

Carolyn Ohno

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/4447204/carolyn-ohno-publications-by-year.pdf>

Version: 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
10	An integrated analysis of cell-type specific gene expression reveals genes regulated by REVOLUTA and KANADI1 in the Arabidopsis shoot apical meristem. <i>PLoS Genetics</i> , 2020 , 16, e1008661	6	5
9	Auxin Acts through MONOPTEROS to Regulate Plant Cell Polarity and Pattern Phyllotaxis. <i>Current Biology</i> , 2016 , 26, 3202-3208	6.3	74
8	Two-Step Regulation of a Meristematic Cell Population Acting in Shoot Branching in Arabidopsis. <i>PLoS Genetics</i> , 2016 , 12, e1006168	6	58
7	Regulation of MIR165/166 by class II and class III homeodomain leucine zipper proteins establishes leaf polarity. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016 , 113, 11973-11978	11.5	65
6	Alternate wiring of a KNOXI genetic network underlies differences in leaf development of <i>A. thaliana</i> and <i>C. hirsuta</i> . <i>Genes and Development</i> , 2015 , 29, 2391-404	12.6	51
5	Live-imaging of the Arabidopsis inflorescence meristem. <i>Methods in Molecular Biology</i> , 2014 , 1110, 431-404	10.4	14
4	Alignment between PIN1 polarity and microtubule orientation in the shoot apical meristem reveals a tight coupling between morphogenesis and auxin transport. <i>PLoS Biology</i> , 2010 , 8, e1000516	9.7	310
3	Antagonistic regulation of PIN phosphorylation by PP2A and PINOID directs auxin flux. <i>Cell</i> , 2007 , 130, 1044-56	56.2	530
2	Patterns of auxin transport and gene expression during primordium development revealed by live imaging of the Arabidopsis inflorescence meristem. <i>Current Biology</i> , 2005 , 15, 1899-911	6.3	858
1	PIN-FORMED1 polarity in the shoot is insensitive to the polarity of neighbouring cells		1
