

# Brendan A Wintle

## List of Publications by Citations

**Source:** <https://exaly.com/author-pdf/4423379/brendan-a-wintle-publications-by-citations.pdf>  
**Version:** 2024-04-09

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.  
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

149 papers	9,411 citations	47 h-index	95 g-index
155 ext. papers	11,285 ext. citations	6.5 avg, IF	6.24 L-index

#	Paper	IF	Citations
149	Predicting species distributions for conservation decisions. <i>Ecology Letters</i> , <b>2013</b> , 16, 1424-35	10	985
148	Zero tolerance ecology: improving ecological inference by modelling the source of zero observations. <i>Ecology Letters</i> , <b>2005</b> , 8, 1235-46	10	590
147	Cross-validation strategies for data with temporal, spatial, hierarchical, or phylogenetic structure. <i>Ecography</i> , <b>2017</b> , 40, 913-929	6.5	566
146	Is my species distribution model fit for purpose? Matching data and models to applications. <i>Global Ecology and Biogeography</i> , <b>2015</b> , 24, 276-292	6.1	460
145	Prioritizing multiple-use landscapes for conservation: methods for large multi-species planning problems. <i>Proceedings of the Royal Society B: Biological Sciences</i> , <b>2005</b> , 272, 1885-91	4.4	367
144	Climate change, connectivity and conservation decision making: back to basics. <i>Journal of Applied Ecology</i> , <b>2009</b> , 46, 964-969	5.8	310
143	Correlative and mechanistic models of species distribution provide congruent forecasts under climate change. <i>Conservation Letters</i> , <b>2010</b> , 3, 203-213	6.9	307
142	Fauna habitat modelling and mapping: A review and case study in the Lower Hunter Central Coast region of NSW. <i>Austral Ecology</i> , <b>2005</b> , 30, 719-738	1.5	209
141	Habitat area, quality and connectivity: striking the balance for efficient conservation. <i>Journal of Applied Ecology</i> , <b>2011</b> , 48, 148-152	5.8	198
140	The Use of Bayesian Model Averaging to Better Represent Uncertainty in Ecological Models. <i>Conservation Biology</i> , <b>2003</b> , 17, 1579-1590	6	192
139	Imperfect detection impacts the performance of species distribution models. <i>Global Ecology and Biogeography</i> , <b>2014</b> , 23, 504-515	6.1	176
138	Global synthesis of conservation studies reveals the importance of small habitat patches for biodiversity. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2019</b> , 116, 909-914	11.5	172
137	A new method for dealing with residual spatial autocorrelation in species distribution models. <i>Ecography</i> , <b>2012</b> , 35, 879-888	6.5	166
136	Plant extinction risk under climate change: are forecast range shifts alone a good indicator of species vulnerability to global warming?. <i>Global Change Biology</i> , <b>2012</b> , 18, 1357-1371	11.4	155
135	Deep-sea diversity patterns are shaped by energy availability. <i>Nature</i> , <b>2016</b> , 533, 393-6	50.4	139
134	Counting the books while the library burns: why conservation monitoring programs need a plan for action. <i>Frontiers in Ecology and the Environment</i> , <b>2013</b> , 11, 549-555	5.5	129
133	When to stop managing or surveying cryptic threatened species. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2008</b> , 105, 13936-40	11.5	127

132	ESTIMATING AND DEALING WITH DETECTABILITY IN OCCUPANCY SURVEYS FOR FOREST OWLS AND ARBOREAL MARSUPIALS. <i>Journal of Wildlife Management</i> , <b>2005</b> , 69, 905-917	1.9	126
131	Taming a Wicked Problem: Resolving Controversies in Biodiversity Offsetting. <i>BioScience</i> , <b>2016</b> , 66, 489-498	3.7	118
130	Ignoring imperfect detection in biological surveys is dangerous: a response to 'fitting and interpreting occupancy models'. <i>PLoS ONE</i> , <b>2014</b> , 9, e99571	3.7	115
129	Allocating monitoring effort in the face of unknown unknowns. <i>Ecology Letters</i> , <b>2010</b> , 13, 1325-37	10	113
128	Some practical suggestions for improving engagement between researchers and policy-makers in natural resource management. <i>Ecological Management and Restoration</i> , <b>2008</b> , 9, 182-186	1.4	111
127	The biodiversity bank cannot be a lending bank. <i>Conservation Letters</i> , <b>2010</b> , 3, 151-158	6.9	109
126	PRECISION AND BIAS OF METHODS FOR ESTIMATING POINT SURVEY DETECTION PROBABILITIES <b>2004</b> , 14, 703-712		108
125	Model averaging in ecology: a review of Bayesian, information-theoretic, and tactical approaches for predictive inference. <i>Ecological Monographs</i> , <b>2018</b> , 88, 485-504	9	105
124	When have we looked hard enough? A novel method for setting minimum survey effort protocols for flora surveys. <i>Austral Ecology</i> , <b>2008</b> , 33, 986-998	1.5	95
123	Integrating biological and social values when prioritizing places for biodiversity conservation. <i>Conservation Biology</i> , <b>2014</b> , 28, 992-1003	6	83
122	Using carbon investment to grow the biodiversity bank. <i>Conservation Biology</i> , <b>2008</b> , 22, 510-3	6	82
121	Modeling species-habitat relationships with spatially autocorrelated observation data <b>2006</b> , 16, 1945-58		81
120	Planning for robust reserve networks using uncertainty analysis. <i>Ecological Modelling</i> , <b>2006</b> , 199, 115-124		80
119	Strategic foresight: how planning for the unpredictable can improve environmental decision-making. <i>Trends in Ecology and Evolution</i> , <b>2014</b> , 29, 531-41	10.9	79
118	Uncertainty analysis favours selection of spatially aggregated reserve networks. <i>Biological Conservation</i> , <b>2006</b> , 129, 427-434	6.2	79
117	Ecological-economic optimization of biodiversity conservation under climate change. <i>Nature Climate Change</i> , <b>2011</b> , 1, 355-359	21.4	77
116	Hotspots of plant invasion predicted by propagule pressure and ecosystem characteristics. <i>Diversity and Distributions</i> , <b>2011</b> , 17, 1099-1110	5	77
115	Active adaptive conservation of threatened species in the face of uncertainty <b>2010</b> , 20, 1476-89		75

114	Utility of Dynamic-Landscape Metapopulation Models for Sustainable Forest Management. <i>Conservation Biology</i> , <b>2005</b> , 19, 1930-1943	6	74
113	Uncertainty analysis for regional-scale reserve selection. <i>Conservation Biology</i> , <b>2006</b> , 20, 1688-97	6	73
112	Forecasting species range dynamics with process-explicit models: matching methods to applications. <i>Ecology Letters</i> , <b>2019</b> , 22, 1940-1956	10	72
111	State-and-transition modelling for Adaptive Management of native woodlands. <i>Biological Conservation</i> , <b>2011</b> , 144, 1224-1236	6.2	70
110	Conservation planning with dynamic threats: The role of spatial design and priority setting for species persistence. <i>Biological Conservation</i> , <b>2010</b> , 143, 756-767	6.2	70
109	Havens for threatened Australian mammals: the contributions of fenced areas and offshore islands to the protection of mammal species susceptible to introduced predators. <i>Wildlife Research</i> , <b>2018</b> , 45, 627	1.8	68
108	The boundary-quality penalty: a quantitative method for approximating species responses to fragmentation in reserve selection. <i>Conservation Biology</i> , <b>2007</b> , 21, 355-64	6	63
107	Hydroperiod is the main driver of the spatial pattern of dominance in mangrove communities. <i>Global Ecology and Biogeography</i> , <b>2013</b> , 22, 806-817	6.1	62
106	Unpacking the mechanisms captured by a correlative species distribution model to improve predictions of climate refugia. <i>Global Change Biology</i> , <b>2016</b> , 22, 2425-39	11.4	62
105	Evaluating 318 continental-scale species distribution models over a 60-year prediction horizon: what factors influence the reliability of predictions?. <i>Global Ecology and Biogeography</i> , <b>2017</b> , 26, 371-384	6.1	57
104	Designing occupancy surveys and interpreting non-detection when observations are imperfect. <i>Diversity and Distributions</i> , <b>2012</b> , 18, 417-424	5	57
103	Diets of sympatric native and introduced carnivores in the Barrington Tops, eastern Australia. <i>Austral Ecology</i> , <b>2011</b> , 36, 290-296	1.5	50
102	A protocol for better design, application, and communication of population viability analyses. <i>Conservation Biology</i> , <b>2013</b> , 27, 644-56	6	47
101	Comment on 'Methods to account for spatial autocorrelation in the analysis of species distributional data: a review' <i>Ecography</i> , <b>2009</b> , 32, 374-378	6.5	47
100	After the Megafires: What Next for Australian Wildlife?. <i>Trends in Ecology and Evolution</i> , <b>2020</b> , 35, 753-757	6.9	46
99	Towards strategic offsetting of biodiversity loss using spatial prioritization concepts and tools: A case study on mining impacts in Australia. <i>Biological Conservation</i> , <b>2015</b> , 192, 513-521	6.2	45
98	Transparent planning for biodiversity and development in the urban fringe. <i>Landscape and Urban Planning</i> , <b>2012</b> , 108, 140-149	7.7	45
97	The threats to Australia's imperilled species and implications for a national conservation response. <i>Pacific Conservation Biology</i> , <b>2019</b> , 25, 231	1.2	45

96	Scenarios and Models to Support Global Conservation Targets. <i>Trends in Ecology and Evolution</i> , <b>2019</b> , 34, 57-68	10.9	45
95	Valid auto-models for spatially autocorrelated occupancy and abundance data. <i>Methods in Ecology and Evolution</i> , <b>2015</b> , 6, 1137-1149	7.7	44
94	A general model of detectability using species traits. <i>Methods in Ecology and Evolution</i> , <b>2013</b> , 4, 45-52	7.7	42
93	Adaptive risk management for certifiably sustainable forestry. <i>Forest Ecology and Management</i> , <b>2008</b> , 256, 1311-1319	3.9	39
92	Alien invaders and reptile traders: what drives the live animal trade in South Africa?. <i>Animal Conservation</i> , <b>2010</b> , 13, 24-32	3.2	36
91	Urban bat communities are affected by wetland size, quality, and pollution levels. <i>Ecology and Evolution</i> , <b>2016</b> , 6, 4761-74	2.8	36
90	How to build an efficient conservation fence. <i>Conservation Biology</i> , <b>2010</b> , 24, 182-8	6	35
89	Incorporating spatial autocorrelation into species distribution models alters forecasts of climate-mediated range shifts. <i>Global Change Biology</i> , <b>2014</b> , 20, 2566-79	11.4	34
88	Dealing with Cumulative Biodiversity Impacts in Strategic Environmental Assessment: A New Frontier for Conservation Planning. <i>Conservation Letters</i> , <b>2017</b> , 10, 195-204	6.9	34
87	Functional responses of insectivorous bats to increasing housing density support land-sparing rather than land-sharing urban growth strategies. <i>Journal of Applied Ecology</i> , <b>2016</b> , 53, 191-201	5.8	33
86	Inferring extinctions from sighting records of variable reliability. <i>Journal of Applied Ecology</i> , <b>2014</b> , 51, 251-258	5.8	30
85	Environment. "True" conservation progress. <i>Science</i> , <b>2009</b> , 323, 43-4	33.3	30
84	Ask not what nature can do for you: A critique of ecosystem services as a communication strategy. <i>Biological Conservation</i> , <b>2018</b> , 224, 71-74	6.2	30
83	Spatial conservation priorities are highly sensitive to choice of biodiversity surrogates and species distribution model type. <i>Ecography</i> , <b>2015</b> , 38, 1101-1111	6.5	29
82	Linking modelling, monitoring and management: an integrated approach to controlling overabundant wildlife. <i>Journal of Applied Ecology</i> , <b>2010</b> , 47, 1169-1178	5.8	29
81	Modelling species responses to extreme weather provides new insights into constraints on range and likely climate change impacts for Australian mammals. <i>Ecography</i> , <b>2018</b> , 41, 308-320	6.5	28
80	Integrating modelling of biodiversity composition and ecosystem function. <i>Oikos</i> , <b>2016</b> , 125, 10-19	4	28
79	Modelling the benefits of habitat restoration in socio-ecological systems. <i>Biological Conservation</i> , <b>2014</b> , 169, 60-67	6.2	27

78	Spending to save: What will it cost to halt Australia's extinction crisis?. <i>Conservation Letters</i> , <b>2019</b> , 12, e12682	6.9	26
77	Incorporating detectability of threatened species into environmental impact assessment. <i>Conservation Biology</i> , <b>2015</b> , 29, 216-25	6	24
76	Uncertain sightings and the extinction of the Ivory-billed Woodpecker. <i>Conservation Biology</i> , <b>2012</b> , 26, 180-4	6	24
75	Improving the Design of a Conservation Reserve for a Critically Endangered Species. <i>PLoS ONE</i> , <b>2017</b> , 12, e0169629	3.7	24
74	Reptiles in restored agricultural landscapes: the value of linear strips, patches and habitat condition. <i>Animal Conservation</i> , <b>2014</b> , 17, 544-554	3.2	23
73	Modelling human impacts on the Tasmanian wedge-tailed eagle ( <i>Aquila audax fleayi</i> ). <i>Biological Conservation</i> , <b>2009</b> , 142, 2438-2448	6.2	23
72	Reconciling uncertain costs and benefits in Bayes nets for invasive species management. <i>Risk Analysis</i> , <b>2010</b> , 30, 277-84	3.9	23
71	What are we measuring? A review of metrics used to describe biodiversity in offsets exchanges. <i>Biological Conservation</i> , <b>2020</b> , 241, 108250	6.2	23
70	Modelling both dominance and species distribution provides a more complete picture of changes to mangrove ecosystems under climate change. <i>Global Change Biology</i> , <b>2015</b> , 21, 3005-20	11.4	22
69	Quantifying variance components in ecological models based on expert opinion. <i>Journal of Applied Ecology</i> , <b>2011</b> , 48, 736-745	5.8	22
68	The sensitivity of population viability analysis to uncertainty about habitat requirements: implications for the management of the endangered southern brown bandicoot. <i>Conservation Biology</i> , <b>2008</b> , 22, 1045-54	6	22
67	Linking cost efficiency evaluation with population viability analysis to prioritize wetland bird conservation actions. <i>Biological Conservation</i> , <b>2011</b> , 144, 2354-2361	6.2	21
66	Use of confidence intervals to demonstrate performance against forest management standards. <i>Forest Ecology and Management</i> , <b>2007</b> , 247, 237-245	3.9	21
65	Revealing beliefs: using ensemble ecosystem modelling to extrapolate expert beliefs to novel ecological scenarios. <i>Methods in Ecology and Evolution</i> , <b>2017</b> , 8, 1012-1021	7.7	20
64	A global synthesis of survival estimates for microbats. <i>Biology Letters</i> , <b>2015</b> , 11,	3.6	19
63	Analysis of Trade-Offs Between Biodiversity, Carbon Farming and Agricultural Development in Northern Australia Reveals the Benefits of Strategic Planning. <i>Conservation Letters</i> , <b>2017</b> , 10, 94-104	6.9	19
62	Australia's mammal fauna requires a strategic and enhanced network of predator-free havens. <i>Nature Ecology and Evolution</i> , <b>2018</b> , 2, 410-411	12.3	18
61	Egg-laying and rainfall synchrony in an endangered bird species: Implications for conservation in a changing climate. <i>Biological Conservation</i> , <b>2013</b> , 161, 1-9	6.2	16

60	Minimizing the cost of keeping options open for conservation in a changing climate. <i>Conservation Biology</i> , <b>2014</b> , 28, 646-53	6	15
59	Using strategic foresight to assess conservation opportunity. <i>Conservation Biology</i> , <b>2014</b> , 28, 1474-83	6	15
58	Extinct or still out there? Disentangling influences on extinction and rediscovery helps to clarify the fate of species on the edge. <i>Global Change Biology</i> , <b>2017</b> , 23, 621-634	11.4	14
57	Metrics of progress in the understanding and management of threats to Australian birds. <i>Conservation Biology</i> , <b>2019</b> , 33, 456-468	6	14
56	Minimizing species extinctions through strategic planning for conservation fencing. <i>Conservation Biology</i> , <b>2017</b> , 31, 1029-1038	6	13
55	A Call for International Leadership and Coordination to Realize the Potential of Conservation Technology. <i>BioScience</i> , <b>2019</b> , 69, 823-832	5.7	13
54	Species partitioning in a temperate mountain chain: Segregation by habitat vs. interspecific competition. <i>Ecology and Evolution</i> , <b>2017</b> , 7, 2685-2696	2.8	12
53	A checklist of attributes for effective monitoring of threatened species and threatened ecosystems. <i>Journal of Environmental Management</i> , <b>2020</b> , 262, 110312	7.9	12
52	Incorporating landscape stochasticity into population viability analysis <b>2007</b> , 17, 317-22		12
51	Occupancy and detectability modelling of vertebrates in northern Australia using multiple sampling methods. <i>PLoS ONE</i> , <b>2018</b> , 13, e0203304	3.7	12
50	Modelling the spatial variation of vital rates: An evaluation of the strengths and weaknesses of correlative species distribution models. <i>Diversity and Distributions</i> , <b>2017</b> , 23, 841-853	5	11
49	An info-gap approach to power and sample size calculations. <i>Environmetrics</i> , <b>2007</b> , 18, 189-203	1.3	11
48	Towards Adaptive Management of Native Vegetation in Regional Landscapes <b>2008</b> , 159-182		11
47	Including indigenous knowledge in species distribution modeling for increased ecological insights. <i>Conservation Biology</i> , <b>2021</b> , 35, 587-597	6	11
46	Characterising uncertainty in generalised dissimilarity models. <i>Methods in Ecology and Evolution</i> , <b>2017</b> , 8, 985-995	7.7	10
45	steps: Software for spatially and temporally explicit population simulations. <i>Methods in Ecology and Evolution</i> , <b>2020</b> , 11, 596-603	7.7	10
44	Cost-effective conservation of an endangered frog under uncertainty. <i>Conservation Biology</i> , <b>2016</b> , 30, 350-61	6	10
43	Climate and Fire Scenario Uncertainty Dominate the Evaluation of Options for Conserving the Great Desert Skink. <i>Conservation Letters</i> , <b>2016</b> , 9, 181-190	6.9	10

42	Open access solutions for biodiversity journals: Do not replace one problem with another. <i>Diversity and Distributions</i> , <b>2019</b> , 25, 5-8	5	10
41	Integrated models to support multiobjective ecological restoration decisions. <i>Conservation Biology</i> , <b>2017</b> , 31, 1418-1427	6	9
40	Incorporating uncertainty of management costs in sensitivity analyses of matrix population models. <i>Conservation Biology</i> , <b>2013</b> , 27, 134-44	6	9
39	Future forests and indicator-species population models. <i>Forestry Chronicle</i> , <b>2007</b> , 83, 36-40	1	9
38	Using decision science to evaluate global biodiversity indices. <i>Conservation Biology</i> , <b>2021</b> , 35, 492-501	6	9
37	Identifying technology solutions to bring conservation into the innovation era. <i>Frontiers in Ecology and the Environment</i> , <b>2019</b> , 17, 591-598	5.5	8
36	A stitch in time: Synergistic impacts to platypus metapopulation extinction risk. <i>Biological Conservation</i> , <b>2020</b> , 242, 108399	6.2	8
35	Continuous predictors of species distributions support categorically stronger inference than ordinal and nominal classes: an example with urban bats. <i>Landscape Ecology</i> , <b>2014</b> , 29, 1237-1248	4.3	8
34	Monitoring, imperfect detection, and risk optimization of a Tasmanian devil insurance population. <i>Conservation Biology</i> , <b>2018</b> , 32, 267-275	6	8
33	Spatially explicit power analysis for detecting occupancy trends for multiple species. <i>Ecological Applications</i> , <b>2019</b> , 29, e01950	4.9	7
32	Efficiently locating conservation boundaries: Searching for the Tasmanian devil facial tumour disease front. <i>Biological Conservation</i> , <b>2009</b> , 142, 1333-1339	6.2	7
31	Threatened species impact assessments: survey effort requirements based on criteria for cumulative impacts. <i>Diversity and Distributions</i> , <b>2015</b> , 21, 620-630	5	6
30	Getting our Act together to improve Indigenous leadership and recognition in biodiversity management. <i>Ecological Management and Restoration</i> , <b>2022</b> , 23, 33-42	1.4	6
29	Systematic planning can rapidly close the protection gap in Australian mammal havens. <i>Conservation Letters</i> , <b>2019</b> , 12, e12611	6.9	5
28	FoxNet: An individual-based model framework to support management of an invasive predator, the red fox. <i>Journal of Applied Ecology</i> , <b>2019</b> , 56, 1460-1470	5.8	5
27	Unexpectedly high densities of feral cats in a rugged temperate forest. <i>Biological Conservation</i> , <b>2019</b> , 239, 108287	6.2	5
26	The use of dynamic landscape metapopulation models for forest management: a case study of the red-backed salamander. <i>Canadian Journal of Forest Research</i> , <b>2012</b> , 42, 1091-1106	1.9	5
25	The scaling of population persistence with carrying capacity does not asymptote in populations of a fish experiencing extreme climate variability. <i>Proceedings of the Royal Society B: Biological Sciences</i> , <b>2017</b> , 284,	4.4	4

24	Impacts of climate change and urban development on the spotted marsh frog ( <i>Limnodynastes tasmaniensis</i> ). <i>Austral Ecology</i> , <b>2013</b> , 38, 11-22	1.5	4
23	Quantifying the impact of vegetation-based metrics on species persistence when choosing offsets for habitat destruction. <i>Conservation Biology</i> , <b>2021</b> , 35, 567-577	6	4
22	Impact Indicators for Biodiversity Conservation Research: Measuring Influence within and beyond Academia. <i>BioScience</i> , <b>2021</b> , 71, 383-395	5.7	4
21	The minimum land area requiring conservation attention to safeguard biodiversity. <i>Science</i> , <b>2022</b> , 376, 1094-1101	33.3	4
20	Adaptive management informs conservation and monitoring of Australia's threatened malleefowl. <i>Biological Conservation</i> , <b>2019</b> , 233, 31-40	6.2	3
19	Choosing ecosystem service investments that are robust to uncertainty across multiple parameters <b>2012</b> , 22, 697-704		3
18	Dynamic Landscape Metapopulation Models and Sustainable Forest Management <b>2009</b> , 473-499		3
17	Developing a two-way learning monitoring program for Mankarr (Greater Bilby) in the Western Desert, Western Australia. <i>Ecological Management and Restoration</i> , <b>2022</b> , 23, 129-138	1.4	3
16	Identifying uncertainties in scenarios and models of socio-ecological systems in support of decision-making. <i>One Earth</i> , <b>2021</b> , 4, 967-985	8.1	3
15	A threatened species index for Australian birds. <i>Conservation Science and Practice</i> , <b>2021</b> , 3, e322	2.2	3
14	Predators, fire or resources: What drives the distribution of herbivores in fragmented mesic forests?. <i>Austral Ecology</i> , <b>2020</b> , 45, 329-339	1.5	2
13	Corrigendum to: The threats to Australia's imperilled species and implications for a national conservation response. <i>Pacific Conservation Biology</i> , <b>2019</b> , 25, 328	1.2	2
12	A fractional land use change model for ecological applications. <i>Environmental Modelling and Software</i> , <b>2022</b> , 147, 105258	5.2	2
11	Design considerations for rapid biodiversity reconnaissance surveys and long-term monitoring to assess the impact of wildfire. <i>Diversity and Distributions</i> ,	5	2
10	Assessing biophysical and socio-economic impacts of climate change on regional avian biodiversity. <i>Scientific Reports</i> , <b>2021</b> , 11, 3304	4.9	2
9	Equilibrium Modeling for Environmental Science: Exploring the Nexus of Economic Systems and Environmental Change. <i>Earth's Future</i> , <b>2021</b> , 9, e2020EF001923	7.9	2
8	The effect of substrate compaction on plant water use and the implications for phytocap design specifications. <i>Ecological Engineering</i> , <b>2019</b> , 127, 195-203	3.9	1
7	Collaborative conservation planning: Quantifying the contribution of expert engagement to identify spatial conservation priorities. <i>Conservation Letters</i> , <b>2019</b> , 12, e12673	6.9	1

6	Integrating species metrics into biodiversity offsetting calculations to improve long-term persistence. <i>Journal of Applied Ecology</i> ,	5.8	1
5	Factors influencing the residency of bettongs using one-way gates to exit a fenced reserve. <i>Austral Ecology</i> , <b>2020</b> , 45, 858	1.5	1
4	Recognizing culturally significant species and Indigenous-led management is key to meeting international biodiversity obligations. <i>Conservation Letters</i> ,	6.9	1
3	Pathways to strategic communication for biodiversity conservation: Response to hearing ourselves (and acting in consequence): A commentary on Bekessy et al. from a bird-handling environmental education perspective <i>Biological Conservation</i> , <b>2019</b> , 233, 330-331	6.2	0
2	Measuring impacts on species with models and metrics of varying ecological and computational complexity. <i>Conservation Biology</i> , <b>2020</b> , 34, 1512-1524	6
