| #  | ARTICLE                                                                                                                                                                                                            | IF  | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | The ablation of EZH2 uncovers its crucial role in rhabdomyosarcoma formation. <i>Cell Cycle</i> , 2012, 11, 3828-3836.                                                                                             | 2.6 | 47        |
| 2  | Hyaluronan Esters Drive Smad Gene Expression and Signaling Enhancing Cardiogenesis in Mouse Embryonic and Human Mesenchymal Stem Cells. <i>PLoS ONE</i> , 2010, 5, e15151.                                         | 2.5 | 36        |
| 3  | Roles of enhancer of zeste homolog 2: From skeletal muscle differentiation to rhabdomyosarcoma carcinogenesis. <i>Cell Cycle</i> , 2014, 13, 516-527.                                                              | 2.6 | 31        |
| 4  | On the role of retinoblastoma family proteins in the establishment and maintenance of the epigenetic landscape. <i>Journal of Cellular Physiology</i> , 2013, 228, 276-284.                                        | 4.1 | 24        |
| 5  | Targeting Enhancer of Zeste Homolog 2 as a promising strategy for cancer treatment. <i>World Journal of Clinical Oncology</i> , 2016, 7, 135.                                                                      | 2.3 | 23        |
| 6  | Sputum analysis: Non-invasive early lung cancer detection. <i>Journal of Cellular Physiology</i> , 2013, 228, 945-951.                                                                                             | 4.1 | 21        |
| 7  | The role of enhancer of zeste homolog 2: From viral epigenetics to the carcinogenesis of hepatocellular carcinoma. <i>Journal of Cellular Physiology</i> , 2018, 233, 6508-6517.                                   | 4.1 | 19        |
| 8  | Synthesis and Cytotoxicity of Novel Hexahydrothienocycloheptapyridazinone Derivatives. <i>Molecules</i> , 2009, 14, 3494-3508.                                                                                     | 3.8 | 15        |
| 9  | 12-tetradecanoylphorbol-13-acetate and EZH2 inhibition: A novel approach for promoting myogenic differentiation in embryonal rhabdomyosarcoma cells. <i>Journal of Cellular Physiology</i> , 2018, 233, 2360-2365. | 4.1 | 13        |
| 10 | PRC2: an epigenetic multiprotein complex with a key role in the development of rhabdomyosarcoma carcinogenesis. <i>Clinical Epigenetics</i> , 2021, 13, 156.                                                       | 4.1 | 10        |
| 11 | Verteporfin exhibits anti-proliferative activity in embryonal and alveolar rhabdomyosarcoma cell lines. <i>Chemico-Biological Interactions</i> , 2019, 312, 108813.                                                | 4.0 | 9         |
| 12 | Activation and function of murine Cyclin T2A and Cyclin T2B during skeletal muscle differentiation. <i>Journal of Cellular Biochemistry</i> , 2013, 114, 728-734.                                                  | 2.6 | 8         |
| 13 | Role of Enhancer of Zeste Homolog 2 Polycomb Protein and Its Significance in Tumor Progression and Cell Differentiation. , 0, , .                                                                                  |     | 8         |
| 14 | A new parameter of growth inhibition for cell proliferation assays. <i>Journal of Cellular Physiology</i> , 2018, 233, 4106-4115.                                                                                  | 4.1 | 7         |
| 15 | Bromodomain Inhibitor JQ1 Provides Novel Insights and Perspectives in Rhabdomyosarcoma Treatment. <i>International Journal of Molecular Sciences</i> , 2022, 23, 3581.                                             | 4.1 | 4         |
| 16 | Abstract 1072: PIN1 controls cell cycle progression through its interaction with pRb protein. , 2010, , .                                                                                                          |     | 0         |
| 17 | Abstract LB-284: Retinoblastoma tumor suppressor protein phosphorylation and inactivation depend on direct interaction with Pin1. , 2012, , .                                                                      |     | 0         |
