#	ARTICLE	IF	CITATIONS
1	The Physical Parameters of Four WC-type Wolf-Rayet Stars in the Large Magellanic Cloud: Evidence of Evolution*. <i>Astrophysical Journal</i> , 2022, 924, 44.	4.5	7
2	Stable nickel production in type Ia supernovae: A smoking gun for the progenitor mass?. <i>Astronomy and Astrophysics</i> , 2022, 660, A96.	5.1	16
3	Modeling the signatures of interaction in Type II supernovae: UV emission, high-velocity features, broad-boxy profiles. <i>Astronomy and Astrophysics</i> , 2022, 660, L9.	5.1	27
4	WO-type Wolf-Rayet Stars: The Last Hurrah of Massive Star Evolution*. <i>Astrophysical Journal</i> , 2022, 931, 157.	4.5	15
5	Eta Carinae: An Evolving View of the Central Binary, Its Interacting Winds and Its Foreground Ejecta. <i>Astrophysical Journal</i> , 2022, 933, 175.	4.5	4
6	BAT99-9 – a WC4 Wolf-Rayet star with nitrogen emission: evidence for binary evolution?. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 503, 2726-2732.	4.4	7
7	Using Shell models to investigate clumping in the wind of the O7Iaf+ supergiant AzV83. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 504, 311-325.	4.4	4
8	Non-local Thermodynamic Equilibrium Radiative Transfer Simulations of Sub-Chandrasekhar-mass White Dwarf Detonations. <i>Astrophysical Journal Letters</i> , 2021, 909, L18.	8.3	43
9	Spectroscopic signatures of the vanishing natural coronagraph of Eta Carinae. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 505, 963-978.	4.4	9
10	The explosion of $9M_{\odot}$ stars as Type II supernovae: Results from radiative-transfer modeling at one year after explosion. <i>Astronomy and Astrophysics</i> , 2021, 652, A64.	5.1	17
11	Multiepoch VLT-FORS spectropolarimetric observations of supernova 2012aw reveal an asymmetric explosion. <i>Astronomy and Astrophysics</i> , 2021, 651, A19.	5.1	10
12	A High-velocity Scatterer Revealed in the Thinning Ejecta of a Type II Supernova. <i>Astrophysical Journal Letters</i> , 2021, 921, L35.	8.3	3
13	Eta Carinae: A Tale of Two Periastron Passages. <i>Astrophysical Journal</i> , 2021, 923, 102.	4.5	4
14	On the changes in the physical properties of the ionized region around the Weigelt structures in η -Carinae over the 5.54-yr spectroscopic cycle. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 495, 2754-2770.	4.4	4
15	Understanding nebular spectra of Type Ia supernovae. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 494, 2221-2235.	4.4	18
16	UV Spectroscopy of Massive Stars. <i>Galaxies</i> , 2020, 8, 60.	3.0	11
17	Radiative-transfer modeling of supernovae in the nebular-phase. <i>Astronomy and Astrophysics</i> , 2020, 643, L13.	5.1	9
18	Photometric and spectroscopic diversity of Type II supernovae. <i>Astronomy and Astrophysics</i> , 2019, 631, A8.	5.1	40

#	ARTICLE	IF	CITATIONS
19	Distinguishing circumstellar from stellar photometric variability in Eta Carinae. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 484, 1325-1346.	4.4	19
20	Solving the $\hat{\text{I}}^3$ -ray radiative transfer equation for supernovae. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 487, 1218-1226.	4.4	6
21	The difficulty of inferring progenitor masses from type-II-Plateau supernova light curves. <i>Astronomy and Astrophysics</i> , 2019, 625, A9.	5.1	33
22	The enigmatic binary system HD 5980. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 486, 725-742.	4.4	9
23	Supernovae from blue supergiant progenitors: What a mess!. <i>Astronomy and Astrophysics</i> , 2019, 622, A70.	5.1	14
24	Mid-infrared evolution of $\hat{\text{I}}$ Carinae from 1968 to 2018. <i>Astronomy and Astrophysics</i> , 2019, 630, L6.	5.1	13
25	BRITE-Constellation reveals evidence for pulsations in the enigmatic binary $\hat{\text{I}}$ Carinae. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018, 475, 5417-5423.	4.4	11
26	Progenitors of low-luminosity Type II-Plateau supernovae. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018, 473, 3863-3881.	4.4	32
27	Ejecta mass diagnostics of Type Ia supernovae. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018, 474, 3187-3211.	4.4	28
28	A Changing Wind Collision ^{âˆ’} . <i>Astrophysical Journal</i> , 2018, 853, 164.	4.5	12
29	The detonation of a sub-Chandrasekhar-mass white dwarf at the origin of the low-luminosity Type Ia supernova 1999by. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018, 474, 3931-3953.	4.4	28
30	Impact of clumping on core-collapse supernova radiation. <i>Astronomy and Astrophysics</i> , 2018, 619, A30.	5.1	25
31	$\hat{\text{I}}$ Carinae's Dusty Homunculus Nebula from Near-infrared to Submillimeter Wavelengths: Mass, Composition, and Evidence for Fading Opacity. <i>Astrophysical Journal</i> , 2017, 842, 79.	4.5	35
32	The Evolution and Physical Parameters of WN3/O3s: A New Type of Wolfâ€™Rayet Star [*] . <i>Astrophysical Journal</i> , 2017, 841, 20.	4.5	27
33	The 2014 X-Ray Minimum of $\hat{\text{I}}$ Carinae as Seen by Swift. <i>Astrophysical Journal</i> , 2017, 838, 45.	4.5	30
34	Explosion of red-supergiant stars: Influence of the atmospheric structure on shock breakout and early-time supernova radiation. <i>Astronomy and Astrophysics</i> , 2017, 605, A83.	5.1	63
35	Evidence for sub-Chandrasekhar-mass progenitors of Type Ia supernovae at the faint end of the widthâ€™luminosity relation. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017, 470, 157-165.	4.4	75
36	A study of the low-luminosity Type II-Plateau supernova 2008bk. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017, 466, 34-48.	4.4	33

#	ARTICLE	IF	CITATIONS
37	The Evolutionary Status of WN3/O3 Wolf-Rayet Stars. Proceedings of the International Astronomical Union, 2016, 12, 176-180.	0.0	0
38	The Massive stellar Population at the Galactic Center. Proceedings of the International Astronomical Union, 2016, 12, 287-291.	0.0	1
39	To γ and beyond! The He α absorption variability across the 2014.6 periastron passage of η Carinae. Monthly Notices of the Royal Astronomical Society, 2016, 461, 2540-2558.	4.4	20
40	The fossil wind structures of Eta Carinae: changes across one 5.54-yr cycle. Monthly Notices of the Royal Astronomical Society, 2016, 462, 3196-3220.	4.4	27
41	Models of interacting supernovae and their spectral diversity. Monthly Notices of the Royal Astronomical Society, 2016, 458, 2094-2121.	4.4	44
42	Measuring nickel masses in Type Ia supernovae using cobalt emission in nebular phase spectra. Monthly Notices of the Royal Astronomical Society, 2015, 454, 3816-3842.	4.4	72
43	A one-dimensional Chandrasekhar-mass delayed-detonation model for the broad-lined Type Ia supernova 2002bo. Monthly Notices of the Royal Astronomical Society, 2015, 448, 2766-2797.	4.4	39
44	THE HD 5980 MULTIPLE SYSTEM: MASSES AND EVOLUTIONARY STATUS. Astronomical Journal, 2014, 148, 62.	4.7	40
45	Type II Plateau supernovae as metallicity probes of the Universe. Monthly Notices of the Royal Astronomical Society, 2014, 440, 1856-1864.	4.4	41
46	Critical ingredients of Type Ia supernova radiative-transfer modelling. Monthly Notices of the Royal Astronomical Society, 2014, 441, 3249-3270.	4.4	51
47	A MODERN SEARCH FOR WOLF-RAYET STARS IN THE MAGELLANIC CLOUDS: FIRST RESULTS. Astrophysical Journal, 2014, 788, 83.	4.5	58
48	[Co III] versus Na I D in Type Ia supernova spectra. Monthly Notices of the Royal Astronomical Society, 2014, 439, 3114-3120.	4.4	25
49	Constraints on the explosion mechanism and progenitors of Type Ia supernovae. Monthly Notices of the Royal Astronomical Society, 2014, 441, 532-550.	4.4	79
50	A New Class of Wolf-Rayet Stars: WN3/O3s. Proceedings of the International Astronomical Union, 2014, 9, 64-69.	0.0	1
51	The Massive Star Population at the Center of the Milky Way. Proceedings of the International Astronomical Union, 2014, 9, 426-430.	0.0	0
52	Unlocking the secrets of supernovae through their light curves, spectra & polarization. High Energy Density Physics, 2013, 9, 297-302.	1.5	3
53	Type II-Plateau supernova radiation: dependences on progenitor and explosion properties. Monthly Notices of the Royal Astronomical Society, 2013, 433, 1745-1763.	4.4	143
54	Radiative properties of pair-instability supernova explosions. Monthly Notices of the Royal Astronomical Society, 2013, 428, 3227-3251.	4.4	104

#	ARTICLE	IF	CITATIONS
55	A BAKE-OFF BETWEEN CMFGEN AND FASTWIND: MODELING THE PHYSICAL PROPERTIES OF SMC AND LMC O-TYPE STARS. <i>Astrophysical Journal</i> , 2013, 768, 6.	4.5	39
56	One-dimensional delayed-detonation models of Type Ia supernovae: confrontation to observations at bolometric maximum. <i>Monthly Notices of the Royal Astronomical Society</i> , 2013, 429, 2127-2142.	4.4	99
57	A COMPANION AS THE CAUSE OF LATITUDE-DEPENDENT EFFECTS IN THE WIND OF ETA CARINAE. <i>Astrophysical Journal Letters</i> , 2012, 759, L2.	8.3	24
58	Non-thermal excitation and ionization in supernovae. <i>Monthly Notices of the Royal Astronomical Society</i> , 2012, 426, 1671-1686.	4.4	35
59	The influence of rotation on optical emission profiles of O stars. <i>Monthly Notices of the Royal Astronomical Society</i> , 2012, 426, 1043-1049.	4.4	22
60	On the influence of the companion star in Eta Carinae: 2D radiative transfer modelling of the ultraviolet and optical spectra.... <i>Monthly Notices of the Royal Astronomical Society</i> , 2012, 423, 1623-1640.	4.4	65
61	Time-dependent radiative transfer calculations for supernovae. <i>Monthly Notices of the Royal Astronomical Society</i> , 2012, 424, 252-271.	4.4	98
62	On the nature of supernovae Ib and Ic. <i>Monthly Notices of the Royal Astronomical Society</i> , 2012, 424, 2139-2159.	4.4	157
63	Modeling Supernova Spectra. <i>Proceedings of the International Astronomical Union</i> , 2011, 7, 251-252.	0.0	0
64	Hot Stars with Winds: The CMFGEN Code. <i>Proceedings of the International Astronomical Union</i> , 2011, 7, 229-234.	0.0	5
65	Combined modelling of the He2-131 planetary nebula and of its central star. <i>Proceedings of the International Astronomical Union</i> , 2011, 7, 306-307.	0.0	0
66	Core-collapse explosions of Wolf-Rayet stars and the connection to Type IIb/IIc supernovae. <i>Monthly Notices of the Royal Astronomical Society</i> , 2011, 414, 2985-3005.	4.4	171
67	Synthetic line and continuum linear-polarization signatures of axisymmetric Type II supernova ejecta. <i>Monthly Notices of the Royal Astronomical Society</i> , 2011, 415, 3497-3519.	4.4	43
68	The atomic physics underlying the spectroscopic analysis of massive stars and supernovae. <i>Astrophysics and Space Science</i> , 2011, 336, 87-93.	1.4	7
69	WIND STRUCTURE AND LUMINOSITY VARIATIONS IN THE WOLF-RAYET/LUMINOUS BLUE VARIABLE HD 5980. <i>Astronomical Journal</i> , 2011, 142, 191.	4.7	26
70	Non-LTE time-dependent spectroscopic modelling of Type II-plateau supernovae from the photospheric to the nebular phase: case study for 15 and 25 M_{\odot} progenitor stars. <i>Monthly Notices of the Royal Astronomical Society</i> , 2010, , no-no.	4.4	35
71	Supernova radiative-transfer modelling: a new approach using non-local thermodynamic equilibrium and full time dependence. <i>Monthly Notices of the Royal Astronomical Society</i> , 2010, , .	4.4	32
72	Detection of high-velocity material from the wind-wind collision zone of Eta Carinae across the 2009.0 periastron passage. <i>Astronomy and Astrophysics</i> , 2010, 517, A9.	5.1	29

#	ARTICLE	IF	CITATIONS
73	A \approx 40 YEAR VARIABILITY CYCLE IN THE LUMINOUS BLUE VARIABLE/WOLF-RAYET BINARY SYSTEM HD 5980?. Astronomical Journal, 2010, 139, 2600-2611.	4.7	31
74	METALLICITY IN THE GALACTIC CENTER: THE QUINTUPLET CLUSTER. Astrophysical Journal, 2009, 691, 1816-1827.	4.5	90
75	SN 1994W: an interacting supernova or two interacting shells?. Monthly Notices of the Royal Astronomical Society, 2009, 394, 21-37.	4.4	105
76	The extended interacting wind structure of Eta Carinae. Monthly Notices of the Royal Astronomical Society, 2009, 396, 1308-1328.	4.4	48
77	Radiation Driven Stellar Winds. , 2009, , .		1
78	A multispectral view of the periodic events in $\hat{\iota}$ Carinae. Monthly Notices of the Royal Astronomical Society, 2008, 386, 2330-2344.	4.4	65
79	Using Quantitative Spectroscopic Analysis to Determine the Properties and Distances of Type II Plateau Supernovae: SN 2005cs and SN 2006bp. Astrophysical Journal, 2008, 675, 644-669.	4.5	118
80	On the Importance of the Interclump Medium for Superionization: O \langle sc \rangle vi \langle sc \rangle Formation in the Wind of $\hat{\iota}$ Puppis. Astrophysical Journal, 2008, 685, L149-L152.	4.5	33
81	Timeâ€dependence Effects in Photosphericâ€Phase Type II Supernova Spectra. , 2007, , .		0
82	Time-dependent Effects in Supernova Spectra. , 2007, , .		0
83	$\hat{\iota}$ Carinae across the 2003.5 Minimum: Spectroscopic Evidence for Massive Binary Interactions. Astrophysical Journal, 2007, 660, 669-686.	4.5	74
84	What Do We Really Know About the Winds of Massive Stars?. Proceedings of the International Astronomical Union, 2007, 3, 89-96.	0.0	1
85	Massive Stars in the Galactic Center. Proceedings of the International Astronomical Union, 2007, 3, 257-264.	0.0	0
86	Near-infrared interferometry of $\hat{\iota}$ Carinae with spectral resolutions of 1 500 and 12 000 using AMBER/VLTI. Astronomy and Astrophysics, 2007, 464, 87-106.	5.1	82
87	Non-LTE model for the wind of the NGC 6543 central star. Proceedings of the International Astronomical Union, 2006, 2, 401.	0.0	1
88	The UV Scattering Halo of the Central Source Associated with $\hat{\iota}$ Carinae. Astrophysical Journal, 2006, 642, 1098-1116.	4.5	84
89	Quantitative spectroscopic analysis of and distance to SN1999em. Astronomy and Astrophysics, 2006, 447, 691-707.	5.1	79
90	On the sensitivity of Heâ€%I singlet lines to the Feâ€%IV model atom in O stars. Astronomy and Astrophysics, 2006, 456, 659-664.	5.1	38

#	ARTICLE	IF	CITATIONS
91	Quantitative spectroscopy of photospheric-phase type II supernovae. <i>Astronomy and Astrophysics</i> , 2005, 437, 667-685.	5.1	115
92	Spectroscopic Effects of Rotation in Extended Stellar Atmospheres. <i>Astronomical Journal</i> , 2005, 129, 454-465.	4.7	48
93	A Change in the Physical State of $\hat{\iota}$ -Carinae?. <i>Astronomical Journal</i> , 2005, 129, 900-906.	4.7	56
94	The sub-arcsecond dusty environment of Eta Carinae. <i>Astronomy and Astrophysics</i> , 2005, 435, 1043-1061.	5.1	50
95	Lower mass loss rates in O-type stars: Spectral signatures of dense clumps in the wind of two Galactic O4 stars. <i>Astronomy and Astrophysics</i> , 2005, 438, 301-316.	5.1	187
96	Distance determinations using type II supernovae and the expanding photosphere method. <i>Astronomy and Astrophysics</i> , 2005, 439, 671-685.	5.1	135
97	Kinematics and Ultraviolet to Infrared Morphology of the Inner Homunculus of $\hat{\iota}$ -Carinae. <i>Astrophysical Journal</i> , 2004, 605, 405-424.	4.5	61
98	Quantitative Spectroscopy of O Stars at Low Metallicity: O Dwarfs in NGC 346. <i>Astrophysical Journal</i> , 2003, 595, 1182-1205.	4.5	224
99	Latitude-dependent Effects in the Stellar Wind of $\hat{\iota}$ -Carinae. <i>Astrophysical Journal</i> , 2003, 586, 432-450.	4.5	160
100	Advances in modeling of Wolf-Rayet stars. Symposium - International Astronomical Union, 2003, 212, 70-79.	0.1	1
101	Spectroscopic studies of OB stars in the Magellanic Clouds with VLT-LIVES. Symposium - International Astronomical Union, 2003, 212, 176-177.	0.1	0
102	Quantitative Analysis of O-Type Stars Properties, at Low Metallicity. Symposium - International Astronomical Union, 2003, 212, 156-157.	0.1	0
103	Direct measurement of the size and shape of the present-day stellar wind of $\hat{\iota}$ -Carinae. <i>Astronomy and Astrophysics</i> , 2003, 410, L37-L40.	5.1	86
104	A Tale of Two Stars: The Extreme O7 Iaf+ Supergiant AV 83 and the OC7.5 III((f)) star AV 69. <i>Astrophysical Journal</i> , 2003, 588, 1039-1063.	4.5	153
105	Stellar and wind properties of LMC WC4 stars. <i>Astronomy and Astrophysics</i> , 2002, 392, 653-669.	5.1	159
106	Revised Stellar Temperatures for Magellanic Cloud O Supergiants from Far Ultraviolet Spectroscopic Explorer and Very Large Telescope UV-Visual Echelle Spectrograph Spectroscopy. <i>Astrophysical Journal</i> , 2002, 579, 774-799.	4.5	159
107	The Shape and Orientation of the Homunculus Nebula Based on Spectroscopic Velocities. <i>Astronomical Journal</i> , 2001, 121, 1569-1577.	4.7	114
