EMELV DE VET

#	Article	IF	CITATIONS
1	Wired for harsh food environments: Human spatial memory favours the effortless location and consumption of high-calorie foods. Food Quality and Preference, 2022, 97, 104478.	2.3	2
2	Health Effects of Increasing Protein Intake Above the Current Population Reference Intake in Older Adults: A Systematic Review of the Health Council of the Netherlands. Advances in Nutrition, 2022, 13, 1083-1117.	2.9	11
3	The effect of personal relative deprivation on food choice: An experimental approach. PLoS ONE, 2022, 17, e0261317.	1.1	2
4	Stakeholder dialogue on dilemmas at work as a workplace health promotion intervention including employees with a low SEP: a Responsive Evaluation. BMC Public Health, 2022, 22, 407.	1.2	2
5	Use and Effect of Embodied Conversational Agents for Improving Eating Behavior and Decreasing Loneliness Among Community-Dwelling Older Adults: Randomized Controlled Trial. JMIR Formative Research, 2022, 6, e33974.	0.7	3
6	Internally regulated eating style: a comprehensive theoretical framework. British Journal of Nutrition, 2021, 126, 138-150.	1.2	8
7	Nudging healthy eating in Dutch sports canteens: a multi-method case study. Public Health Nutrition, 2021, 24, 327-337.	1.1	7
8	Use and Effect of Web-Based Embodied Conversational Agents for Improving Eating Behavior and Decreasing Loneliness Among Community-Dwelling Older Adults: Protocol for a Randomized Controlled Trial. JMIR Research Protocols, 2021, 10, e22186.	0.5	9
9	Caregivers' Role in the Effectiveness of Two Dutch School-Based Nutrition Education Programmes for Children Aged 7–12 Years Old. Nutrients, 2021, 13, 140.	1.7	7
10	The effectiveness of workplace health promotion programs on self-perceived health of employees with a low socioeconomic position: An individual participant data meta-analysis. SSM - Population Health, 2021, 13, 100743.	1.3	11
11	Supporting eating behaviour of community-dwelling older adults: co-design of an embodied conversational agent. Design for Health, 2021, 5, 120-139.	0.4	11
12	Short and Long-Term Innovations on Dietary Behavior Assessment and Coaching: Present Efforts and Vision of the Pride and Prejudice Consortium. International Journal of Environmental Research and Public Health, 2021, 18, 7877.	1.2	3
13	The effect of a brief mindfulness intervention on perception of bodily signals of satiation and hunger. Appetite, 2021, 164, 105280.	1.8	9
14	How physical cues surrounding foods influence snack consumption: The case of covering foods. Food Quality and Preference, 2021, 93, 104260.	2.3	2
15	How the Use of a Patient-Accessible Health Record Contributes to Patient-Centered Care: Scoping Review. Journal of Medical Internet Research, 2021, 23, e17655.	2.1	23
16	Assessing teaching quality in nutrition education: A study of two programs in the Netherlands and Australia. International Journal of Educational Research Open, 2021, 2-2, 100086.	1.0	0
17	How autonomy is understood in discussions on the ethics of nudging. Behavioural Public Policy, 2020, 4, 108-123.	1.6	54
18	Increasing the Proportion of Plant-Based Foods Available to Shift Social Consumption Norms and Food Choice among Non-Vegetarians. Sustainability, 2020, 12, 5371.	1.6	14

#	Article	IF	CITATIONS
19	Education or Provision? A Comparison of Two School-Based Fruit and Vegetable Nutrition Education Programs in the Netherlands. Nutrients, 2020, 12, 3280.	1.7	8
20	Neighbourhood fast food exposure and consumption: the mediating role of neighbourhood social norms. International Journal of Behavioral Nutrition and Physical Activity, 2020, 17, 61.	2.0	27
21	Responsive evaluation of stakeholder dialogue as a worksite health promotion intervention to contribute to the reduction of SEP related health inequalities: a study protocol. BMC Health Services Research, 2020, 20, 196.	0.9	5
22	Development and validation of the Multidimensional Internally Regulated Eating Scale (MIRES). PLoS ONE, 2020, 15, e0239904.	1.1	6
23	Developing Embodied Conversational Agents for Coaching People in a Healthy Lifestyle: Scoping Review. Journal of Medical Internet Research, 2020, 22, e14058.	2.1	73
24	Dealing with Too Little: The Direct Experience of Scarcity does not Affect Snack Intake. Applied Psychology: Health and Well-Being, 2019, 11, 459-483.	1.6	8
25	The One that I Want: Strong personal preferences render the center-stage nudge redundant. Food Quality and Preference, 2019, 78, 103744.	2.3	19
26	Identifying social norms in physical aspects of food environments: A photo study. Appetite, 2019, 143, 104414.	1.8	9
27	Experiences and views of older people on their participation in a nurse-led health promotion intervention: "Community Health Consultation Offices for Seniors― PLoS ONE, 2019, 14, e0216494.	1.1	11
28	Served Portion Sizes Affect Later Food Intake Through Social Consumption Norms. Nutrients, 2019, 11, 2845.	1.7	14
29	The association of self-regulation with weight loss maintenance after an intensive combined lifestyle intervention for children and adolescents with severe obesity. BMC Obesity, 2017, 4, 13.	3.1	7
30	Self-crafting vegetable snacks: testing the IKEA-effect in children. British Food Journal, 2017, 119, 1301-1312.	1.6	10
31	The association of eating styles with weight change after an intensive combined lifestyle intervention for children and adolescents with severe obesity. Appetite, 2016, 99, 82-90.	1.8	18
32	Depletion sensitivity predicts unhealthy snack purchases. Appetite, 2016, 96, 25-31.	1.8	11
33	The potential of peer social norms to shape food intake in adolescents and young adults: a systematic review of effects and moderators. Health Psychology Review, 2016, 10, 326-340.	4.4	93
34	Encouraging vegetable intake as a snack among children: the influence of portion and unit size. Public Health Nutrition, 2015, 18, 2736-2741.	1.1	17
35	Hungry for an intervention? Adolescents' ratings of acceptability of eating-related intervention strategies. BMC Public Health, 2015, 16, 5.	1.2	43
36	Food Culture in the Home Environment: Family Meal Practices and Values Can Support Healthy Eating and Self-Regulation in Young People in Four European Countries. Applied Psychology: Health and Well-Being, 2015, 7, 22-40.	1.6	27

#	Article	IF	CITATIONS
37	Communicating eating-related rules. Suggestions are more effective than restrictions. Appetite, 2015, 86, 45-53.	1.8	27
38	PortionControl@HOME: Results of a Randomized Controlled Trial Evaluating the Effect of a Multi-Component Portion Size Intervention on Portion Control Behavior and Body Mass Index. Annals of Behavioral Medicine, 2015, 49, 18-28.	1.7	37
39	The proof is in the eating: subjective peer norms are associated with adolescents' eating behaviour. Public Health Nutrition, 2015, 18, 1044-1051.	1.1	48
40	The home food environment of overweight gatekeepers in the Netherlands. Public Health Nutrition, 2015, 18, 1815-1823.	1.1	7
41	Social proof in the supermarket: Promoting healthy choices under low self-control conditions. Food Quality and Preference, 2015, 45, 113-120.	2.3	55
42	The habitual nature of unhealthy snacking: How powerful are habits in adolescence?. Appetite, 2015, 95, 182-187.	1.8	31
43	Editorial: Self-Regulation of Eating Behaviour among Adolescents. Applied Psychology: Health and Well-Being, 2015, 7, 1-3.	1.6	2
44	Towards a Behavioral Vaccine: Exposure to Accessible Temptation when Self-Regulation is Endorsed Enhances Future Resistance to Similar Temptations in Children. Applied Psychology: Health and Well-Being, 2015, 7, 63-84.	1.6	9
45	Associations between active video gaming and other energy-balance related behaviours in adolescents: a 24-hour recall diary study. International Journal of Behavioral Nutrition and Physical Activity, 2015, 12, 32.	2.0	9
46	Navigating the obesogenic environment: How psychological sensitivity to the food environment and self-regulatory competence are associated with adolescent unhealthy snacking. Eating Behaviors, 2015, 17, 19-22.	1.1	45
47	It's my party and I eat if I want to. Reasons for unhealthy snacking. Appetite, 2015, 84, 20-27.	1.8	61
48	Replacing Non-Active Video Gaming by Active Video Gaming to Prevent Excessive Weight Gain in Adolescents. PLoS ONE, 2015, 10, e0126023.	1.1	28
49	Assessing self-regulation strategies: development and validation of the tempest self-regulation questionnaire for eating (TESQ-E) in adolescents. International Journal of Behavioral Nutrition and Physical Activity, 2014, 11, 106.	2.0	23
50	¢â,¬Å"When the going gets tough, who keeps going?ââ,¬Â•Depletion sensitivity moderates the ego-depletion effect. Frontiers in Psychology, 2014, 5, 647.	1.1	41
51	Dutch children and parents' views on active and non-active video gaming. Health Promotion International, 2014, 29, 235-243.	0.9	28
52	Active video games as a tool to prevent excessive weight gain in adolescents: rationale, design and methods of a randomized controlled trial. BMC Public Health, 2014, 14, 275.	1.2	17
53	Health on impulse: When low self-control promotes healthy food choices Health Psychology, 2014, 33, 103-109.	1.3	107
54	Identifying the â€~if' for â€~if-then' plans: Combining implementation intentions with cue-monitoring targeting unhealthy snacking behaviour. Psychology and Health, 2014, 29, 1476-1492.	1.2	91

#	Article	IF	CITATIONS
55	Don't tell me what I should do, but what others do: The influence of descriptive and injunctive peer norms on fruit consumption in adolescents. British Journal of Health Psychology, 2014, 19, 52-64.	1.9	172
56	Behavioural strategies to control the amount of food selected and consumed. Appetite, 2014, 72, 156-165.	1.8	28
57	How Norms Work: Selfâ€ldentification, Attitude, and Selfâ€Efficacy Mediate the Relation between Descriptive Social Norms and Vegetable Intake. Applied Psychology: Health and Well-Being, 2014, 6, 230-250.	1.6	49
58	Active and non-active video gaming among Dutch adolescents: Who plays and how much?. Journal of Science and Medicine in Sport, 2014, 17, 597-601.	0.6	24
59	Personal, Social, and Game-Related Correlates of Active and Non-Active Gaming Among Dutch Gaming Adolescents: Survey-Based Multivariable, Multilevel Logistic Regression Analyses. JMIR Serious Games, 2014, 2, e4.	1.7	6
60	At-Home Environment, Out-of-Home Environment, Snacks and Sweetened Beverages Intake in Preadolescence, Early and Mid-Adolescence: The Interplay Between Environment and Self-Regulation. Journal of Youth and Adolescence, 2013, 42, 1873-1883.	1.9	50
61	The role of self-regulating abilities in long-term weight loss in severely obese children and adolescents undergoing intensive combined lifestyle interventions (HELIOS); rationale, design and methods. BMC Pediatrics, 2013, 13, 41.	0.7	13
62	The Development and Evaluation of an Internet-Based Intervention to Increase Awareness About Food Portion Sizes: A Randomized, Controlled Trial. Journal of Nutrition Education and Behavior, 2013, 45, 701-707.	0.3	16
63	Eating by example. Effects of environmental cues on dietary decisions. Appetite, 2013, 70, 1-5.	1.8	87
64	Motivational interviewing within the different stages of change: An analysis of practice nurse-patient consultations aimed at promoting a healthier lifestyle. Social Science and Medicine, 2013, 87, 60-67.	1.8	24
65	Access to excess: how do adolescents deal with unhealthy foods in their environment?. European Journal of Public Health, 2013, 23, 752-756.	0.1	39
66	Ain't no mountain high enough? Setting high weight loss goals predict effort and short-term weight loss. Journal of Health Psychology, 2013, 18, 638-647.	1.3	17
67	Appropriateness standards can help to curb the epidemic of overweight: response to Dewitte and to Herman and Polivy. Health Psychology Review, 2013, 7, 173-176.	4.4	0
68	Less is more: The effect of multiple implementation intentions targeting unhealthy snacking habits. European Journal of Social Psychology, 2013, 43, 344-354.	1.5	45
69	Obesity, overconsumption and self-regulation failure: the unsung role of eating appropriateness standards. Health Psychology Review, 2013, 7, 146-165.	4.4	49
70	Adolescents' Views on Active and Non-Active Videogames: A Focus Group Study. Games for Health Journal, 2012, 1, 211-218.	1.1	24
71	Minority talks: The influence of descriptive social norms on fruit intake. Psychology and Health, 2012, 27, 956-970.	1.2	76
72	Do distant foods decrease intake? The effect of food accessibility on consumption. Psychology and Health, 2012, 27, 59-73.	1.2	79

#	Article	IF	CITATIONS
73	"l should remember I don't want to become fatâ€ı Adolescents' views on selfâ€regulatory strategies fo healthy eating. Journal of Adolescence, 2012, 35, 67-75.	or 1.2	22
74	More or better: Do the number and specificity of implementation intentions matter in increasing physical activity?. Psychology of Sport and Exercise, 2011, 12, 471-477.	1.1	74
75	Anticipated emotions and effort allocation in weight goal striving. British Journal of Health Psychology, 2011, 16, 201-212.	1.9	26
76	Environmental correlates of physical activity and dietary behaviours among young people: a systematic review of reviews. Obesity Reviews, 2011, 12, e130-42.	3.1	228
77	Implementation intentions for buying, carrying, discussing and using condoms: the role of the quality of plans. Health Education Research, 2011, 26, 443-455.	1.0	37
78	Expert views on most suitable monetary incentives on food to stimulate healthy eating. European Journal of Public Health, 2010, 20, 325-331.	0.1	35
79	Should implementation intentions interventions be implemented in obesity prevention: the impact of if-then plans on daily physical activity in Dutch adults. International Journal of Behavioral Nutrition and Physical Activity, 2009, 6, 11.	2.0	52
80	Predictors of Stage Transitions in the Precaution Adoption Process Model. American Journal of Health Promotion, 2008, 22, 282-290.	0.9	19
81	Do the Transtheoretical Processes of Change Predict Transitions in Stages of Change for Fruit Intake?. Health Education and Behavior, 2008, 35, 603-618.	1.3	14
82	Does habit strength moderate the intention–behaviour relationship in the Theory of Planned Behaviour? The case of fruit consumption. Psychology and Health, 2007, 22, 899-916.	1.2	134
83	Testing the transtheoretical model for fruit intake: comparing web-based tailored stage-matched and stage-mismatched feedback. Health Education Research, 2007, 23, 218-227.	1.0	23
84	Implementation intentions and diet. Journal of Psychosomatic Research, 2007, 63, 499-500.	1.2	4
85	The Transtheoretical model for fruit, vegetable and fish consumption: associations between intakes, stages of change and stage transition determinants. International Journal of Behavioral Nutrition and Physical Activity, 2006, 3, 13.	2.0	35
86	Do Implementation Intentions Help to Turn Good Intentions into Higher Fruit Intakes?. Journal of Nutrition Education and Behavior, 2006, 38, 25-29.	0.3	59
87	Predicting Fruit Consumption: Cognitions, Intention, and Habits. Journal of Nutrition Education and Behavior, 2006, 38, 73-81.	0.3	143
88	Comparing stage of change and behavioral intention to understand fruit intake. Health Education Research, 2006, 22, 599-608.	1.0	13
89	Stages of change in fruit intake: A longitudinal examination of stability, stage transitions and transition profiles. Psychology and Health, 2005, 20, 415-428.	1.2	20
90	How stable are stages of change for nutrition behaviors in the Netherlands?. Health Promotion International, 2005, 20, 27-32.	0.9	33

#	Article	IF	CITATIONS
91	Determinants of Forward Stage Transition from Precontemplation and Contemplation for Fruit Consumption. American Journal of Health Promotion, 2005, 19, 278-285.	0.9	35
92	Determinants of forward stage transitions: a Delphi study. Health Education Research, 2004, 20, 195-205.	1.0	121
93	The Effects of Practicing Registration of Organ Donation Preference on Self-Efficacy and Registration Intention: An Enactive Mastery Experience. Psychology and Health, 2003, 18, 585-594.	1.2	21
