#	ARTICLE	IF	CITATIONS
1	Guinea Grass Establishment in South Texas Is Driven by Disturbance History and Savanna Structure. <i>Rangeland Ecology and Management</i> , 2022, 83, 124-132.	2.3	5
2	Targeted Grazing of an Invasive Grass Improves Outcomes for Native Plant Communities and Wildlife Habitat. <i>Rangeland Ecology and Management</i> , 2021, 75, 41-50.	2.3	7
3	The dilemma of Guinea grass ( <i>Megathyrus maximus</i> ): a valued pasture grass and a highly invasive species. <i>Biological Invasions</i> , 2021, 23, 3653-3669.	2.4	18
4	Ungulate Herbivory Is Correlated with High Aspen Suckering Density but Reductions in Aspen Growth Rates and Recruitment. <i>Rangeland Ecology and Management</i> , 2019, 72, 454-460.	2.3	1
5	Human altered disturbance patterns and forest succession: impacts of competition and ungulate herbivory. <i>Oecologia</i> , 2019, 189, 1061-1070.	2.0	13
6	Temporal patterns of ungulate herbivory and phenology of aspen regeneration and defense. <i>Oecologia</i> , 2018, 188, 707-719.	2.0	5
7	Differential effects of cattle, mule deer, and elk herbivory on aspen forest regeneration and recruitment. <i>Forest Ecology and Management</i> , 2018, 422, 273-280.	3.2	17
8	Measures of browse damage and indexes of ungulate abundance to quantify their impacts on aspen forest regeneration. <i>Ecological Indicators</i> , 2018, 89, 648-655.	6.3	16
9	Herbivory impacts of elk, deer and cattle on aspen forest recruitment along gradients of stand composition, topography and climate. <i>Forest Ecology and Management</i> , 2017, 397, 39-47.	3.2	26
10	OUP accepted manuscript. <i>Tree Physiology</i> , 2017, 37, 402-413.	3.1	18
11	Stand Composition, Tree Proximity and Size Have Minimal Effects on Leaf Function of Coexisting Aspen and Subalpine Fir. <i>PLoS ONE</i> , 2016, 11, e0154395.	2.5	4
12	Fire severity alters plant regeneration patterns and defense against herbivores in mixed aspen forests. <i>Oikos</i> , 2014, 123, 1479-1488.	2.7	42
