a systematic review. American Journal of Clinical Nutrition, 2019, 109, 935S-955S.	4.7	42
113	Types and amounts of complementary foods and beverages consumed and growth, size, and body composition: a systematic review. American Journal of Clinical Nutrition, 2019, 109, 956S-977S.	4.7	41
114	Characteristics that modify the effect of small-quantity lipid-based nutrient supplementation on child growth: an individual participant data meta-analysis of randomized controlled trials. American Journal of Clinical Nutrition, 2021, 114, 15S-42S.	4.7	41
115	Zinc supplementation does not affect growth, morbidity, or motor development of US term breastfed infants at 4â€“10 mo of age. American Journal of Clinical Nutrition, 2006, 84, 594-601.	4.7	40
116	Effects of pre- and post-natal lipid-based nutrient supplements on infant development in a randomized trial in Ghana. Early Human Development, 2016, 99, 43-51.	1.8	40
117	Effects of age at introduction of complementary foods to breast-fed infants on duration of lactational amenorrhea in Honduran women. American Journal of Clinical Nutrition, 1997, 65, 1403-1409.	4.7	39
118	Detecting Candida albicans in Human Milk. Journal of Clinical Microbiology, 2003, 41, 475-478.	3.9	39
119	The Infant Feeding Intentions scale demonstrates construct validity and comparability in quantifying maternal breastfeeding intentions across multiple ethnic groups. Maternal and Child Nutrition, 2010, 6, 220-227.	3.0	38
120	Study of Women, Infant feeding, and Type 2 diabetes mellitus after GDM pregnancy (SWIFT), a prospective cohort study: methodology and design. BMC Public Health, 2011, 11, 952.	2.9	38
121	Effects of energy density and feeding frequency of complementary foods on total daily energy intakes and consumption of breast milk by healthy breastfed Bangladeshi children. American Journal of Clinical Nutrition, 2008, 88, 84-94.	4.7	37
122	Effects of lipid-based nutrient supplements and infant and young child feeding counseling with or without improved water, sanitation, and hygiene (WASH) on anemia and micronutrient status: results from 2 cluster-randomized trials in Kenya and Bangladesh. American Journal of Clinical Nutrition, 2019, 109, 148-164.	4.7	37
123	Effects of discontinuing coffee intake on iron status of iron-deficient Guatemalan toddlers: a randomized intervention study. American Journal of Clinical Nutrition, 1997, 66, 168-176.	4.7	35
124	The use of multiple logistic regression to identify risk factors associated with anemia and iron deficiency in a convenience sample of 12â€“36-mo-old children from low-income families. American Journal of Clinical Nutrition, 2008, 87, 614-620.	4.7	35
125	Postâ€partum weight change patterns in the WHO Multicentre Growth Reference Study. Maternal and Child Nutrition, 2011, 7, 228-240.	3.0	35
126	Maternal Supplementation with Small-Quantity Lipid-Based Nutrient Supplements Compared with Multiple Micronutrients, but Not with Iron and Folic Acid, Reduces the Prevalence of Low Gestational Weight Gain in Semi-Urban Ghana: A Randomized Controlled Trial. Journal of Nutrition, 2017, 147, 697-705.	2.9	35

#	Article	IF	Citations
127	Effect of the maternity ward system on the lactation success of low-income urban Mexican women. Early Human Development, 1992, 31, 25-40.	1.8	34
128	Infant weight-for-length is positively associated with subsequent linear growth across four different populations. Maternal and Child Nutrition, 2005, 1, 11-20.	3.0	34
129	Increasing Iron Intake of Children through Complementary Foods. Food and Nutrition Bulletin, 2007, 28, S595-S609.	1.4	34
130	Lipid-based nutrient supplements do not decrease breast milk intake of Malawian infants. American Journal of Clinical Nutrition, 2014, 99, 617-623.	4.7	34
131	Lipid-Based Nutrient Supplements Plus Malaria and Diarrhea Treatment Increase Infant Development Scores in a Cluster-Randomized Trial in Burkina Faso. Journal of Nutrition, 2016, 146, 814-822.	2.9	34
132	Path analyses of risk factors for linear growth faltering in four prospective cohorts of young children in Ghana, Malawi and Burkina Faso. BMJ Global Health, 2019, 4, e001155.	4.7	34
133	Small-quantity lipid-based nutrient supplements for the prevention of child malnutrition and promotion of healthy development: overview of individual participant data meta-analysis and programmatic implications. American Journal of Clinical Nutrition, 2021, 114, 3S-14S.	4.7	34
134	Exclusive Breast-Feeding for 6 Months, with Iron Supplementation, Maintains Adequate Micronutrient Status among Term, Low-Birthweight, Breast-Fed Infants in Honduras. Journal of Nutrition, 2004, 134, 1091-1098.	2.9	33
135	Formulations for Fortified Complementary Foods and Supplements: Review of Successful Products for Improving the Nutritional Status of Infants and Young Children. Food and Nutrition Bulletin, 2009, 30, S239-S255.	1.4	33
136	The Challenges of Promoting Optimal Infant Growth. Journal of Nutrition, 2001, 131, 1879-1880.	2.9	32
