#	Article	IF	CITATIONS
1	Bioremediation of sediments contaminated with polycyclic aromatic hydrocarbons: the technological innovation patented review. International Journal of Environmental Science and Technology, 2022, 19, 5697-5720.	3.5	5
2	Environmental DNA metabarcoding for benthic monitoring: A review of sediment sampling and DNA extraction methods. Science of the Total Environment, 2022, 818, 151783.	8.0	62
3	Local Environmental Conditions Promote High Turnover Diversity of Benthic Deep-Sea Fungi in the Ross Sea (Antarctica). Journal of Fungi (Basel, Switzerland), 2022, 8, 65.	3.5	3
4	Acoustic Detection and Mapping of Submerged Stone Age Sites with Knapped Flint. , 2022, , 901-933.		1
5	Pollutant Pb burden in Mediterranean Centroscymnus coelolepis deep-sea sharks. Marine Pollution Bulletin, 2022, 174, 113245.	5.0	3
6	The Paradox of an Unpolluted Coastal Site Facing a Chronically Contaminated Industrial Area. Frontiers in Marine Science, 2022, 8, .	2.5	6
7	Changes in coral forest microbiomes predict the impact of marine heatwaves on habitat-forming species down to mesophotic depths. Science of the Total Environment, 2022, 823, 153701.	8.0	13
8	Impact of resuspended mine tailings on benthic biodiversity and ecosystem processes: The case study of Portmán Bay, Western Mediterranean Sea, Spain. Environmental Pollution, 2022, 301, 119021.	7.5	3
9	Fungi Can Be More Effective than Bacteria for the Bioremediation of Marine Sediments Highly Contaminated with Heavy Metals. Microorganisms, 2022, 10, 993.	3.6	12
10	Reply to: Ecological variables for deep-ocean monitoring must include microbiota and meiofauna for effective conservation. Nature Ecology and Evolution, 2021, 5, 30-31.	7.8	5
11	Restoration of <i>Cymodocea nodosa</i> seagrass meadows: efficiency and ecological implications. Restoration Ecology, 2021, 29, e13313.	2.9	17
12	Acoustic Mapping of Submerged Stone Age Sites—A HALD Approach. Remote Sensing, 2021, 13, 445.	4.0	9
13	Sensitivity of foraminiferal-based indices to evaluate the ecological quality status of marine coastal benthic systems: A case study of the Gulf of Manfredonia (southern Adriatic Sea). Marine Pollution Bulletin, 2021, 163, 111933.	5.0	12
14	Highly Contaminated Marine Sediments Can Host Rare Bacterial Taxa Potentially Useful for Bioremediation. Frontiers in Microbiology, 2021, 12, 584850.	3.5	33
15	Genome Sequence of an <i>Alkaliphilus</i> Species Isolated from Historically Contaminated Sediments of the Gulf of Naples (Mediterranean Sea). Microbiology Resource Announcements, 2021, 10, .	0.6	0
16	Multiple impacts of microplastics can threaten marine habitat-forming species. Communications Biology, 2021, 4, 431.	4.4	69
17	Diversity, Ecological Role and Biotechnological Potential of Antarctic Marine Fungi. Journal of Fungi (Basel, Świtzerland), 2021, 7, 391.	3.5	20
18	Metagenome-assembled genome (MAG) of <i>Oceancaulis alexandrii</i> NP7 isolated from Mediterranean Sea polluted marine sediments and its bioremediation potential. G3: Genes, Genomes, Genetics, 2021, 11, .	1.8	6

19       Betterlie, Fungt and Microalgoe for the Bioremediation of Marine Scalments Contaminated by       3.6       65         20       In Vitro Evaluation of Antioxidant Potential of the Invasive Seagrass Halophila stipulacea. Marine Direct Scal, 19, 37.       4.6       2         21       Design of Antioxidant Potential of the Invasive Seagrass Halophila stipulacea. Marine Delex, 2020, 112, 103781.       3.2       4.6         22       Metacoan life in anoxic marine sediments, 2020, 89-100.       0       3.6       3.7         23       Effecting al mediated leaching efficiency of valuable mediation of proteophage polymetallic nodules.       6.1       3.6       3.6         24       Assessing the efficiency and ecocustationability of bioremediation strategies for the reclamation of seagrasma mediows over forty years of investigation.       5.6       3.6         26       Multiple declines and recoveries of Advints esegrass meadows over forty years of investigation.       5.0       8.2       10         27       Impact of historical sulfide mine tailings discharge on meiofaunal assemblages (PortmA <sub>1</sub> n Bay,) TJ ETQq11 0.78434g/set T-Vyeneter 2       3.6       3.6       3.6         28       Development of an Eco-Sultainable Solution for the Second Life of Decommetistical Oll and Gas       8.2       10         29       Evolopical assessment of antimopoguic linguage the finite contamination con promote turnover dinersity of berthic prolearybut assemblages: The case <t< th=""><th>#</th><th>Article</th><th>IF</th><th>CITATIONS</th></t<>	#	Article	IF	CITATIONS
20       Drugs, 2021, 13, 37.       4.0       4.8       2         21       Towards a marine strategy for the deep Mediterranean Sea: Analysis of current ecological status.       3.2       40         22       Metazoan life in anoxic marine sediments., 2020, 89-100.       0         23       High fungal-mediated leaching efficiency of valuable metals from deep-sea polymetallic nodules.       6.1       10         24       Assessing the efficiency and consoutainability of bioremediation strategies for the reclamation of highly contaminated marine sediments.
