#	ARTICLE	IF	CITATIONS
1	The relative contribution of the decreasing trend in tumour thickness to the 2010s increase in net survival from cutaneous malignant melanoma in Italy: a population-based investigation*. British Journal of Dermatology, 2022, 187, 52-63.	1.4	11
2	Mid-term trends and recent birth-cohort-dependent changes in incidence rates of cutaneous malignant melanoma in Italy. International Journal of Cancer, 2021, 148, 835-844.	2.3	13
3	Variation of Cancer Incidence between and within GRELL Countries. International Journal of Environmental Research and Public Health, 2021, 18, 9262.	1.2	3
4	Risk of thyroid as a first or second primary cancer. A population-based study in Italy, 1998-2012. Cancer Medicine, 2021, 10, 6855-6867.	1.3	12
5	Melanoma survival with Classification and Regression Trees Analysis: a complement for the communication of prognosis to patients. Italian Journal of Dermatology and Venereology, 2021, 156, .	0.1	0
6	What has changed in the epidemiology of skin melanoma in central Italy during the past 20 years?. Melanoma Research, 2020, 30, 396-401.	0.6	10
7	Colorectal cancer incidence trends among Italian individuals aged younger than 50 years are decreasing. Cancer, 2020, 126, 453-453.	2.0	0
8	Time trends and age-period-cohort analysis of cutaneous malignant melanoma incidence rates in the Romagna Region (northern Italy), 1986-2014. Melanoma Research, 2020, 30, 198-205.	0.6	6
9	The quality of cancer registries data has to become "liquid". European Journal of Cancer Prevention, 2020, 29, 546-547.	0.6	0
10	T-PEC: a novel test for the elicited production of clitic pronouns in Italian. Preliminary data. Clinical Linguistics and Phonetics, 2020, 35, 1-27.	0.5	2
11	Cancer cure for 32 cancer types: results from the EURO CARE-5 study. International Journal of Epidemiology, 2020, 49, 1517-1525.	0.9	48
12	Management of kidney cancer patients: 2018 guidelines of the Italian Medical Oncology Association (AIOM). Tumori, 2019, 105, 3-12.	0.6	10
13	Prognosis and cure of long-term cancer survivors: A population-based estimation. Cancer Medicine, 2019, 8, 4497-4507.	1.3	24
14	Female breast cancers (T1-2, N0, M0, HR+, HER2~) with an intermediate genetic-based recurrence risk: a real-world estimate in Italy. Tumori, 2019, 105, 483-487.	0.6	1
15	Cancer registries - guardians of breast cancer biomarker information: A systematic review. International Journal of Biological Markers, 2019, 34, 194-199.	0.7	10
16	Cancer incidence and mortality trends from 2003 to 2014 in Italy. Tumori, 2019, 105, 121-137.	0.6	13
17	Evaluation of the agreement between TNM 7th and 8th in a population-based series of cutaneous melanoma. Journal of the European Academy of Dermatology and Venereology, 2019, 33, 521-524.	1.3	7
18	Thick melanoma in Tuscany. Giornale Italiano Di Dermatologia E Venereologia, 2019, 154, 638-645.	0.8	2

#	ARTICLE	IF	CITATIONS
19	Metastatic breast cancers: Estimates for Italy. Tumori, 2018, 104, 116-120.	0.6	6
20	Methods for second primary cancer evaluation have to be standardized. International Journal of Cancer, 2018, 142, 1285-1285.	2.3	1
21	The need for a rapid and comprehensive adoption of the revised European standard population in cancer incidence comparisons. European Journal of Cancer Prevention, 2017, 26, 447-452.	0.6	9
22	Pancreatic cancer incidence rises also in Italy. International Journal of Epidemiology, 2017, 46, 2090-2090.	0.9	4
23	Trends in net survival from breast cancer in six European Latin countries: results from the SUDCAN population-based study. European Journal of Cancer Prevention, 2017, 26, S85-S91.	0.6	9
24	Variability of cancer risk within an area: time to complement the incidence rate. European Journal of Cancer Prevention, 2017, 26, 442-446.	0.6	2
25	Do big numbers assure high-quality of data?. Lancet Haematology, the, 2017, 4, e309.	2.2	2
26	Trends in net survival from 15 cancers in six European Latin countries: the SUDCAN population-based study material. European Journal of Cancer Prevention, 2017, 26, S3-S8.	0.6	3
27	Immigrants and cancer in Italy: a literature review. Annali Dell'Istituto Superiore Di Sanita, 2017, 53, 238-245.	0.2	0
28	Using the Benford's Law as a First Step to Assess the Quality of the Cancer Registry Data. Frontiers in Public Health, 2016, 4, 225.	1.3	11
29	Melanoma survival: sex does matter, but we do not know how. European Journal of Cancer Prevention, 2016, 25, 404-409.	0.6	24
30	The Relationship Between Gastric and Esophageal Cancers in Italy. American Journal of Gastroenterology, 2016, 111, 1201-1202.	0.2	2
31	Thickness and Diameter in Melanoma: Is There a Relation?. Tumori, 2016, 102, e1-e3.	0.6	17
32	How staging of thin melanoma is changed after the introduction of TNM 7th edition: a population-based analysis. Journal of Cancer Research and Clinical Oncology, 2016, 142, 73-76.	1.2	11
33	Are biomarkers evaluated in biopsy specimens predictive of prostate cancer aggressiveness?. Journal of Cancer Research and Clinical Oncology, 2016, 142, 201-212.	1.2	13
34	Differences in Clinicopathological Features and Distribution of Risk Factors in Italian Melanoma Patients. Dermatology, 2015, 230, 256-262.	0.9	6
35	Changes in cervical cancer incidence following the introduction of organized screening in Italy. Preventive Medicine, 2015, 75, 56-63.	1.6	35
36	Melanoma density and relationship with the distribution of melanocytic naevi in an Italian population. Melanoma Research, 2015, 25, 80-87.	0.6	16

#	ARTICLE	IF	CITATIONS
37	Population-based method for investigating adherence to international recommendations for pathology reporting of primary cutaneous melanoma: Results of a EURO CARE-5 high resolution study. <i>Cancer Epidemiology</i> , 2015, 39, 424-429.	0.8	5
38	Survival of patients with skin melanoma in Europe increases further: Results of the EURO CARE-5 study. <i>European Journal of Cancer</i> , 2015, 51, 2179-2190.	1.3	80
39	Participation and Risk of High Grade Cytological Lesions Among Immigrants and Italian-Born Women in an Organized Cervical Cancer Screening Program in Central Italy. <i>Journal of Immigrant and Minority Health</i> , 2015, 17, 670-678.	0.8	13
40	Long-term survival, prevalence, and cure of cancer: a population-based estimation for 818 902 Italian patients and 26 cancer types. <i>Annals of Oncology</i> , 2014, 25, 2251-2260.	0.6	77
41	Management of rectal cancers in relation to treatment guidelines: a population-based study comparing Italian and French patients. <i>Digestive and Liver Disease</i> , 2014, 46, 645-651.	0.4	7
42	Non-segmental vitiligo and psoriasis comorbidity – a case-control study in Italian patients. <i>Journal of the European Academy of Dermatology and Venereology</i> , 2014, 28, 433-437.	1.3	22
43	Cancer incidence in Italian contaminated sites. <i>Annali Dell'Istituto Superiore Di Sanita</i> , 2014, 50, 186-91.	0.2	16
44	Clinical and dermoscopic features of small Reed nevus (<6mm). <i>Journal of the European Academy of Dermatology and Venereology</i> , 2013, 27, 919-921.	1.3	5
45	Cost profiles of colorectal cancer patients in Italy based on individual patterns of care. <i>BMC Cancer</i> , 2013, 13, 329.	1.1	18
46	Impact of diabetes on overall and cancer-specific mortality in colorectal cancer patients. <i>Journal of Cancer Research and Clinical Oncology</i> , 2013, 139, 1303-1310.	1.2	33
47	Trends in colorectal incidence by anatomic subsite from 1985 to 2005: a population-based study. <i>International Journal of Colorectal Disease</i> , 2013, 28, 637-641.	1.0	30
48	Biological characteristics of interval cancers: a role for biomarkers in the breast cancer screening. <i>Journal of Cancer Research and Clinical Oncology</i> , 2013, 139, 181-185.	1.2	37
49	Incidence and mortality trends for four major cancers in the elderly and middle-aged adults: An international comparison. <i>Surgical Oncology</i> , 2013, 22, e31-e38.	0.8	14
50	Consistency and inconsistency in testing biomarkers in breast cancer. A GRELL study in cut-off variability in the Romance language countries. <i>Breast</i> , 2013, 22, 476-481.	0.9	2
51	Invasive breast cancer: a significant correlation between histological types and molecular subgroups. <i>Journal of Cancer Research and Clinical Oncology</i> , 2013, 139, 617-623.	1.2	45
52	Cancer prevalence estimates in Europe at the beginning of 2000. <i>Annals of Oncology</i> , 2013, 24, 1660-1666.	0.6	36
53	Breast cancer survival in the US and Europe: A CONCORD high-resolution study. <i>International Journal of Cancer</i> , 2013, 132, 1170-1181.	2.3	100
54	Testicular cancer in Europe and the USA: survival still rising among older patients. <i>Annals of Oncology</i> , 2013, 24, 508-513.	0.6	53

#	ARTICLE	IF	CITATIONS
55	Initial Treatment for Newly Diagnosed Elderly Colorectal Cancer Patients: Patterns of Care in Italy and the United States. <i>Journal of the National Cancer Institute Monographs</i> , 2013, 2013, 88-98.	0.9	13
56	Indicators of the standard of care for melanoma. <i>Melanoma Research</i> , 2013, 23, 283-289.	0.6	9
57	Excess body weight and increased Breslow thickness in melanoma patients. <i>European Journal of Cancer Prevention</i> , 2013, 22, 480-485.	0.6	9
58	Comparing Cancer Care, Outcomes, and Costs Across Health Systems: Charting the Course. <i>Journal of the National Cancer Institute Monographs</i> , 2013, 2013, 124-130.	0.9	28
59	Cancer prevalence in United States, Nordic Countries, Italy, Australia, and France: an analysis of geographic variability. <i>British Journal of Cancer</i> , 2013, 109, 219-228.	2.9	22
60	Estimates of cancer burden in Tuscany. <i>Tumori</i> , 2013, 99, 334-341.	0.6	1
61	Relationship between Latitude and Melanoma in Italy. <i>ISRN Oncology</i> , 2012, 2012, 1-5.	2.1	10
62	The prognostic impact of the anatomical sites in the "head and neck melanoma"™. <i>Melanoma Research</i> , 2012, 22, 402-405.	0.6	47
63	Features of small melanocytic lesions. <i>Melanoma Research</i> , 2012, 22, 252-256.	0.6	26
64	Changes in the Incidence of Thyroid Cancer Between 1991 and 2005 in Italy: A Geographical Analysis. <i>Thyroid</i> , 2012, 22, 27-34.	2.4	40
65	Feasibility of evaluating quality cancer care using registry data and electronic health records: a population-based study. <i>International Journal for Quality in Health Care</i> , 2012, 24, 411-418.	0.9	28
66	Does an organised screening programme reduce the inequalities in breast cancer survival?. <i>Annals of Oncology</i> , 2012, 23, 319-323.	0.6	31
67	Cancer prevalence in Italy: an analysis of geographic variability. <i>Cancer Causes and Control</i> , 2012, 23, 1497-1510.	0.8	10
68	Ageing and other factors behind recent cancer incidence and mortality trends in Italy. <i>Journal of Geriatric Oncology</i> , 2012, 3, 111-119.	0.5	5
69	Epidemiology of glial and non-glial brain tumours in Europe. <i>European Journal of Cancer</i> , 2012, 48, 1532-1542.	1.3	248
70	Regional inequalities in cancer care persist in Italy and can influence survival. <i>Cancer Epidemiology</i> , 2012, 36, 541-547.	0.8	26
71	A difficult detection can influence survival analysis. <i>Cancer</i> , 2012, 118, 6297-6297.	2.0	0
72	Familial and sporadic melanoma: different clinical and histopathological features in the Italian population " a multicentre epidemiological study " by GIPMe (Italian Multidisciplinary Group on) Tj ETQq0 0 0 igBT /Overlock 10 Tf		

#	ARTICLE	IF	CITATIONS
73	Accuracy of needle biopsy of breast lesions visible on ultrasound: Audit of fine needle versus core needle biopsy in 3233 consecutive samplings with ascertained outcomes. <i>Breast</i> , 2012, 21, 449-454.	0.9	49
74	Balancing harms and benefits of service mammography screening programs: a cohort study. <i>Breast Cancer Research</i> , 2012, 14, R9.	2.2	38
75	ABO blood group and risk of cutaneous malignant melanoma. <i>European Journal of Cancer Prevention</i> , 2011, 20, 121-122.	0.6	15
76	Is the incidence of brain tumors really increasing? A population-based analysis from a cancer registry. <i>Journal of Neuro-Oncology</i> , 2011, 104, 589-594.	1.4	30
77	Female Breast Cancer Status According to ER, PR and HER2 Expression: A Population Based Analysis. <i>Pathology and Oncology Research</i> , 2011, 17, 753-758.	0.9	47
78	Distribution, Incidence, and Prognosis in Neuroendocrine Tumors: a Population Based Study from a Cancer Registry. <i>Pathology and Oncology Research</i> , 2011, 17, 759-763.	0.9	57
79	Is Conventional Urinary Cytology Still Reliable for Diagnosis of Primary Bladder Carcinoma? Accuracy Based on Data Linkage of a Consecutive Clinical Series and Cancer Registry. <i>Acta Cytologica</i> , 2011, 55, 193-196.	0.7	21
80	Incidence of thyroid cancer in Italy, 1991â€“2005: time trends and ageâ€“periodâ€“cohort effects. <i>Annals of Oncology</i> , 2011, 22, 957-963.	0.6	91
81	Polymorphisms of Estrogen Receptors: Risk Factors for Invasive Melanoma â€“ A Prospective Study. <i>Oncology</i> , 2011, 80, 232-237.	0.9	11
82	Harmonization may be counterproductive--at least for parts of Europe where public health research operates effectively. <i>European Journal of Public Health</i> , 2011, 21, 686-687.	0.1	16
83	Does in situ melanoma really come before invasive melanoma? Descriptive epidemiology questions this relationship. <i>Tumori</i> , 2011, 97, 257.	0.6	2
84	Colorectal cancer incidence rates have decreased in central Italy. <i>European Journal of Cancer Prevention</i> , 2010, 19, 424-425.	0.6	13
85	Cancer incidence in people with AIDS in Italy. <i>International Journal of Cancer</i> , 2010, 127, 1437-1445.	2.3	61
86	Disentangling the Roles of Mammographic Screening and HRT in Recent Breast Cancer Incidence Trends in Italy by Analyses Based on Calendar Time and Time Since Screening Activation. <i>Breast Journal</i> , 2010, 16, no-no.	0.4	8
87	Multiple primary melanoma: the impact of atypical naevi and follow up. <i>British Journal of Dermatology</i> , 2010, 163, 1319-1322.	1.4	32
88	Risk of Invasive Cervical Cancer and Cervical Intraepithelial Neoplasia Grade I/II in Central Italy by Area of Birth. <i>Journal of Medical Screening</i> , 2010, 17, 87-90.	1.1	7
89	Prostate Cancer Incidence Rates Have Started to Decrease in Central Italy. <i>Journal of Medical Screening</i> , 2010, 17, 50-51.	1.1	10
90	Contrast-Enhanced Ultrasound: A Filter Role in AJCC Stage I/II Melanoma Patients. <i>Oncology</i> , 2010, 79, 370-375.	0.9	16

#	ARTICLE	IF	CITATIONS
91	Descriptive epidemiology of cholangiocarcinoma in Italy. <i>Digestive and Liver Disease</i> , 2010, 42, 490-495.	0.4	75
92	What reasons lie behind long-term survival differences for gastric cancer within Europe?. <i>European Journal of Cancer</i> , 2010, 46, 1086-1092.	1.3	33
93	Variation in "standard care"™ for breast cancer across Europe: A EUROCARE-3 high resolution study. <i>European Journal of Cancer</i> , 2010, 46, 1528-1536.	1.3	66
94	Up-to-date estimates of breast cancer survival for the years 2000"2004 in 11 European countries: The role of screening and a comparison with data from the United States. <i>European Journal of Cancer</i> , 2010, 46, 3351-3357.	1.3	53
95	The thickness of melanomas has decreased in central Italy, but only for thin melanomas, while thick melanomas are as thick as in the past. <i>Melanoma Research</i> , 2010, 20, 422-426.	0.6	45
96	Italy is one of the European countries with the greatest population observed by cancer registries]. <i>Epidemiologia E Prevenzione</i> , 2010, 34, 82.	1.1	3
97	Strong Seasonality in the Diagnosis of Skin Melanoma in Italy: The Italian Network of Cancer Registries (AIRTUM) Study. <i>Tumori</i> , 2009, 95, 665-668.	0.6	11
98	A method to estimate mortality trends when death certificates are imprecisely coded: An application to cervical cancer in Italy. <i>International Journal of Cancer</i> , 2009, 124, 1200-1205.	2.3	44
99	The EUROCARE-4 database on cancer survival in Europe: Data standardisation, quality control and methods of statistical analysis. <i>European Journal of Cancer</i> , 2009, 45, 909-930.	1.3	120
100	An estimate of overdiagnosis 15 years after the start of mammographic screening in Florence. <i>European Journal of Cancer</i> , 2009, 45, 3166-3171.	1.3	68
101	Coexisting endometrial and ovarian carcinomas: A retrospective clinicopathological study. <i>Pathology Research and Practice</i> , 2008, 204, 643-648.	1.0	22
102	The Use of Commercially Available Personal UV-meters Does Cause Less Safe Tanning Habits: A Randomized-controlled Trial. <i>Photochemistry and Photobiology</i> , 2008, 84, 758-763.	1.3	15
103	Incidence of primary liver cancer in Italy between 1988 and 2002: An age"period" cohort analysis. <i>European Journal of Cancer</i> , 2008, 44, 285-292.	1.3	19
104	Prognostic Variability in Completely Resected pN1 Non-Small-Cell Lung Cancer. <i>Asian Cardiovascular and Thoracic Annals</i> , 2008, 16, 375-380.	0.2	4
105	Survival in Patients With Uveal Melanoma in Europe. <i>JAMA Ophthalmology</i> , 2008, 126, 1413.	2.6	95
106	Clinico-pathological characteristics of familial melanoma in a Mediterranean population. <i>Melanoma Research</i> , 2008, 18, 367-369.	0.6	2
107	The risk of developing a second, different, cancer among 14"560 survivors of malignant cutaneous melanoma: a study by AIRTUM (the Italian Network of Cancer Registries). <i>Melanoma Research</i> , 2008, 18, 230-234.	0.6	25
108	The melanoma epidemic debate: some evidence for a real phenomenon from Tuscany, Italy. <i>Melanoma Research</i> , 2007, 17, 129-130.	0.6	18

#	ARTICLE	IF	CITATIONS
109	Melanoma incidence in central Italy will go on increasing also in the near future: A registry-based, age- <i>period</i> -cohort analysis. <i>European Journal of Cancer Prevention</i> , 2007, 16, 50-54.	0.6	11
110	The cytological screening turned out effective also for adenocarcinoma: a population-based case-control study in Trento, Italy. <i>European Journal of Cancer Prevention</i> , 2007, 16, 564-567.	0.6	11
111	Incidence of Uveal Melanoma in Europe. <i>Ophthalmology</i> , 2007, 114, 2309-2315.e2.	2.5	327
112	Cytopathological diagnosis in a cancer registry. <i>Cancer</i> , 2007, 111, 99-105.	2.0	0
113	Predictors of skin self-examination in subjects attending a pigmented lesion clinic in Italy. <i>Journal of the European Academy of Dermatology and Venereology</i> , 2007, 21, 95-99.	1.3	5
114	Prostate cancer specific mortality in the Florence screening pilot study cohort 1992-1993. <i>European Journal of Cancer</i> , 2006, 42, 1858-1862.	1.3	8
115	Time trends of cancer incidence in European children (1978-1997): Report from the Automated Childhood Cancer Information System project. <i>European Journal of Cancer</i> , 2006, 42, 1961-1971.	1.3	117
116	Baseline factors influencing decisions on digital follow-up of melanocytic lesions in daily practice: An Italian multicenter survey. <i>Journal of the American Academy of Dermatology</i> , 2006, 55, 256-262.	0.6	14
117	Mortality Among Discharged Psychiatric Patients in Florence, Italy. <i>Psychiatric Services</i> , 2006, 57, 1474-1481.	1.1	30
118	Prognostic variables and prognostic groups for malignant melanoma. The information from Cox and Classification And Regression Trees analysis: an Italian population-based study. <i>Melanoma Research</i> , 2006, 16, 429-433.	0.6	14
119	Prognostic variability among nonsmall cell lung cancer patients with pathologic N1 lymph node involvement. <i>Cancer</i> , 2006, 107, 793-798.	2.0	33
120	Seasonal variation in the diagnosis of cutaneous melanoma and non-cutaneous malignancies: an Italian population-based study. <i>Melanoma Research</i> , 2005, 15, 69-72.	0.6	12
121	Classic Kaposi's sarcoma in Italy, 1985-1998. <i>British Journal of Cancer</i> , 2005, 92, 188-193.	2.9	58
122	Re: Role of Detection Method in Predicting Breast Cancer Survival: Analysis of Randomized Screening Trials. <i>Journal of the National Cancer Institute</i> , 2005, 97, 1853-1854.	3.0	4
123	Cutaneous melanoma. <i>Lancet, The</i> , 2005, 365, 2003.	6.3	4
124	Determining overdiagnosis by screening with DRE/TRUS or PSA (Florence pilot studies, 1991-1994). <i>European Journal of Cancer</i> , 2005, 41, 411-415.	1.3	32
125	Early diagnosis, not differential treatment, explains better survival in service screening. <i>European Journal of Cancer</i> , 2005, 41, 2728-2734.	1.3	42
126	Clinical Significance and Optimal Management of Patients with an "Atypia, Probably Benign" (C3) Report at FNAC of the Breast. <i>Breast Journal</i> , 2004, 10, 458-459.	0.4	5

#	ARTICLE	IF	CITATIONS
127	Improvement of malignant/benign ratio in excised melanocytic lesions in the 'dermoscopy era': a retrospective study 1997-2001. <i>British Journal of Dermatology</i> , 2004, 150, 687-692.	1.4	218
128	Increasing trends of cervical adenocarcinoma incidence in Central Italy despite Extensive Screening Programme, 1985-2000. <i>Cancer Detection and Prevention</i> , 2004, 28, 461-464.	2.1	34
129	Addition of dermoscopy to conventional naked-eye examination in melanoma screening: a randomized study. <i>Journal of the American Academy of Dermatology</i> , 2004, 50, 683-689.	0.6	188
130	Frequency and characteristics of melanomas missed at a pigmented lesion clinic: a registry-based study. <i>Melanoma Research</i> , 2004, 14, 403-407.	0.6	45
131	Cancer trends in Italy: figures from the cancer registries (1986-1997). <i>Epidemiologia E Prevenzione</i> , 2004, 28, 1-6.	1.1	48
132	The use of models for estimating overall incidence trend. <i>Epidemiologia E Prevenzione</i> , 2004, 28, 22-6.	1.1	0
133	Palliative home care reduces time spent in hospital wards: a population-based study in the Tuscany Region, Italy. <i>Cancer Causes and Control</i> , 2003, 14, 971-977.	0.8	39
134	Letter to the Editor: Only superficial spreading melanoma is causing the melanoma epidemics?. <i>European Journal of Epidemiology</i> , 2003, 19, 91-92.	2.5	6
135	Expansion of natural killer cells in patients with head and neck cancer: Detection of $\alpha$ -noninhibitory (activating) killer Ig-like receptors on circulating natural killer cells. <i>Head and Neck</i> , 2003, 25, 297-305.	0.9	9
