citing authors

#	ARTICLE	IF	CITATIONS
1	Decline in the alpine landscape aesthetic value in a national park under climate change. <i>Climatic Change</i> , 2022, 170, 1.	1.7	11
2	Sanitation is the greatest concern in outdoor cat management but ecological message frames promote biodiversity conservation in Japan. <i>Environmental Conservation</i> , 2022, 49, 122-129.	0.7	2
3	Using a Choice Experiment to Understand Preferences for Disaster Risk Reduction with Uncertainty: A Case Study in Japan. <i>Sustainability</i> , 2022, 14, 4753.	1.6	4
4	Understanding preferences for pricing policies in Japan's national parks using the best-worst scaling method. <i>Journal for Nature Conservation</i> , 2021, 60, 125954.	0.8	15
5	Price premiums for wildlife-friendly rice: Insights from Japanese retail data. <i>Conservation Science and Practice</i> , 2021, 3, e417.	0.9	4
6	Relational values help explain green infrastructure preferences: The case of managing crane habitat in Hokkaido, Japan. <i>People and Nature</i> , 2021, 3, 861-871.	1.7	8
7	Understanding recreation demands and visitor characteristics of urban green spaces: A use of the zero-inflated negative binomial model. <i>Urban Forestry and Urban Greening</i> , 2021, 65, 127332.	2.3	8
8	Application of the double-bounded dichotomous choice model to the estimation of crowding acceptability in natural recreation areas. <i>Journal of Outdoor Recreation and Tourism</i> , 2020, 32, 100195.	1.3	7
9	Adaptation to climate change and conservation of biodiversity using green infrastructure. <i>River Research and Applications</i> , 2020, 36, 921-933.	0.7	21
10	Understanding services from ecosystem and facilities provided by urban green spaces: A use of partial profile choice experiment. <i>Forest Policy and Economics</i> , 2020, 111, 102086.	1.5	13
11	The value of leisure time of weekends and long holidays: The multiple discrete-continuous extreme value (MDCEV) choice model with triple constraints. <i>Journal of Choice Modelling</i> , 2020, 37, 100238.	1.2	8
12	Understanding residents' perceptions of nature and local economic activities using an open-ended question before protected area designation in Amami Islands, Japan. <i>Journal for Nature Conservation</i> , 2020, 56, 125857.	0.8	7
13	How to Engage Tourists in Invasive Carp Removal: Application of a Discrete Choice Model. <i>Science for Sustainable Societies</i> , 2020, , 31-44.	0.2	3
14	Voluntary Contributions to Hiking Trail Maintenance: Evidence From a Field Experiment in a National Park, Japan. <i>Ecological Economics</i> , 2018, 144, 124-128.	2.9	23
15	Citizens promote the conservation of flagship species more than ecosystem services in wetland restoration. <i>Biological Conservation</i> , 2017, 214, 1-5.	1.9	41
16	Public segmentation based on the risk perception of brown bear attacks and management preferences. <i>European Journal of Wildlife Research</i> , 2016, 62, 203-210.	0.7	6
17	Demand for bear viewing hikes: Implications for balancing visitor satisfaction with safety in protected areas. <i>Journal of Outdoor Recreation and Tourism</i> , 2016, 16, 44-49.	1.3	11
18	Heterogeneous preferences for social trail use in the urban forest: A latent class model. <i>Urban Forestry and Urban Greening</i> , 2016, 19, 20-28.	2.3	19

#	ARTICLE	IF	CITATIONS
19	Why People Visit Zoos: An Empirical Approach Using the Travel Cost Method for the Higashiyama Zoo, Nagoya, Japan. <i>Structure and Function of Mountain Ecosystems in Japan</i> , 2016, , 101-107.	0.1	0
20	How many broadleaved trees are enough in conifer plantations? The economy of land sharing, land sparing and quantitative targets. <i>Journal of Applied Ecology</i> , 2016, 53, 1117-1126.	1.9	9
21	Heterogeneous Preferences for Winter Nature-Based Tours in Sub-Frigid Climate Zones: A Latent Class Approach. <i>Tourism Economics</i> , 2015, 21, 387-407.	2.6	18
22	Reducing the extinction of experience: Association between urban form and recreational use of public greenspace. <i>Landscape and Urban Planning</i> , 2015, 143, 69-75.	3.4	103
23	Preferences for certified forest products in Japan: A case study on interior materials. <i>Forest Policy and Economics</i> , 2014, 43, 1-9.	1.5	20
24	Trade-off between human-wildlife conflict risk and recreation conditions. <i>European Journal of Wildlife Research</i> , 2014, 60, 501-510.	0.7	11
25	Spatial tradeoffs between residents' preferences for brown bear conservation and the mitigation of human-bear conflicts. <i>Biological Conservation</i> , 2014, 176, 126-132.	1.9	23
26	A decision support model for traffic congestion in protected areas: A case study of Shiretoko National Park. <i>Tourism Management Perspectives</i> , 2013, 8, 18-27.	3.2	9
27	Factors Influencing Visitors to Suburban Open Space Areas near a Northern Japanese City. <i>Forests</i> , 2012, 3, 155-165.	0.9	17
28	Combining ecological and recreational aspects in national park management: A choice experiment application. <i>Ecological Economics</i> , 2011, 70, 1231-1239.	2.9	142
29	How many people should be in the urban forest? A comparison of trail preferences of Vienna and Sapporo forest visitor segments. <i>Urban Forestry and Urban Greening</i> , 2010, 9, 215-225.	2.3	66
30	The influence of decision-making rules on individual preferences for ecological restoration: Evidence from an experimental survey. <i>Ecological Economics</i> , 2009, 68, 2426-2431.	2.9	16
31	Estimating economic values of vegetation restoration with choice experiments: a case study of an endangered species in Lake Kasumigaura, Japan. <i>Landscape and Ecological Engineering</i> , 2008, 4, 103-113.	0.7	20
32	Estimating annual visitors flow in Daisetsuzan National Park, Japan: combining self-registration books and infrared trail traffic counters. <i>Journal of Forest Research</i> , 2008, 13, 286-295.	0.7	7
