citing authors

#	ARTICLE	IF	CITATIONS
1	Clinical application of a rapid antigen test for the detection of SARS-CoV-2 infection in symptomatic and asymptomatic patients evaluated in the emergency department: A preliminary report.. Journal of Infection, 2021, 82, e14-e16.	1.7	47
2	Direct Oral Anticoagulant Treatment and Mild Traumatic Brain Injury: Risk of Early and Delayed Bleeding and the Severity of Injuries Compared with Vitamin K Antagonists. Journal of Emergency Medicine, 2019, 57, 817-824.	0.3	35
3	Severity of SARS-CoV-2 infection and albumin levels recorded at the first emergency department evaluation: a multicentre retrospective observational study. Emergency Medicine Journal, 2022, 39, 63-69.	0.4	27
4	Errors in nurse-led triage: An observational study. International Journal of Nursing Studies, 2021, 113, 103788.	2.5	21
5	Rapid antigen test to identify COVID-19 infected patients with and without symptoms admitted to the Emergency Department. American Journal of Emergency Medicine, 2022, 51, 92-97.	0.7	21
6	The COVID-19 epidemic and reorganisation of triage, an observational study. Internal and Emergency Medicine, 2020, 15, 1517-1524.	1.0	20
7	Correlation between arterial blood gas and CT volumetry in patients with SARS-CoV-2 in the emergency department. International Journal of Infectious Diseases, 2020, 97, 233-235.	1.5	20
8	The ROX index can be a useful tool for the triage evaluation of COVID-19 patients with dyspnoea. Journal of Advanced Nursing, 2021, 77, 3361-3369.	1.5	15
9	Decision tree analysis to predict the risk of intracranial haemorrhage after mild traumatic brain injury in patients taking DOACs. American Journal of Emergency Medicine, 2021, 50, 388-393.	0.7	13
10	Estimated plasma volume status (ePVS) could be an easy-to-use clinical tool to determine the risk of sepsis or death in patients with fever. Journal of Critical Care, 2020, 58, 106-112.	1.0	12
11	Triage of patients with fever: The Manchester triage system's predictive validity for sepsis or septic shock and seven-day mortality. Journal of Critical Care, 2020, 59, 63-69.	1.0	11
12	Performance of the Manchester Triage System in patients with dyspnoea: A retrospective observational study. International Emergency Nursing, 2020, 53, 100931.	0.6	10
13	Effectiveness of Manchester Triage System in risk prioritisation of patients with pulmonary embolism who present dyspnoea, chest pain or collapse. International Emergency Nursing, 2020, 50, 100842.	0.6	9
14	Thirty-day mortality in atrial fibrillation patients with gastrointestinal bleeding in the emergency department: differences between direct oral anticoagulant and warfarin users. Internal and Emergency Medicine, 2020, 15, 311-318.	1.0	8
15	Risk factors associated with intracranial bleeding and neurosurgery in patients with mild traumatic brain injury who are receiving direct oral anticoagulants. American Journal of Emergency Medicine, 2021, 43, 180-185.	0.7	8
16	Effect of the Emergency Department Assessment of Chest Pain Score on the Triage Performance in Patients With Chest Pain. American Journal of Cardiology, 2021, 161, 12-18.	0.7	7
17	Risk of delayed intracranial haemorrhage after an initial negative CT in patients on DOACs with mild traumatic brain injury. American Journal of Emergency Medicine, 2022, 53, 185-189.	0.7	6
18	Acute abdominal pain in triage: A retrospective observational study of the Manchester triage system's validity. Journal of Clinical Nursing, 2021, 30, 942-951.	1.4	5

#	ARTICLE	IF	CITATIONS
19	The Manchester Triage System's performance in clinical risk prioritisation of patients presenting with headache in emergency department: A retrospective observational study. <i>Journal of Clinical Nursing</i> , 2021, , .	1.4	5
20	Nurse triage accuracy in the evaluation of syncope according to European Society of Cardiology guidelines. <i>European Journal of Cardiovascular Nursing</i> , 2022, 21, 280-286.	0.4	4
21	Triage assessment of transitory loss of consciousness in the emergency departmentâ€”A retrospective observational study. <i>Journal of Advanced Nursing</i> , 2022, 78, 1337-1347.	1.5	4
22	Blood sampling during nurse triage reduces patient length of stay in the emergency department: A propensity score-weighted, population-based study. <i>International Emergency Nursing</i> , 2020, 49, 100826.	0.6	2
23	Use of Soft Cervical Collar among Whiplash Patients in Two Italian Emergency Departments Is Associated with Persistence of Symptoms: A Propensity Score Matching Analysis. <i>Healthcare (Switzerland)</i> , 2021, 9, 1363.	1.0	2
24	Outâ€”ofâ€”hospital versus inâ€”hospital status epilepticus: the role of etiology and comorbidities. <i>European Journal of Neurology</i> , 0, , .	1.7	2
25	Predictors of post-traumatic complication of mild brain injury in anticoagulated patients: DOACs are safer than VKAsâ€”comment. <i>Internal and Emergency Medicine</i> , 2021, 16, 2319-2321.	1.0	1
26	â€”Decision tree analysis for assessing the risk of post-traumatic haemorrhage after mild traumatic brain injury in patients on oral anticoagulant therapyâ€”. <i>BMC Emergency Medicine</i> , 2022, 22, 47.	0.7	1
27	Safety and differences between direct oral anticoagulants and vitamin K antagonists in the risk of post-traumatic intrathoracic bleeding after rib fractures in elderly patients. <i>Emergency Care Journal</i> , 2021, 17, .	0.2	1
28	Patients with mild traumatic brain injury receiving direct oral anticoagulants in Emergency Department: a necessary discussion. <i>American Journal of Emergency Medicine</i> , 2021, 42, 235-236.	0.7	0
29	Emergency department prioritization of transient loss of consciousness due to epileptic seizures. <i>Journal of the Neurological Sciences</i> , 2021, 429, 117688.	0.3	0
30	The state of the art of the management of anticoagulated patients with mild traumatic brain injury in the Emergency Department. <i>Emergency Care Journal</i> , 2022, 18, .	0.2	0
