| #  | Article                                                                                                                                                                                                                          | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Weight of evidence tools in the prediction of acute fish toxicity. Integrated Environmental<br>Assessment and Management, 2023, 19, 1220-1234.                                                                                   | 1.6 | 3         |
| 2  | Unravelling reasons for variability in the OECD 306 marine biodegradation test. Chemosphere, 2022, 300, 134476.                                                                                                                  | 4.2 | 2         |
| 3  | Environmental risk assessment of veterinary medicinal products intended for use in aquaculture in<br>Europe: the need for developing a harmonised approach. Environmental Sciences Europe, 2021, 33, .                           | 2.6 | 8         |
| 4  | Specific toxicity of azithromycin to the freshwater microalga Raphidocelis subcapitata.<br>Ecotoxicology and Environmental Safety, 2021, 222, 112553.                                                                            | 2.9 | 13        |
| 5  | Evaluation of a Bayesian Network for Strengthening the Weight of Evidence to Predict Acute Fish<br>Toxicity from Fish Embryo Toxicity Data. Integrated Environmental Assessment and Management, 2020,<br>16, 452-460.            | 1.6 | 8         |
| 6  | Development of a hybrid Bayesian network model for predicting acute fish toxicity using multiple<br>lines of evidence. Environmental Modelling and Software, 2020, 126, 104655.                                                  | 1.9 | 17        |
| 7  | Use of models for the environmental risk assessment ofÂveterinary medicines in European<br>aquaculture: currentÂsituation and future perspectives. Reviews in Aquaculture, 2019, 11, 969-988.                                    | 4.6 | 16        |
| 8  | Characterization of multiple biomarker responses using flow cytometry to improve environmental<br>hazard assessment with the green microalgae Raphidocelis subcapitata. Science of the Total<br>Environment, 2019, 687, 827-838. | 3.9 | 23        |
| 9  | An ecotoxicological assessment of mine tailings from three Norwegian mines. Chemosphere, 2019, 233, 818-827.                                                                                                                     | 4.2 | 21        |
| 10 | Performance of Threeâ€Dimensional Rainbow Trout ( <i>Oncorhynchus mykiss</i> ) Hepatocyte Spheroids<br>for Evaluating Biotransformation of Pyrene. Environmental Toxicology and Chemistry, 2019, 38,<br>1738-1747.               | 2.2 | 7         |
| 11 | Repeatability and Reproducibility of the RTgill-W1 Cell Line Assay for Predicting Fish Acute Toxicity.<br>Toxicological Sciences, 2019, 169, 353-364.                                                                            | 1.4 | 52        |
| 12 | Risk of sea lice in aquaculture versus the cost of treatment. Integrated Environmental Assessment and Management, 2018, 14, 156-157.                                                                                             | 1.6 | 2         |
| 13 | A call for action: Improve reporting of research studies to increase the scientific basis for regulatory decisionâ€making. Journal of Applied Toxicology, 2018, 38, 783-785.                                                     | 1.4 | 15        |
| 14 | Reducing repetition of regulatory vertebrate ecotoxicology studies. Integrated Environmental<br>Assessment and Management, 2017, 13, 955-957.                                                                                    | 1.6 | 6         |
| 15 | Alternative approaches to vertebrate ecotoxicity tests in the 21st century: A review of developments over the last 2 decades and current status. Environmental Toxicology and Chemistry, 2016, 35, 2637-2646.                    | 2.2 | 92        |
| 16 | Environmental fate and effects of novel quorum sensing inhibitors that can control biofilm formation. Chemosphere, 2016, 164, 52-58.                                                                                             | 4.2 | 10        |
| 17 | A tiered assessment strategy for more effective evaluation of bioaccumulation of chemicals in fish.<br>Regulatory Toxicology and Pharmacology, 2016, 75, 20-26.                                                                  | 1.3 | 19        |
| 18 | Benzoylurea pesticides used as veterinary medicines in aquaculture: Risks and developmental effects on nontarget crustaceans. Environmental Toxicology and Chemistry, 2015, 34, 1533-1542.                                       | 2.2 | 44        |

| #  | Article                                                                                                                                                                                                              | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Assessment of the Direct Effects of Biogenic and Petrogenic Activated Carbon on Benthic Organisms.<br>Environmental Science & Technology, 2015, 49, 3705-3710.                                                       | 4.6 | 13        |
| 20 | Recommendations for the inclusion of targeted testing to improve the regulatory environmental risk assessment of veterinary medicines used in aquaculture. Environment International, 2015, 85, 1-4.                 | 4.8 | 19        |
| 21 | Development of a list of reference chemicals for evaluating alternative methods to in vivo fish bioaccumulation tests. Environmental Toxicology and Chemistry, 2014, 33, 2740-2752.                                  | 2.2 | 4         |
| 22 | Is the transformation/dissolution protocol suitable for ecotoxicity assessments of inorganic substances such as silica fume?. Science of the Total Environment, 2014, 468-469, 358-367.                              | 3.9 | 10        |
| 23 | OECD validation study to assess intra- and inter-laboratory reproducibility of the zebrafish embryo toxicity test for acute aquatic toxicity testing. Regulatory Toxicology and Pharmacology, 2014, 69, 496-511.     | 1.3 | 192       |
| 24 | A European perspective on alternatives to animal testing for environmental hazard identification and risk assessment. Regulatory Toxicology and Pharmacology, 2013, 67, 506-530.                                     | 1.3 | 139       |
| 25 | In Vivo Passive Sampling of Nonpolar Contaminants in Brown Trout ( <i>Salmo trutta</i> ).<br>Environmental Science & Technology, 2013, 47, 11660-11667.                                                              | 4.6 | 26        |
| 26 | Ecotoxicity of paint mixtures: Comparison between measured and calculated toxicity. Science of the Total Environment, 2012, 435-436, 526-540.                                                                        | 3.9 | 13        |
| 27 | Bioconcentration of the intense sweetener sucralose in a multitrophic battery of aquatic organisms.<br>Environmental Toxicology and Chemistry, 2011, 30, 673-681.                                                    | 2.2 | 36        |
| 28 | The fish embryo toxicity test as an animal alternative method in hazard and risk assessment and scientific research. Aquatic Toxicology, 2010, 97, 79-87.                                                            | 1.9 | 320       |
| 29 | Defining the chronic impacts of atenolol on embryo-larval development and reproduction in the fathead minnow (Pimephales promelas). Aquatic Toxicology, 2008, 86, 361-369.                                           | 1.9 | 76        |
| 30 | Animal use replacement, reduction, and refinement: Development of an integrated testing strategy for<br>bioconcentration of chemicals in fish. Integrated Environmental Assessment and Management, 2007, 3,<br>3-17. | 1.6 | 53        |
| 31 | EVALUATION OF THE REPRODUCTIVE EFFECTS OF TAMOXIFEN CITRATE IN PARTIAL AND FULL LIFE-CYCLE<br>STUDIES USING FATHEAD MINNOWS (PIMEPHALES PROMELAS). Environmental Toxicology and Chemistry,<br>2007, 26, 695.         | 2.2 | 42        |
| 32 | Animal use replacement, reduction, and refinement: development of an integrated testing strategy for<br>bioconcentration of chemicals in fish. Integrated Environmental Assessment and Management, 2007, 3,<br>3-17. | 1.6 | 21        |
| 33 | A STRATEGY TO REDUCE THE NUMBERS OF FISH USED IN ACUTE ECOTOXICITY TESTING OF PHARMACEUTICALS. Environmental Toxicology and Chemistry, 2003, 22, 3031.                                                               | 2.2 | 76        |
