#	ARTICLE	IF	CITATIONS
1	Skeletal muscle alterations in patients with acute Covid-19 and post-acute sequelae of Covid-19. <i>Journal of Cachexia, Sarcopenia and Muscle</i> , 2022, 13, 11-22.	7.3	119
2	Adiposity increases weight-bearing exercise-induced dyspnea despite favoring resting lung hyperinflation in COPD. <i>Chronic Respiratory Disease</i> , 2022, 19, 14799731211052305.	2.4	2
3	Patients with Chronic Obstructive Pulmonary Disease Can Accurately Perform Home-Based Measurements of Inspiratory Capacity and Dynamic Hyperinflation. <i>COPD: Journal of Chronic Obstructive Pulmonary Disease</i> , 2022, 19, 236-242.	1.6	0
4	Comprehensive Health Assessment 3 Months After Recovery From Acute Coronavirus Disease 2019 (COVID-19). <i>Clinical Infectious Diseases</i> , 2021, 73, e1089-e1098.	5.8	332
5	Recovery after Covid-19. <i>The Lancet Regional Health - Western Pacific</i> , 2021, 12, 100208.	2.9	5
6	Treatable traits qualifying for nonpharmacological interventions in COPD patients upon first referral to a pulmonologist: the COPD sTRAITosphere. <i>ERJ Open Research</i> , 2020, 6, 00438-2020.	2.6	13
7	Nutritional supplementation during pulmonary rehabilitation in COPD: Do not expect an elixir of life but keep the hunger for more robust evidence. <i>Chronic Respiratory Disease</i> , 2020, 17, 147997312090495.	2.4	0
8	Normal Weight but Low Muscle Mass and Abdominally Obese: Implications for the Cardiometabolic Risk Profile in Chronic Obstructive Pulmonary Disease. <i>Journal of the American Medical Directors Association</i> , 2017, 18, 533-538.	2.5	26
9	The Prevalence of Metabolic Syndrome In Chronic Obstructive Pulmonary Disease: A Systematic Review. <i>COPD: Journal of Chronic Obstructive Pulmonary Disease</i> , 2016, 13, 399-406.	1.6	125
10	Sarcopenia in Advanced COPD Affects Cardiometabolic Risk Reduction by Short-Term High-intensity Pulmonary Rehabilitation. <i>Journal of the American Medical Directors Association</i> , 2016, 17, 814-820.	2.5	28
11	Muscle Quality is More Impaired in Sarcopenic Patients With Chronic Obstructive Pulmonary Disease. <i>Journal of the American Medical Directors Association</i> , 2016, 17, 415-420.	2.5	35
12	A Multidimensional Risk Score to Predict All-Cause Hospitalization in Community-Dwelling Older Individuals With Obstructive Lung Disease. <i>Journal of the American Medical Directors Association</i> , 2016, 17, 508-513.	2.5	9
13	The Muscle Oxidative Regulatory Response to Acute Exercise Is Not Impaired in Less Advanced COPD Despite a Decreased Oxidative Phenotype. <i>PLoS ONE</i> , 2014, 9, e90150.	2.5	11
14	Dietary fibre and fatty acids in chronic obstructive pulmonary disease risk and progression: a systematic review. <i>Respirology</i> , 2014, 19, 176-184.	2.3	39
15	Central Fat and Peripheral Muscle. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2013, 187, 8-13.	5.6	41
16	Loss of quadriceps muscle oxidative phenotype and decreased endurance in patients with mild-to-moderate COPD. <i>Journal of Applied Physiology</i> , 2013, 114, 1319-1328.	2.5	91
17	Characterization of the inflammatory and metabolic profile of adipose tissue in a mouse model of chronic hypoxia. <i>Journal of Applied Physiology</i> , 2013, 114, 1619-1628.	2.5	45
18	The influence of abdominal visceral fat on inflammatory pathways and mortality risk in obstructive lung disease. <i>American Journal of Clinical Nutrition</i> , 2012, 96, 516-526.	4.7	78

#	ARTICLE	IF	CITATIONS
19	Low-grade adipose tissue inflammation in patients with mild-to-moderate chronic obstructive pulmonary disease. <i>American Journal of Clinical Nutrition</i> , 2011, 94, 1504-1512.	4.7	50
20	Is age-related decline in lean mass and physical function accelerated by obstructive lung disease or smoking?. <i>Thorax</i> , 2011, 66, 961-969.	5.6	85
21	Pulmonary Function in Diabetes. <i>Chest</i> , 2010, 138, 393-406.	0.8	188
