1789 citing authors

#	Article	IF	Citations
1	Remembering to remember: prospective memory in children with epilepsy. Child Neuropsychology, 2022, 28, 1-16.	1.3	2
2	Identifying prospective memory deficits in multiple sclerosis: Preliminary evaluation of the criterion and ecological validity of a single item version of the memory for intentions test (MIST). Clinical Neuropsychologist, 2022, , 1-16.	2.3	0
3	Assessing prospective memory in children using the Memory for Intentions Screening Test for Youth (MISTY). Clinical Neuropsychologist, 2021, 35, 643-659.	2.3	2
4	An exploration of prospective memory components and subtasks of the Memory for Intentions Test (MIST). Journal of Clinical and Experimental Neuropsychology, 2020, 42, 274-284.	1.3	5
5	Relationships between drinking quantity and frequency and behavioral and hippocampal BOLD responses during working memory performance involving allocentric spatial navigation in college students. Drug and Alcohol Dependence, 2019, 201, 236-243.	3.2	4
6	Prospective memory intervention using visual imagery in individuals with brain injury. Neuropsychological Rehabilitation, 2019, 29, 289-304.	1.6	20
7	Current Approaches to Cognitive Rehabilitation. , 2019, , 731-748.		O
8	A review of prospective memory in individuals with acquired brain injury. Clinical Neuropsychologist, 2018, 32, 891-921.	2.3	19
9	Relationship between fMRI response during a nonverbal memory task and marijuana use in college students. Drug and Alcohol Dependence, 2018, 188, 71-78.	3.2	7
10	Longitudinal Effects of Alcohol Consumption on the Hippocampus and Parahippocampus in College Students. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2018, 3, 610-617.	1.5	28
11	A comparison of laboratory, clinical, and self-report measures of prospective memory in healthy adults and individuals with brain injury. Journal of Clinical and Experimental Neuropsychology, 2018, 40, 423-436.	1.3	10
12	Prospective memory in clinical populations. Clinical Neuropsychologist, 2018, 32, 741-747.	2.3	9
13	Effects of drinking patterns on prospective memory performance in college students Neuropsychology, 2017, 31, 191-199.	1.3	8
14	Composite impulsivity-related domains in college students. Journal of Psychiatric Research, 2017, 90, 118-125.	3.1	8
15	Heavy Drinking in College Students Is Associated with Accelerated Gray Matter Volumetric Decline over a 2 Year Period. Frontiers in Behavioral Neuroscience, 2017, 11, 176.	2.0	21
16	Longitudinal influence of alcohol and marijuana use on academic performance in college students. PLoS ONE, 2017, 12, e0172213.	2.5	74
17	A Preliminary Prospective Study of an Escalation in †Maximum Daily Drinks', Fronto-Parietal Circuitry and Impulsivity-Related Domains in Young Adult Drinkers. Neuropsychopharmacology, 2016, 41, 1637-1647.	5.4	36
18	Clinical utility and psychometric properties of the World Health Organization Quality of Life—BREF in individuals with traumatic brain injury Rehabilitation Psychology, 2015, 60, 309-310.	1.3	2

#	Article	IF	CITATIONS
19	A longitudinal study of the effects of coping motives, negative affect and drinking level on drinking problems among college students. Anxiety, Stress and Coping, 2014, 27, 527-541.	2.9	22
20	fMRI response during figural memory task performance in college drinkers. Psychopharmacology, 2014, 231, 167-179.	3.1	14
21	Functional magnetic resonance imaging (<scp>fMRI)</scp> response to alcohol pictures predicts subsequent transition to heavy drinking in college students. Addiction, 2014, 109, 585-595.	3.3	83
22	Prospective memory in schizophrenia: Relationship to medication management skills, neurocognition, and symptoms in individuals with schizophrenia Neuropsychology, 2014, 28, 359-365.	1.3	40
23	A person-centered approach to understanding negative reinforcement drinking among first year college students. Addictive Behaviors, 2013, 38, 2937-2944.	3.0	14
24	Influence of Alcohol Use and Family History of Alcoholism on Neural Response to Alcohol Cues in College Drinkers. Alcoholism: Clinical and Experimental Research, 2013, 37, E161-71.	2.4	63
25	Influence of Alcohol Use on Neural Response to Go/No-Go Task in College Drinkers. Neuropsychopharmacology, 2013, 38, 2197-2208.	5.4	85
26	Effect of type of cue, type of response, time delay and two different ongoing tasks on prospective memory functioning after acquired brain injury. Neuropsychological Rehabilitation, 2012, 22, 40-64.	1.6	17
27	A differential deficit in time- versus event-based prospective memory in Parkinson's disease Neuropsychology, 2011, 25, 201-209.	1.3	77
28	Current Approaches to Cognitive Rehabilitation. , 2010, , 505-517.		3
29	Prospective Memory Intervention: A Review and Evaluation of a Pilot Restorative Intervention. Brain		
	Impairment, 2009, 10, 76-86.	0.7	42
30	Impairment, 2009, 10, 76-86. Memory for Intentions Screening Test: Psychometric Properties and Clinical Evidence. Brain Impairment, 2009, 10, 23-33.	0.7	108
30	Impairment, 2009, 10, 76-86. Memory for Intentions Screening Test: Psychometric Properties and Clinical Evidence. Brain		
	Impairment, 2009, 10, 76-86. Memory for Intentions Screening Test: Psychometric Properties and Clinical Evidence. Brain Impairment, 2009, 10, 23-33. The rehabilitation of attention in individuals with mild traumatic brain injury, using the APT-II	0.7	108
31	Impairment, 2009, 10, 76-86. Memory for Intentions Screening Test: Psychometric Properties and Clinical Evidence. Brain Impairment, 2009, 10, 23-33. The rehabilitation of attention in individuals with mild traumatic brain injury, using the APT-II programme. Brain Injury, 2000, 14, 535-548. Neuropsychological Assessment of Individuals with Mild Traumatic Brain Injury. Clinical	0.7	108
31	Impairment, 2009, 10, 76-86. Memory for Intentions Screening Test: Psychometric Properties and Clinical Evidence. Brain Impairment, 2009, 10, 23-33. The rehabilitation of attention in individuals with mild traumatic brain injury, using the APT-II programme. Brain Injury, 2000, 14, 535-548. Neuropsychological Assessment of Individuals with Mild Traumatic Brain Injury. Clinical Neuropsychologist, 1998, 12, 21-30. Lack of sedative and cognitive effects of diphenhydramine and cyclobenzaprine in elderly volunteers.	0.7 1.2 2.3	108 64 44
31 32 33	Impairment, 2009, 10, 76-86. Memory for Intentions Screening Test: Psychometric Properties and Clinical Evidence. Brain Impairment, 2009, 10, 23-33. The rehabilitation of attention in individuals with mild traumatic brain injury, using the APT-II programme. Brain Injury, 2000, 14, 535-548. Neuropsychological Assessment of Individuals with Mild Traumatic Brain Injury. Clinical Neuropsychologist, 1998, 12, 21-30. Lack of sedative and cognitive effects of diphenhydramine and cyclobenzaprine in elderly volunteers. Journal of Psychopharmacology, 1997, 11, 325-329.	0.7 1.2 2.3	108 64 44 8

#	Article	IF	CITATIONS
37	Verbal fluency in individuals with mild traumatic brain injury Neuropsychology, 1996, 10, 416-422.	1.3	62
38	Modality dependent changes in event-related potentials correlate with specific cognitive functions in nondemented patients with Parkinson's disease. Journal of Neural Transmission Parkinson's Disease and Dementia Section, 1995, 9, 197-209.	1.2	33
39	Set-shifting and spatial orientation in patients with Parkinson's disease. Neuropsychology, Development and Cognition Section A: Journal of Clinical and Experimental Neuropsychology, 1992, 14, 801-821.	1.1	36
40	The Impact of Different Approaches to Cognitive Remediation on Generalization. NeuroRehabilitation, 1992, 2, 38-45.	1.3	4
41	Clustering strategies on tasks of verbal fluency in Parkinson's disease. Neuropsychologia, 1992, 30, 95-99.	1.6	131
42	Visuospatial Orientation in Parkinson's Disease. International Journal of Neuroscience, 1990, 51, 9-18.	1.6	39
43	The auditory P300 correlates with specific cognitive deficits in Parkinson's disease. Journal of Neural Transmission Parkinson's Disease and Dementia Section, 1990, 2, 249-264.	1.2	28
44	Neuropsychological aspects of Parkinson's disease. Neuropsychology Review, 1990, 1, 185-221.	4.9	68
45	Effect of inversion on memory for faces in Parkinson's disease and right-hemisphere stroke patients. Journal of Communication Disorders, 1990, 23, 303-323.	1.5	2
