#	ARTICLE	IF	CITATIONS
1	Measuring Listening Effort: Convergent Validity, Sensitivity, and Links With Cognitive and Personality Measures. <i>Journal of Speech, Language, and Hearing Research</i> , 2018, 61, 1463-1486.	1.6	89
2	Individual Differences in Susceptibility to the McGurk Effect: Links With Lipreading and Detecting Audiovisual Incongruity. <i>Journal of Speech, Language, and Hearing Research</i> , 2014, 57, 2322-2331.	1.6	48
3	Conducting spoken word recognition research online: Validation and a new timing method. <i>Behavior Research Methods</i> , 2016, 48, 553-566.	4.0	43
4	What accounts for individual differences in susceptibility to the McGurk effect?. <i>PLoS ONE</i> , 2018, 13, e0207160.	2.5	37
5	Putting the Self in Self-Correction: Findings From the Loss-of-Confidence Project. <i>Perspectives on Psychological Science</i> , 2021, 16, 1255-1269.	9.0	36
6	Many neighborhoods: Phonological and perceptual neighborhood density in lexical production and perception. <i>Journal of Memory and Language</i> , 2016, 89, 162-178.	2.1	32
7	Rapid adaptation to fully intelligible nonnative-accented speech reduces listening effort. <i>Quarterly Journal of Experimental Psychology</i> , 2020, 73, 1431-1443.	1.1	28
8	Understanding Speech amid the Jingle and Jangle: Recommendations for Improving Measurement Practices in Listening Effort Research. <i>Auditory Perception & Cognition</i> , 2020, 3, 169-188.	1.1	19
9	Sizing up the competition: Quantifying the influence of the mental lexicon on auditory and visual spoken word recognition. <i>Journal of the Acoustical Society of America</i> , 2011, 130, 1663-1672.	1.1	16
10	Talking Points: A Modulating Circle Increases Listening Effort Without Improving Speech Recognition in Young Adults. <i>Psychonomic Bulletin and Review</i> , 2020, 27, 536-543.	2.8	13
11	There goes the neighborhood: Lipreading and the structure of the mental lexicon. <i>Speech Communication</i> , 2011, 53, 220-228.	2.8	12
12	Phi-square Lexical Competition Database (Phi-Lex): An online tool for quantifying auditory and visual lexical competition. <i>Behavior Research Methods</i> , 2014, 46, 148-158.	4.0	11
13	About Face: Seeing the Talker Improves Spoken Word Recognition but Increases Listening Effort. <i>Journal of Cognition</i> , 2019, 2, 44.	1.4	11
14	Grammatical context constrains lexical competition in spoken word recognition. <i>Memory and Cognition</i> , 2014, 42, 676-687.	1.6	10
15	Noise increases listening effort in normal-hearing young adults, regardless of working memory capacity. <i>Language, Cognition and Neuroscience</i> , 2019, 34, 628-640.	1.2	10
16	Publishing Open, Reproducible Research With Undergraduates. <i>Frontiers in Psychology</i> , 2019, 10, 564.	2.1	7
17	Talking points: A modulating circle reduces listening effort without improving speech recognition. <i>Psychonomic Bulletin and Review</i> , 2019, 26, 291-297.	2.8	6
18	Keep listening: Grammatical context reduces but does not eliminate activation of unexpected words.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2018, 44, 962-973.	0.9	6

#	ARTICLE	IF	CITATIONS
19	The Danger of Testing by Selecting Controlled Subsets, with Applications to Spoken-Word Recognition. <i>Journal of Cognition</i> , 2019, 2, 2.	1.4	6
20	“Paying” attention to audiovisual speech: Do incongruent stimuli incur greater costs?. <i>Attention, Perception, and Psychophysics</i> , 2019, 81, 1743-1756.	1.3	4
21	Revisiting the target-masker linguistic similarity hypothesis. <i>Attention, Perception, and Psychophysics</i> , 2022, 84, 1772-1787.	1.3	3
22	Recall of Speech is Impaired by Subsequent Masking Noise: A Replication of Rabbitt (1968) Experiment 2. <i>Auditory Perception & Cognition</i> , 2020, 3, 158-167.	1.1	2
23	Speech and non-speech measures of audiovisual integration are not correlated. <i>Attention, Perception, and Psychophysics</i> , 2022, 84, 1809-1819.	1.3	2
24	“Where are the . . . Fixations?” Grammatical number cues guide anticipatory fixations to upcoming referents and reduce lexical competition.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2022, 48, 643-657.	0.9	1
25	Making long-distance relationships work: Quantifying lexical competition with Hidden Markov Models. <i>Journal of Memory and Language</i> , 2016, 90, 88-102.	2.1	0
